## SPECIAL ANNOUNCEMENTS

---

---

### ***New Edition of the ERIC Thesaurus***

The 9th Edition of the *Thesaurus of ERIC Descriptors* (a list of key words for indexing documents into the ERIC database and a tool for searching the database) is now available. This edition reflects over 800 changes from the 8th Edition: the addition of terms, the deletion of terms, and other modifications. Its sturdy cloth, reinforced binding is designed to withstand continuous, heavy use.

ORDER FROM: Oryx Press  
2214 North Central at Encanto  
Phoenix, Arizona 85004

PRICE: \$25.00 (if paid with order)  
\$25.00 plus postage costs (if billing necessary)

---

### ***History of ERIC Now Available***

Anyone planning to develop an information storage and retrieval system, or working in the field of information science, will find the new publication *ERIC — The First Fifteen Years, 1964-1979* of special interest and use. How ERIC (Educational Resources Information Center) evolved from a small file of "fugitive" (unpublished) education research reports to the foremost information database in education, acquiring and storing all types of education literature, has been documented in this new publication just off the press.

Written by Dr. Delmer J. Trester, who worked in Central ERIC for over a decade during ERIC's formative years, the publication presents a detailed and candid account of ERIC's development during its first 15 years. It discusses the political realities that helped to shape the system; it describes the budgetary constraints that impacted operation of the system; and it presents the alternative system models which were considered at various times in the face of budget problems.

Copies of *ERIC — The First Fifteen Years* are available at \$7 each (no postage on prepaid orders) from: SMEAC Information Reference Center, College of Education, Ohio State University, 1200 Chambers Road, Columbus, Ohio 43212.

The publication is also available on microfiche in the ERIC database as document ED 195 289, and may be purchased on microfiche for \$0.91 from the ERIC Document Reproduction Service (EDRS), 3030 N. Fairfax Drive, Suite 200, Arlington, Virginia 22201.

## Introduction

**RESOURCES IN EDUCATION (RIE)** —A monthly abstract journal announcing recent report literature related to the field of education, permitting the early identification and acquisition of reports of interest to the educational community.

**Sponsor: Educational Resources Information Center (ERIC)  
National Institute of Education (NIE)  
U.S. Department of Education  
Washington, D.C. 20208**

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 Clearinghouses located at universities or with professional organizations across the country. These Clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The Clearinghouses are listed on the inside back cover.

**Organization of Journal:** *Resources in Education* is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with the prefix ED (ERIC Document). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

**Availability of Documents:** The documents cited in *Resources in Education*, except as noted, are available from the ERIC Document Reproduction Service (EDRS), in both microfiche (MF) and paper copy (PC), or microfiche only. Availability in microfiche only may be determined by the source, for proprietary or copyright reasons, or by ERIC for reasons related to legibility and reproducibility. The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for documents, microfiche, and subscriptions to microfiche collections is to be found in the section entitled "How to Order ERIC Documents" in the most recent issue of RIE.

**How to Submit Documents to ERIC:** If you have documents that you would like to have considered for announcement in *Resources in Education* (RIE), you should send clean, legible copies (in duplicate, if possible) to the ERIC Processing and Reference Facility, 4833 Rugby Avenue, Bethesda, MD 20814. A reproduction release, giving ERIC permission to reproduce in paper copy and microfiche (or microfiche only), and signed by the author or official representative of the source institution, is requested for all documents selected for inclusion in RIE. Standard reproduction release forms may be obtained from the ERIC Facility (a sample appears at the back of this issue of RIE).

**How To Order RIE:** The U.S. Government Printing Office (GPO) prints *RIE* and functions as subscription agent. Detailed subscription information appears on the title page and on the page in the back of *RIE* entitled "How to Order **RESOURCES IN EDUCATION.**"

# HIGHLIGHTS Of Special Interest

## ERIC Clearinghouse Publications

This page highlights publications announced in this issue of *Resources in Education* which were created by the ERIC clearinghouses and selected as having special significance for educators. For each brief citation appearing here, there is a full abstract appearing under the same ED number in the pages of the issue.

In addition to collecting the literature of education for announcement in *Resources in Education* and *Current Index to Journals in Education*, the ERIC clearinghouses analyze and synthesize the literature in a number of different formats designed to compress the vast amount of information available and to meet the varying needs of ERIC users. These formats include research reviews, state-of-the-art studies, interpretive studies on topics of high current interest, research briefs, annotated bibliographies, and compilations. While some publications are comprehensive reviews designed for those who are interested in pursuing a subject in depth, others are brief analyses designed for the busy practitioner whose time is limited for staying abreast of new developments in education.

ERIC publications are published either by the ERIC clearinghouses responsible for producing them or through cooperative arrangements with other organizations. Copies are usually available directly from the responsible clearinghouse or from the source listed in the citation. In addition, the publications are announced in *Resources in Education*, are contained in all ERIC microfiche collections, and are available in microfiche or paper copy from the ERIC Document Reproduction Service (EDRS), P.O. Box 190, Arlington, Virginia 22210. Special collections of clearinghouse publications are also available on microfiche from EDRS, as follows:

1975-77	(574 documents).....	\$114.00 (includes postage)
1978	(211 documents) .....	\$ 40.95 (includes postage)
1979	(159 documents) .....	\$ 29.15 (includes postage)
1980	(176 documents).....	\$ 36.80 (includes postage)

ning, Careers, \*Demand Occupations, \*Employ-  
ment Opportunities, Females, Labor Force, Labor  
Market, \*Manpower Needs, Occupational Aspira-  
tion, Occupational Guidance, Occupations, Voca-  
tional Counseling, \*Working Women

Identifiers—Consortium of States, \*National Occupa-  
tional Competency Testing Institute, Illinois

Women's opportunities for employment will be di-  
rectly related to their level of skill and experience but  
also to the labor market demands through the remain-  
der of the decade. The number of workers needed for  
all major occupational categories is expected to in-  
crease by about one-fifth between 1970 and 1980, but  
the growth rate will vary by occupational group. Pro-  
fessional and technical workers are expected to have  
the highest predicted rate (39 percent), followed by  
service workers (35 percent), clerical workers (26  
percent), sales workers (24 percent), craftsmen and  
foremen (20 percent), managers and administrators  
(15 percent), and operatives (11 percent). This publi-  
cation contains a brief discussion and employment  
information concerning occupations for professional  
and technical workers, managers and administrators,  
skilled trades, sales workers, clerical workers, and  
service workers. In order for women to take advantage  
of increased labor market demands, employer atti-  
tudes toward working women need to change and  
women must: (1) receive better career planning and  
counseling, (2) change their career aspirations, and (3)  
fully utilize the sources of legal protection and assist-  
ance which are available to them. (SB)

## Document Resumes

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically by Clearinghouse prefix and Clearinghouse accession number.

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject Index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names used in this Section, together with the page on which each Clearinghouse's entries begin:

	Page		Page

Pub Type—Reference Materials - Bibliographies (131) — Collected Works - Serials (022)

EDRS Price - MF03 Plus Postage. PC Not Available from EDRS.

Descriptors—\*Abstracts, Education, \*Indexes Identifiers—\*Resources in Education

Resources in Education (RIE) is a monthly abstract journal which announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,500 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape data base prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for MAY 1979. (LRS/WTB)

Descriptors—\*Adult Education, \*Adult Literacy, \*Adult Reading Programs, Adults, Comparative Analysis, English (Second Language), Foreign Students, \*Functional Literacy, Guidelines, Literacy, \*Program Development, \*Program Effectiveness, Reading Tests, Skilled Occupations, Unemployment

Identifiers—\*Project ALMS

Project ALMS (Adult Literacy Mission Support) was designed to improve the communication skills of semi-literate or illiterate adults, help participants become more self-sufficient, provide an ongoing program for other such individuals, and provide a manual of guidelines and suggestions for other programs. Three groups were established to make a comparison among 25 students who were gainfully employed in a local electric plant as machinist trainees, 128 Chinese students living in China and learning to read English as a second language, and 26 generally unemployed students participating in an individualized adult basic reading program. All three groups consisted of adults aged 17 to 40. Programs of study varied with the group as well as the individual according to specific, diverse reading goals. Growth in reading was ascertained through pre- and posttesting utilizing the Woodcock Mastery Skills Tests. Data revealed that the individualized approach was superior and that the Woodcock Test can be used appropriately for adults having less than tenth grade reading level but not for adults who are reading above that level. Test goals also confirmed that the program goals were met. (The manual developed during the project is also included.) (MN)

Descriptors—Computer Programs, Computers, \*Computer Science, Computer Storage Devices, \*Correctional Institutions, \*Data Analysis, Data Bases, Data Collection, Data Processing, \*Information Dissemination, \*Information Needs, \*In-

formation Retrieval, Information Storage, Information Systems, Models, State of the Art Reviews

Designed to help the correctional administrator meet external demands for information, this detailed analysis of the demand information problem identifies the sources of requests for and the nature of the information required from correctional institutions and discusses the kinds of analytic capabilities required to satisfy most demand information requests. The goals and objectives of correctional data analysis systems are outlined. Examined next are the content and sources of demand information inquiries. A correctional case law demand information model is provided. Analyzed next are such aspects of the state of the art of demand information as policy considerations, procedural techniques, administrative organizations, technology, personnel, and quantitative analysis of processing. Available software, report generators, and statistical packages are covered in a discussion of report generation and analysis of technology. Also described are the systems transfer technology available for contemporary corrections and transferable demand information technologies. Recommendations are made concerning the following areas: the OBCIS data base as a solution to the demand information problem, demand information administrative policy, automating agency policy, automating program descriptions, software needs, communication problems, dirty data, use of computers in litigation, technology transfer, personnel turnover, and negotiation of demand information requests. ## Identifiers—Agricultural Chemicals

This document contains Indiana agricultural chemicals curriculum materials based on the Vocational-Technical Education Consortium of States (VTECS) Agricultural Chemicals Catalog. It is intended to improve preparation of high school and adult students for handling and using agricultural chemicals and for jobs as chemical salespersons or chemical applicators. Based on an analysis of tasks involved in agricultural chemical workers' jobs, the curriculum materials are divided into 34 domains covering the following material: disposal of chemical containers; delivery of chemicals; locating fields to be treated; managing chemical storage; writing receipts; recording accounts payable and receivable; selling agricultural chemicals; sales promotion; machinery purchase; grain grading; moisture testing grain; formulating feeding rations; applying for weighing license; chemical testing; soil samples; soil deficiencies; calculating application rates; preparing for and applying liquids and dry chemicals; inspection and maintenance of liquid equipment and dry equipment; assembling boom-type equipment; inspection and maintenance of lighting systems; changing oil and filters; cleaning filters; inspecting respirators; changing spark plugs and ignition points; and replacing impeller pump, power take-off shaft, worn bearings, and universal joints. Each domain is composed of performance objectives, guides, performance checklists, task analysis, learning content, data sheets, and domain-referenced tests covering the tasks in the domain. (KC)

Identifiers—East Germany, \*Europe (East), Poland, USSR

This report outlines changes in training and education that have taken place in the 1960s and the first years of the 1970s in three countries of Eastern Europe—the German Democratic Republic, Poland, and the USSR. Compiled in the report is information from legal and assimilated texts, as well as from studies and reports, articles, and authoritative opinions emanating from official bodies, research institutes, and private persons from the three countries examined. Some special social and economic problems, educational policy trends, and the Council for Mutual Economic Assistance (CMEA) are discussed. Described next is the institutional structure of the educational system of each country. Trends and developments in several specific areas are traced, including young people in training and employment, girls and women, vocational guidance, further education and training, rural areas, research and development, occupations recognized for training purposes, and teaching staff. Following a series of final observations, substantive abstracts of selected texts are provided. Also included in the report is a 106-item annotated bibliography on training systems in each of the three above-mentioned countries as well as in other CMEA countries. (MN)

ED 209 428 CE 030 215

**Implementing Employability Skills, Reading Skills, and Math Skills in Vocational Education. Final Report. Vocational Technical Education Research Report. Volume 19, Number 2.**

Pennsylvania State Univ., University Park. Div. of Occupational and Vocational Studies.

Spons Agency—Department of Education, Washington, D.C.; Pennsylvania State Dept. of Education, Harrisburg. Bureau of Vocational and Technical Education.

Pub Date—Jul 81

Note—127p; For a related document see CE 030 229.

EDRS Price—MF01/PC06 Plus Postage.

Descriptors—Cooperative Programs, Curriculum Guides, \*Disadvantaged, \*Employment Potential, Field Tests, Guidelines, Information Dissemination, Inservice Teacher Education, Instructional Materials, Job Skills, \*Mainstreaming, \*Material Development, Mathematics, Program Development, Program Evaluation, Program Validation, Reading Skills, Secondary Education, \*Teacher Workshops, \*Vocational Education

Identifiers—Mathematics Skills

A project was undertaken to implement the employability, reading, and math skills of disadvantaged students in vocational education. Included in the project were the following activities: (1) field tests, evaluation, and dissemination of a mathematics skills curriculum guide for disadvantaged learners; (2) field tests and revision of guidelines for establishing, operating, and evaluating co-op and mainstream programs for the disadvantaged; and (3) implementation of a series of small-group workshops for teachers of disadvantaged students on implementing employability, reading, and mathematics skills in vocational programs. Separate mathematics, employability, and reading skills curriculum guides and an administrator's manual for planning, developing, and implementing mainstream, self-contained, or co-op programs for the disadvantaged were developed during the course of the project. An independent review by a third-party evaluator indicated that all objectives had been satisfactorily completed by the project staff. Recommendations were made calling for widespread dissemination of project-developed materials, funding to facilitate such a dissemination effort, and implementation of an impact study to determine the extent of the utilization of the project materials. (The above-mentioned administrator's guide is available separately—see note.) (MN)

Note—72p; For a related document see CE 030 215.

Pub Type—Guides—Non-Classroom (055)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—Accident Prevention, Administrator Guides, \*Cooperative Programs, \*Disadvantaged, Educational Needs, Facilities, Guidelines, Program Descriptions, \*Program Development, \*Program Implementation, School Safety, \*Self Contained Classrooms, Student Organizations, Teacher Qualifications, Teacher Responsibility, Vocational Education, \*Work Experience Programs

Identifiers—\*Mainstreaming the Disadvantaged

This administrator's manual contains guidelines for planning, developing, and implementing mainstream, self-contained, or cooperative work experience programs for the disadvantaged. Outlined in the introductory section are the philosophy underlying programs for the disadvantaged, procedures to determine student eligibility, signals indicating the need for a program, the main features of each program and ways to determine which program is most suitable for a given situation, safety and accident-prevention practices, student organizations, and steps in organizing a vocational program for the disadvantaged. Then the mainstreaming approach to dealing with the disadvantaged is described, with

special emphasis on program advantages and disadvantages, curriculum, and teacher qualifications. Covered in a discussion of self-contained programs are the main features of such programs, their advantages and disadvantages, curriculum, type of school, suggested fields of training, physical facilities, and teacher qualifications. The same points are considered in an examination of cooperative work experience programs. Appended to the manual are a director of state and federal offices and organizations involved in educating the disadvantaged and instructional techniques for disadvantaged students. (A related report on a project to implement employability, reading, and math skills in vocational education is available separately—see note.) (MN)

Descriptors—Adult Education, Community Characteristics, Community Education, Community Resources, Continuing Education, Demography, Economic Climate, \*Economic Development, Economic Status, \*Educational Economics, \*Educational Finance, Educational Needs, Field Studies, \*Financial Support, Housing, \*Investment, Job Training, Postsecondary Education, \*School Community Relationship, Unemployment

Identifiers—New York (Canandaigua)

A study examined the relationship between educational investments and economic development in the small community of Canandaigua, New York. A field study approach was used to collect data pertaining to the city's population characteristics, income characteristics, economic conditions, unemployment rates, and housing conditions. These data were analyzed in conjunction with figures pertaining to Canandaigua's investment in continuing adult education, job training, formal education, and community education. Comparison of these data with formal guidelines for educational investment in a community of the types of Canandaigua indicated that the city is spending more than enough of its available money on educational enterprises. However, too much is being spent on formal education. Therefore, recommendations were made calling for increased funding in the areas of adult and continuing education. The investment guidelines also suggest that Canandaigua must provide more money for both continuing and job training education. Recommendations included calls for similar studies in other communities and for using bond ratings to determine the economic level of a community. (A related dissertation on educational investments and economic growth in smaller communities is available separately—see note.) (MN)

**A Descriptive Study of Adult Full and Part-Time Home Economics Teachers in Florida with Implications for Inservice Education.**

Pub Date—Oct 81

Note—9p; Paper presented at the National Adult Education Conference (Anaheim, CA, October 30, 1981).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Adult Education, \*Adult Educators, Adult Programs, \*Educational Needs, Home Economics, \*Home Economics Teachers, \*Inservice Teacher Education, Needs Assessment, Postsecondary Education, \*Teacher Characteristics, Teacher Education Programs

Identifiers—Florida

A study was conducted to gather data that would provide a descriptive profile of educational, employment, and experiential backgrounds of full-time and part-time adult home economics teachers in Florida, with the intent of using the findings to design inservice activities to promote professional teacher development and more relevant programs for the adults being served. The study was conducted in two parts: first, a survey to provide a descriptive profile of home economics teachers of adults; and second, the use of the Delphi technique to identify and set priorities of specific needs of

adults to be met through home economics programs, as perceived by the teachers. The 339 full- and part-time home economics teachers of adults in the six most densely populated counties in Florida were the population for the first part of the survey, while the sample for the Delphi component consisted of 70 selected home economics teachers of adults. The data revealed that the average home economics teacher of adults in Florida is a white, married female, 46 years of age or older, and born in the United States. She has three children between the ages of 18 and 24, has a bachelor's degree, and is vocationally certified. She is a full-time teacher who has worked with adults for 10 years or less and has had employment other than as a teacher, and has minimal professional organization affiliation. The teachers identified a number of topics they would be willing to teach with additional inservice preparation. Using the Delphi technique, the selected teachers identified 10 perceived needs of adults. It was recommended that the findings of the study be used in designing teacher inservice education. (KC)

Descriptors—Extension Education, Followup Studies, \*Health Personnel, Nurses, \*Nursing Education, \*Outcomes of Education, Postsecondary Education, \*Professional Continuing Education, \*Program Effectiveness, Program Evaluation, \*Workshops

Identifiers—University of Missouri

From October, 1977, through December, 1979, 13 one-day continuing education workshops were given by the University of Missouri Extension for nurses and other health-care professionals. A total of 520 different health care professionals attended the sessions, with multiple registrations bringing the total enrollment in the program to 925. Programs were designed to help the participants acquire updated information on various aspects of nursing and other professional health care, new and improved methods and techniques in the delivery of health care, and enhancement of their competencies. To provide long-term evaluation of the effects of the workshops, a one-page Impact Survey Report Form was adapted from one used with the University of Wisconsin-Extension Programs and sent to the past participants. Results from the 341 forms returned by 227 participants were very positive. Most participants reported that they had gained insights, contacts, new ideas, answers to questions, useful resource materials, reinforcement, and help in making decisions. A very high percentage of the respondents rated from "moderate" to "high" the amount of information they actually applied and used, and adequacy of skill training; more than 90 percent said "yes, definitely" or "probably, yes" that the program was worth the time and money spent; and most participants also reported ideas gained at the workshops resulted in better service to their patients and personal satisfaction and confidence. An in-depth interview with 20 of the participants and their supervisors is yet to be conducted as part of the evaluation of the workshops. (KC)

Descriptors—Adult Education, Communications, \*Continuing Education, \*Educational Practices, \*Educational Trends, Enrollment, \*Extension Education, Independent Study, Individualized Instruction, Instruction, Nontraditional Education, Open Enrollment, \*Open Universities, Outreach Programs, Program Descriptions, Program Development, Student Characteristics

Identifiers—\*Distance Education, Open University (Great Britain)

This conference paper consists of a sketch of the British Open University at work as well as a brief commentary on current developments in the fields of communication technology, course design, instruction, and current trends in distance education. Provided first are statistics pertaining to current enrollment and enrollment projections, student body composition, staff size, and the extent of services provided by the University. Such issues as the relative feasibility of various audio, video, and telecommunications equipment; modification of correspondence units; and the effect of distance teaching on the nature of knowledge are covered. Described next are four new courses offered by the Open University and collaboration efforts between the Open University and outside agencies. Four trends in distance education are mentioned: the boom in distance education; the trends to apply distance teaching to a curriculum derived from the disciplines first and then move to a curriculum derived from the broad field of adult concerns; the trend in communications technology towards more individualized teaching; and the trend towards specialization in distance education. Descriptors—\*Administrative Change, Administrative Policy, \*Administrative Principles, Adult Education, Decision Making, Educational Administration, Educational Cooperation, Educational Policy, Educational Practices, Elementary Secondary Education, Higher Education, Organizational Effectiveness, \*Organizational Theories, Personnel Management, Policy Formation, School Administration, Self Actualization, Staff Utilization, Supervision, Teacher Alienation, Teacher Burnout, Teacher Morale, \*Teacher Motivation, Teacher Role, Teacher Supervision, Teaching Conditions

Teachers are alienated and dissatisfied with their jobs and often "burn out" because they must work in a bureaucratic structure in which all or most decisions are made by administrators and are expected to be carried out by the professionals, rather than being made by the professionals or in collaboration. This pyramidal structure or organization is based on assumptions about human nature characterized by Douglas MacGregor as Theory X—that is, that humans are lazy, will only do what profits them, and must be forced to work and be closely supervised. In contrast to Theory X is Theory Y, in which humans are seen as having a need for work, to pursue excellence, and to "self-actualize," as Maslow called it. Most organizational researchers today contend that the era of effective Theory X management has passed and should be replaced by a Theory Y-style characterized by an organizational structure flatter than the pyramid, in which cooperation prevails and authority and responsibility are shared among administrators and professionals. Moving toward such a structure would help to solve some of the problems of teacher alienation today. Steps toward more participatory organizational management of schools include the following: (1) development of participative/supportive leadership processes; (2) concern for genuine motivational forces; (3) improved communications; (4) better interaction-influence processes; (5) improved decision-making processes; (6) mutual goal-setting or -ordering processes; and (7) improved control processes, considering individuals and their goals. Public school education will be improved if the hierarchical pyramid crumbles and is replaced by a new symbiosis of professionals and administrators working for a joined system and individual goals. This report details the setting up of a program to assess the training potential of a new simulator (Device 2F64C) for training SH-3 replacement helicopter pilots. Section 2 describes the training situation at the fleet readiness squadron prior to and during the transition to a new curriculum that resulted from an instructional system development program. Section 3 discusses factors impacting on syllabi content and the process used in developing syllabi for assessing training effectiveness of Device 2F64C. A description is provided of the development of detailed scripts to ensure effective implementation of a syllabus designed to realize the maximum potential of the new device. Section 4 outlines the experimental plan for assessing the training effectiveness of Device 2F64C. The training regimen for a control group, performance data, and data collection process is described. Appendixes, amounting to approximately three-fourths of the report, include an excerpt of a training aid developed to facilitate learning of complex procedures and evaluate a computer authoring and editing system, two scenarios that are examples of a set developed for evaluating Device 2F64C, list of tasks on which the control group was trained, and a list of training tasks for the experimental group. This student workbook consists of 23 career exploration/career development activities in the form of checklists, inventories, charts, and forms. Included among the activities provided are a work activities checklist, a work situations checklist, an interest checklist, a school subject chart, and a matrix on which to consolidate the information gathered in these inventories. Worker trait group descriptions are listed for 66 occupational groups. Also provided are worksite selection and worksite update forms and site placement and site visit records. An aptitude checklist and inventories to assess employability functional life, reading, and math skills are included. The remaining sections contain a learning activity sheet, an individualized education plan, a form to record student appointments with instructors/counselors, and a career exploration guide. (MN)

 Identifiers—\*California, Comprehensive Employment and Training Act

As part of a five-year plan for vocational education, the California State Department of Education and the Chancellor's Office of Community Colleges contracted for a study to be done to obtain information on programs and services that are being provided to displaced homemakers. Through a series of mailed questionnaires, first to self-identified groups, then to potential service providers, 119 programs and service centers providing aid for displaced homemakers were identified and contacted. An analysis of the responses of the 119 institutions indicated that there are two types of service providers: full-range programs that could be called displaced homemaker centers and programs; and other service providers, which did not provide total services for displaced homemakers but did serve them in various ways. The survey also indicated that the need is greater than the services provided, since there are more than 580,000 displaced homemakers to be served by the 119 centers. However, there are several strengths to the structure. First, the centers are found across the state; second, no single institutional type dominates, so individuals can find the institution that meets their needs. There are also weaknesses; namely, not all locations are served, and almost half of the centers and programs rely on Comprehensive Employment and Training Act (CETA) funds, which are in jeopardy. It was suggested that it would be beneficial for the centers to concentrate on providing a full range of counseling services, while the other service providers should concentrate on training for employment. (Services for and numbers of displaced homemakers by county are provided. An information request form and the survey form are appended.) (KC)

Descriptors—Adults, \*Displaced Homemakers, \*Educational Needs, Employer Attitudes, Evaluation Needs, \*Financial Needs, \*Individual Needs, Information Seeking, \*Need Gratification, Needs Assessment, Program Development, \*Social Attitudes, Statewide Planning, Vocational Education

Identifiers—California

As part of its five-year state plan for vocational education, the California State Department of Education and the Chancellor's Office of the California Community Colleges commissioned a study of the needs of displaced homemakers. (These women's needs were relevant to the state's plans for vocational education because the Education Amendments of 1976 made it possible to address them.) Information was gathered by literature review, mail questionnaire, and direct communication with displaced homemakers and their service providers. These three information bases showed that displaced homemakers had a large number of needs that could be grouped into five major categories: informational needs about the services available to them; financial needs, both long- and short-term; personal counseling needs to aid in becoming emotionally stable and self-sufficient; vocational needs for employment at a level sufficient to support their families; and education and training needs to prepare for a first or a better job. It was also found that displaced homemakers are a product of a society that refuses to recognize work done in the home as "real work," and it was stated that until societal attitudes change, with changes in Social Security and other financial programs, along with employer attitude changes, displaced homemakers will continue to have many problems in American society. (A bibliography of displaced homemaker materials

is included in the report.) (KC)

Identifiers—Congress 96th, Older Workers, Social Security

With Social Security and retirement benefits unable to keep up with inflation, and persons living longer than ever in this country, retirement at age 65 or younger may no longer be a desirable choice for millions of older workers. These themes were articulated by government officials and foundation officers at the first session of a U.S. Senate hearing on work after 65, held in Washington, D.C., in April, 1980. In the hearing, witnesses from the Center on Work and Aging, American Institutes for Research; the Gerontology Research Institute, University of Southern California; the Center for Studies in Social Policy, the Work in America Institute; the National Council on Aging; and the President's Commission on Pension Policy, along with Senators Lawton Chiles, Pete Domenici, John Heinz, and Charles Percy, testified that the demographic picture of the United States will show a much greater number of older persons after the turn of the next century, as compared to today. This population, if early-age retirements continue, will place a great strain on the resources of the country for support. At the same time, witnesses noted, many thousands of older workers are both capable and desirous of continuing on the job, or at least being employed part time. Efforts must be made to change both public policy and public opinion to both permit and encourage older workers to continue to be employed, according to the witnesses, with benefits from such a policy accruing to both the older persons and the economy of the country. (KC)

Identifiers—Congress 96th, Older Workers

Flexible retirement policies have worked very well for four major United States corporations, according to testimony of their executives during the second part of a U.S. Senate hearing on work after age 65, conducted in Washington, D.C., in May, 1980. Executives of Xerox, Polaroid, Bankers Life and Casualty, and Atlantic Richfield told the special committee on aging that their companies have a 15-year span—from 55 to 70 and beyond—during which employees can choose to retire. The execu-

tives said that in most cases the best, most productive workers were the ones who chose to stay the longest; thus, not having mandatory retirement was helpful for the companies. The company officials also commented that older workers had records of absences that were as good as or better than those of younger workers, and much better safety records. The hearing record also includes testimony about the needs of older workers and the future needs of the marketplace for older workers by Senators Lawton Chiles, Charles Percy, John Glenn, David Pryor, and John Melcher. In addition, reports of various task forces and surveys relating to older workers and retirement are appended to the document. (KC)

Identifiers—Congress 96th, Florida, Older Workers, Social Security

The problem of senior citizens in Florida who need to work are chronicled in this third part of the Senate Special Committee on Aging, Work after 65 hearings, conducted in Orlando, Florida, in July, 1980. During the Florida hearing, representatives of various government programs for senior citizens, professors of education and economics and private employers and employment agencies described the services their agencies or offices provided for persons over age 65, and the problems these seniors encounter. Themes running through the testimony were that pensions and Social Security provide inadequate incomes for most retired persons, and, therefore, the people need jobs. However, they often encounter discrimination in finding a job and in being paid a fair wage. However, experience has shown that older workers are as capable as younger ones if they are allowed to work. The witnesses urged more help for senior citizens in finding employment and in filling out forms required, as well as suggestions for increasing Medicare benefits. Many personal anecdotes of productive senior citizens are included. (KC)

Identifiers—Recent College Graduates Survey 1978 (NCES)

This report provides data on occupational outcomes (type of occupation, unemployed, and not in the labor force) as of February, 1978, by major field of study for persons who received bachelor's degrees during the July 1, 1976-June 30, 1977, school year. Section 1 presents findings that summarize the occupational outcome data by major field of study.

Since certain fields and occupations tend to attract members of one sex more than the other, occupational outcome is examined separately for males and females. Also, since the occupational outcomes of bachelor's recipients who are enrolled and who are not enrolled for an advanced degree may be different, occupational outcome is looked at separately for those enrolled and not enrolled for an advanced degree. The basic data tables presented in section 2 are designed to serve as reference tables for college students and others involved in the process of choosing a major field career. These tables provide profiles of occupation and employment status for the major fields of study covering all bachelor's recipients, men and women, and those enrolled and not enrolled for an advanced degree. Evaluative (142)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Career Education, \*Evaluation Methods, \*Needs Assessment, Questionnaires, Standardized Tests, \*Test Construction, \*Test Selection, Test Use

A basic consideration in conducting a career education needs assessment is whether to select published tests or to develop new instruments and evaluation techniques. Advantages of published tests are availability and convenience and ease to use. Advantages in using self-developed measures can be seen by examining a needs assessment study in which both types are used. In a fall 1976 needs assessment for career education in upstate New York, ninth and twelfth graders were administered the attitudes section of the Career Maturity Inventory (CMI), and they and their parents also responded to a project-developed questionnaire. Interpretation of CMI results was that the average student needed supplemental career education and guidance slightly less than the average student in the nation. The questionnaire asked questions concerning parental influence and school influence on career decisions. Data suggested that parents and children agreed on need for parental influence but disagreed regarding amount, usefulness, and quality of parents' information. The public felt the school was not doing sufficient work in career education, and more effective information dissemination and parental education were needed. A comparison of needs assessment information obtained from the two tests indicates that the self-developed questionnaire provided the most meaningful, useful information. (YLB)

Evaluations of Firms and Professionals Who Provide Consumer Services. An Annotated Bibliography of Consumer Services.

Washington Center for the Study of Services, Washington, D.C.

Spons Agency—Office of Consumer's Education (ED), Washington, D.C.

Pub Date—Dec 80

Note—73p.

Pub Type—Reference Materials - Bibliographies (131)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—Abstracts, Annotated Bibliographies, \*Community Services, \*Consumer Education, \*Consumer Protection, Consumer Science, Evaluation Methods, Financial Services, Human Services, \*Professional Services, Research Methodology, \*Summative Evaluation

This annotated bibliography contains summaries of studies of consumer services in 39 fields, plus summaries of publications of interest to consumer advocates, published during the past 10 years. Since most service providers do business in a single locale, the evaluations are usually local in scope (for example, a comparison of major appliance repair firms in Washington, D.C.), although assessments of an entire service industry rather than of individual providers, suggestions to aid individual consumers in shopping for a given kind of service provider, gen-

eral information about a service field, common problems and "ripoffs" in a service field, instructions for do-it-yourselfers, and methods for conducting consumer studies are included. The bibliography is organized into two parts. The first part covers the 39 service fields, arranged in alphabetical order. Example fields included are abortion clinics, appliance repair, auto repair, day care services, employment agencies, food stores, hospital emergency rooms, opticians, plumbers, schools, and television repair shops. The second part covers four general topics on producing and disseminating service provider evaluations (fund-raising and selling publications, libel law, publicity, and research methods). The annotations of those documents that report evaluations of service providers focus on the characteristics that were assessed, the means of data collection, and the basic findings. Names and addresses of contact persons and sources of the documents and related research materials and methodology are provided. (KC)

This monograph deals with the philosophical and ideological development of the Canadian Association for Adult Education (CAAE) during the years of Ned Corbett's leadership of the organization from its founding in 1935 to his retirement in 1951. The first stage of transformation of the CAAE is discussed in terms of the association changing from a clearinghouse and information center to assuming a direct programming role in the field of citizenship education. Next, numerous quotations from directors' reports are presented to show the development of a second stage of the association as a social reform movement. The 1943 Manifesto, with its statement of seven principles, and Corbett's 1947 principles of adult education are presented. Programs and services provided by the association are described and examples of the thinking of the times are quoted from Adult Learning and Food for Thought. Reviewed next are the publications program in connection with Farm Radio Forum and Citizen's Forum and the association's relationship to other organizations through the Joint Planning Commission. Following a discussion of selected briefs representing lobbying activities is a summary of the Corbett years, the central themes of which were citizenship education, rural adult education, and Canadian nationalism. An extensive bibliography is provided. (BFB)

Descriptors—College Credits, \*Credits, \*Disadvantaged Youth, Employment Programs, \*Experiential Learning, Federal Programs, \*Job Skills, Postsecondary Education, Program Development, Secondary Education, Youth Employment Identifiers—\*Comprehensive Employment and Training Act, Pennsylvania

A study was conducted to examine methods through which Comprehensive Employment and Training Act (CETA) participants may be awarded credit for participation in CETA-sponsored programs in Pennsylvania. To accomplish this, CETA prime sponsors, CETA program operators, and a group of randomly selected potential program operators were surveyed. After identifying programs that had established credit-awarding procedures, on-site interviews were conducted to determine how this credit was awarded, the extent of credit awarded, the types of activities for which the credit was awarded, and the strengths and weaknesses of the credit-awarding process. The results of the study indicated that less than one-half of the respondents who operated programs awarded credit for CETA-sponsored activities, while half of those who did not award credit believed that awarding credit was inappropriate. A problem viewed by both proponents and nonproponents of awarding credit was that the participants were paid, and program operators forecasted or perceived negative community reactions for "paying students to go to school." Some respondents who did not award credit had an erroneous understanding of the process for granting credit. Programs that did award credit gave it for classroom experiences such as development of job-seeking skills, remedial and developmental instruction in English, reading, mathematics, and attainment of consumer skills, with .5 to 2.0 credits being awarded. It was recommended that a model for awarding credit be developed and more information about the credit-granting process be given to program operators, school boards, and community groups. (KC)

This manual provides program objectives for instructors teaching electricity and electronics courses in junior and senior high Department of Defense Dependents Schools. The manual begins with a description of the electricity/electronics courses offered in the Dependents Schools. Following is the main part of the document, consisting of two general objectives: (1) to demonstrate an understanding of the basic concepts and skills in electricity and electronics, and (2) to demonstrate an understanding of the basic concepts related to computers. For each of these objectives, program objectives and suggested instructional objectives are provided, correlated with grade level and electronics or electricity courses. The final section of the manual is an illustrated layout of suggested facilities for the electricity/electronics laboratory. Appended to the manual is a list of approved textbooks for the electricity/electronics curriculum, along with publishers' and authors' names, sources of materials, and names of the textbook review committees. Note—222p.

Pub Type—Reports - Descriptive (141) — Reports - Evaluative (142)

EDRS Price - MF01/PC09 Plus Postage.

Descriptors—Adolescents, Career Counseling, Comparative Analysis, Counselor Role, \*Demonstration Programs, \*Disadvantaged Youth, Employment Programs, Employment Services, Evaluation, Federal Programs, \*Job Placement, \*Job Search Methods, Job Skills, \*Program Effectiveness, Program Evaluation, Success, Summative Evaluation, Young Adults, \*Youth Employment

Identifiers—Massachusetts (Cambridge), Pennsylvania (Wilkes Barre), Youth Employment and Demonstration Projects Act

Two job search assistance programs for disadvantaged youth, funded under the Youth Employment and Demonstration Projects Act, were evaluated for both operation and impact. The two programs were the Cambridge, Massachusetts, Job Factory, which paid youths a stipend for doing the "job" of finding a job, while providing group activities, resume writing, job search skills and placement assistance; and the Wilkes-Barre, Pennsylvania, Workshop, which assigned participants to one of three treatment groups to receive either individual career counseling and job placement services, career counseling, job placement services, and group job search skills workshops, or career counseling and job search skills workshops. No stipend was paid in the Pennsylvania project. In the Cambridge group, 203 youths were enrolled in the Job Factory while 165 served as controls; 396 youths were enrolled in the three treatment groups in Wilkes-Barre. The process evaluation showed that the Job Factory functioned fairly smoothly because it was a modification of an existing program, while the Workshop experienced difficulties in implementation because of its "top-down" model. The impact evaluation found that the Job Factory had a substantial effect in getting youth to work quickly, although these effects may not continue long-term, while in the Workshop, there were no significant differences in the rate of job finding for the three groups. Job Factory participants found moderately better jobs than the controls, while no major differences in the groups were found in the Workshop participants. In Cambridge, attitudes/knowledge areas did not contribute to job finding, while in Wilkes Barre, job search skills were a significant component of job finding. Overall, it was found that the intensity of the search fostered by the moral support of counselors was the most significant component in the job search assistance programs. (KC)

Identifiers—Department of Education

As a result of a series of miniconferences held throughout the United States on implementing career education in grades K-12, four implementation issues were identified and summarized in this monograph. (Other issues are treated in separate publications.) The issues which the K-12 educators identified as very important were the following: (1) the issue of infusing career education into the regu-

CE 030 429

lar curriculum versus creating separate courses; (2) whether the term "career education" should be abandoned; (3) the nature of the relationship between vocational education and career education, and (4) the use of career education resource centers in many school districts. For each of these issues, the arguments pro and con as advanced by the miniconference participants are summarized, and the personal observations of Kenneth B. Hoyt, Director, Office of Career Education, U.S. Department of Education, are included. As a result of the discussion at the conferences, Hoyt concludes that K-12 career education practitioners are fully capable of defining and discussing crucial conceptual issues, and they should be listened to more by those who make career education policy decisions; and that if an issue can be identified, there are already several K-12 career education practitioners in the country who have developed unique approaches to solving the problem. This module is one in a series of seven focused on skills vocational teachers need to develop and manage programs that are performance-based and fully individualized. Designed to allow for individualization of a teacher education program, these modules supplement those prepared by the National Center for Research in Vocational Education for professional development of vocational teachers. The objective of this module is to help develop skill in validating existing occupational analyses. (Analysis is a process through which the skills, knowledge, and attitudes needed for successful employment are identified.) Focuses are on the process used to establish a program's scope, development of skills needed to revise existing analyses, and verification of a revised occupational analysis. Contents include three learning experiences based on three enabling objectives that provide background information, practice experiences, or a combination. Completion of these experiences should lead to achievement of the terminal objective in the fourth and final learning experience with teacher performance assessment form. Each learning experience includes a learning activity (activities) with information sheets, case studies, and self-checks with model answer (as feedback). Optional activities may also be provided. The Folk High School: Denmark's Contribution to Adult Education.

Pub Date—Nov 81

Note—50p.

Pub Type—Historical Materials (060)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Adult Education, Cultural Education, \*Educational History, \*Educational Philosophy, \*Folk Schools, \*Nontraditional Education Identifiers—\*Danish Folk Schools, Denmark, Folk High Schools, Grundtvig (Nicola), Scandinavia This paper provides an historical record of the folk high school as a liberal educational philosophy since the mid-nineteenth century. The social and political setting in which the Danish folk high school began, along with a biographical sketch of its founder, N. F. S. Grundtvig (1783-1872), are reviewed within the first eight pages. The folk high school in Denmark is reviewed in terms of basic characteristics, the residential collective adult education concept, course scheduling, instructor qualifications, administration, and financing. A description of the Skælskøer folk high school is presented and includes statistical data, aims and objectives, financial and recruitment aspects, course length and descriptions, teaching methods and techniques, function and education of teachers, intended and unintended effects, and fundamental risks. Then descriptions of the folk high school programs in Norway, Sweden, and Finland are presented. Included in the 5-page section on impact are the following: participation figures; similarities and differences among folk high schools in Nordic countries; and a brief overview of folk high schools in England and Scotland, continental Europe, North America, Asia, and Africa. The paper concludes with considerations of the future of the folk high school. (BFB)

Identifiers—\*Oregon

Designed to provide Oregon vocational directors and teachers with a process for collecting information to be used in evaluating and planning vocational education programs, this handbook presents guidelines for both local annual planning and long-range planning. Various items to consider when reviewing an existing program are covered, including availability of jobs for graduates, program outcomes, program components, developing a plan for the program, modification and operating costs, and alternatives to the program. Examined next are the following aspects of reviewing an alternative program: assisting the availability of jobs for program completers, determining program outcomes, estimating program operating costs, and evaluating alternatives to the program. The following areas of the decision-making process for a new program are described: availability of jobs for program participants, interest in the new program, preliminary plans for the program under consideration, operating costs, cost effectiveness, and alternatives to the program. Also set forth are guidelines for developing a district long-range plan. A planning leader's guide is provided. Included in appendixes are Oregon standards applying to vocational education, proposed specific vocational program requirements, and 27 forms for use in planning a vocational program. (MN)

Intended for instructors in occupational education programs, this catalog identifies instructional materials found to be successful for teaching specific occupational competencies identified in the Instructional Support System for Occupational Education (ISSOE) in the area of business and office education. Contents include 151 materials reporting forms for materials used in various program areas of business and office education. Forms are organized first by program area and then by ISSOE task numbers arranged sequentially. (A separate form is provided for each task for which the material is used.) Program areas/units include communication skills, filing and retrieval, adding and calculating machines, financial and recordkeeping systems, and data processing. The materials reporting form provides this information: course, unit, and module titles; task title and number; school name and address, instructor, and phone number; ISSOE region; V-TECS number; type of instruction materials best suited for; instructional, grade, and ability levels; type of materials used; title of material, author, edition, copyright, date, publisher, cost, and pages used; comments; and written teacher comments. Enhancing the Role of Women in National Development Through Development Training Programs. A Report on the Design of a Technology Transfer Model Using Applied Research Institutes and Women's Voluntary Organizations.

Denver Univ., Colo. Denver Research Inst.

Spons Agency—Agency for International Development (Dept. of State), Washington, D.C. Office of Science and Technology.

Pub Date—Jan 80

Note—85p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Adult Education, \*Developing Nations, \*Economic Development, \*Females, Planning, Program Administration, Program Design, Program Development, Program Implementation, Rural Areas, \*Sex Role, \*Technology Transfer, Voluntary Agencies, \*Women's Education

Identifiers—Colombia, Development Training Forum, \*National Development, Thailand

To assist in institution-building in selected developing countries, the Office of International Programs/Denver Research Institute (OIP/DRI) developed a training component that focused on channeling local input to program design and implementation. The program was initially developed to focus on enhancing the role of women in national development and to assist them in promoting the flow of technology to rural users. It was determined that a need for training in planning and management skills existed among the women in Thailand and Colombia. DRI created the Development Training Forum (DTF), which uses a participatory planning method to teach basic organizational planning and program management skills. A series of training forums was then held in Thailand and Colombia. The DTF was found to have both topical and cross-cultural application and to be able to be modified for organizations at all levels. Local replication of the

DTF method has occurred in Thailand. Modifications to adapt the method to local cultural and social influences have included language, focus, participation, time frame, and additional sessions. (Appendixes, amounting to approximately one-half of the report, include summary data from the DTF in Thailand and Colombia.) (YLB)

Recruiting Public Aid Recipients into Adult Education Programs.

Pub Date—81

Note—20p.; Paper presented at the National Adult Education Conference (Anaheim, CA, October 29, 1981).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Adult Education, Counselor Role, Educational Needs, Letters (Correspondence), Program Administration, Program Descriptions, \*Program Design, Program Development, Program Implementation, \*Publicity, Records (Forms), Recruitment, Staff Role, \*Student Recruitment, \*Welfare Recipients

Identifiers—North Chicago Community High School IL

This program description provides a detailed summary of the efforts employed at the North Chicago Community High School in North Chicago, Illinois, to recruit public aid recipients into adult education programs. Outlined first are the educational needs of the North Chicago community. Then various agencies cooperating with the high school's recruitment efforts are listed. Presented next are the measurable objectives of the recruitment program. The organizational structure of the adult education program and the relationship of Title XX public aid coordinators and high school recruiter-counselors to the total program are explained. Appended to the report are various forms, including a student questionnaire, an enrollment roster, course advertisements, publicity letters, and facsimiles of publicity posters. (MN)

Identifiers—\*Comprehensive Employment and Training Act, Florida

Designed for use by those who intend to improve the Comprehensive Employment and Training Act (CETA)-adult education linkage through staff development activities, this guide includes a description of CETA purposes, adult education programs, educational linkages, staff development considerations, and support material. The CETA-adult education linkage, CETA employment and training programs, and Florida's adult education programs are described. Various types of educational linkages and coordination are discussed. Presented next is a staff development model that takes into consideration staff development benefits, needs, barriers, and resources. Strategies are set forth for on-going staff development in five areas (organizational analysis, involvement, planning, staff development activities, and follow-through and implementation). Outlined next are various phases of staff development workshops, including the pre-planning, planning, implementation, and follow-through stages. Appendixes contain brief descriptions of CETA; Florida adult education program support; and lists of resource persons, Florida Atlantic University resources for adult education staff development, selected additional resources, and CETA and adult

education agencies by Florida counties. (MN)

Training Skills: A Rating Scale. National Project on Career Education.

Model Secondary School for the Deaf, Washington, D.C.; National Technical Inst. for the Deaf, Rochester, N. Y.

Spons Agency—Department of Education, Washington, D.C.

Pub Date—Oct 81

Note—24p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Career Education, Communication Skills, \*Deafness, Educational Planning, Inservice Teacher Education, Program Effectiveness, \*Rating Scales, \*Self Evaluation (Individuals), \*Teacher Educator Education, Teacher Educators, \*Teacher Effectiveness, Teacher Workshops

This manual describes a system for assessing training readiness of state National Project on Career Education (NPCE) trainers who will deliver inservice training to educators of the deaf in career education and planning skills. Each of three sections offers an explanation and concrete scenario for one of the three skill areas included on the NPCE-developed self-rating scale trainers use after participation in career education inservice workshops. These skill areas are platform skills (voice/signing, dress, visuals and other media, interpreter use, confidence), style skills (mannerisms, flexibility, enthusiasm, timing, and audience rapport), and processing skills (articulation, wait-time, praise rejection, building, audience questions, conflict or communicative blocks). (Processing involves a questioning strategy.) The rating scale is appended. (YLB)

Metric Education Resources for Health Educators. A Workshop for Health Educators.

Florida International Univ., Miami.

Pub Date—Nov 81

Note—94p.

Pub Type—Guides - Classroom - Teacher (052) — Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—\*Allied Health Occupations Education, Behavioral Objectives, Elementary Secondary Education, \*Inservice Teacher Education, Integrated Curriculum, Learning Activities, \*Metric System, Postsecondary Education, Pretests Posttests, \*Resource Materials, Teacher Workshops, Transparencies, Vocational Education

These workshop materials are designed to provide basic information and develop competencies necessary for the health occupations teacher to use and integrate metrics into the curriculum. Objectives and activities of the three-hour workshop are outlined. Informational materials cover historical development of the metric system, metric units, metric equivalents, rationale for metrification, and metric symbols. A glossary of metric terms is provided. Questions to guide discussion about the metric system are listed. Material specific to use of the metric system in the field of health is then provided. Activities are included that allow for practice in using the metric system and identifying strategies for implementing metric education into the health occupations curriculum. A pretest and pretest test are presented. Ten transparency masters that may be used by the teacher in the classroom are also given. A 12-page bibliography compiled by the National Council of Teachers of Mathematics lists metric information sources in these categories: books, workbooks, and posters; manipulative aids and kits; films and filmstrips; filmloops and videocassettes; slides and transparencies; audiocassettes and records; periodicals, reports and pamphlets; games; and duplicating masters. Comparative Patterns in Rural and Urban Adult Education Programs: Participation, Focus, and Barriers.

Pub Date—81

Note—19p.; Paper presented at the National Adult Education Conference (Anaheim, CA, October 29, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Access to Education, \*Adult Education, \*Adult Learning, \*Adult Programs, \*Adult Students, \*Comparative Analysis, \*Continuing Education, \*Motivation, \*Participation, \*Postsecondary Education, \*Rural Areas, \*Urban Areas

A study was conducted to compare adult learning experiences within formal educational programs in rural areas with those in urban areas, predominantly at the postsecondary level. It focused on the phenomenon of adult learning in rural settings by analyzing participation rates, needs assessment data, interest inventories, program evaluations, and research studies of postsecondary continuing education programs. Information reported in the literature of adult education was compared and contrasted with findings of studies conducted in a nine-county rural area of West Central Minnesota. Findings indicated that there is no consensus that adult learning occurs in formal settings at the same frequency in rural and urban areas. Participation in both settings was most heavily concentrated in age categories below age 55. In urban areas the focus of adult learners was on formal credit; in rural areas adults focused on noncredit activities. Motivation for adults in urban areas was education for vocational advancement; adults in rural areas were motivated by personal development and self-improvement. Barriers to education existed more often for rural adults. The most serious were distance (access), lack of adequate finances, and lack of adequate advising and counseling. (YLB)

Plan for Action to Reduce Engineering Shortage...

with Supporting Data.

American Electronics Association, Palo Alto, Calif.

Pub Date—Oct 81

Note—40p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Electronics, \*Engineering, \*Engineering Education, \*Engineers, \*Higher Education, \*School Business Relationship, \*Secondary Education, \*Teacher Shortage

Identifiers—American Electronics Association, \*Engineering Shortage

This nine-point plan for reducing the engineer shortage includes a paper outlining the significance of the problem and points toward major causes. Section 1 discusses the American Electronics Association's (AEA) education program. It overviews cause of the problem at the undergraduate and graduate levels and outlines these nine mechanisms: (1) industry-wide standard for giving resources to education, (2) spotlighting of model industry-university programs, (3) formation of regional task forces to work with companies and colleges, (4) assistance to task forces, (5) an AEA Electronics Education Foundation, (6) continuation of the Blue Ribbon Committee on Engineering Education, (7) AEA Standing Committee to provide assistance, (8) industry lobby-networks in major electronics states, and (9) increase in Engineering Education Department staff. Section 2 reviews extent of the engineering shortage. Causes discussed in section 3 include attitudes, undergraduate supply, foreign students, limitations of education's capacity, outdated equipment and facilities, and faculty shortages. Section 4 summarizes the impact of continued shortages; section 5 offers a consensus view on the shortage. Addenda include figures and lists referred to in the body of the report. (YLB)

Vocational Education in Correctional Institutions.

A Report Based on Four National Hearings.

National Advisory Council on Vocational Education, Washington, D.C.; National Inst. of Education (ED), Washington, D.C.

Pub Date—Mar 81

Note—66p.

Pub Type—Information Analyses (070) — Opinion Papers (120)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—\*Correctional Education, \*Correctional Institutions, \*Correctional Rehabilitation, \*Educational Finance, \*Educational Needs, \*Federal Legislation, \*Federal Programs, \*Federal Regulation, \*Federal State Relationship, \*Hearings, \*Outcomes of Education, \*Postsecondary Education, \*Program Effectiveness, \*Program Improvement, \*Rehabilitation Programs, \*State Agencies, \*State Departments of Education, \*State Govern-

ment, \*State Programs, \*Statewide Planning, \*Vocational Education, \*Vocational Rehabilitation

Identifiers—National Advisory Council on Vocational Education

Four hearings were held during 1979 by the National Advisory Council on Vocational Education (NACVE) to determine the status of vocational education in correctional institutions. Testimony from 106 witnesses from 27 states led to the overall conclusion that the current level and quality of correctional vocational education is not adequate to provide, on a regular basis, comprehensive vocational education programs to offenders. Over the course of the four hearings, four major issues were implicated in all the problems, frustrations, and possible solutions discussed by witnesses. These issues are the following: (1) funding is inadequate, and there is lack of funding cooperation between state education and correctional agencies; (2) in the area of administration, recruitment, training, and retention of qualified vocational instructors is insufficient; facilities and equipment are inadequate; and there is a lack of coordination and integration of vocational programs with prison industries; (3) regarding comprehensive programming, vocational program standards are lacking and programs are not relevant to realistic job opportunities; and (4) concerning federal policy and leadership, overall coordination is absent; and there is a shortage of research, evaluation, data collection, and technical assistance. Descriptors—\*Adult Development, \*Adult Education, \*Adult Learning, \*Adult Students, \*Educational Psychology, \*Educational Theories, \*Independent Study, \*Learning Theories, \*Life-long Learning, \*Motivation, \*Needs Assessment

Identifiers—\*Self Planned Learning

This review of self-planned learning is divided into three parts: (1) learning theory, (2) instructional theory, and (3) practitioner application. Its objective is to help participants learn about the relevance and applications to and implications for adult development and learning of psychology. In the first part behaviorism and neobehaviorism are discussed in terms of learning theory, and a learning theory genealogy is presented. A second section in part 1 focuses on adults involved in self-directed learning and their reasons for participation. Part 2 moves the discussion from learning theory to a theory of instruction, a move beyond the descriptive and explanatory to the prescriptive (to procedures to be recommended in practice). Self-instructional considerations are overviewed. A second section discusses adult instruction in terms of self-directed learning. Part 3 looks at how to integrate theory and practice, especially in reference to the adult learner. Needs assessment, the methodology of obtaining the how and what of adult learning, is discussed. Implications and policy considerations are also presented. (YLB)

Descriptors—\*Classification, \*Cluster Grouping, \*Educational Research, \*Enrollment, \*Longitudinal Studies, \*National Surveys, \*Secondary Education, \*Secondary School Students, \*Student Participation, \*Vocational Education

A study focused on identifying the patterns of participation in vocational education and relating them to various labor market and postsecondary education participation outcomes. Its purpose was to develop a classification schema for vocational education students. The sample consisted of 3,056 high school graduates for whom complete high school transcripts for grades 9-12 were available and was part of the New Youth Cohort of the National Longitudinal Survey of Labor Market Experience. Five descriptive concepts/characteristics (intensity, diversity, continuity, proximity, and supportive diversity) were derived to assign students to five types/patterns of participation or profiles: concentrator, limited concentrator, concentrator/explorer, and incidental/personal. Results of the profile matching showed 22% of secondary graduates with no vocational credits, nearly 50% of those who had exposure to vocational education were in the incidental/personal category, less than 2% were identified as explorers, and the other groups collectively accounted for almost 50%. Cluster analyses indicated verification of the proposed pattern types. Sex, race, and family socioeconomic status had an effect on participation. The classification procedure based on transcript data was found to be a workable way to identify patterns of participation in vocational education. (YLB)

Descriptors—Case Studies, Data Analysis, Educational Research, Employment Services, \*Job

Placement, Literature Reviews, National Surveys,

Outcomes of Education, Questionnaires, Secondary Education, \*Secondary School Students, \*Vocational Education, Vocational Followup

A study identified factors influencing placement

of former secondary vocational education students

in jobs related to their training. Findings also

described educational and community processes

appearing to influence job placement. Data came

from a literature review, analysis of existing data, case

studies, and mail questionnaires. Case studies were

conducted in eight local education agencies (LEAs)

in seven states. Existing data for all 50 states and

586 LEAs were analyzed. Mail questionnaires were

received from 5,062 individuals representing 10

respondent groups in 62 LEAs in the seven states.

Data indicated higher job placement in schools

where administrators, counselors, and teachers be-

lieve job placement is a purpose of vocational edu-

cation programs and is their responsibility; admission

to vocational education programs is restricted to

students with high interest and potential; there is a

high demand for workers in the surrounding labor

market area; manufacturing is a major community

industry; the community has a mix of industry sizes;

needs assessment surveys are frequently used to

plan and evaluate vocational education programs;

teachers have regular contact with employers re-

garding job placement; students participate in youth

organizations and acquire job readiness training and

basic education skills; and the vocational education

curriculum is oriented to employers' needs. (Append-

ices include instruments, data tables, and bibliog-

raphy). (YLB)

**Identifiers**—\*Canadian Manpower Consultative Service, Comprehensive Employment and Training Act

The American economy is in a state of flux; it will probably generate more displaced workers; and it has yet to determine a policy to assist such workers in preparing for and locating new jobs. Although the extent of the problem is not entirely known, a low estimate is that some 2.2 million workers may have been affected by plant closings and mass layoffs between 1975 and 1981. Most often, the typical dislocated worker is male, semiskilled, older, less educated, and with some years' seniority and earning a relatively good wage. The United States has a variety of labor market service programs. Among these are the Comprehensive Employment and Training Act (CETA), which is targeted to the disadvantaged and thus not available to help most displaced workers; CETA Private Industry Councils; local management and labor groups; state vocational retraining programs; and other federally, locally, or privately funded programs that appear sporadically. An approach to helping displaced workers that has been successful in Canada is the Canadian Manpower Consultative Service (MCS), which is characterized by lack of bureaucracy; temporary composition for a specific plant in a specific locale; cooperation between labor, management, and government; and an entrepreneurial spirit. (A case study of a plant layoff in which workers were aided through MCS is included in this report.) To assist dislocated workers, the United States should develop programs with the following key features: a private industry-public body partnership, a local base, flexibility, use of existing resources, non-bureaucratic structures, and a modest start to be followed by building on successes. **Identifiers**—\*Erie County Technical School PA

Adoption and implementation of advanced concepts in structuring and using a local advisory council and craft committees can result in significantly improved vocational education programs. The organizational structure of a vocational-technical school advisory council should be a vehicle that facilitates accomplishment of its prime function—to advise the board and administration concerning the general philosophy, objectives, and program needs of the school. The value and use of an advisory council can vary widely, depending upon how much the administration and board genuinely seek community involvement in identifying and improving secondary and adult training. Advice can be as little as an educated opinion from a small cross-section of the community appointed to a legally required council; but it also can be a comprehensive plan supported by meaningful research—carried out by a much larger and greatly involved council that uses an executive committee approach. An example of an active and successful advisory council is that of the Erie County (Pennsylvania) Technical School and the Regional Occupation Skill Center for Adult Training, which has had a number of organizational changes to better serve its schools by conducting skill needs assessments and by raising \$700,000 to

build the Center. Organizing an effective advisory council requires the following steps: (1) design a structure that will best facilitate the function of the council and craft committees to assist the school board and administration in planning; (2) modify the structure when needs and activities change; (3) seek out the best qualified persons to serve on the council; and (4) use work planning (management by objectives). **Identifiers**—National Advisory Council on Vocational Education

This booklet is intended for persons appointed to local advisory councils or committees and for teachers, educators, and/or administrators of vocational-technical education in order to assist them in establishing and maintaining effective local advisory councils. The first sections of the guide define an advisory council, profile types of advisory councils, explain why advisory councils are important, set forth the mandate and state guidelines for advisory councils, and provide information on the National and the Pennsylvania Advisory Councils on Vocational Education. In the middle sections of the booklet, procedures for establishing local advisory councils are outlined, along with a sample appointment letter and tips on council orientation, organization, meetings, structures, by-laws, roles, and projects councils can conduct to improve the condition of vocational education. The last sections of the guide discuss program evaluation and council self-evaluation, national priorities, and do's and don'ts for an effective council. It is suggested that the booklet be adapted to local conditions to be most effective. (KC)

**Let the Kids Help One Another: A Model Training and Evaluation System for the Utilization of Peer Tutors with Special Needs Students in Vocational Education.**

Pub Date—6 Dec 81

**Note**—30p; Paper presented at the Annual Conference of the American Vocational Association (Atlanta, GA, December 6, 1981).

**Pub Type**—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC02 Plus Postage.**

**Descriptors**—\*Disabilities, Evaluation Criteria, Evaluation Methods, Models, \*Peer Teaching, Program Development, \*Program Evaluation, Program Implementation, Records (Forms), Secondary Education, Student Characteristics, Student Evaluation, Student Role, Supervision, Teacher Role, \*Training, Tutorial Programs, \*Tutors, \*Vocational Education

Because of its benefits to classroom teachers, tutors, and tutees, peer tutoring as a strategy for instructing handicapped students in vocational education is gaining in popularity. Several factors are important to the successful implementation of a peer tutoring program, including administrative support, assessment of tutoring needs, and establishment of program goals and objectives. Equally important is the formulation of a tutor role description which provides the tutor and teacher with a clear description of their responsibilities, a criteria for selecting tutors, a supervision or evaluation instrument for measuring the tutor's performance, and guidelines for the appropriate use of tutors in the classroom. In selecting appropriate tutors teachers should consider a variety of personal characteristics and variables such as age, achievement levels, and racial and socioeconomic backgrounds. While a review of tutor training programs in the literature reveals certain components that are characteristics of

successful training programs, the organization of these components into training sessions is determined by individual school training programs. Two suggested training activities found effective in training programs for tutors and paraprofessionals are the Peer Tutor Decision Worksheet and the Tutor Training Triad. Also essential are close supervision and quantitative and qualitative evaluation of peer tutors. (MN)

**Identifiers**—Waukesha County Technical Institute WI

A prototype for the development of an auto-tutorial course in anatomy and physiology for adult learners in Associate Degree Nursing (ADN) was implemented in the fall semester, 1980, at Waukesha County Technical Institute in Pewaukee, Wisconsin. The format of the two-semester course consists of two hours of scheduled lecture time and three hours of scheduled anatomy-physiology laboratory time each week, plus an independent study session component, the auto-tutorial learning laboratory (ATL). The ATL contains audiovisual materials presenting new content that is to be learned and materials for the reinforcement of content presented in scheduled class sessions. The time devoted to the auto-tutorial learning laboratory varies with each student. Learnings in the courses are scheduled prior to the need for related content in nursing courses. The audiovisual materials in the ATL contain that part of the course content which could be presented effectively on filmstrips and cassettes and were selected from commercially produced materials rather than instructor-produced. Support materials have been written to guide and assist the student in achieving the course objectives. Instructional objectives are printed and handed to students for each unit. A combination of study guides, review sheets, and self-tests have been prepared for support of student learning in the auto-tutorial laboratory sessions. (A list of the audiovisual aids used, with their manufacturers, is included in the document.) (Author/KC)

In an attempt to promote optimal planning and improvement of local vocational programs as well as to be accountable for the distribution of vocational funds, the Wisconsin Department of Public Instruction, Bureau of Vocational Education, has, since 1976, sponsored the development of a statewide secondary vocational education program evaluation model. The Wisconsin Statewide Secondary Vocational Program Evaluation System has been piloted extensively and implemented on a five-year cyclical basis. Participating schools plan, conduct, and re-

## 12 Document Resumes

port a comprehensive self-evaluation as phase 1. In phase 2, schools host either a full external evaluation team, or, when resources are scarce, appropriate schools may elect to host a mini on-site visitation. For phase 3, Implementation of Evaluation Findings, schools develop short- and long-range plans for improvement based on findings from the self-evaluation and specific guidelines. Results over a five-year period show that the evaluation did make a difference in improving programs at the local level; and that the mini on-site visitation is an effective use of scarce resources. In addition, yearly composite evaluation reports based on self-evaluation data from participating schools have been published to aid state-level planners of vocational education in Wisconsin. Descriptors—Attitudes, \*Dropout Attitudes, \*Dropout Characteristics, Dropout Research, Dropouts, Education Work Relationship, Family Characteristics, Females, Grade 9, Influences, Males, Occupational Aspiration, Parent Aspiration, \*Parent Attitudes, Parent Background, \*Parent Influence, Parent Student Relationship, \*Potential Dropouts, School Holding Power, Secondary Education, Student Attitudes, Student Characteristics, Student Educational Objectives Identifiers—Australia (Victoria)

A study was conducted in Victoria, Australia, to examine the factors that influence Year 9 students' intentions to leave secondary school. Discriminant function analysis was used to determine the effects of family background variables, school characteristics, significant others, personal assessments, and attitudes on school-leaving intentions of 2,300 students. The results indicate that the school-leaving intentions of both boys and girls are most influenced by the aspirations they perceive their parents holding for them, their attitudes toward school, and their occupational aspirations; and that these factors mediate the effects of family background and school characteristics. Students who intended to leave school earliest perceived that their parents had low educational aspirations for them, held negative attitudes toward school, and aspired to low status jobs. Descriptors—\*Educational Needs, \*Inservice Teacher Education, Needs Assessment, \*Professional Development, \*Professional Training, \*Program Effectiveness, Program Evaluation, Secondary Education, Skill Development, Teaching Methods, Vocational Education, \*Vocational Education Teachers

Identifiers—South Carolina

A needs assessment was conducted to determine the training and professional development needs of vocational education teachers in South Carolina. The study was designed to identify the skills/skill areas that are used on a day-to-day basis by vocational teachers; those for which they received training either prior to certification or in the course of inservice programs; and finally, those which are used and felt to be important to the teaching process but for which little or no adequate training was provided to the teachers. All program areas except trade and industrial education were surveyed. (A similar study for trade and industrial education was conducted earlier.) In order to obtain information from different perspectives, three respondent groups were surveyed with a rating sheet listing 98 skills. These groups included 1,270 vocational education teachers, 305 administrators of schools offering vocational programs, and 36 teacher educators who have taught instructional skills and methods to vocational teachers. Most of the skills listed in this

survey were classified as needs by teachers in each program area. There were many more skills/skill areas in which teachers felt a need for themselves than were perceived by either teacher educators or administrators. All groups indicated that inservice education opportunities existed to a moderate extent, but that they were dissatisfied with the quantity and quality of the training. Teachers also said that inservice conferences were too far away and that they have no professional leave. The skill ratings and perceived needs will be used by the South Carolina Office of Vocational Education to plan inservice programs for vocational education teachers. (Author/KC)

Towards a Strategy for Planning Vocational Education.

Minnesota Univ., Minneapolis. Dept. of Vocational and Technical Education.

Pub Date—Aug 81

Note—62p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Educational Assessment, Educational Change, Educational Finance, Educational Needs, Educational Objectives, \*Educational Planning, Educational Resources, \*Educational Strategies, Education Work Relationship, Individual Needs, Long Range Planning, \*Models, Needs Assessment, Performance Factors, School Community Relationship, School Role, Standards, Values, Vocational Adjustment, \*Vocational Education

This report describes a strategy for planning vocational education. Discussed first are areas comprising the context for planning vocational education, including the relationship between education and work, the dimensions and stages of work adjustment, and the mission and performance requirements of vocational education (with attention to desired ends, limited work roles, relevance, concern for the individual, equal educational opportunity, time, available resources, technology, planning, and efficiency). The following variables/components of a model of vocational education are examined: vocational education as a process, the individual's life and work roles and vocational education, the changing nature of the individual's role, the technology of vocational education, society's functions and vocational education, resources for vocational education, alternatives to vocational education, cultural values and vocational education, and information and vocational education. Aspects of a theoretical strategy for planning vocational education are explained, including assigning value to society's and the individual's needs, determining present and desired levels of mutual satisfaction, defining alternative changes to get from the present to the desired state of affairs, and the cost of alternative changes. Also provided are operational strategies for very long range, long range, and short term educational planning. (MN)

Descriptors—Comparative Analysis, Educational Attitudes, \*Educational Needs, Employment Patterns, Females, \*Leisure Time, Males, Postsecondary Education, \*Professional Continuing Education, \*Professional Personnel, Recreational Activities, Salaries, Sex Bias, \*Sex Differences, Sex Fairness, Staff Development

Identifiers—Leisure Education, Wisconsin

A study was conducted to ascertain the continuing education needs of men and women leisure service professionals in Wisconsin and to identify differences caused by gender. (Leisure service professionals were defined as persons employed full-time in administering, directing, leading, organizing, and planning in leisure service organizations.) A questionnaire was mailed to 1,646 Wisconsin professionals regarding their characteristics, continuing education needs and interests, and attitudes toward continuing education, with a 50 percent response rate. Data collected were analyzed using descriptive statistics, analysis of variance, and tests of homogeneity. It was found that male recreation professionals' salaries were an average of almost

\$6,000 more than those of females. In general, attitudes toward continuing education were similar in males and females, although women tended to view continuing education in a slightly more positive light. Men had high continuing education needs in public relations, budgeting techniques, program evaluation, supervising staff, and long range planning. Women said they needed information on innovative programming, programming for special groups, activity analysis, current issues, and program evaluation. No significant differences in needs between women and men were found in staff training, time management, public speaking, and interpersonal communications. It was recommended that since no major differences by gender were found, opportunities for continuing education should be made available to all personnel, with particular emphasis on removing barriers or deterrents to women. Identifiers—Kansas

A study examined the opinions of agriculture teachers, school administrators, students, and parents concerning females as agriculture students, teachers, and workers in agriculture. A survey instrument to collect respondent demographic data and a questionnaire to measure sex bias were completed by the following groups connected with Kansas vocational agriculture programs: 154 teachers, 132 administrators, 576 students (approximately 7 percent of the student enrollment in the state), and 390 parents. Included among those data collected by the instruments were respondent age, sex, years of teaching experience, program emphasis, years of schooling completed, socioeconomic background, student plans after high school, overall sex bias rating, vo-ag student enrollee bias, worker sex bias, and female teacher bias. All four types of respondents indicated that students, teachers, administrators, and parents do not encourage females to enroll in vocational agriculture courses. While all investigated groups exhibited support for employment opportunities for females and for female enrollment, they all revealed a preference for male workers in agricultural occupations. Students seemed slightly opposed to female agricultural education teachers. Recommendations called for developing programs to show career opportunities for females in agriculture and to recruit female students into vocational agriculture. (MN)

This guide to a curriculum unit in agricultural structures is designed to expand the curriculum materials available in vocational agriculture in Missouri. It and Agricultural Structures I (see note) provide reference materials to systematize the curriculum. The six units cover working with concrete (19 lessons, 2 laboratory exercises), drawing and plan reading (6 lessons), planning grain-feed handling (6 lessons), electrical work on the farm (14 lessons), plumbing on the farm (5 lessons, 1 laboratory exercise), and alternate energy systems (6 lessons). Each lesson may contain some or all of the following: an objective; study questions; references; teaching procedure with assignment; discussion; and answer key to examination; examination; transparency masters; assignment sheets; and handouts. Laboratory exercises may contain some or all of the following: objective, tools and materials needed, procedures, transparency masters, and handouts. A bibliography is found at the beginning of the guide. Appendixes include a listing of additional supplementary sources and cross indexing of the electrical work unit to the revised version of "Practical Farming Wiring Demonstrations," by Curtis Weston. Intended for instructors serving the occupational needs of disadvantaged and handicapped students, this curriculum guide contains nine units for a carpentry program. Its purposes are to provide minimum skills for students entering the mainstream, supplement vocational skills of students already mainstreamed, and provide vocational instructional materials for the modified classroom. Teachers should adapt these self-paced and self-contained instructional materials to suit teaching/learning situations. These nine units are included: Job Opportunities in Carpentry, Reading and Measuring with Rulers, Lumber Selection and Measurement, Cutting with Hand Saws, Uses of Nails and Hammers, Using a Hand Plane, and Using a Wood Chisel. Each unit contains these sections: (1) unit objectives and self-assessment statements; (2) introduction (motivational statement); (3) description of tools, materials, and equipment; (4) steps of procedure (explanation and illustration of given skill); and (5) student evaluation (true-false, identification, or steps of procedure). Descriptors—Adjustment (to Environment), Adult Development, \*Career Development, Competence, Cross Sectional Studies, \*Education Work Relationship, \*Engineers, \*Experiential Learning, Graduate Surveys, Learning Processes, Outcomes of Education, \*Professional Continuing Education, School Role, \*Social Workers, Student Attitudes, Teacher Attitudes, Teaching Methods, Work Environment

A research project examined the relationship between education and work in the professions of social work and engineering. The project encompassed four main studies of professionals at different career stages. There were (1) a questionnaire and interview study of alumni from the Case Western Reserve University Schools of Engineering and Social Work in five graduating years; (2) a corresponding investigation of current students and teaching methods in these two professions; (3) a project studying engineers and their work environments in two engineering firms; and (4) a study of the experiential learning process. Among those areas addressed in the project were the following: development of an applied theory of experiential learning, assessment of adaptive competencies, assessment of person-environment congruence, the relationship of professional education and career development, and the relationship between careers and adult development. Developed in the study was a system identifying three levels of competence—performance, learning, and developmental competencies. Techniques for assessing each of these levels and for assessing person-environment congruence were developed and tested. Data also indicated that professional education currently prepares professionals better for their core professional role than for lifelong careers and that adult development is marked by a shift from specialization to integration. Descriptors—\*Academic Aspiration, Academic Education, College Bound Students, Enrollment Influences, Females, General Education, High Schools, \*High School Students, Males, Noncollege Bound Students, \*Occupational Aspiration, Part Time Employment, Sex Bias, \*Sex Fairness, Sex Stereotypes, Student Attitudes, \*Vocational Education, Work Attitudes

Identifiers—Oregon

Three hundred eighty-eight students in 16 randomly chosen high schools in Oregon were interviewed to determine their attitudes toward the issue of sex equity. About half the students were vocational students, and half were non-vocational students. From these interviews, a number of conclusions were drawn, including the following: (1) About 30-40 percent of vocational and non-vocational students see significant differences between men and women in terms of work attitudes and abilities. Female students are much less likely to see such differences. (2) Vocational students are more likely to work fulltime the first year they leave high school than non-vocational students, and more

females of both groups plan to work parttime. (3) Between 20 percent and 30 percent of all students said they had been discouraged from taking a course, most often by other students. Within the school environment, other students and counselors were cited as having the most influence over students' selection of courses. (4) About one-third of the students did not know about their school's job exploration or job/career awareness activities. (5) Female students were more likely to have discussed job or career plans with their counselors. More than half the students have a job outside school. Non-vocational females are likely to receive a lower hourly wage than are males. (6) Non-vocational students have both higher aspirations and expectations toward post-high school education than do vocational students. Among non-vocational students, males and females have similar aspirations, but males are more likely to believe they will carry them out. (Attitudes of teachers, counselors, and principals were also studied—see note.) (KC)

Identifiers—\*Oregon

Sixteen randomly chosen public high schools in Oregon were studied to determine the attitudes of teachers, counselors, and principals toward the issue of sex equity. Within these schools, 701 teachers, 57 counselors, and 16 principals were interviewed. From these interviews, a number of conclusions were drawn, including the following. (1) Strategies most frequently used to increase nontraditional enrollment in vocational education courses were teachers having available career/job materials which are not sex stereotyped, and counselors having access to materials and employment data that demonstrate the availability of careers/jobs to women. (2) A majority of the teachers and counselors mentioned at least one practice of which they were aware that discourages male and/or female enrollment in certain courses—sexist comments and/or jokes by school personnel were cited most frequently. (3) Most teachers and counselors were aware of Title IX legislation, but the majority of them said that the national emphasis on sex equity had had no effect on their teaching and counseling practices. (4) Most teachers and counselors did not think it was beneficial for male and female students to be segregated in some classes. (5) Almost half of the teachers but only one-fifth of the counselors felt that certain jobs are more appropriate for members of one sex. (6) The majority of the personnel interviewed has attended a sex equity workshop and had examined their materials for sex biased information. (7) Principals who have recruitment plans to increase non-traditional enrollments stated that these plans have had a positive effect. (Attitudes of students toward sex equity were also studied—see note.) (KC)

Identifiers—John Abbott College PQ, \*Life Events

A study was conducted at John Abbott College in Quebec to determine the frequency and intensity of life-change events that had occurred in women's lives in the two-year period prior to college entry and their impact on the women's participation in the college. It was hoped that such information could be used to design intervention strategies at earlier times, offering additional varieties of academic and support programs, and designing a curriculum that would be more relevant and meaningful to this new group of students. The population for the study was composed of women volunteers from the college's several-years-old Adult Learner's Program and its Intensive French Program. These women completed a questionnaire, the Schedule of Recent Experience (SRE), and 20 women were selected from the group for in-depth interviews because of their high stress scores. Data gathered showed that although the occurrence of a number of life-change events had been reported on the SRE by the group of returning women students, these events either did not appear to represent the most significant life events, did not occur at all, or did not occur in the two-year period prior to re-entry. Some events, such as death or divorce, were reported, but they seemed to serve as long-term motivating factors coupled with the women's perception of the need for personal growth and preparation for employment as they faced the future after finishing their maternal role. One life event triggering reentry for several women, however, was moving or having someone close to them move. The women surveyed said that attendance in the two-year college program was a rewarding personal growth experience. (KC)

**Assessing the Generalizable Skills of Post-Secondary Vocational Students. A Validation Study.** Minnesota Univ., Minneapolis. Dept. of Vocational and Technical Education.

Pub Date—[81]

Note—95p.

Pub Type—Reports—Evaluative (142)

EDRS Price—MF01/PC04 Plus Postage.

Descriptors—\*Basic Skills, Communication Skills, Educational Diagnosis, Interpersonal Competence, \*Postsecondary Education, Questionnaires, Reading Skills, Self Evaluation (Individuals), \*Student Evaluation, Surveys, Teacher Attitudes, \*Test Reliability, \*Test Validity, \*Vocational Education

Identifiers—Likert Scales, Mathematics Skills, Minnesota

A study examined the feasibility, reliability, and validity of two instruments designed to assess the degree to which postsecondary vocational students possessed those generalizable skills that are believed to be functionally relevant to success in a vocational program. The instruments, a student self-rating and a teacher rating form, contained 81 Likert-scale items measuring students' mathematics, communications, interpersonal, and reading skills. Completing the instruments were 18 teachers and 161 students enrolled in one of five different vocational programs in one Minnesota postsecondary vocational school. A concurrent validation research design was used to test the reliability and validity of the ratings, while controlling for type of vocational program, sex of student, and the mathematics and reading aptitude of the student as measured by standardized test scores. While data indicated that both student and teacher ratings of generalizable skills produced high coefficients of internal consistency for all control variables, evidence did not support the concurrent validity of the student and teacher ratings of generalizable skills in relationship to the students' standardized aptitude scores. In addition, the ratings were not sensitive to differences in reading aptitude scores. Recommendations called for further research involving revisions in the instrument and use of different populations. (MN)

Descriptors—\*Career Education, Counselor Training, \*Curriculum Development, \*Disabilities, Elementary Secondary Education, Higher Education, \*Instructional Materials, Mild Disabilities, \*Program Implementation, Severe Disabilities, Student Evaluation, Teacher Education, Visual Aids

Identifiers—Education for all Handicapped Children Act

Although interest in and literature about career education for the handicapped has been growing very rapidly in the last few years, many professionals have been hard pressed to keep pace with the knowledge explosion in the field. This book is intended to aid teachers in acquiring up-to-date knowledge of career education for the handicapped and methods for implementing it in their classrooms. The book can be used in two ways: (1) as a theoretical framework for teacher educators and as a text in preservice and inservice programs; and (2) as a practical framework to show the classroom teacher how to implement career education for the handicapped. The book is divided into three sections. The first section, Theoretical Foundations, covers the concept and the rationale of career education for the handicapped. In the second section, Implementation, curriculum considerations for various degrees of handicapping conditions are dealt with and methods teachers can use to implement career education in the schools are presented. The third section, Issues, includes discussions on selected problems in career education for the handicapped. Each chapter concludes with a bibliography, and materials for use as inservice training handouts or transparencies are included in the appendix. (KC)

Descriptors—Guidelines, Informal Reading Inventories, Instructional Materials, \*Learning Activities, Learning Processes, Material Development, Readability, Reading Diagnosis, \*Reading Improvement, \*Reading Skills, Reading Tests, Secondary Education, \*Skill Development, Standardized Tests, Study Skills, Teaching Methods, Test Construction, Vocabulary, Vocabulary Development, Vocabulary Skills, \*Vocational Education

Designed to help vocational teachers aid students in reading vocational education class materials, this handbook contains six sections of background information and suggested activities geared to various aspects of reading and a section of ideas for use in improving the reading skills of vocational students. While most of the examples in the handbook were derived from industrial mechanics classes, they can be used in any vocational class. The basic reading skills required in vocational programs are listed. Discussed next are using standardized test scores, constructing informal reading inventories (IRIs), choosing reading passages and developing questions, and giving and scoring an IRI. Guidelines are given for assessing the reading level of textbooks. Described next are various methods for teaching vocabulary, including using vocabulary scans, structured overviews, illustrations, glossaries, crossword puzzles, and abbreviations. A guided reading plan overview, instructions for implementing such a plan, and a study guide are presented. Included in a section on study skills are discussions of taking notes; interpreting charts, graphs, and schematics; and using cross references and conversion tables. A holistic approach to learning and whole brain activities are explained. (MN)

Descriptors—\*Adult Education, Age Groups, Blacks, Family Characteristics, Females, \*Graduates, Graduate Study, Graduate Surveys, Higher Education, Males, \*Masters Degrees, Professional Continuing Education, Student Characteristics, Student Educational Objectives, Tables (Data), \*Vocational Followup, Whites

Identifiers—\*University of the District of Columbia

A follow-up study was conducted of graduates of the Masters of Adult Education degree program of the University of the District of Columbia to ascertain their present status and how they feel about their graduate experience. Information obtained by a mailed questionnaire from 205 of the 367 persons who graduated from 1969 through 1979 included the graduates' demographic characteristics, their current employment, their additional educational activities and plans, and how they rated the overall aspects of the adult education program. The respondents were nearly equally divided between men and women, most black, a majority married, their average age 43 years, and a majority concentrated in the area of administration and supervision. Eighty-six percent of the graduates felt that they had achieved their goal for attending the University, which was either (1) preparation for getting an adult education job or entering a new field; or (2) updating or improving skills for a job held at the time. Most of the graduates are employed full time, with 54 percent in educational occupations, and 31 percent in professional, technical, and managerial occupations. Since completing their Masters degree, 10 percent of the respondents have completed an additional degree, 17 percent are working toward an additional degree, and 43 percent will probably pursue another degree in the future; 60 percent of the respondents indicated interest in pursuing a doctoral degree in adult education if it is offered at the University. Respondents rated the program very high, making few suggestions for changes, although some individual suggestions for courses were made. Tables of data are included in the narrative, and the questionnaire is appended. (KC)

Selected Characteristics of New Students Enrolled in the Department of Adult Education, 1980-1981, University of the District of Columbia.

District of Columbia Univ., Washington, D.C. Dept. of Adult Education.

Pub Date—Nov 81

Note—66p; For a related document see CE 030 529.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—\*Adult Education, Adult Students, Age Groups, Blacks, Family Characteristics, Females, \*Graduate Students, \*Higher Education, Males, \*Masters Degrees, Professional Continuing Education, \*Student Characteristics, Student Educational Objectives, Student Needs, Whites

Identifiers—University of the District of Columbia

This study is a continuation of an effort to obtain information concerning the characteristics of new students admitted to the Master of Arts program in the Department of Adult Education of Federal College, University of the District of Columbia. Its purpose was to provide descriptive information, established baseline data for future studies, and to obtain information helpful in making administrative and programmatic decisions concerning new students. The study included all persons (29) admitted as regular students in the adult education program for the summer and fall, 1980, and spring, 1981, terms. Data was obtained from the admissions application form and by a questionnaire designed by the researcher. The results of the study show that most of the new students are black and middle-aged, half are male, about half are married, many have children, and most are part-time students who are employed in some phase of adult education. Other data that emerged included that most students are

first-generation college students whose fathers were either skilled or semi-skilled workers, professional or semi-professional workers, managerial workers, or self-employed. The primary purpose for attending the program was to enable the student to get a new job or enter a new field, and about half of the students expected to pursue a doctoral degree. Students had heard of the program from a variety of sources—most frequently from other students or the university catalog, and some expressed needs for late-afternoon classes. Data from this study compared to a study of the previous year shows some differences, but because of the small numbers studied, no significant trends. The student questionnaire and tables of resultant analyses are appended. (KC)

Arrington, Larry R.

Relationship of Length of Vocational Agriculture Teacher Contract to Supervised Occupational Experience Program Scope and FFA Chapter Activity Level.

Florida Univ., Gainesville. Inst. of Food and Agricultural Sciences.

Pub Date—Dec 81

Note—13p; Paper presented at the National Agricultural Education Research Meeting (Atlanta, GA, December 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Agricultural Education, \*Contracts, Educational Research, High Schools, High School Seniors, \*Program Content, State Surveys, \*Student Organizations, \*Supervised Farm Practice, Teacher Characteristics, Teacher Participation, \*Vocational Education Teachers

Identifiers—Florida, \*Future Farmers of America

A study examined the relationship of length of vocational agriculture teacher contract to supervised occupational experience program scope and Future Farmers of America (FFA) chapter activity level. A questionnaire measuring the activity level of the FFA chapter and soliciting information on various extraneous variables was administered to the entire central Florida vocational agriculture teacher population (56 teachers). A second questionnaire sought information from high school seniors regarding the scope of their supervised occupational experience programs and the number of supervisory teacher visits they received. Also collected were data concerning length of teaching contract and number of years of teaching experience. Based on analyses of these data, it was concluded that there is a positive relationship between supervised occupational experience program scope and the following independent variables: length of teacher contract, teacher having had high school vocational education, percentage of students from rural areas, teacher assistance with fairs, and number of supervisory home visits. The same positive relationship was observed between the above-mentioned independent variables and level of FFA chapter activity. Recommendations include calls for additional similar studies, evaluation of the effects of vocational agriculture summer programs, and longitudinal studies to examine program outcomes. (MN)

Identifiers—Asbestos, Hazardous Materials, Hazards, \*Occupational Safety and Health

This document contains the texts of 10 panel discussions presented at a seminar designed to give the media an opportunity to learn about occupational health problems. Discussed first were protecting the American worker, and disease on the job. Personal testimony on worker health and a case study of the effects of asbestos were presented. Also covered

were reproductive health, places the media can seek information concerning occupational health, cancer in the workplace, the government role in occupational health, and economic and policy issues of regulation. The following agencies and institutions were among those represented in the panel discussions: the U.S. Department of Labor; the University of Illinois; the National Institute for Occupational Safety and Health; the National Institute for Environmental Health Sciences; the Oil, Chemical, and Atomic Workers Union; the United Auto Workers; Mount Sinai School of Medicine; the Occupational Safety and Health Administration; Georgetown University; the American Industrial Health Council; the National Cancer Institute; the Monsanto Company; the Occupational Safety and Health Review Commission; the Shell Oil Company; and the Massachusetts Institute of Technology. Business Law for Business Education Departments in Pennsylvania's Public Schools. Bulletin 290.

Pennsylvania State Dept. of Education, Harrisburg.

Bureau of Vocational and Technical Education.

Pub Date—81

Note—97p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Business, \*Business Education, \*Course Content, \*Course Objectives, \*Educational Objectives, High Schools, Student Educational Objectives, Teaching Guides, \*Teaching Methods, Values Education

Identifiers—\*Business Law, Pennsylvania

This guide is designed to aid high school teachers of business law in Pennsylvania to structure their courses. Specifically, it is intended to help teachers identify and place correct emphasis upon those areas of business law which will most nearly meet the students' needs when they reach adulthood, to help teachers to inculcate in the students the necessity for acceptable social values when dealing with others, and to help teachers explore alternative teaching strategies useful in the presentation of business law in their classes. The guide is organized in nine chapters, and also contains a bibliography of business law books, periodicals, and sources. Topics covered in the teaching guide include the following: philosophy, goals, and objectives of the high school business law course; course content for a semester, year, or mini-course; teaching legal vocabulary; teaching legal fundamentals; teaching law as applied to contracts: contracts dealing with property; laws that govern business relations of individuals; and student and teacher evaluation. Throughout the chapters, teaching suggestions are given, and technical background knowledge needed by teachers is provided. (KC)

Descriptors—Citations (References), Educational Demand, Educational History, Educational Trends, Employment Opportunities, \*Employment Projections, Enrollment Trends, \*Geographic Distribution, Higher Education, History, Labor Needs, \*Labor Supply, \*Nurses, Nurses Aides, \*Nursing Education, Postsecondary Education, Research Methodology, Specialization, Student Characteristics, Tables (Data), Vocational Education, \*Wages

This book, organized in six chapters and a bibliography, presents historical and current statistics and references on the supply of nursing personnel within the United States. Chapter 1 includes a discussion of national estimates of the active nurse supply and the distribution of these nurses by field of practice and by academic preparation. Chapters 2 and 3 focus on state distribution of registered nurses and licensed practical nurses and their characteristics, while chapter 4 depicts historical trends in nursing education. Presented are the number of nurse training programs, students, and graduates over the years. The data are organized in three parts which

include trends in the geographic distribution of registered nursing and practical nursing students admitted to, enrolled in, and graduated from programs of basic nursing education; selected characteristics of these students; and post-RN students in baccalaureate and higher degree programs. Chapter 5 includes data on nursing personnel in various fields. Chapter 6 presents a discussion of four series of registered nurse supply projections to the year 2000. In addition, the chapter also presents two sets of projections for licensed practical nurses from the year 1985 forward. Tabular material is presented for the United States as a whole, with geographic region and state data presented whenever possible. (KC)

Descriptors—Adult Basic Education, Adult Education, Adult Literacy, Competence, Competency Based Teacher Education, \*Educational Needs, Inservice Teacher Education, \*Literacy Education, \*Needs Assessment, Postsecondary Education, Preservice Teacher Education, \*Self Evaluation (Individuals), Teacher Attitudes, Teacher Education, Teaching Skills, Test Construction, Tutoring, \*Tutors, Volunteers, \*Volunteer Training

Identifiers—\*Tutor Self Assessment Inventory (Brown)

A Tutor Self-Assessment Inventory (TSAI) was developed from the literature on reading, adult basic education, literacy education, and comments of professionals in order to provide the volunteer literacy tutor an opportunity to compare his or her self-perceptions regarding tutoring abilities and knowledge to attributes and competencies considered important by experienced volunteer literacy tutors. By using the self-assessment inventory, tutors can identify their strengths and weaknesses and tutor trainers can plan for preservice or inservice education programs to meet their educational needs. Competencies and attributes selected were chosen because of their ability to be taught, their importance in the tutoring situation, or their high rating by volunteer tutors. The TSAI has a stem followed by a series of statements to be rated on a five-point scale. The items are divided into six subsections under two major headings: knowledge and awareness (attributes) and competencies. The TSAI was designed for immediate scoring by the tutor. (The TSAI is contained in the appendix of this document.) (KC)

Identifiers—\*Comprehensive Employment and Training Act, Texas, University of Texas

The University of Texas Pilot Program was operated in five sites in Texas (Abilene, Brownsville, El Paso, Houston, and Temple) to demonstrate the utility of competency-based high school diplomas for Comprehensive Employment and Training Act (CETA) clients. Included among the program features common to all five sites were the following: (1) the roles and functions of individuals, organizations, and agencies involved; (2) initiation of effect by the same University of Texas project staff; (3) cost con-

siderations; (4) adult performance level (APL) materials and competency-based high school diploma (CBHSD) program processes; and (5) problem areas (staff cooperation, insufficient workshop training, inadequate APL materials, staff shortages, staff inflexibility). A number of differences also existed among the various sites with respect to these five areas. Examination of the similarities and differences among the sites resulted in nine recommendations. These included calls to resolve problems resulting from different budget cycles, to delineate responsibility for different elements of the program, to focus on adequate staff training, to develop remedial and supplementary APL materials, and to coordinate tests. (Related reports describing student/client completion results and employer follow-up are available separately—see note.) (MN)

Identifiers—Comprehensive Employment and Training Act, Texas

A study examined the student/client completion of a competency-based high school diploma for CETA clients. Using follow-up forms, attendance records, correspondence, telephone calls, and client information sheets, researchers collected data from clients and staff pertaining to 102 of the 238 program clients from five sites in Texas (Abilene, Brownsville, El Paso, Houston, and Temple). Despite restrictions imposed by the Privacy Act, investigators were able to obtain information concerning 76 program graduates and 26 dropouts. Thirty-seven graduates were working at some time during the 90-day follow-up period. Less than half of them felt that their jobs were directly related to their career goals. Over 90 percent of the graduates surveyed were positive about the program's impact. Follow-up of the 26 dropouts or leavers revealed that those who chose to leave generally did so because their unrealistic expectations led to quick and easy disappointment. (Related reports describing the structural and programmatic features of the pilot project as a model and the employer follow-up are available separately—see note.) (MN)

Identifiers—Comprehensive Employment and Training Act, Texas

A study examined the attitudes of employers who provided jobs for 37 of the graduates and a number

of the dropouts from the University of Texas Competency-Based High School Diploma (CBHSD) Program for Comprehensive Employment and Training Act (CETA) clients that was implemented at five sites in Texas. Because of the restraints imposed on employers by the Privacy Act in giving information on hired graduates, follow-up information was available for only 45 percent of the 238 students/clients served by the program, and only 14 students had near-to-complete reports filed on them. What one can glean from the sparse information submitted by employers to CETA is that 37 graduates (roughly one-third of all graduates) secured some kind of employment. One-third of these worked in offices and less than one-quarter of them entered professional or management slots. In all likelihood, the public sector employers who had provided the bulk of work experience for candidates during the pilot project continued to be the employers for a majority of candidates after they completed components of the CBHSD program. (Related reports describing the structural and programmatic features of the project as a model and its student/client completion results are available separately—see note.) (MN)

Identifiers—North Dakota

This course guide for a transportation course is one of four developed for the energy/power area in the North Dakota senior high industrial arts education program. (Eight other guides are available for two other areas of Industrial Arts—graphic communications and production.) Part 1 provides such introductory information as a definition and instructional objectives for Industrial Arts. Part 2 contains the course rationale and objectives; guidelines for implementation; taxonomic structure; course description including length, credit, prerequisites, and student competencies; suggested instructional units with required number of class periods; and 14 units. Each unit includes some or all of the following material: unit objective(s), topic outline, and selected student competencies to be developed through sample coordinated learning activities. Unit titles are Introduction to Transportation Technology, Early Developments in Transportation, Transportation-Productive System, Classification of Technical System, Terrestrial Mode (Random Route), Terrestrial Mode (Fixed Route), Stationary Conveyance Systems, Marine Modes of Transportation, Space Transportation and Vehicles, Transportation and the Future, Energy and Transportation, Transportation and the Environment, and Occupational Information. A reference list is appended. (YLB)

Descriptors—Allied Health Occupations Education, Curriculum Development, Data Analysis, \*Data Collection, \*Educational Needs, \*Educational Planning, Information Needs, Models, Pilot Projects, Postsecondary Education, Program Descriptions, \*Program Design, \*Program Development, \*Vocational Education

This guide, which derives from planning work at Southeast Community College (Nebraska), is designed to improve the practice of vocational program planning at the postsecondary level. After an overview is provided in the first section, a compilation of seven separate categories is presented which deals with gathering needed information for reviewing new vocational program proposals. The following types of information are suggested to be collected: identification of researchers' implementation date; brief program description; supply/demand data; specific employer needs; future employment opportunities; employer-identified prerequisites; admission requirements; enrollment potential; program design including objectives, structure, impact, and expansion plans; advisory committee construction and other agency involvement; rationale; staffing; facilities; equipment; projected income; budget; and summary comments concerning impact, timing, and justification. An elaborate color-coded participation matrix is presented using eight generic questions with a descriptive scale describing the possible involvement of governments, educational agencies, employers, employees, the general public, and the local school. A planning process model is diagrammatically presented in order to assess a vocational program at any stage of its justification, development, implementation, or operation. An illustration of the process is presented in the development of a program for sonographers. A PERT network is provided which includes events, activities, and time frames. A bibliography of sources, the new program proposal, and a questionnaire for data collection are appended. (BPB)

Clusters, Occupational Therapy Assistants, Patients, Physical Therapy Aides, Physiology, \*Program Design, \*Program Implementation, Secondary Education, Surgical Technicians, Teamwork, Vocational Education

Identifiers—Emergency Medical, \*Oregon

Intended to assist the vocational teacher in designing and implementing a cluster program in health occupations, this guide suggests ideas for teaching the specific knowledge and skills that qualify students for entry-level employment in the health occupations field. The knowledge and skills are applicable to 12 occupations: dental assistant; dental hygienist; dental lab technician; emergency medical technician; medical assistant; medical lab assistant; nursing assistant; nurse, general duty; occupational therapy assistant; physical therapy assistant; respiratory therapist; and surgical technician. The guide is also suitable for preparing students to enter advanced training programs. Section 1, Cluster Organization and Implementation, addresses goal-based planning and provides a proposed cluster curriculum, sample curriculum schedule, descriptions of course content, and current Oregon manpower data. In section 2, Instructional Emphasis Areas, are contained course goals and learning activities for six allied support courses: Human Body Structure and Function, Microbes and Disease, Health Team Relations, Patient Relations, and Health Care Skills I and II. Section 3, Assessment, briefly discusses group and individual approaches. The appendix includes lists of equipment and supplies, resources, and career opportunities; information on Health Occupations Students of America; clinical experience checklist; and occupational analysis data. Part of a five-part package (see note) of training materials to teach interviewing skills to human services personnel, this participant's workbook contains all the forms and training aids that would typically be distributed to the participants during the training session. It includes material needed for the various training exercises that are done during the training session and self-assessment checklists for the material covered. The training program defines the skills that interviewers need to ensure that as much relevant information as possible is exchanged during interviews, and it helps turn these skills into lasting habits. Major topics covered in the first six sections of the workbook include how to motivate clients to show up for interviews, how to prepare for initial interviews, how to listen actively and use body language effectively, and how to use different types of verbal responses to achieve objectives and to encourage self-exploration. The last section of the workbook contains forms for self-assessment on the various interview techniques covered in the training session. (KC)

Descriptors—Adolescents, Adults, \*Employment Programs, \*Expenditures, Federal Legislation, \*Federal Programs, Lobbying, National Organizations, Nonprofit Organizations, \*Organizational Effectiveness, \*Professional Associations, Program Costs, Self Evaluation (Groups)

Identifiers—\*Comprehensive Employment and Training Act, Department of Labor, \*Prime Sponsors

The United States General Accounting Office reviewed prime sponsor use of Comprehensive Employment and Training Act (CETA) funds for activities related to membership organizations. Data was gathered by mailed questionnaires to 474 prime sponsors (89 percent response rate), site visits to national membership organizations, attendance at conferences sponsored by membership organizations, and telephone interviews with CETA-related membership organizations, and Department of Labor officials. The following conclusions were reached from these data. (1) It was determined that CETA's provisions are sufficiently broad to allow prime sponsors to use CETA funds to enter into membership and to pay expenses for activities related to membership organizations. (2) CETA prime sponsors spent \$1.8 million in fiscal year 1979 for activities related to membership organizations. (3) Services provided by membership organizations to prime sponsors include information dissemination, technical assistance, and advocacy. (4) Benefits accruing to CETA prime sponsors from membership organizations include exchange of information, innovative programs, information about budget allocations and regulations, analyses of CETA legislation and policies, provision of a forum for discussion, and staff training. (5) There is no direct evidence that CETA funds were used for lobbying efforts by the membership organizations, although it is possible that they may be indirectly related. Prime sponsors believe expenditures related to membership organizations are justified because the services they provide are worth the cost and are frequently more useful than those provided by the Department of Labor. Identifiers—\*Phoenix Union High School District AZ

The Adult Reading Academy, a federally-funded service of the Phoenix Union High School District, serves native- and foreign-born adult students who are deficient in the basic skills of reading, writing, arithmetic, and oral communication. In 1980/81, the program served 476 students at 17 sites. Approximately 24 percent of the clients served were members of minority groups (principally Spanish-speaking), the elderly, adjudicated youth, pregnant teenagers, or inmates of the women's prison. Student academic success was evaluated by the Wide Range Achievement Test. Three-fourths of the students who were pre- and posttested made the projected gain of one month in grade level per 25 hours of instruction. Many of the students also reported personal success at home and on the job. Inservice training was provided to both paid staff and volunteer staff members, 27 of whom contributed a total of 1417.5 hours to the program during the year. Participant evaluations of the inservice workshops were positive. Two areas of concern, common to many adult basic education programs, were evident during the year: (1) five sites did not attract enough clients, and (2) approximately 20 percent of the students separated from the Academy without stating their reasons for leaving. Staff members reported difficulty in making follow-up contacts. A thorough evaluation of program effects is, therefore, difficult. (Author/KC)

Identifiers—Wisconsin

An August, 1981, conference in Madison, Wisconsin, brought together the state's vocational educators to explore the work-education relationship and where vocational education is going in the next decade. In the first of the four addresses, Dean Bowles, Deputy State Superintendent of Public Instruction, described upcoming challenges for secondary vocational education. These challenges include the decline of high school-age youth in the coming decade, the demand for greater technical expertise, employer needs for more highly technically trained workers, the necessity to provide salable skills to greater percentages of high school youths, and the need for adult vocational education. Following, Harland Samson, Associate Dean, School of Education, at the University of Wisconsin-Madison, outlined issues affecting education and work. He reviewed the current status of vocational education, commented on the possible emergence of the more humane industrial-democracy theory of education against the now-prevailing social efficiency theory, and predicted changes that will take place in vocational education through the year 2000. In the third presentation, Garth Hanson, Associate Professor at the University of Illinois at Carbondale, gives how-to tips and examples that teachers and administrators can use to get publicity for their vocational education programs. Finally, Amanda Smith, Management and Educational Consultant in Sex Equity for North Carolina, presented ideas for building trust between women and men for a more productive work force. (KC)

A Guide for Planning Performance-Based Family Education in Home Economics Education Programs.  
South Carolina State Dept. of Education, Columbia. Office of Vocational Education.  
Pub Date—Jul 80  
Note—271p.  
Pub Type—Guides - Classroom - Teacher (052) —

Guides - Non-Classroom (055)

EDRS Price - MF01/PC11 Plus Postage.  
Descriptors—\*Behavioral Objectives, Child Abuse, Child Neglect, Child Rearing, Competence, \*Competency Based Education, Consumer Education, Divorce, Family (Sociological Unit), Family Financial Resources, \*Family Life, Family Life Education, Family Problems, \*Family Relationship, Family Structure, \*Home Economics, Homemaking Skills, Interpersonal Competence, Interpersonal Relationship, Learning Activities, Learning Modules, Marital Instability, Marriage, Money Management, Nuclear Family, \*Parent-hood Education, Secondary Education, Teaching Guides, Vocational Education

This guide has been developed in order to help secondary teachers to plan a two-level, performance-based semester course on family life. Each of the levels is organized into units based on competencies. Level 1 covers self-understanding, the family in perspective, interpersonal relations, solutions to crises, community resources, and establishing an independent family unit. Level 2 includes decision making to achieve family goals, resources to achieve goals, consumer decisions and family unity, and parenting decisions. Each level course contains an outline of its major competencies and conceptual framework, and a list of resources. For each of the 10 units of the guide, a competency, performance objectives, performance guides (which help the student work toward achievement of the performance objective), and learning experiences are included, along with suggested resources and teacher evaluation activities. Identifiers—Habituation, Vocational Assessment, \*Vocational Technology for Cerebral Palsied Project

A three-year project involving 27 participants was conducted to develop and apply a model vocational rehabilitation service program for cerebral palsied individuals; the project included assessment, work adjustment training, and placement. Included in the project were the following activities: (1) demonstrating a service delivery model of vocational assessment, work adjustment training, and placement for individuals moderately and severely disabled with cerebral palsy; (2) developing and continuing interagency cooperation among rehabilitation agencies, social service agencies, and schools; (3) identifying services essential to vocational adjustment of project clients; (4) exploring the needs of project clients in the areas of job development, post-employment services, and other services designed to enhance the independent functioning of the client in the community; (5) disseminating the Vocational Technology Project's model of task analysis, assessment, work adjustment training, placement, and follow-up of adolescent and adult clients with cerebral palsy; (6) exploring potentials for project refunding or spin-off; and (7) generating and disseminating a final project report. Inasmuch as the project was deemed successful, suggestions were offered to rehabilitation professionals interested in future replication of the program. (The appendices to the report are available separately—see note.) (MN)

Identifiers—Habituation, Michigan, Vocational Assessment, \*Vocational Technology for Cerebral Palsied Project

These 26 appendices to the final report of the Vocational Technology for Cerebral Palsied Individuals Project contain various project-developed forms, assessment instruments, manuals, and bibliographies. Included are project informational literature, news articles, and the project presentation format. Sample intake forms, client referrals, and brief descriptions of project clients are provided. Also reproduced are a sample assessment schedule, assessment tools, a sensory-motor assessment, and a functional change scale. Following sample reports, a workshop supervision manual and a residential attendant manual are provided. Presented next are an employer evaluation, a client's placement record, a job task analysis, a list of conferences attended by project staff, project training manuals and outlines, and a videotape brochure. Among other items appended to the report are listings of facilities in Michigan, occupations for homebound clientele, agency contacts, and student objectives. A placement bibliography, project evaluation information, and regional training information also appear in the appendices. (The final project report is available separately—see note.) (MN)

This guide contains background materials and ideas for vocational education teachers to use in planning learning activities on the metric system for their students. Organized into eight chapters, the book covers the following topics: overview of the metric system; program administration; metrics in agricultural education; in business and distributive education; in health occupations education; in home economics education; and in industrial arts, trade and industrial, and technical education. Each chapter includes an introduction; instructional strategies; standards for metrics in that field; information about tools, instruments, and equipment; sample teaching

activities; and references and resources. The final chapter is an annotated guide to metric learning and teaching. (KC)

Descriptors—\*Adult Basic Education, Agency Cooperation, Cooperative Programs, \*Correctional Education, \*Correctional Institutions, Correctional Rehabilitation, Disabilities, Dropouts, Evening Programs, Individualized Instruction, Peer Teaching, Postsecondary Education, Private Agencies, \*Program Effectiveness, Public Agencies, Reading Programs, Secondary Education, \*State Programs, Tutors, Vocational Education

Identifiers—\*310 Project, \*Missouri

The 310 project is an educational research and demonstration program with learning centers located in five Missouri correctional institutions. These are the Missouri State Penitentiary, the Missouri Intermediate Reformatory, the Missouri Training Center for Men, the Central Missouri Correctional Center, and the Ozark Correctional Center. Manned by a staff of eight teachers, these centers served 896 inmates with more than 12 hours of instruction in 1981. The program focused on low functioning and handicapped adults and vocational curricula. Included in the project were the following key components: a 0-6 grade reading program that used an inmate tutor approach, night school programs, cooperation with private and nonprofit outside agencies, emphasis on techniques that encouraged students to remain in the educational system, and a follow-up system to keep inmates in the educational system when transferred from one institution to another. While the project's basic mission was to serve inmates with less than an eighth grade education, the night programs emphasized a grade 9-12 level of education. The test scores of project participants from each of the five institutions attest to the project's success. (The report on

the project is available separately—see note.) (MN)

This "how-to" manual provides information and specific strategies for vocational educators who want to become involved in the economic development/job creation process. It is especially designed for the novice business and industry liaison or coordinator. Section 1 outlines the economic development and job creation process and emphasizes vocational education's involvement as a service institution to students (potential employees) and employers. Benefits of economic development are presented. Section 2 focuses on planning for economic development. It deals with assessment of economic development models, model descriptions, and identification of models. Strategies for joining the economic development team or putting a team together are presented, along with a profile of a linking agent. Section 3 focuses on planning an industry training program. It includes parts on types of training programs and instructional methods, budgets, contractual agreements, time-lines, task analyses, curriculum and instructional materials, trainee recruitment, equipment, facilities, placement, program and trainee evaluation, and monitoring. Section 4 highlights federal, state, and local sources of funding and technical assistance. Section 5 is an annotated bibliography to 30 resource publications. Appendixes include case studies of 17 model sites, needs survey, summaries of instructional methods, and sample budget and contract. (YLB)

Descriptors—Behavioral Objectives, \*Clothing, \*Clothing Instruction, Competence, Equipment Maintenance, Equipment Utilization, Job Skills, Learning Activities, Learning Modules, \*Manufacturing, \*Needle Trades, \*Occupational Home Economics, Postsecondary Education, Secondary Education, \*Sewing Instruction, Sewing Machine Operators, State Curriculum Guides

Identifiers—Alterationists, Drapery Makers, Upholsterers

Designed to provide individualized, hands-on experience for secondary or postsecondary students in gainful homemaking programs, this occupational clothing curriculum contains eight learning modules. The following topics are covered in the modules: plant production for the needle trades (needle trade structure and operation, terminology, history, equipment/techniques, careers/job availability, labeling); power sewing equipment (teacher maintenance, student use and care); basic industrial sewing techniques (stitching various fabrics and blindstitching); short projects (advanced stitching methods, utilization of basic attachments); needle trade production simulation; drapery making (basics of drapery making, selecting styles, measuring/cutting, constructing pleated drapes); recreational vehicle upholstery (box cushion construction, cord-

ing and zipper insertion techniques); and alterations (occupations in alterations, basic alteration procedures, determination of preparations that are possible in changing the dimensions of commercial garments). Following an initial listing of competencies taught in the given module, each module includes learning activities, worksheets, and performance checklists. A module evaluation form is appended. (MN)

Descriptors—\*Adult Education, \*Adult Learning, Adults, Annual Reports, Educational Finance, \*Educational Planning, \*Educational Policy, Educational Trends, \*Federal Legislation, Federal Programs, Futures (of Society), Policy Formation, Postsecondary Education, Public Policy, Tables (Data)

Identifiers—Adult Education Act 1978, \*National Advisory Council on Adult Education

This report covers the Council on Adult Education's operation from September 1979 to December 30, 1980. The report outlines the annual activities, describes the Council's program, and gives a status report on the process developed to obtain input on the development of recommendations for the reauthorization of the Adult Education Act, which expires in 1983. During the period of time that this report covers, the Council completed recommendations on the organizational structure of the Office of Assistant Secretary for Vocational and Adult Education in the Department of Education, and published three extensive reports which will serve as basic references as the new Administration and the Congress formulate a federal policy relating to adult learners. A major part of the annual report is devoted to a preview paper on adult learning programs. In this paper, the Council notes that we know that most adult learning is self-directed and often done independently of structured educational institutions, and that adult education activities and adult earning opportunities are increasing. Under these conditions, the paper suggests ways in which organizational changes might enable the federal government to accomplish more than it now does with existing educational programs. The paper encourages linkages and cooperation that may be facilitated by organization charts and job descriptions, but depends, in the final analysis, upon the leadership at the top and the good will and common sense of the rest of those involved. The annual report also addresses the issue of administrative costs for adult education and makes recommendations for use of funds. (KC)

Descriptors—\*Adult Basic Education, Adult Education, Basic Skills, \*Educational Needs, \*Educational Planning, Enrollment Influences, \*High School Equivalency Programs, Marketing, Minority Groups, Needs Assessment, Older Adults, Program Development, \*Program Improvement, Vocational Education, Young Adults

Identifiers—\*Wisconsin

This study was conducted to assess the educational needs of Wisconsin adults aged 16 years and older who had not graduated from and were not attending high school or had not received a high school equivalency credential. The project staff interviewed 1,680 Wisconsin residents who met these criteria by telephone, using computerized random digit dialing. Results were compiled in the form of frequency analysis and cross tabulations. The fol-

lowing conclusions were reached, with recommendations for adult basic education (ABE) programming to meet the needs uncovered. (1) Persons in the 16-25-year-olds age range are the most cost effective target for ABE recruitment and programming; however, competing demands on their time make flexible scheduling, innovative approaches, and televised instruction a wise course. (2) Teachers should understand the needs of 16-25-year-olds; and more emphasis should be placed on preparation for high school equivalency. (3) The needs of older adults might be met through association with churches. (4) ABE's concentration on basic skills is needed and should continue. (5) The ABE program should make greater use of family and friends to teach persons who need the skills. (6) Newspapers, magazines, and books should be used as instructional materials. (7) Instructional units in the completion of various forms should be used. (8) Marketing of the program will have to become more selective and more sophisticated. (9) Special needs of minority groups will have to be met in increasing numbers. (10) ABE programs should be integrated into other adult educational activities and with vocational programs to better serve the population's needs. (KC)

Identifiers—\*Agricultural Marketing, Commodity Futures

Designed for use in farm business management adult programs, this marketing curriculum includes six teaching lessons and professional staff products. The following topics are covered in the lessons: introduction to marketing; interpretation of price/demand/supply cycles and fundamental outlook trends (carryover/projections/disappearance); farmers' marketing alternatives to the cash grain market; using the futures market and understanding the function of the commodity exchanges; farmers' marketing alternatives using the futures market for hedging; and factors to consider in reaching a marketing (selling) decision. Also included is a special assignment dealing with development of a written marketing plan. Each unit contains sections on student objectives; transitions between units; the lesson itself (including attention focusers, suggested teaching strategies, key questions, and learning activities); a summary; an at-the-farm activity; lists of needed learning resources; references; and visuals for the curriculum. Also appended to the curriculum are a variety of charts, tables, problems, and handouts. (MN)

Identifiers—\*Interdisciplinary Cooperative Educ Curric Manual

A field test examined the validity of the "Interdisciplinary Cooperative Education Curriculum Manual." (Among those topics covered in the

manual are the following: vocational student organizations, leadership, civic responsibility, health and safety, human relations, communications, resource management, consumer skills, consumer law, career planning, job search strategies, and arithmetic.) Twenty-six Oklahoma vocational, agriculture, and home economics teachers submitted between one and no units each (a total of 116 units), representing the work of 590 students. In addition, instructors provided comments on the units and suggested changes in them. Item analyses were made on the tests, including frequency counts of the number of correct answers and the percentage of students having a correct answer on a given item. Identification was made of those concepts on which 20 percent or more of the students were not achieving. Because over one-half of the units fell below the arbitrarily set standard of 80 percent, the manual warrants further study to determine what weaknesses exist—whether in the presentation of the concepts as written or as taught or in the students' inability to comprehend the more abstract concepts. (Teacher comments on the manual and item-by-item test results are included.) (MN)

This core curriculum contains five units of material for teaching energy to vocational agriculture students. Energy uses and the benefits of energy conservation are covered in a unit on the impact of energy on agriculture. Discussed next are tractor performance and Nebraska tractor test data for selecting and evaluating tractors for maximum fuel efficiency. Proper ballasting of a tractor as well as operational procedures such as proper matching of tillage equipment to the tractor, gearing up and throttling down, and minimized idling are covered in a unit dealing with tractor operation for maximum fuel efficiency. Addressed next are the following topics: terms related to petrochemical energy use in agriculture, recognizing the amounts of energy these represent, various practices in the use of petrochemicals, and alternatives to their use in farming. Grain production, harvesting, handling, and storage practices that save energy are examined. Included in each unit are a terminal objective; specific objectives; suggested activities; instructional materials (objectives, information sheets, and transparency masters); a unit test; and test answers. (A related core curriculum for teaching metrics to vocational students is available separately—see note.) (MN)

Identifiers—Liquids, Solids, Velocity, Volume

(Mathematics)

This core curriculum contains five units for use in teaching metrics to vocational students. Included in the first unit are a series of learning activities to familiarize students with the terminology of metrics, including the prefixes and their values. Measures of distance and speed are covered. Discussed next are measures of volume used with solids and liquids. Terminology of metric weight and mass measurement as well as conversion to the metric system from the American standard system are addressed in a series of activities. The final unit consists of exercises to enable students to relate temperature scales to one another. Included in each unit are a terminal objective, specific objectives, suggested activities, a listing of instructional materials provided, references, information sheets, student handouts, unit tests, and test answers. (A related basic core curriculum for teaching energy to vocational agriculture students is available separately—see note.) (MN)

Identifiers—Behavioral Expectations Scale, Wisconsin

This document is a kit for conducting a program of performance appraisal for first line supervisors (such as department chairpersons) in instructional departments in two-year colleges. It was developed for use in selected postsecondary technical insti-

tutes in Wisconsin, but could be used in nontechnical settings. The first three sections of the loose-leaf manual trace the development of the individual Staff Development Portfolio and provide background information through related literature about the need for appraisal and staff development. The fourth section of the manual is the Individual Staff Development Portfolio. It contains information on how to conduct the performance appraisal meeting, how to use the Individual Staff Development Portfolio, worksheets to conduct the performance appraisal, rating sheets describing various ratings that could be applied to an individual, and notes for in-service information for the evaluator of the first-line supervisor. The performance appraisal is based on management by objectives and behavior expectancy scales (BES). In the fifth section of the kit, terms are defined. Following next are appendices containing examples of the use of management by objectives and behavior expectancy scales and a short summary of the development of the portfolio. (KC)

Identifiers—Autonomy (Personal), \*Career Anchors Model

Created by Dr. Edgar Schein of the Massachusetts Institute of Technology (MIT), the career anchor model suggests that certain motivational/talent/value drives, formed through work experience, function to guide and constrain entire careers; and that such anchors are the source of stability that permits growth and change in other areas. The concept of a career anchor, which focuses not only on what the person wants or thinks is important, but also on what the individual feels he or she is good at, emerged directly from a longitudinal study of a representative group of 44 MIT Management School male graduates who completed their graduate work in the early 1960s. Emerging from interviews with these graduates were the following five career anchors: security, technical/functional competence, managerial competence, creativity, and autonomy. The typology of career anchors plays a significant role as organizations begin to focus on human resource planning and development. Organizational and individual needs cannot be matched without more knowledge about individual life cycles and the interaction of self, family, and career development; the nature of organizational career dynamics; and the interaction of individual and organization. Since the career anchor model may provide a structure for understanding the human component in educational systems, it may help teachers plan their careers better and thus help to alleviate teacher burnout. A useful, values-oriented human resource development (HRD) program evaluation approach is one that is empirical with its orientation derived from a

social/technical perspective. The optimum mix between the technical skills of evaluation and the required social skills of evaluation delivery is crucial for the quality assurance process. The core to this approach is grounded in the interrelationship of three continua: (1) the general context of training, education, and development; (2) time dimensions; and (3) action components such as source, types, and collection methods for data. The most critical dimension of the socio-technical continuum approach is time. A general framework can be provided to indicate the initial considerations and the immediate, intermediate, and long-term positions. The direction for evaluation design and understanding of evaluation results should be considered under the initial considerations area by means of evaluation issues, participant and management expectations, and the projected results on future decision-making. The day-to-day development and management of quality assurance tasks focus on the levels of information, sources of data, and methods of collecting data. Evaluating the evaluation can be achieved through the following technical and social components: reliability, validity, utility, credibility, and feasibility. This type of analysis links evaluation to planning and thus to recycling and feedback while also blending judgment with objective evidence. (A 16-item reference section is included.) (BPB)

Descriptors—Adult Education, Adults, Community Education, \*Conservation Education, Disadvantaged, Economically Disadvantaged, Educationally Disadvantaged, \*Energy Conservation, \*Extension Education, \*Fuel Consumption, Heating, \*Low Income, Low Income Counties, Low Income Groups, Outcomes of Education, Postsecondary Education, \*Program Effectiveness, Rural Areas

Identifiers—\*Energy Education, Oklahoma (Choctaw County)

The Oklahoma State University Cooperative Extension and the Oklahoma Department of Energy conducted a special project to deliver energy education to limited income families in rural Choctaw County. The project, conducted between September 1 and November 30, 1980, was designed to deliver energy conservation practices, increase comfort, decrease energy loss, and control utility costs for the families. Eight paraprofessionals were trained to teach energy efficient housing structure modifications and changes in living habits or behavior that would reduce household energy use to 788 families (1,943 people). Data collected confirmed the limited income status of the families: 86 percent had incomes below \$12,000; 44 percent were headed by persons aged 62 and over; and 46 percent had eight years or less of education. A pre- and post-project survey of household knowledge of energy conservation and of structural and behavioral practices showed that the project had the following results: (1) the people involved increased their knowledge and skills; (2) the participants know enough to reapply their knowledge and skills in future years; (3) scarce resources (money and energy) were extended or conserved for both households and society; and (4) using paraprofessionals to teach the families is a successful model; families were motivated to change behavior; treatments affected change in knowledge and structural and behavioral conditions. It was recommended that the results of the project be considered when planning energy education programs to reach limited income clientele. (KC)

Identifiers—\*Peace Corps

Projects, operations, and future plans are covered in this annual report for the second year of the Peace Corps. The first section looks at the Peace Corps in action in Africa, Latin America, the Far East, the Near East, and South Asia. Brief descriptions are provided in the second section of programs in eight host countries: El Salvador, Ghana, Philippines, Togo, Nepal, Tanganyika, North Borneo/Sarawak, and Colombia. A section on operations considers recruitment, selection, and training of volunteers; operations overseas; and staffing for overseas service. Section 4 discusses new developments that represent improvements upon past procedures and practices, including educational television, lawyers for Africa, training counterparts in the United States, Gabon construction project, orientation for staff wives, volunteer conferences, other nations' Peace Corps, and returning volunteers. Other sections focus on the budget, unsolicited opinions from the press, and research, evaluation, and the medical programs. (YLB)

Identifiers—\*Peace Corps

Projects, operations, and future plans are covered in this annual report for the third year of the Peace Corps. An introduction comments on returning volunteers and presents regional maps with tables for Latin America, Africa, Near East and South Asia, and Far East. Section 1 contains letters and reports from volunteers in Peru, Ivory Coast, Nepal, Pakistan, Bolivia, and Thailand, as well as excerpts from letters written by people in nine host countries. In the next section crisis situations are described that the Peace Corps encountered in the Dominican Republic, Bolivia, Cyprus, Panama, and Tanganyika. Section 4 describes novel approaches to recruiting, training, administration, and overseas programming. The next two sections discuss other nations' Peace Corps and the budget. Returning volunteers as a resource are the focus of the final section. (YLB)

Identifiers—\*Peace Corps

Projects, operations, and future plans are covered in this annual report for the fourth year of the Peace Corps. An introduction overviews successes and failures and the Conference of Returned Volunteers. Section 2 presents regional maps with tables for Latin America, Near East and South Asia, Far East,

and Africa. A description of the Peace Corps program in Afghanistan is then presented to provide a capsule of Peace Corps history to date. Section 4 describes new approaches or improvements in training, recruiting, and programming. Budget information is provided in section 5. Section 6 discusses the Peace Corps in Sabah. Section 7 summarizes in tables statistics and activities of returned volunteers, describes the Conference on the Returned Peace Corps Volunteer, and reprints communications from former Volunteers. The report concludes with an overview of the Peace Corps program in the Dominican Republic. (YLB)

Identifiers—\*Peace Corps

Projects, operations, and future plans are covered in this annual report for the tenth year of the Peace Corps. An overview focuses on Peace Corps success in providing technical assistance to aid development plans for the seventies and in responding to local needs as well as on its failures. The next section considers the Peace Corps response to the New Directions policies, including providing volunteers who are specialists with demand skills; recruiting families; improving recruitment procedures such as use of intern programs; altering training to prepare volunteers more specifically for their assignments; and changing in-country administration to provide for greater partnership and cooperation. The Peace Corps involvement with the United Nations Corps of Volunteers and other international volunteer undertakings is also described. Other topics briefly commented on are activities of returned volunteers, budget, and outlook for the next year. (YLB)

In this report are described projects and activities undertaken by ACTION's seven volunteer programs in 1972. After an introduction that overviews the year in general, a discussion of International Organizations gives an account of Peace Corps activities in Africa, Latin America, and North Africa, Near East, Asia, and the Pacific. The next section describes programs under the responsibility of the Office of Domestic and Anti-Poverty Operations: Vista, Older Americans Volunteer Programs, SCORE, and ACE. Regional program reports are provided for the 10 regions of the Domestic Operations programs. Responsibilities and/or accomplishments of these other offices are also reported: Administration and Finance, Citizens Placement, Congressional Affairs, General Counsel, Minority Affairs, Program and Policy Development, Public Affairs, Staff Placement and Training, and Voluntary Act Liaison. State summaries of active volunteers are provided for VISTA, University Year for ACTION, Retired Senior Volunteer Program, Foster Grandparents, and Service Corps of Retired Executives/Active Corps of Executives. Identifiers—\*ACTION (Agency), Peace Corps

In this report are described projects and activities undertaken by ACTION's volunteer programs in 1977. The first section concentrates on reviews conducted, including a major review of ACTION's domestic volunteer programs and the management systems supporting them and an assessment of its programs using the Zero-Base Budget approach called for by President Carter. Peace Corps activities are then reviewed for these regions: North Africa, Near East, Asia, the Pacific; Latin America, and Africa. Charts summarize (1) basic human

needs of the host countries and the number of volunteers serving them, (2) volunteers serving in all host countries from 1962-77, (3) education and age profile of volunteers and trainees, and (4) Peace Corps budget. A section on domestic volunteer programs describes activities of VISTA, University Year for ACTION, Youth Challenge Program, National Student Volunteer Program, and Older Americans Volunteer Programs. Activities of support offices are then overviewed. The report concludes with descriptions of some new ACTION projects, including these: Zero-Base Paperwork, Johnston Flood Relief, Former Volunteer, Personal Representative Service System, Fixed Income Counseling, Women's Program, and Workplace Democracy. Appropriate tables supplement content. (YLB)

Identifiers—\*ACTION (Agency), Peace Corps

In this report are described projects and activities undertaken by ACTION's volunteer programs in 1978. The introduction notes a continued growth in programs and comments on new developments. Older American Volunteer Programs are discussed in the next section, specifically the Retired Senior Volunteer Program, Foster Grandparent Program, and Senior Companion Program. The next three topics considered are VISTA, the three service-learning programs for youth (National Student Volunteer Program, University Year for ACTION, Youth Challenge Program), and special initiatives introduced in 1978 in such areas as youth unemployment, aging, small farmer, crime, family violence, energy, and urban problems. The section on the Peace Corps summarizes by country, programs and activities in Africa, Latin America, and North Africa, Near East, Asia, and the Pacific. Activities and changes within support offices are then described. Appropriate tables, charts, and maps supplement content. (YLB)

Identifiers—\*ACTION (Agency), Peace Corps

In this report are described projects and activities undertaken by ACTION's volunteer programs in 1979. A foreword comments on ACTION's achievements and response to national priorities. Activities of Older American Volunteer Programs are discussed in the next section, specifically those of the Retired Senior Volunteer Program, Foster Grandparent Program, and Senior Companion Program. The next section focuses on project areas pursued by VISTA, including programs of the National Center for Service-Learning. Discussion regarding the Peace Corps looks at new directions in 1979, the Office of Programming and Training Coordination, the Information Collection Exchange, and Women in Development projects. Accounts are also given by country, of Peace Corps activities in the regions of Africa, Latin America, and North Africa, Near East, Asia, and the Pacific. A section on the Office of Voluntary Citizen Participation describes activities of its components, including Former Volunteer Services, Peace Corps Partnership, Domestic Development Service, and special projects. Activities

and changes within support offices are then described. Appropriate tables, charts, and maps supplement content. (YLB)

Identifiers—\*ACTION (Agency), Peace Corps

In this report are described projects and activities undertaken by ACTION's volunteer programs in 1980. A section on VISTA highlights programs in major emphasis areas (energy, independent living, youth employment) and comments on budget, projects promoting self-reliance and cooperative efforts, and the national grants program. Discussion of the National Center for Service Learning focuses on the University Year for ACTION (UYA) program, research, and the UYA education study. Activities of Older American Volunteer Programs are discussed in the next section, specifically those of the Foster Grandparent Program, Retired Senior Volunteer Program, and Senior Companion Program. The eight ongoing programs and four special projects managed by the Office of Voluntary Citizen Participation are then described. Discussion of the Peace Corps concerns projects in 1980, major developments, and activities in the regions of Africa, Latin America and Caribbean, and North Africa, Near East, Asia, and the Pacific. Two countries are highlighted in each region. Peace Corps programming and training are discussed in terms of basic needs and specific volunteer training models. Other Peace Corps activities discussed are Women in Development, training, and Information Collection and Exchange. Activities and changes within support offices are then described. Appropriate tables supplement content. (YLB)

Descriptors—Change, \*Educational Change, Educational Needs, Educational Planning, \*Education Work Relationship, Employment Patterns, \*Futures (of Society), \*Job Training, Labor Force Development, \*Labor Needs, Long Range Planning, School Business Relationship, Technological Advancement, \*Vocational Education

Vocational education in America has attempted to be the bridge between education and work. The Comprehensive Employment and Training Act (CETA), an example of such a bridge, provides for remedial education in basic skills for training disadvantaged youths and young adults who had not been successful in the educational system. The context of skilled workforce preparation is changing. National changes such as the philosophy of the Reagan administration and its goals, the acceleration of technological change and demographic change, will affect the interface between education and work. The developments may affect the interaction of education and work in the following ways: (1) expansion of career development programs; (2) re-emphasis on the study of mathematics and science; (3) more emphasis on postsecondary technical education with equipment sharing with industry; (4) increased demand for industry training utilizing a teacher-worker exchange; (5) increase in cooperative education; (6) training trust funds negotiated by labor unions; (7) increase of vocational education in rural areas; and (8) expansion of special needs programs. Combined with labor union willingness to build retraining into industry-wide con-

tracts, this represents the opportunity to redefine education and work, or rather to rationalize all of the disconnected pieces into a reasonably smooth continuum. (BPB)

**Displaced Homemakers Research Project. Final Report.**

Employment Training and Educational Services, Inc., Bluffton, Ind.; Fort Wayne Women's Bureau, Inc., Ind.

Spons Agency—Indiana State Office of Occupational Development, Indianapolis.

Pub Date—Sep 81

Note—266p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC11 Plus Postage.

Descriptors—Adult Education, \*Agency Cooperation, Coordination, \*Delivery Systems, \*Displaced Homemakers, Educational Research, \*Individual Characteristics, Interviews, Job Training, \*Needs Assessment, \*Program Effectiveness, Program Evaluation, Surveys, Vocational Education, Workshops

Identifiers—\*Indiana, Linkage

An Indiana study was conducted to research adequacy of employment and training programs to displaced homemakers, assess characteristics of displaced homemakers, assess effectiveness of past and current programs, and make recommendations. Information on characteristics of displaced homemakers was gained from 280 respondents at six workshops, 146 respondents to demographic data sheets, and personal interviews completed by 49 displaced homemakers. Twenty-four interviews with community agencies and 15 linkage interviews provided data on programmatic needs, services presently provided, duplications and gaps in services, linkages, and barriers to linkages. Findings indicated that existing training and employment services were adequate but potential participants were not served due to lack of programs in many areas of the state or non-eligibility. The typical displaced homemaker was over 35 and white, had no more than a twelfth grade education, earned less than \$5000, and was unskilled or semi-skilled and currently unemployed. In 1980-81 there were seven programs in Indiana. Recommendations included an improved image for vocational education, definition for and means to identify the displaced homemaker, visible coordinating mechanisms for services, and continuance of programs and the role of Comprehensive Employment and Training Act in the programs. (Appendices include instruments, workshop materials, dissemination report, and bibliography.) (YLB)

Descriptors—Continuing Education, \*Human Services, Inservice Education, \*Needs Assessment, \*Professional Training, Program Descriptions, \*Program Design, \*Program Evaluation, \*Training

Needs assessment, program design, and evaluation are presented in a series of 12 papers for trainers, educators, and practitioners interested in training for human service practice. Needs assessment is discussed in terms of direct interpersonal approaches; indirect interpersonal approaches; and social indicator approaches. Weaknesses of needs assessment are identified and discussed in terms of lack of clear-cut definitions, interpreting and weighting data collected, lack of well defined training competency hierarchies, and the difficulty of extracting useful information on the existing knowledge and sophistication within the target population. Included in this section are two papers describing needs assessments undertaken in a mental health center and with service providers in gerontology. Program design is reviewed with specific attention paid to size, purpose, economy, and the sociopolitical environment. Seven papers follow that report on large scale training programs, a program that utilizes telecommunication satellites, a

state-wide inservice program for social workers, a rural rape crisis program, a community college-based program, and a description on how to use information science in design. A background to the evaluation of training programs in human services is provided. Included in this section are three papers that address issues related to evaluation of training effectiveness. To assess the changing lifestyles, values, and preferences of American youth, measures of drug use, interrelationships among such measures, and their relationships to other variables were investigated in a nationwide survey of 1978 high school seniors. Students reported their use of cigarettes, alcohol, marijuana and 10 other categories of drugs during their lifetime, the past year, and the past 30 days. The data revealed that reported use during the past 30 days was systematically higher than predictions based on reported use during the past year, suggesting that self-reports for use during the past year substantially underestimated the frequency of use. Composite measures of drug use were subsequently developed to combine information about lifetime, annual, and 30-day use. The results indicate that the composite measures are well-suited for correlational analyses with a variety of other dimensions and can generally be used in place of the set of three separate measures (lifetime, annual, monthly) for each drug. Descriptors—\*Behavior Patterns, Drinking, Drug Abuse, \*Drug Use, High School Seniors, \*Illegal Drug Use, Marihuana, National Surveys, \*Research Methodology, \*Research Problems, Secondary Education, \*Self Evaluation (Individuals), Smoking

Due to certain inconsistencies between students' reports of monthly versus yearly drug use, further analyses of self-reported drug use by high school senior classes of 1976-1979 were conducted. Previous reports of drug use frequency during the past month were roughly three times larger than estimates based on usage reports during the past year, a consistent phenomenon for alcohol, marijuana and 10 other categories of illicit drugs. The results suggest four possible explanations of this phenomenon, including forgetting, "telescoping," developmental trends, or "senioritis." Self-reports of drug use may be, in many cases, systematically underreported; however, analyses of trends are likely to be valid because any biases are likely to be fairly constant from year to year. James, Richard. Warbington, Kathleen. Behavioral Prescribing by the Numbers: A Manual for Educators Who Work with Problem Students.

Memphis State Univ., Tenn.; Mid-South Teacher Corps, Memphis, Tenn.

Pub Date—25 Jun 80

Note—51p.

Pub Type—Guides - Classroom - Learner (051) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—\*Behavior Modification, Behavior Problems, Data Collection, Elementary Secondary Education, Evaluation Criteria, \*Individualized Programs, \*Inservice Teacher Education, \*Performance Contracts, Reinforcement, \*Remedial Programs, Student Adjustment, \*Student Problems

This manual describes a systematic approach, behavioral prescribing, for dealing with student problem behaviors. Aspects of the behavioral prescribing process are described, including: (1) enlisting the support of parents and teachers; (2) deciding on the problem behaviors; (3) collecting baseline data; (4) building a reinforcement schedule; (5) contracting agreements between problem students, teachers, parents, and classmates; and (6) assessing behavior change. This manual also describes teacher training needs in terms of behavioral prescribing, with suggestions for training approaches and resources. Additionally, basic listening skills training and behavior management skills training for teachers are stressed. (RC)

Descriptors—\*Childhood Needs, Community Involvement, Community Programs, \*Cooperation, Helping Relationship, Models, Need Gratification, Parent Participation, \*Parent School Relationship, \*Program Implementation, \*School Community Programs, \*School Community Relationship, Social Problems, Social Responsibility

The School Community Involvement System (SCIS) is presented as a model community program that encourages educators, parents and community members to work together to meet the needs of children and society. This model is intended as a comprehensive systematic program for community involvement and communication in the school experience, as well as a guide for principals and faculties in developing or upgrading community involvement programs. The rationale for parent and community involvement in the schools is discussed, various levels of involvement are described, and parental rights to information and influence are explained. The goal of SCIS is described as the development of a true community school with three major components: (1) a community advisory council; (2) an involvement program (school-based); and (3) an involvement support system (community-based). Personnel needed and services provided by each component are detailed along with four alternative procedures for implementation of a SCIS program. (NRB)

The elderly make up 11% of the total population of the United States, and senior citizens, particularly those aged 75 and over, are the fastest growing group in the country. Although one-fourth of the federal budget is allotted to their support, many older persons have difficulty in gaining access to the programs designed for their benefit. The elderly comprise a disproportionate share of all poor households as financial problems of the retirement system continue to grow. Currently plans to coordinate government programs and improve the method of financing the retirement system are receiving increased attention. Financing Social Security from general revenue funds or with actuarial reserves are two possible alternatives to the present pay-as-you-go system. Health care is also of concern to policymakers, as long-term needs of the chronically ill elderly must be considered. New program initiatives should emphasize homemaker services, geriatric day care, and compensations for families that support elderly relatives. The strengthening of informal relationships among the elderly, their families, friends, community groups, private organizations, and government at state, local, and federal levels is also necessary. Descriptors—Divorce, \*Employed Women, \*Females, Labor Force, \*Marital Status, Predictor Variables, Role Perception, Sex Differences, Sex Role, \*Social Change, \*Social Influences, \*Suicide

Identifiers—\*Anomie Theory

Previous studies by Newman, Whittemore, and Newman (NWN) reported that between the years 1959 and 1963 and the years 1962 and 1967, percentages of women in the labor force increased as well as suicide rates. The role of women in the labor force was indicative of anomie, which correlated with suicide. The relationship between working women and suicide has changed along with societal changes. A replication of these studies was attempted using data from 597 suicide cases occurring in the years 1967-1973. Specifically, the dependent variables from the NWN studies and two new variables, percent married and percent divorced, were examined. Results showed that race, housing, and income were significant predictors. Age, the weakest predictor in the NWN studies, was now a significant predictor of suicide rate. The variable, "women in the labor force," was not a significant predictor in the replication study. An analysis of the variables, "percent married" and "percent divorced," using sex-specific suicide rates concluded that male suicide rates correlated positively with the divorce rate, while female suicide rates correlated positively with the marriage rate. The existing social and political situations of the three time periods may help to explain the findings. (NRB)

## \*Student Behavior

Identifiers—\*Cliques

Research indicates substantial evidence that, compared with competition, cooperation increases mutual friendliness and contact between individuals. The effects of cooperative and competitive experiences on the structure of student cliques in the classroom were examined. Seven classrooms of fourth-, fifth-, and sixth-grade students (N=117) were randomly assigned to cooperative group learning, competitive group learning, or control learning treatments for a six-week program. Following the program, student relationships were measured using two sociometric questions. Students also completed the State-Trait Anxiety Inventory for Children and the Social Behavior Scale. Results showed that cooperative groups decreased the average clique size, while competitive experiences enlarged pre-existing cliques. Both treatments increased mean student prestige, increased the tendencies of students to occupy broker network roles, and reduced isolate network roles. The results suggest that the increased opportunities for student interaction in the classroom provided by both group treatments increase relationships among individuals, but that cooperative and competitive goal structures have opposite effects on peer clique structures. (Author/NRB)

Descriptors—\*Career Choice, \*Career Development, College Students, Decision Making, Evaluation, Higher Education, Influences, \*Interest Inventories, Interest Research, \*Majors (Students), \*Measurement Objectives, \*Test Theory

Interest inventories have been used extensively in high schools and universities to help students make career choices. To determine whether interest inventories aid students with their career development toward their college major and occupational choice, students were assigned to one of six interest inventory groups: Strong-Campbell (N=44); Kuder DD (N=44); Jackson JVIS (N=45); College Major Card Sort (N=54); Control I (N=42); and Control II (N=41). The students completed the Career Development Survey to assess their levels of development toward their college major and occupational choices. One control group received a pre-test and a post-test to check the reliability of the instrument and to assess the effect of a pre-test on the post-test. Significant differences occurred between the freshmen, sophomores, juniors, and seniors; however, no significant differences existed between the sexes. The interest inventory groups had slightly higher means; however, no significant differences existed between the six groups. The findings suggest that interest inventories may not aid students toward their career choices as much as is assumed. (Author/NRB)

Descriptors—\*Academic Achievement, Adjustment (to Environment), Age Differences, Attitudes, \*Coping, \*Cross Cultural Studies, Elementary Secondary Education, Motivation, \*Peer Evaluation, Sex Differences, \*Student Adjustment, \*Student Behavior, Students

The study of coping may lead to a better understanding of how children develop adaptive or maladaptive behaviors. Cross-cultural studies were conducted in 1965 and in 1968 with 10- and 14-year-old children from Brazil, England, Italy, Japan, Mexico, West Germany, Yugoslavia, and the

United States. Attributes of attitudes, motivation, and coping behaviors were measured using the Behavior Rating Scale (BRS), a peer-rated index of coping behavior. A combination of coping and motivation measures showed greater power to explain school achievement than any previous noncognitive measures; the BRS was one of the best predictors of school achievement. Results from the two United States samples found that all BRS items, except for anxiety and aggression correlated highly with the children's grade point average. The findings indicate that children's peers are good judges of their peers' coping abilities with school situations and classroom achievement, and that the BRS is a valid measure of the effectiveness of children's classroom coping behaviors. Descriptors—Behavior Patterns, \*Drug Abuse, \*Illegal Drug Use, Marijuana, \*National Surveys, \*Regional Characteristics, \*Rural Population, \*Rural Urban Differences, Sociocultural Patterns, Trend Analysis

A household survey of 3,253 rural persons, conducted as part of the 1979 National Survey on Drug Abuse, focused on comparisons between rural and non-rural drug usage patterns. The findings indicated that rates of illicit drug use in rural areas increased through the 1970's and that rural/non-rural differences in illicit drug use declined. Rural and non-rural users of illicit drugs resembled each other demographically; age, education, and gender were associated with illicit drug use in the same ways in both types of areas. Rural and non-rural residents began using illicit drugs at approximately the same age. More than half of the rural young adults (age 18-25) and more than one-fourth of the rural youth (age 12-17) had used marijuana at least once; of the two groups, half were current users, i.e., they had used marijuana within the month prior to the interview. Rural/non-rural differences were much more noticeable in the South and North Central regions; in contrast, rural and non-rural areas in the West and Northeast showed much smaller differences. The findings suggest that the emergence of drug abuse in rural areas may be related to variations in the rural environment. (Author/NRB)

Descriptors—Child Advocacy, \*Child Welfare, \*Court Litigation, Court Role, \*Divorce, \*Family Problems, Government Role, Hearings, One Parent Family, Parent Child Relationship, \*Parent Role

Identifiers—\*Congress 96th, \*Parent Kidnaping This record of a Congressional subcommittee hearing on parental kidnapping begins with an introduction to the problems of approximately 25,000 children, who are abducted each year by a parent in violation of child custody and visitation court orders following divorce proceedings. Various legal technicalities are noted, including that parents are exempt from criminal prosecution under the federal kidnapping statute, i.e., when a parent kidnaps a child and takes him/her to another state, that state is not bound by the child custody decree issued in

the first state. Several Congressional members introduce legislation to combat the problem of child snatching and describe experiences of their constituents who were victimized by child snatching. Testimony is provided by a panel of witnesses, comprised of members of Children's Rights Inc., a non-profit organization addressing the problems of child snatching as well as parents of kidnapped children. The motives of parental kidnappers are explored, dangers to the children are discussed, FBI involvement in cases is considered, and changes in legislation are suggested. Statements from representatives from the Department of Justice, the FBI, and the Department of Health and Human Services are also included in the appendix. (NRB)

Identifiers—\*Family Violence

This handbook contains descriptions of information about specific federal programs that provide services for victims of domestic violence, and of federal agencies that have the potential to develop related projects and programs. Based primarily on information obtained through the Interdepartmental Committee on Domestic Violence review and analysis of federal programs, this comprehensive directory lists 87 program activities and services, including direct service grants, research and demonstration efforts, training and technical assistance, and information and referral services. Each program is detailed in terms of: (1) a description; (2) uses and use restrictions; (3) types of assistance; (4) formula and matching grants; (5) eligibility requirements; (6) applications and award procedures; (7) appropriations; (8) program accomplishments; and (9) information contacts. The handbook is organized alphabetically by government agency; within each agency heading, programs are arranged numerically by Office of Management and Budget number, and programs without numbers appear alphabetically at the end of the listing. A detailed table of contents and subject index are provided for those seeking funds for domestic violence projects. (Author/NRB)

A review of research suggesting that career development and growth toward self-actualization among minority students may be delayed by environmental conditions is followed by the presentation of a planned career guidance program for minority college students. The formulation of course goals based on responses of 467 minority college students to the Counseling Needs Assessment Survey is described. Course modules designed to deal with each of 11 identified needs are discussed. The career guidance course curriculum is presented, beginning with the administration of the "Strength Barrage" and the California Occupational Preference System, along with strategies for examining jobs and career interests through use of the Occupational Outlook Handbook and by on-site job visits with adult role models. A randomized summary of course perceptions and evaluations of 247 students is included, as well as recommendations for

offering the course to all upperclassmen. (NRB)

**Correlates of Depression in the Elderly: Sex Differences and Similarities.**

Pub Date—Mar 81

Note—18p.; Paper presented at the Annual Meeting of the Southeastern Psychological Association (27th, Atlanta, GA, March 25-28, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Correlation, \*Depression (Psychology), \*Economic Status, Gerontology, Interpersonal Relationship, \*Older Adults, \*Physical Health, Quality of Life, \*Sex Differences, Social Isolation, \*Stress Variables

The most common psychological disorder found in the elderly is depression. To investigate the relationship between numerous age-related stresses and depression in older adults, 68 residents of a retirement center completed a questionnaire assessing depression and a wide range of possible losses or stresses. Depression was related to poorer financial status, fewer and less satisfying interpersonal relationships, and poorer physical health. For women, greater concerns about death were related to depression; poorer physical health and lack of involvement in activities were related to depression for men. The findings suggest that depressive experiences differ considerably for males and females. (Author/JAC)

**The Role of Supervision in School Psychology Training: Views of Students and Faculty.**

Pub Date—81

Note—24p.; Best copy available.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Comparative Analysis, \*Counselor Educators, \*Counselor Training, Educational Objectives, Higher Education, \*Practicum Supervision, \*School Psychologists, \*Student Attitudes, Student Teacher Relationship, \*Supervisory Methods, \*Teacher Role, Training Methods

In school psychology the supervision of practicum experiences is widely acknowledged as a critical component of training, yet little research has been devoted to systematically conceptualizing, practicing, or evaluating the process of supervision for psychologists-in-training. Students and faculty in school psychology made attributions to the importance of supervision across a three-year period of training. Students ranked their supervisor's administrative role of field site coordinators as most vital, followed by their educative role of technical assistance and guidance in professional development, and their personal and emotional support least important. Both faculty and students perceived the supervisory relationship as becoming less structured and more mutual across three years of study, with declining emphasis on technical assistance as students became more competent, confident, and independent. Additionally, faculty and students

## 28 Document Resumes

shared a perception of sharply declining need for technical assistance in assessment over time, but sustained emphasis in intervention and professional development. The congruence in perceptions suggests that a common framework defines the supervisory process in school psychology, which is not unlike that of other disciplines such as social work and clinical psychology. Descriptors—\*Attitude Change, Behavior Development, \*Bibliotherapy, Change Strategies, \*Classroom Techniques, Educational Objectives, Elementary Secondary Education, Imagination, \*Self Concept, \*Social Cognition, State of the Art Reviews, \*Student Development, Students

Identifiers—\*Fairy Tales  
Fairy tales can be used in the classroom to promote normal growth and development as well as carry a message of hope and faith in the strength and goodness of humans. Because fairy tales are imaginative literature, readers can safely experience and work through scary situations which are analogous to situations in real life. Bibliotherapy refers to the basic concept that literature has therapeutic properties and is a program of activity based on the interactive processes of media and those who experience it. The therapeutic properties of reading are useful in education to support life adjustment, psychological maturity and moral development. (JAC)

The Relationship of Sex Education to Sexual Behavior, Attitudes, and Knowledge.

Pub Date—Apr 81

Note—23p.; Paper presented at the Annual Meeting of the American Educational Research Association (65th, Los Angeles, CA, April 13-17, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Attitude Measures, Attribution Theory, Change Agents, \*College Students, Ethical Instruction, Higher Education, \*Sex Education, \*Sexuality, \*Student Attitudes, \*Student Behavior, Student Educational Objectives

Research has not identified any consistent relationships between participation in high school sex education programs and the sexual attitudes and behaviors of college students. Results of preliminary research into the relationship of sex education and developing sexuality have shown few significant correlations. A sample of college students completed the Sexual Experience Questionnaire while another sample completed the Sexual Knowledge Test. Results showed that students rated themselves as having a fair knowledge of sexuality; however, their overall test performance ratings indicated that they may not have been as knowledgeable as they believed. The findings suggest that the current controversy about sex education may be misplaced, and that further research is needed before any conclusions can be drawn. (JAC)

Descriptors—\*Affective Behavior, Attitudes, Beliefs, Cognitive Processes, Educational Theories, \*Emotional Development, \*Emotional Response, \*Moral Values, \*Philosophy, \*Psychological Patterns, State of the Art Reviews

Methods of philosophical psychology can be used to analyze the concept of emotion. Distinctions ex-

ist between dispositional and occurrent emotional states. Intensionality is neither a necessary nor a sufficient condition for an emotion; thus, emotions can be appraised as reasonable (or unreasonable) and the source of intensionality can be determined. Some emotions have a propositional belief component, while other emotions have a nonpropositional (or attributional) belief component. Important distinctions should be made between the object and cause of emotions, the identity and nature of emotions, and the evidence for an ascription of an emotion and its nature. A cognitive-attitudinal component seems essential and explains both the intentionality and intensionality of emotions. (JAC)

How Well Do We Support Parents After the Death of a Child?

Pub Date—81

Note—15p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Age Differences, \*Children, Death, \*Emotional Adjustment, Family Problems, \*Grief, \*Helping Relationship, \*Human Services, \*Parents, Religious Factors, Social Values

Identifiers—\*Social Support  
The support of friends and religious groups is a critical factor in the ability of parents to adjust to the death of a child. Two groups (N=19 each) of bereaved parents completed a questionnaire to assess their grief reactions. The results found that parents took an average of 11 months to return to an approximate level of personal happiness experienced before their child's death. Religious groups and helping professionals were major sources of support. Parents spent an average of five months to function smoothly again. Mourning practices and the help of medical professionals (doctors, nurses, and psychiatrists) were important supportive components for older parents. The findings suggest that for parents to successfully complete the mourning process, friends, family and professionals need to play a more active role. (Author/JAC)

Descriptors—Aggression, Alcoholic Beverages, \*Antisocial Behavior, \*Attribution Theory, Behavior Patterns, Crime, \*Drinking, \*Rape, \*Responsibility, Sex Differences, \*Victims of Crime, Violence

Identifiers—\*Blame

One explanation for the positive relationship between alcohol consumption and violent crime considers alcohol consumption to be a socially accepted excuse for otherwise inappropriate behaviors. A policy capturing methodology was used to examine judgments of responsibility for rape. Male (N=30) and female (N=66) undergraduates received 40 profiles of alleged rapes with variations in 9 information categories. Subjects rated assailant and victim responsibility, degree of sanction appropriate for the assailant, and victim willingness to participate. No significant sex differences occurred between mean judgments of victim responsibility, assailant responsibility, or victim willingness. In terms of sanctions for the assailant, females assigned lengthier sentences than males. All subjects rated assailants as more responsible than victims; both the rapist and the victim were held more responsible if they had been drinking. No significant sex differences occurred in the patterns of cue utilization. Subjects showed a bias toward blaming the victim; the best predictor of judgments was the victim's alcohol consumption. Other salient predictors were the extent to which the victim had been threatened and the reputation of the assailant. Degree of victim resistance was the least effective predictor. Results suggest that drinkers are held more, rather than less, responsible for aggressive behaviors. (NRB)

Descriptors—Classroom Communication, Congruence (Psychology), Elementary School Teachers, \*Nonverbal Communication, Primary Education, Role Perception, \*Sex Role, Sex Stereotypes, \*Socialization, Sociocultural Patterns, Student Development, \*Student Teacher Relationship, \*Teacher Behavior, \*Teacher Influence

Research has shown that children's differentiation of gender-appropriate behavior is not directly affected by their teacher's gender. However, the teacher's behavior in relation to the material being taught may convey the sex-appropriateness or -inappropriateness to the child. To examine the effects of student gender and sexual stereotype of the instructional material on the nonverbal behaviors of the teacher, 10 teachers from upper elementary grades taught 20 first-grade and 20 second-grade students. Each teacher taught individual lessons in which items were stereotyped as either traditionally feminine or traditionally masculine to 2 girls and 2 boys. Lessons were videotaped and judged for warmth, enthusiasm, and reinforcement. Results showed that incongruence between the sexual stereotype of the items and the gender of the student affected the nonverbal behavior of the teacher. Teachers were judged to be friendlier toward female students while working on material that was culturally inappropriate for females and to be friendlier toward male students on material that was culturally more congenial to the student's gender. The findings suggest that differential teaching behaviors may contribute to the sex-role socialization of students. (Author/NRB)

Descriptors—Abortions, \*Adolescents, Behavior Patterns, \*Birth Rate, Contraception, \*Family Planning, \*Females, \*Illegitimate Births, Marriage, \*Pregnancy, Sex Education, Trend Analysis  
Identifiers—\*Kentucky

This report analyzes trends in childbearing among Kentucky's adolescents from 1970 through 1977 and reviews childbearing patterns in Kentucky and in the United States for adolescents aged 10-14 and 15-19 to identify several factors associated with adolescent pregnancy. The fact that adolescent women are reaching biological maturity at an earlier age is cited as one factor that explains the increased numbers of teenage pregnancies. Other causes of adolescent pregnancy are delineated, including increased and earlier initiation of sexual activity, the nonuse or ineffective use of contraceptives, and planned pregnancies. Several consequences of teenage pregnancy are explored, and trends in abortion, adoption, and marriage are examined. The social, economic, biological and emotional consequences of adolescent childbearing are discussed along with the health risks to mother and baby. Strategies for intervention are presented that emphasize the adolescent's need for accurate information about sex and birth control, as well as the availability of health and family planning services. Although geographically specific, this report reflects an issue of great importance in the United States today. (NRB)

Descriptors—Attribution Theory, Behavior Problems, \*Child Development, Childhood Needs, \*Emotional Adjustment, \*Family Problems, \*Family Relationship, \*Marital Instability, Marriage, \*Parent Attitudes, Parent Influence, Psychological Patterns, Spouses  
Identifiers—\*Social Desirability

The relationship between the degree of marital adjustment and the emotional adjustment of the children within the family is widely accepted as is the corollary belief that the marital relationship determines the child's adjustment. A sample of 69 married couples with children was used to examine the interrelationships among several measures of family adjustment and to explore the role of the social desirability response set on the self-report of marital and child adjustment. Subjects completed the Spouse Observation Checklist, the Dyadic Adjustment Scale, the Louisville Behavior Checklist, the Eyberg Child Behavior Inventory, the Parent Attitude Research Instrument, and the Edwards Social Desirability Scale. Results closely replicated previous findings, suggesting that couples with well-adjusted marriages were unlikely to have children who evidenced behavior problems. When social desirability was controlled, the relationship between marital and child adjustment was not significant. The results suggest that previously reported correlations between marital and child adjustment may have been inflated by a social desirability response set. The social desirability response set appears to play an important role in the relationship between marital and child adjustment among normal families. (Author/NRB)

Descriptors—\*Academic Achievement, \*Attribution Theory, Classroom Communication, \*Classroom Environment, Elementary Education, Grades (Scholastic), \*Locus of Control, Student Attitudes, Student Behavior, Student Evaluation, \*Student Evaluation of Teacher Performance, Teacher Attitudes, \*Teacher Behavior

Several studies have shown that teachers' locus of control orientations are differentially related to attitudes about teaching and classroom behavior. To investigate the relationship between teachers' locus of control and students' perceptions of classroom climate, academic responsibility, and grades, matched pairs of teachers from grades four through eight completed a teaching-specific locus of control measure. Their students (N=245) completed the Origin Climate Questionnaire and the Intellectual Achievement Responsibility Questionnaire. Current letter grades were also obtained for each student. Students with the more internally oriented teachers reported a more origin-line classroom climate, i.e., a classroom atmosphere in which students perceived the teacher as encouraging goal setting, responsibility, and self-confidence, and had higher grades than students with less internally oriented teachers. Teachers' locus of control orientations were not related to student-attributed responsibility, although within-class correlations indicated that attributed responsibility was positively related to perceived classroom climate and grades. The results suggest that further research needs to be directed toward delineating determinants of teachers' locus of control and the manner in which these orientations are conveyed to students. Effects of Brief Training on Sex-Related Differences in Spatial Visualization.  
Pub Date—May 81  
Note—26p.; Paper presented at the Annual Meeting of the Midwestern Psychological Association (53rd, Detroit, MI, April 30-May 2, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Adult Learning, Adults, \*Biological Influences, Cognitive Style, \*Environmental Influences, \*Perceptual Development, \*Sex Differences, \*Spatial Ability, Transfer of Training

Researchers disagree not only about the existence or magnitude of sex-related differences in spatial perception, but also about the determinants of such differences. Training in three distinct spatial tasks was provided in an attempt to destabilize individual and sex-related differences, while exploring the relative contributions of biological and environmental factors to visual-spatial skill. Undergraduates (N=83) participated in 6 weekly one-hour sessions. Subjects completed four spatial pretests and then were matched on scores and randomly assigned to experimental and control groups. After the experimental group completed three sessions of visual-spatial training in three of the four pretests, all subjects took posttests. Results showed no effects for sex on any of the four posttests, suggesting that males and females benefited equally and significantly from the training. A comparison of female experimental subjects and male control subjects indicated that training closed the spatial experience gap between the sexes on all tests. Results show that male and female adults may be trained in visual-spatial skills, and that the effects of the training are generalizable beyond the immediate training situation. (NRB)

Descriptors—\*Aggression, \*Alcoholism, \*Attribution Theory, \*Battered Women, Behavior, \*Drinking, Family Problems, \*Locus of Control, \*Psychological Patterns, Responsibility, Spouses, \*Violence

Identifiers—\*Blame, Family Violence

Several researchers have explored the role of alcohol in domestic violence and attribution of blame. To compare the amount of blame attributed to an incident of wife abuse, alcoholic (N=52) and nonalcoholic (N=159) subjects read an account of wife abuse and distributed a percentage of the blame to the man, the woman, and the situation. Nonalcoholic subjects attributed less blame to an intoxicated husband than to a sober husband and more blame to an intoxicated wife than to a sober one. Alcoholic subjects increased the amount of blame attributed to the husband and decreased the blame attributed to the wife only when the husband was intoxicated and the wife was sober. Alcoholics attributed more internal responsibility for the abuse than did nonalcoholics. For the nonalcoholics, alcohol intoxication in wife abuse seemed to provide the intoxicated husband with a socially acceptable excuse for his abusive behavior and a reason for beating his intoxicated wife. For the alcoholics, alcohol intoxication increased the amount of personal responsibility attributed to the intoxicated individual for the abuse, particularly when the spouse was sober. The results suggest a need for further research on other forms of abuse, e.g., child abuse, husband abuse, and abuse of the elderly. (Author/NRB)

Descriptors—\*Age Differences, \*Career Choice, Children, College Students, Elementary Education, Grade 6, Higher Education, \*Nontraditional Occupations, \*Occupational Aspiration, \*Sex Differences, Sex Role, \*Vocational Interests

Although research has shown that children tend to designate traditional sex-role areas when asked what they would like to be and that girls nominate a narrower range of vocations than do boys, more recent findings suggest that children of both sexes nominate equal numbers of vocations. Older girls, unlike boys, also choose nontraditional vocations. Sixth grade males (N=58) and females (N=63) and male (N=58) and female (N=117) college students scaled 7 career-related categories by the method of paired comparisons. The categories were classified as traditionally masculine (politics, athletics, finance, public relations) or traditionally feminine (fashion, education, health care). Subjects designated the more preferred alternative from each of the 21 possible pairs of categories. Both sexes had traditionally same-sex areas at the tops of their scales and opposite-sex categories at the bottoms; males preferred athletics most and fashion least, while females preferred health care and education most and politics least. Responses were consistent within subjects and significantly in agreement within groups. Scale values from the two male scales were significantly correlated as were those from the two female scales. Relationships Among Cognitive and Emotional Empathy Constructs.

Pub Date—Aug 81  
Note—30p.; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Affective Behavior, \*Empathy, \*Locus of Control, Personality Measures, \*Personality Traits, \*Predictor Variables, \*Sex Differences

Although predictive accuracy (cognitive empathy) and emotional empathy may be aspects of the same general ability, few empirical studies have examined the relationships between these dimensions. The relationship between cognitive empathy and emotional empathy was investigated by correlating the Mehrabian and Epstein Emotional Empathy Scale and its subscales with Cronbach's delineation of global predictive accuracy and its subcomponents. A modestly sized relationship was hypothesized, i.e., that persons with strong emotional empathy would also be more accurate in their perceptions of others. An analysis of the data collected from 372 undergraduates indicated no relationship between any of the Cronbach components of predictive accuracy and any of the subscales representing emotional empathy. However, the two types of empathy had distinctive patterns of correlations with locus of control. Persons who scored high on emotional empathy tended to have an external locus of control, whereas persons who scored high on predictive accuracy tended to have an internal locus of control. Gender differences occurred only among the emotional empathy scales, with women scoring higher than men. The results suggest that, contrary to prediction, the ability to judge accurately the attributes of others does not co-exist with the tendency to respond emotionally to the feelings of others. Descriptors—Evaluation Criteria, \*Evaluators, Graduate Students, Higher Education, Participant Satisfaction, \*Program Evaluation, \*Proposal Writing, \*Psychology, Research Needs, \*Simulation, \*Teaching Methods

As more psychologists become involved in program evaluation, program evaluation courses have been developed by many psychology departments. Psychology graduate students (N=19) participated in a semester-long simulation course. Students divided into small groups, and each group submitted a written proposal for evaluating the counseling service of a fictional community agency. Students could question the agency director, role-played by the instructor, to obtain evaluation-relevant information which had been intentionally omitted from descriptive materials about the agency. A second proposal was also written and submitted by each group. The groups then analyzed a fictitious set of pre- and post-measures describing the psychosocial adjustment of three client subgroups and prepared a comprehensive final evaluation report that included the analysis results. Data relevant to the effectiveness of the simulation was generated from questionnaires completed by participants, questions asked by the groups, the proposals and final report, and the instructor's informal observations. Both the performance of the students during the simulation and their subsequent evaluation of the simulation effectiveness indicated that the simulation was involving and educational. The findings suggest that teaching evaluation research via simulation need not be confined to short-term courses. (Author/NRB)

Life-Cycle Developmental Theory as a Tool for College Counselors.

Pub Date—81  
Note—14p.  
Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Development, Adults, \*Adult Students, \*Age Differences, Aging (Individuals), \*Counseling Services, \*Counselor Role, \*Developmental Stages, Faculty Advisers, \*Higher Education, Individual Needs, Nontraditional Students, State of the Art Reviews, Student Personnel Workers

In recent years, the median age of the college student has shifted dramatically upward so that higher education now serves a more age-diversified population. This phenomenon has vast implications for both student affairs professionals and faculty who are involved in counseling and advising students. College counselors must redefine their roles and recognize adult students as individuals facing very different developmental tasks from the traditional college-age students. Counselors must review psychosocial development theory, cognitive development theory, and empirical evidence to explore the differences between the traditional college-age student and the adult student. The use of life cycle theory in developmental counseling permits counselors to construct a conceptual framework from which they can better serve all students regardless of age. Counseling approaches and techniques may have to be modified to serve adult students, who have diverse anxieties, concerns, expectations and educational goals. The visibility of developmental counseling services must be increased. College counselors must respond to these challenges through a sound understanding of adults' growth and development and the influences their educational institutions exercise on this growth process. (Author/NRB)

Descriptors—Affective Behavior, \*Counseling Techniques, \*Counselor Client Relationship, \*Counselor Evaluation, Credibility, Empathy, Females, \*Paraprofessional Personnel, \*Professional Personnel, \*Status

Identifiers—\*Self Disclosure

Research has suggested that self-involving responses, i.e., direct present expressions of a counselor's feelings about client statements, are highly effective counselor behaviors, while self-disclosure responses, i.e., references to personal experiences of the counselor, are moderately effective in eliciting

positive client perceptions of and responses to the counselor. Female undergraduates (N=180) listened to taped interactions between a counselor and a female client in which the counselor, described as either a professional or paraprofessional, responded with either low intimacy self-disclosure, high intimacy self-disclosure, or self-involving responses. Subjects responded to the counselor as they believed the client would and rated the counselor as they believed the client would by completing the Counselor Rating Form. Results indicated that: (1) high self-disclosing and self-involving counselors received more expert and trustworthy ratings than low self-disclosing counselors; (2) paraprofessionals received more attractive and trustworthy ratings than professionals; (3) client responses to high self-disclosing and self-involving counselors contained more client self-referents than responses to low self-disclosing counselors, which contained more counselor-focused statements; and (4) responses to high self-disclosing counselors contained more affective words and fewer counselor references than responses to self-involving or low self-disclosing counselors. The findings suggest that high intimacy self-disclosure is a superior response to low intimacy self-disclosure and appears to be as effective as self-involving responses. (Author/NRB)

Descriptors—Academic Advising, \*College Students, Counselor Selection, \*Counselor Training, Delivery Systems, \*Faculty Advisers, Helping Relationship, Higher Education, \*Peer Counseling, Peer Influence, Program Development, Program Effectiveness, State of the Art Reviews, \*Student Needs

Academic advising by faculty members has often been ineffective. Peer advising systems that employ peers as academic counselors may successfully address student criticism of faculty advising systems. Peer systems capitalize on the primacy of peer influence, provide an economical delivery system, and are available and accessible to students. These programs are strongly identified with students, able to improve the organizational dynamics of the advising program, and offer positive personal benefits to students involved in the advising program. Although student-to-student counseling has been effective in a variety of student personnel functions, questions concerning continuity, objectivity, and accountability must be answered effectively during program development. Critical elements for program success are: (1) formulation of meaningful peer counseling goals; (2) development of informed peer counseling support; (3) delineation of realistic peer counseling activities; (4) careful selection and training of peer counseling personnel; and (5) evaluation and revision of peer counseling efforts. If these requisites are met and the program is appropriate to the educational institution and its students, then the peer counseling program will be effective. (Author/NRB)

Descriptors—College Credits, Competence, \*Experience, \*Experiential Learning, \*Females, Higher Education, Homemakers, Homemaking Skills, Mothers, \*Prior Learning, \*Reentry Students, \*Reentry Workers, Research Needs, Volunteers

The influx of an unprecedented number of reentry women into educational programs and paid work requires more research on the transferability of women's competencies and life experiences to specific occupations. A questionnaire was developed to survey the life experiences of adult women (N=131) who were participating in various programs of career and educational counseling. The questionnaire

examined the frequency and extent of homemaking, parenting, volunteer work and community services, recreation, formal and nonformal education, and paid work experiences; also included were a section on respondent characteristics and a self-rating of ability on 28 competencies including those most frequently listed in the Dictionary of Occupational Titles qualification profiles of worker trait groups. Data from questionnaires revealed that the women had a variety of life experiences through which they had acquired skills and knowledge relevant to education and employment. The results indicate that adult women have a wide variety of life experiences through which they acquire job-relevant skills and knowledge. (NRB)

Descriptors—Achievement, \*Aptitude, \*Group Dynamics, \*Metacognition (Instructional Purposes), Heterogeneous Grouping, Homogeneous Grouping, Individual Characteristics, Junior High Schools, Junior High School Students, Mathematics Instruction, \*Performance Factors, Secondary School Mathematics, Small Group Instruction, \*Teaching Methods

Most research on small group learning has focused on achievement, but few studies have systematically investigated the effects of group processes on achievement, or the influences of individual aptitudes and group composition on group processes. To investigate the relationship between student aptitudes, group process, and achievement in cooperative small groups in junior high school mathematics classrooms, and the stability of the relationship over time, students (N=105) in four classrooms participated in two studies. Initially, all students learned a one-week unit on consumer mathematics. Three months later, half of the students learned a one-week unit on probability. Students worked in four-person homogeneous-ability or heterogeneous-ability groups; they also completed achievement tests and the Eysenck Personality Inventory. Analyses of the data indicated that group process was a potent predictor of achievement in all studies; "asking a question and receiving no answer," the best predictor of achievement, was detrimental to achievement. The effects of group composition and student aptitudes on achievement were mediated by the group process variable. The mediating effect of group process and the magnitude of coefficients were stable across studies; group process was stable over time, both in average frequency and in individual student levels of participation. The results suggest a need to determine whether the stability of group process is generalizable to longitudinal designs. (Author/NRB)

This paper presents the "uses of the past" model of personality development, a model in which adult development transforms an individual's history into resources for meeting present demands. The components of the model are delineated in terms of how: (1) neither the past nor the present is fixed in its effects or its contribution to present adaptation; (2)

experiences of the past and present interact; and (3) the past, as it expands over time, allows new combinations and capacities for later life changes. Adulthood is defined not as an unchanging stage, but as a series of ongoing states that recruit and combine material from the past for present effective functioning. To illustrate the model, longitudinal data from two inter-generational studies are presented in which subjects' past modes of responding are correlated with adult adaptation according to relevance rather than recency. Findings from the studies are discussed, and future research of and uses for the model are suggested. (NRB)

Identifiers—\*Alcohol and Drug Abuse Education Act, \*Congress 97th

These hearings before the Congressional Subcommittee on Select Education consider the extension through fiscal year 1985 of appropriations for programs established by the Alcohol and Drug Abuse Education Act. The text of the extension bill, H.R. 2644, is presented, followed by testimonies from the Department of Education as well as individuals who are currently implementing drug education programs in their local schools as a direct result of their training experiences. Comments are also presented from representatives of the National Institute on Alcohol and Alcoholism, the National Institute on Drug Abuse, and the Center for Disease Control concerning complementary efforts in the areas of alcohol and drug abuse prevention. The serious extent of alcohol and drug use in schools is emphasized, and the effectiveness of federal government programs on alcohol and drug abuse education over the past decade is discussed. The federal role in developing effective prevention programs at state and local levels is described, and the issue of giving authority to the individual states by grouping alcohol and drug abuse education funds with other educational program funds in block grants is also debated. Descriptors—Adolescents, Bilingualism, \*Community Support, \*Health Education, Inservice Teacher Education, Parent Participation, \*Pregnancy, Prevention, \*Program Implementation, School Personnel, Secondary Education, \*Sex Education, \*Venereal Diseases

This sequential manual for an educational program to prevent premature parenthood and venereal disease is intended for school personnel responsible for designing and implementing human sexuality programs. Chapter One presents the history and description of Project Teen Concern along with a sum-

mary of project evaluations for the past three years. Chapter Two, "Developing Community Support," includes a workshop format for involving community members as a logical first step in the program. Subsequent chapters present guidelines for teacher inservice training, the development and implementation of a parent/community program, and a bilingual program. Each chapter includes a description of implementation and resource components with detailed instructions for program development. An introduction to each topic is followed by lists of planning and delivery phases for each program component. At the end of each chapter, an appendix of resource materials is provided along with sample forms, questionnaires, worksheets, and evaluations. (NRB)

Descriptors—\*Alcoholism, Confidentiality, \*Confidential Records, Court Litigation, \*Disclosure, \*Drug Abuse, Ethics, \*Federal Regulation, Federal State Relationship, \*Legal Responsibility, Patients, Privacy, State Legislation

This participant manual is designed to provide an overview of federal laws and regulations pertaining to the confidentiality of alcohol and drug abuse patient records. The relationship of federal laws to state laws and regulations is also discussed. The materials, useful for persons involved in the fields of substance abuse treatment or prevention, list course objectives and limitations, and explain academic credit for course participation. The 13 course sessions are outlined in the manual, beginning with a pretest of major points in the federal confidentiality regulations and followed by presentations of specific aspects of the regulations. Participant exercises and samples are included, along with discussion of various confidentiality topics such as disclosures with and without patient consent and court orders. The appendix contains the text of the "Confidentiality of Alcohol and Drug Abuse Patient Records, Federal Law Title 42 Public Health." (NRB)

Descriptors—\*Drug Abuse, Drug Rehabilitation, Individual Characteristics, \*Labor Utilization, Literature Reviews, \*Paraprofessional Personnel, \*Program Development, \*Volunteers, \*Volunteer Training

This literature review describes the volunteer movement and its actual and potential effect on the drug abuse field. The first section outlines the philosophical and historical events and perspectives that have influenced the development of volunteerism. The next section presents data on current trends in the use of volunteers in the largest Standard Metropolitan Statistical Areas as well as descriptions of volunteer characteristics. The third section cites evaluation studies on the use of volunteers. The final section discusses administrative concerns, such as sources of volunteers, their recruitment and training, and recommendations for the design and im-

plementation of successful volunteer programs. An extensive listing of references and an appendix of resources are also included. (KMF)

Descriptors—\*Communication (Thought Transfer), Communication Research, \*Decision Making, \*Friendship, \*Interpersonal Relationship, \*Perspective Taking, State of the Art Reviews Identifiers—\*Significant Other

Research has shown that most individuals assume that they have realistic perceptions of the significant people in their lives, be they family, friends or adversaries. However, under special circumstances, images of significant others may be shattered as they are seen "for the first time." A phenomenological analysis of 60 descriptions suggest that this transformation occurs in one of four basic types of contexts. For example, persons may become empathically aware of others when they are seen responding emotionally to an unanticipated occurrence, such as the death of a friend. Fundamentally, the situation in which this new awareness of the other occurs is one in which a person is deeply engaged and which strongly speaks to basic values and concerns. But this new awareness does not simply happen; it requires an implicit decision to remain open to the implications of the other's behavior and to allow one's preconceptions to be challenged. The characteristics of this decision process are in contrast with decision making as it is typically conceptualized in the psychological literature. (Author/KMF)

Odeunmi, Akin  
A Survey of Marital Success and Failure Among Sampled Educated Nigerians.

Pub Date—Apr 81  
Note—23p.; Paper presented at the Annual Conference of the Nigerian Psychological Society (University of Jos, March 31-April 4, 1981). Best copy available.

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Patterns, Communication (Thought Transfer), \*Divorce, Family Life, Foreign Countries, \*Interpersonal Relationship, Marital Instability, \*Marriage, Sexuality, \*Social Attitudes, \*Spouses

Identifiers—\*Marital Satisfaction, \*Nigeria

In Nigeria, various forms of polygamy and monogamy are practiced; however, monogamy is more or less practiced by many Christians and a greater percentage of younger men. A survey of marital success and failure was conducted with samples of Nigerian Diploma students and selected educated community members. Subjects completed two instruments, the Marital Checkup consisting of 35 questions about topics such as companionship, communication, and the myth of the perfect marriage, and the Ireton Personal Inventory. Results indicated that a great percentage of married people were not happy with their marriages, and cited financial problems, personality traits, and sexual maladjustment and promiscuity as causes of marital failure and divorce. The findings suggest that greater emphasis on education and knowledge in matters of sex, marriage, and parenthood is needed. (The Marital Checkup is included in the appendix.) (KMF)

Descriptors—Attitude Measures, \*Attribution Theory, Evaluation Criteria, Higher Education, \*Leadership Qualities, Leadership Styles, Military Personnel, \*Military Schools, \*Sex Bias, \*Sex Differences, Sex Role, \*Sex Stereotypes

Identifiers—\*Military Academy (West Point) NY

Attitudes toward the role of women in the army do not introduce a consistent and strong bias into the way male and female leaders are judged by their subordinates. Male and female cadets at the U.S. Military Academy completed questionnaires describing their unit leaders at two training activities. Results showed that egalitarian followers and traditional followers did not make different attributional or evaluative judgments regarding male and female leaders. However, in the evaluation of leader success, some patterns suggested gender-based bias. The absence of consistent gender-based bias suggests that the West Point environment is generally healthy with regard to the issue of sexism. (JAC)

The Effect of the Accessibility of Self-Relevant Thoughts on Attributional Judgements.

Pub Date—Aug 81  
Note—18p.; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Attribution Theory, \*Cognitive Processes, \*Cognitive Style, Etiology, Individual Power, \*Locus of Control, Self Evaluation (Individuals), \*Social Cognition

Identifiers—\*Self Awareness

Research has established a reliable relationship between self-awareness and causal attribution, i.e., heightened attention toward the self increases attributions of responsibility to the self. It was hypothesized that increased availability or accessibility of self-related cognition would increase causal attributions to the self, although this effect would be due primarily to attributions for positive events. Subjects (N=44) were first induced to use either self-relevant or other-relevant terms in a story construction task. In a subsequent task, they made attributions for hypothetical situations. Self-attributions were significantly greater for those subjects who had been previously "primed" to engage in self-relevant thoughts. The results suggest that when attention is directed toward the self because of either chronic dispositions toward self-consciousness or the expression of self-oriented stories, self-schemata are more likely to become active in the processing of information. (Author/JAC)

This paper discusses the importance and usefulness of assessing student goal attainment, reviews the steps required to select intervention goals, and describes several goal attainment measurement systems. Practical difficulties which are likely to be encountered are described and potential solutions to those difficulties are discussed. The importance of support from the school administration is emphasized. The selection of appropriate goals and goal attainment measures to allow judgments to be made about the social and educational values of the treatment procedures is reviewed. Suggestions are made in terms of the roles of psychologists, e.g., they should set standards within educational systems while attempting to evaluate their own effectiveness. (JAC)

**Degrees of Reciprocity of Peer Acceptance Among High School Students of Jeddah, Saudi Arabia.**  
 An Occasional Research Paper.

Umm Al-Qura Univ., Mecca (Saudi Arabia).  
 Pub Date—Jun 81

Note—14p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Patterns, Foreign Countries, \*High School Students, \*Interpersonal Competence, \*Peer Acceptance, \*Peer Relationship, Secondary Education, \*Social Behavior, \*Social Cognition, Social Status, Student Attitudes

Identifiers—\*Saudi Arabia

Researchers have been interested in studying the correlates and reciprocity of peer acceptance across various cultures. Tenth grade students in a Saudi Arabian suburban high school completed social desirability scales to examine the relationship between the acceptance of class members by individual students and the acceptance of individual students by class members. Results showed that on the whole, relationships between individual students and the rest of the class were not universally reciprocal. This finding might have occurred because of lack of opportunities for student interaction in and outside school. Reciprocity of peer desirability which developed as a result of social interaction was not of the same type among students who expressed identical feelings towards one another. The results suggest that Saudi students, while skilled at initiating relationships, may have difficulty maintaining them. (JAC)

**Alienation Among Sorority and Independent Freshmen at a Women's College.**

Pub Date—[79]

Note—11p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*College Freshmen, Comparative Analysis, \*Females, Group Experience, Higher Education, Peer Acceptance, Peer Relationship, \*Social Isolation, Social Life, \*Sororities, \*Student Adjustment, \*Student Alienation

Identifiers—\*Social Networks

Alienation is experienced by adolescents in varying degrees; however, little research has investigated alienation in relationship to Greek sorority/fraternity membership versus independent status among college students. To measure alienation among freshmen sorority members and freshmen independents in a small women's college, 60 women completed the Dean's Alienation Scale. Results showed that the largest percentages of women joined sororities for social activities and to make friends. Independent students said that they were not interested in sororities or preferred to be independent; some cited financial and time considerations as well. Scores on the Alienation Scale showed significant differences between sorority members and independents in terms of social isolation and total alienation: independents scored higher in both areas. No significant differences occurred for either powerlessness and normlessness. Further research is needed to understand how alienation might be mitigated through various types of group membership. (JAC)

Descriptors—\*Adult Development, \*Counselor Role, \*Developmental Stages, Developmental Tasks, Family Structure, \*Interpersonal Relationship, Marital Instability, \*Marriage Counseling, Parent Role, Role Conflict, \*Spouses, State of the Art Reviews

Identifiers—\*Life Cycles

Marriages, just like the individuals in them, go through stages of development. Understanding these relatively predictable stages can be helpful to couples, by allaying apprehension, promoting preparation for change, and putting fluctuations into

perspective. Research on marital stages and experiences in counseling couples suggest that marriages typically pass through six stages: pre-marital, early marriage, child bearing, childrearing, mid-life, i.e., the years with adolescents, and the post-parental years. Counselors should promote growth and marital communication to help couples negotiate the circuitous paths of their relationships. (Author/JAC)

**Long-Term Changes in Intelligence in Children at Risk.**

Spons Agency—National Inst. of Mental Health (DHHS), Bethesda, Md.

Pub Date—Aug 81

Grant—NIMH-MH-50124

Note—22p.; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Problems, \*Children, Cohort Analysis, Elementary Secondary Education, \*High Risk Students, \*Intellectual Development, \*Intelligence Differences, Longitudinal Studies, \*Parent Child Relationship, Parent Role, \*Psychological Characteristics, Psychopathology, Schizophrenia

Retrospective studies of the intellectual performances of children who later became psychotic adults have yielded evidence of early interference in the development of intelligence in future schizophrenics. The intellectual assessments of 153 children were examined during two test periods in the St. Louis Risk Research Project. In 1967-1972, the Wechsler tests of intelligence were administered to offspring in families with one schizophrenic parent, one parent with affective disorder, one parent with schizoaffective disorder, one physically ill parent, or to offspring with two normal parents. In 1975-1978, the intelligence of offspring was tested again at a mean age of 16 years. Differences between children as a function of parental diagnoses were assessed and yielded significant time effects. Children of schizophrenics and children of parents with affective or physical disorders had greater loss in verbal IQ scores between the first and second testing than did the children of schizoaffectives and children of normal parents. Offspring of psychotic mothers had lower IQ scores than those of psychotic fathers. Children of schizophrenics and children of schizoa-

fectives had the lowest stability in IQ scores from the first to second testing. The findings suggest a need for further replication research on the effects of ill parents on their children. (Author/JAC)

Descriptors—Consultation Programs, \*Counseling Services, \*Counseling Techniques, \*Counselor Role, Higher Education, Human Services, \*Professional Education, Professional Recognition, Publications, \*School Psychologists, State of the Art Reviews, Student Development, \*Student Personnel Services

The professional schools within institutions of higher education are becoming consumers of the counseling psychologist's expertise. The psychologist can offer skills training to enhance the professional performance of students. A knowledge of students' developmental processes can be very useful. The counselor's role may include consulting, research, and publishing in professional journals as well as diagnosis and assessment of students. Interventions may include training programs for students who want to improve their skills with patients or clients. Working in a professional college can provide rich opportunities to psychologists through interdisciplinary experiences. (JAC)

**Leadership: Some Alternative Views and Their Implications.**

Pub Date—24 Aug 81

Note—50p.; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Administrators, Group Dynamics, Human Resources, Leaders, \*Leadership Qualities, \*Leadership Styles, Leadership Training, \*Management Development, \*Organizational Climate, \*Organizational Theories, State of the Art Reviews

Alternatives to traditional views about leadership suggest a dramatically different approach, including focusing on problems rather than individuals, examining leadership positions at critical organizational junctures, and emphasizing environmental and organizational forces that constrain leader behavior. Human resource professionals responding to alternative views must be in a position to anticipate the problems and opportunities facing the organization. Many traditional functions, e.g., planning and organizing, must be redefined. Research in the field of leadership is comparable to the progress of astronomy, which offers some new assumptions to guide future efforts. (Author/JAC)

Pub Date—Aug 81

Note—10p.; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Competence, \*Consultants, Consultation Programs, \*Counselor Client Relationship, Credibility, Drug Abuse, \*Drug Education, \*Ethics, \*Illegal Drug Use, Moral Values, Prevention, Privacy, State of the Art Reviews

Several important ethical issues need to be addressed both by the consultant and the organization in the field of academic substance abuse consultation. Various problems face the university-based academician who consults with agencies and organizations, such as consultant abuse, i.e., when a consultant is hired on the basis of title and academic affiliation rather than for specific research compe-

tencies. In addition, most drug education/prevention programs desire reduction of adolescent drug use; however, some data suggest that drug use may increase rather than decrease as a result of education programs. The ethical issues involved in this phenomenon have not been analyzed. Adolescent drug abuse also represents illegal behaviors and has important implications for issues such as informed consent and protection of data. Finally, implications of therapist-client sexual relationships or harassment upon both the therapeutic relationship and the objective evaluation of therapy outcome must be considered. The psychological research consultant can attempt to improve the methodological quality of substance abuse programs, while simultaneously assuring that ethical standards are maintained. (Author/NRB)

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Delivery Systems, Elementary Secondary Education, \*Needs Assessment, Planning, Program Development, Program Evaluation, Psychological Evaluation, \*Rural Schools, Rural Urban Differences, \*School Psychologists, \*Special Education, State of the Art Reviews, \*Student Needs

School psychologists who work in rural areas face difficult problems because of the setting in which they practice. Traditional models for delivering psychological services in urban and suburban schools are not typically generalizable to rural service delivery. Rural school districts tend to be closed and rigid, reflecting the nature of the community structure. School management may rely heavily on tradition and attempts to promote innovations are often met with opposition. Monetary constraints are faced by nearly all rural schools. These conditions make the implementation of special education services in rural settings difficult. Rural areas present difficulty in recruiting and retaining qualified special education staff, community resistance to change and suspicion of outside interference, and geographical problems. The practice of rural school psychologists must be a program planner and evaluator, taking a multilevel, multidimensional perspective. The rural practitioner must engage in needs assessment, program planning and development, implementation, and outcome evaluations. Despite potential problems and implications for training, rural school psychologists, in order to be effective, must adopt innovative methods of practice. (Author/NRB)

Pub Type—Dissertations/Theses - Doctoral Dissertations (041) — Reports - Research (143)

**EDRS Price - MF01/PC06 Plus Postage.**

Descriptors—Adults, \*Alcoholism, \*Antisocial Behavior, Behavior Problems, Correlation, \*Males, Marital Instability, \*Mental Disorders, \*Personality Problems, Personality Traits, \*Psychological Characteristics, Violence

Studies have shown that sociopaths and alcoholics tend to come from similar social backgrounds and that they share several characteristics. To investigate the relationship between alcoholism and character disorder syndrome in adult males, 20 males who had a history of alcohol problems and displayed characteristics of character disorder were studied by case study analysis. All 20 cases received a diagnosis of alcoholism; 13 received a diagnosis of character disorder. Most cases were diagnosed in 11 or more areas of disturbance; however, four of the seven non-character-disordered were diagnosed in less than nine areas. Fifteen cases had a history of school truancy, 15 were financially dependent on others, and 12 had a history of arrests. The most frequent problems indicated were disturbed marital history, alcohol abuse, impulsive behavior, and dif-

ficulties in work history. The findings suggest that these results were insufficient to substantiate a relationship between alcoholism and character disorders. (NRB)

Identifiers—\*Kansas

This document provides the guidelines to develop a state-wide plan for a continuum of services for deaf-blind individuals. This paper extrapolates from the development of a model plan in Kansas a general set of procedures and policies that can be used by other states and proposes a series of steps for developing a plan for deaf-blind services. The rationale for such a project is described and the needs of the deaf-blind population are discussed. Activities involved in developing a state-wide plan are outlined and developmental work of the model is described. The selection of a project coordinator and the formation of planning groups are detailed. Procedures for recruiting steering committee and task force members are recommended. Methods of planning and conducting group meetings are suggested and project goals, objectives, and activities are enumerated. The appendices contain various survey and evaluation forms and other material relevant to the model. (NRB)

Identifiers—\*Kansas

This volume contains six documents that represent the results of a year-long, statewide study and planning effort for developing a program to serve the deaf-blind population in Kansas. The first document discusses the perceived problems and includes a study of the history of national, regional and state efforts, the initial project goals and objectives, and a planning approach. The second document includes relevant service system constraints and funding sources. Results of a mail questionnaire study of the state's population of deaf-blind individuals to examine the demographics of the client population, the services needed, and the services provided are summarized in the third document. The fourth document outlines a series of criteria developed by the planning participants for the delivery system. The model system, its structure and dynamics, and the procedures for coordinating client services and agency activities are outlined in the fifth document. The final document consists of a time-based year-long implementation plan. (Author/NRB)

Descriptors—Adults, \*Aging (Individuals), Autism, Cerebral Palsy, \*Delivery Systems, \*Developmental Disabilities, Epilepsy, \*Gerontology, \*Individual Needs, Mental Retardation, Need Gratification, Older Adults, \*Program Development

This document contains the proceedings from the National Conference on Developmental Disabilities and Gerontology, a conference designed to develop guidelines for program development on national, state, and local levels; develop and disseminate a proceedings publication; and provide an interface between professionals working at national, state, and local levels in the areas of administration and practice. Following an introduction to the problems of the aged developmentally disabled person and a discussion of the designs and use of the conference participant's workbook, project reports are presented by representatives from five Aging/Developmental Disabilities Projects. A report on needs assessment for older developmentally disabled persons is followed by presentations of four conference workshops focusing on: (1) defining terminology; (2) examining and prioritizing service needs; (3) delineating obstacles in implementing needed services; and (4) developing models of services for the aging and aged developmentally disabled person. Issues concerning the delivery of services are discussed in presentations by representatives from four national consumer organizations for persons with developmental disabilities, e.g., autism, cerebral palsy, epilepsy, mental retardation. The materials conclude with a brief conference evaluation. The appendices contain the conference agenda, a listing of conference participants, and conference evaluation forms. (NRB)

Sex Differences in Occupational Values: Implications for Reducing Sex Bias.

Pub Date—Aug 81

Note—16p; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Career Choice, Career Development, High School Students, \*Interest Inventories, Occupational Aspiration, Secondary Education, \*Sex Bias, \*Sex Differences, Sex Role, Social Cognition, Test Bias, \*Test Validity, \*Values

Research on career development has shown sex differences in patterns of occupational choices and labor force participation. Test takers of career interest inventories and occupational tests may perceive adult roles differently if they are male or female; thus, these perceptions are critical to any attempt to reduce sex bias in testing. High school students (N=600) rated the importance of several values on their choice of an occupation, the decision to marry, and the decision to become a parent. Both males and females agreed on the importance of high income, job security and leisure opportunities as components of an ideal job. For females, the addition of a prestige value suggested a belief in the prestige of working. For males, prestige was related to leadership and working in a field of interest. Results showed that high school students perceived the adult world differently. Career choices by women tended to be limited by past experience or expectation; career choices made by men did not consider values related to other adult roles in marriage and parenthood. The findings suggest that these differ-

ences may affect the construct validity of tests and therefore should be taken into consideration by counselors. (JAC)

Cross-National Perspectives on Mental Health Systems and Services: A Survey of Twenty-Eight Countries.

Pub Date—Aug 81

Note—35p.; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981). Best copy available.

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Community Health Services, Cross Cultural Studies, \*Delivery Systems, Economic Development, \*Financial Support, \*Foreign Countries, Health Personnel, \*Mental Health Programs, \*Program Evaluation, Psychiatric Services, \*Public Policy, Referral

As mental health policies and systems become subject to legislative and public scrutiny, more information is needed to evaluate such programs in the United States and abroad. A cross-national survey of 42 countries and provinces compared mental health policies, mental health services, awareness of these services, evaluation, and financing. Notable differences were found that were not always accounted for in terms of level of economic development. Differences in the range of mental health services were not attributable to the type of financing, although economic development predicted gaps in service delivery. The trend toward community-based facilities was equally popular in countries other than the United States. While most countries collected information about mental illness, many did not tabulate or publicize their findings. The results suggest a need to continue this research on a systematic basis. Relationship Group Therapy: A Short Term Approach with Children.

Pub Date—Aug 81

Note—42p.; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981).

Pub Type—Reports—General (140)—Reports—Evaluative (142)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—\*Children, \*Counseling Techniques, Counseling Theories, Counselor Characteristics, \*Counselor Client Relationship, \*Group Dynamics, \*Group Therapy, Interpersonal Competence, Play Therapy, Program Descriptions, \*Self Actualization, Therapeutic Environment, Values

Identifiers—\*Relationship Psychotherapy  
A new short-term (14-16 sessions) group therapy approach for children, Relationship Group Therapy (RGT), is described. The major group therapy approaches are critiqued and the integration of certain assumptions from each approach are discussed. Stages of RGT therapy and the specific interventions required during various stages of therapy are detailed, as well as qualities of RGT therapists, values inherent in RGT, and the need to evaluate the interventions. Results of a RGT evaluation in an elementary school setting are provided, indicating that the treatment group attained significantly higher goal attainment scores than the control group. Additionally, the appendix contains a sample evaluation checklist for therapists. (Author/JAC)

On Photography: Uses in Psychotherapy.

Pub Date—24 Aug 81

Note—27p.; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981).

Pub Type—Reports—Descriptive (141)—Reference Materials—Bibliographies (131)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—\*Counseling Effectiveness, \*Counseling Techniques, Group Therapy, Individual Counseling, \*Nonverbal Communication, \*Photography, Program Descriptions, \*Psychotherapy, Social Cognition, Therapists, Visual Perception, \*Visual Stimuli

This paper introduces and defines photography, presents an overview of its applications, and shows how photographs can be used adjunctively as both artifacts and metaphors. Examples are given to demonstrate the usefulness of pictures in gathering information about a client's world, taking a history, formulating a diagnosis, and creating intervention strategies. Photographs are considered as stimulus materials and are described as an adjunct to verbal therapy, along with examples of the effectiveness of this approach. A photography bibliography is also provided. (Author/JAC)

Peer Support Networks in a Large Introductory Psychology Class.

New York Inst. of Tech., Old Westbury.  
Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date—Aug 81

Note—8p.; Paper presented at the Annual Convention of the American Psychological Association (89th, Los Angeles, CA, August 24-26, 1981).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Behavior Development, College Students, \*Communication Research, \*Cooperation, Discussion (Teaching Technique), Group Behavior, Higher Education, Peer Groups, \*Peer Influence, \*Peer Teaching, Social Behavior, \*Social Cognition, \*Teaching Methods

Identifiers—\*Networks (Persons)  
Networks have emerged as a major topic of interest in the behavioral sciences, and network concepts have recently been extended by community psychologists to higher education. To examine the effectiveness of peer networks within an introductory psychology class, networks of four students each met weekly in place of a lecture to review material and prepare for exams. Participants were encouraged to seek mutual help in addition to classroom meetings. A comparable, traditional class with the same instructor, syllabus and exams served as a control group. The networking class improved in three areas: (1) academic, i.e., quizzes, midterm and final exams; (2) networking, i.e., number of students known by name; and (3) social climate assessment, i.e., students' perceived classroom social climate. Although the networking generally received favorable reviews, end of the semester discussions indicated that some students experienced anxiety in the group interactions, and viewed networking as a failure of teacher responsibility. The findings indicate that future plans should include development of a more structured network experience to reduce stress, and an increase in out-of-classroom meetings. (Author/MCF)

What Research in Reading Reveals about the Reading Process.

Pub Date—[81]

Note—26p.

Pub Type—Information Analyses (070)—Opinion Papers (120)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Associative Learning, Cognitive Processes, Elementary Secondary Education, \*Reading Comprehension, \*Reading Instruction, \*Reading Processes, \*Reading Research, Teaching Methods

Identifiers—Reading Strategies, \*Schemata  
Research into the reading process has shaped an understanding of how readers "make meaning" when they are engaged in a reading activity. This research has highlighted a learning triad—the reader, the text, and the context (or learning environment)—that interactively affects the manner in which the student will comprehend a particular text. Research also permits reading teachers to consider such pre-reading characteristics as the role of background knowledge, reader/text interaction during reading, and the review, recall, and student response activities that occur after the text has been processed. Similarly, in examining instruction it seems particularly helpful to consider the variety of strategies that readers need to use at each of these three stages in the reading process. Instructional activities before reading might focus on the vocabulary and concep-

tual knowledge appropriate for a specific task. They could include prequestions, analogy, and the idiosyncratic associations students tend to make in an attempt to relate what they already know to what will be contained in the text. Activities during reading might focus on helping the reader develop self-questions or respond to inserted questions. Activities following reading might focus on post-questions, student response, and text- and script-based recall. The most important point to remember is that when instruction focuses on strategies—on how a student interpreted a certain idea and arrived at a certain response—then the student will be more likely to learn to cope effectively with a wide variety of reading tasks as an independent reader. Experiments on the Readability of Natural Expository Paragraphs with Identical or Related Sentence Topics.

Pub Date—[81]

Note—15p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—\*Coherence, Cohesion (Written Composition), College Students, \*Connected Discourse, \*Discourse Analysis, Expository Writing, Higher Education, High Schools, High School Students, \*Paragraph Composition, \*Readability, \*Reading Research, Writing Research

To test the hypothesis that paragraphs composed of sentences with identical or closely related topics (the grammatical subject and its adjuncts) would be easier to read than a paragraph whose sentence topics were only remotely related, two experiments on the readability of paragraphs were conducted. The first experiment involved subjective judgments by 40 high school and 20 college students on the readability of two pairs of paragraphs. The second experiment involved five-minute timed typing tests of pairs of paragraphs. Subjects participating in this second experiment were 14 beginning typing students, 18 students with 36 weeks of typing instruction, and 12 secretarial students with 36 weeks of typing instruction. The data from these experiments strongly supported the hypothesis. The students in the first experiment tended to choose paragraphs with identical or related topics, and the typists tended to make fewer errors while typing at a faster rate using the paragraph with identical or related topics. Teaching Home Economics Content Material in an Individualized Reading Skills Laboratory.

Pub Date—[80]

Note—69p.

Pub Type—Reports—Research (143)—Guides—Classroom—Teacher (052)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—\*Content Area Reading, Grade 8, \*Home Economics, Home Economics Skills, \*Individualized Instruction, Junior High Schools, Nutrition, Reading Difficulties, \*Reading Improvement, Reading Instruction, \*Reading Skills, \*Remedial Reading, Self Concept, Student Motivation, Teaching Methods

Eight grade students whose reading achievement scores fell between second and fourth grade level were given an individualized self-concept approach to reading instruction in home economics. Causes for their reading difficulties were identified as lack of interest in school, no set goals, poor attitudes, poor attendance and suspensions, and disadvantaged learning—the students who had not learned the basic skills needed to be able to function in school. Students worked in a home economics laboratory that was conducted as a reading laboratory for a six-week period. Two in-depth lessons were involved: in the first, students were told the story of Hansel and Gretel and asked to make a gingerbread house; in the second, the students studied nutrition and kept track of their own nutritional habits. A consumer education part of the course involved learning to read labels. At the end of the six-week period, 62% of the students had made gains in vocabulary, 43% had made gains in comprehension, 52% had improved their grades, 75% had improved their self-concept as witnessed by their social behavior, and 63% showed more enthusiasm for home economics. (Appendixes include materials that were used during the course.) (HOD)

**The Effects of Spelling Change on the Adult Reader.**

Pub Date—81  
 Note—38p; Paper presented at the Annual Meeting of the International Conference on Reading and Spelling (3rd, Edinburgh, Scotland, July 31-August 3, 1981).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Adoption (Ideas), Adults, \*Change Strategies, \*Orthographic Symbols, \*Reading Research, \*Spelling, Spelling Instruction

Identifiers—\*Spelling Reform  
 Two new spelling systems, Regular Spelling (RS) and World English Spelling (WES), were tested for their effects on 26 adults. The subjects read passages in one of these new orthographies, timed themselves, completed a comprehension test, and rated the ease of learning to spell and to read the new orthography in relation to traditional orthography. It was found that WES, a phonetic system, impaired the reading rates of adults; but RS, a system uniformly applying the most frequent of existing spelling rules, only impaired reading in the initial stages of the experiment. After reading about 6,000 words of text, the impairment in reading rates in RS had disappeared. By the end of the experiment, spelling in both systems had not been completely mastered by subjects, but this was probably because the teaching of the spelling of the orthographies was treated as secondary within the experiment. (RL)

**Beginning Reading in Italy.**

Pub Date—[80]

Note—17p.

Pub Type—Reports—Descriptive (141)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Beginning Reading, Cross Cultural Studies, Educational Philosophy, \*Educational Practices, Elementary Education, Foreign Countries, \*Language Experience Approach, \*Reading Instruction, \*Teaching Methods, \*Writing Instruction

Identifiers—\*Italy, \*Reading Writing Relationship

Teaching practices in Italy, where teachers combine three different methods for teaching reading, may provide insight into ways to improve methodologies in the United States. The first method is the natural method, which, unlike American methods, teaches reading and writing simultaneously with the emphasis on writing. The teacher writes as children dictate, then the children copy the teacher's writing, first words then sentences. The second method of teaching reading and writing is the phonic/syllabic, or traditional, method in which vowels are introduced, then consonants, then whole words and word parts, all reinforced by writing. The third method is the global method, which is rooted in vocabulary, particularly idiomatic expressions. Qualifying or signal words that change the meaning of the text are stressed with children writing an essay or reading a story following exercises using such words. The school printing press is also widely used by Italian children. Because of the emphasis on writing, far fewer books are available for children's use in Italy. Instead, extensive use is made of newspaper, chart paper, index cards, and teacher made materials. The concept of play, in the educational rather than recreational sense, is also predominant in Italian schools, reducing stress and intensity for children as they learn to read and write. (HTH)

**The Beginner's Concepts about Reading, Attitudes, and Reading Achievement in Relationship to Language Environment.**

Pub Date—Nov 81

Note—18p; Paper presented at the Annual Meeting of the University of South Carolina Conference of Educational Research (Columbia, SC, November 6-7, 1981).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—\*Beginning Reading, Grade 1, \*Language Experience Approach, Primary Education, Reading Achievement, \*Reading Attitudes, \*Reading Instruction, \*Reading Research

Thirty-three first grade classrooms in Georgia were observed to determine the state of language experience instruction and to examine whether such instruction makes a difference in students' awareness of the reading purpose, their knowledge of instructional terminology, their reading attitudes, and their reading achievement. The Allen Level of Implementation Scale (ALIS) was used to determine the level of implementation of language environment. Students were administered a battery of tests to gauge their reading attitudes, reading achievement level, and linguistic awareness. A measure of socioeconomic status was also administered. The findings revealed a general lack of language experience instruction in the classrooms; instead, teachers generally used basal reader guides. Although no significant correlations were found between implementation of language environment and the other variables, socioeconomic status did appear to have an impact on the student sample with the lowest ALIS rating, suggesting that offering first grade students language experiences can deter the effects of socioeconomic status. (FL)

**The Effects of a Modified Neurological Impress Method on Developing Decoding Skills.**

Pub Date—Nov 81

Note—9p; Paper presented at the 1981-1982 East Carolina University Library Science Lecture Series (Greenville, NC, November 13, 1981).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Cognitive Processes, \*Decoding (Reading), Elementary Secondary Education, \*Reading Instruction, Reading Materials, \*Reading Research, Reading Skills, \*Remedial Reading, Tape Recordings, \*Teacher Role

Identifiers—\*Neurological Impress Method, \*Read Along

A study evaluated the effects that a modified neurological impress method (a process whereby a student and a teacher read simultaneously) had on developing a student's decoding skills. Forty-two students in grades one through eight were randomly assigned to one of four groups: (1) a control group; (2) a group in which students read simultaneously with a tape recorder for 15 minutes a day, four days a week for three weeks using teacher assigned materials at the student's frustration reading level; (3) a group in which students read simultaneously with the tape recorder for the same amount of time, but using materials at each pupil's independent reading level; and (4) a group in which students read materials with a teacher in a traditional neurological impress method setting. Each student was pretested and posttested with an oral reading measure. The results indicated that tape recorded sessions using teacher assigned materials written for the pupil's frustration level produced significant growth in decoding skills. (FL)

**Reading and Study Behavior: A Review of the Behavioral Literature with Conclusions and Implications for Developmental Educators.**

Pub Date—Oct 81

Note—25p; Paper presented at the Annual Meeting of the College Reading Association (25th, Louisville, KY, October 29-31, 1981).

Pub Type—Information Analyses (070)—Speeches/Meeting Papers (150)—Reference Materials—Bibliographies (131)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Adult Education, Anxiety, \*Behavioral Science Research, \*Behavioral Sciences, \*Contingency Management, Higher Education, \*Learning Processes, Positive Reinforcement, Reading Achievement, Reading Improvement, Remedial Reading, \*Study Skills

Identifiers—\*Behaviorism

To ascertain the relevancy of behavioral psychology to those who are engaged in developmental work with college and adult students, this paper reviews articles found in several journals concerned with that discipline. The articles reviewed were chosen as representative of those pertaining to achieving academic success and are organized into five major categories: contingency management, including contracting; reading; academic performance; treatment of anxiety, including desensitization; and the use of behavioral procedures to predict success. Based on the literature review, the paper presents six conclusions: (1) learning is a contingent activity; (2) almost anyone can learn if the task is broken down into small enough steps; (3) anxiety can be a debilitating state for an individual; (4) the control of the environment in the form of contingency management, particularly contracting, can be used to help an individual accomplish his or her learning goals; (5) genuine concern for the individual is necessary if treatment is to be successful; and (6) investigations into the improvement of various forms of learning should be limited, for the moment, to results rather than processes. (FL)

Identifiers—\*National Assessment of Educational Progress, Second Literature Third Reading Assessment (1980)

The results of the 1979-80 reading and literature assessment conducted by the National Assessment of Educational Progress (NAEP) are contained in this report. In addition to the national results, the report describes the performance of 9-, 13-, and 17-year-old students in various cohorts defined by geographic region, sex, race/ethnicity, parental education, and size and type of community. The primary focus of the report is upon the written responses of students to works of literature when they were asked to analyze them, defend their initial reactions to the works, evaluate works, or simply respond to them in any way they deemed appropriate. In addition, the report provides information about the students' reading habits and attitudes, as well as their knowledge of literary works, characters, and conventions. The findings presented in the report indicate (1) that most students lacked systematic strategies for examining what they read in order to understand it fully, and (2) that although students could make sound initial responses to works, they did not appear to know how to support or explain their responses in any but the most superficial ways. The report discusses the implications of the findings and suggests that school administrators and teachers take a variety of steps to address the problems raised by them. Primary type of information provided by report: Results (Selective) (Change). (FL)

Descriptors—Adults, \*Editing, \*Reading Comprehension, \*Reading Research, Writing Skills

Identifiers—\*Protocol Analysis, \*Revision (Written Composition)

Editing for clarity is essential in document design, but research suggests that even when used by skilled editors, the standard editing procedures are often limited in their effectiveness. Three experiments were conducted to explore the process of skilled editing in order to understand why it often fails and to determine what can be done to make it more effective. In the first experiment, 24 adults read four documents that had been revised for clarity using standard editing techniques. After reading each document, the subjects completed comprehension tests. The results showed that while three of the documents had been improved by revision, the fourth appeared to have been made worse. In the second experiment, protocols of subjects reading the fourth document were collected in order to pinpoint comprehension difficulties. The document was then revised to reduce the difficulties and administered to 12 new subjects. Comprehension tests from this third experiment revealed that the error rate on the revised version of the document had dropped dramatically. The findings of the experiments suggest that standard editing techniques, even when used by skilled editors, sometimes fail to improve clarity and that reading protocols can provide a powerful editing tool when standard editing techniques fail. Improving Reading Comprehension.

Pub Date—Oct 81

Note—8p.; Paper presented at the Annual Meeting of the Plains Regional Conference of the International Reading Association (9th, Des Moines, IA, October 22-24, 1981).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Content Area Reading, Elementary Education, Questioning Techniques, \*Reading Comprehension, \*Reading Instruction, Reading Material Selection, \*Teaching Methods, \*Vocabulary Development

Identifiers—\*Prereading Activities, Schemata

A recent study found that "mentioning," or saying just enough about a topic to allow for an assignment related to it, had supplanted instruction in reading comprehension in grades three through six. As a replacement to "mentioning," a "preteaching" unit has been developed that concentrates on development of textbook vocabulary, identifying students' concept levels, building a frame of reference using the students' vocabulary, and teaching cue words. All of these activities take place before a reading assignment is given and are not graded, thus relieving anxiety. In order for the teacher to know the problems the student will face in the materials to be presented, a careful examination of the materials must be made with regard to their difficulty, the different concepts presented, readability, and vocabulary. The types of vocabulary that should be defined are (1) technical, (2) general, (3) high frequency, (4) structurally difficult, (5) multiple meaning, and (6) the students' own vocabulary. Cue or signal words and connectives are also taught to aid in comprehension. For testing situations, the teacher shows students how to summarize, compare and contrast, or put into chronological order. Through different levels of questioning, a teacher can gradually bring students to an inferential reading level. Above all, students must be allowed adequate time to give well-thought-out answers during questioning sessions. (HTH)

Descriptors—Diachronic Linguistics, Educational Change, Educational Needs, Foreign Countries, Illiteracy, Individual Needs, \*Literacy, \*Reading Instruction, \*Reading Skills, \*Social Change, \*Writing Skills

Identifiers—Denmark

The nature of reading has changed over the course of time. As more people learned to read and write, the rules became firmer, that is, readers became bound to the forms of the printed text so that rules of the written language became a necessity. Fifty years ago, adults in Denmark who had difficulty in reading could manage tolerably well, though only at a few places within the industrial society. Twenty-five years ago, it was rare for Danes not to be fairly good readers, and today the Dane who cannot read is an invalid while the one who cannot write faces even more difficulties. Every single change in industry increases the requirements for knowledge, and every single change increases the demands for reading and writing. Although the reading of a runic stone and of a computer display unit share some common features, each requires a different power of abstraction, development of concepts, attitude, level of complexity, and previous knowledge. In communication, reading must not be allowed to disappear; educators must teach students that reading is also content and that, among other things, reading is important for the continuation of cultural heritage and for the enlargement of knowledge. We cannot define the possibilities that will be contained in "reading" in just one or two decades from now, but we can try to extrapolate some of what we can now see in the light of change. (HOD)

Townsend, Michael A. R.  
Flexibility of Schema Shifting in Good and Poor Readers.

Pub Date—Apr 81

Note—25p.; Paper presented at the Meeting of the Society for Research in Child Development (Boston, MA, April 2-5, 1981).

Pub Type—Reports - Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Cognitive Processes, \*Discourse Analysis, Grade 3, Primary Education, \*Reading Comprehension, Reading Difficulties, \*Reading Research, Reading Skills

Identifiers—\*Schemata, Schema Theory

The schema theory of reading comprehension holds that an active interplay exists between the reader's cognitive structures (schemata) relevant to a text and the text itself. A study examined whether children varying in reading comprehension ability showed differences in the deployment of cognitive structures—specifically, whether good and poor readers showed similar flexibility in shifting between familiar schemata. Twenty good and twenty poor third grade readers listened to two short passages about familiar daily activities. Comprehension of the second passage demanded a shift in schemata, and only half the children were explicitly cued to that shift. Analyses of free recall and interview responses indicated that although good readers recalled more information, there was similar flexibility of schemata shifting for both good readers and poor readers. (FL)

Descriptors—\*Cognitive Processes, \*Content Area Reading, Elementary Education, Grade 3, Grade 6, \*Reading Comprehension, \*Reading Research, \*Reading Skills, \*Textbook Content

The ability to comprehend the gist and the main ideas of a passage are important textbook reading skills. Since research into children's ability to extract the central thoughts from prose has produced mixed findings, a study was undertaken to determine how skillful children are at comprehending the gist and the main ideas of a passage. To insure that the findings could be generalized to actual classroom reading behavior, the study was conducted in a naturalistic setting—83 third grade and 89 sixth grade students in their own classrooms read unaltered expository prose from existing textbooks. Main idea comprehension was assessed through a series of traditional reading comprehension measures. The results indicated that the students tended not to comprehend either the gist of an entire passage or its main ideas. The findings suggest that educators should continue to teach students how to comprehend main ideas, especially in content area reading materials. (FL)

Paulson, Peter L.  
A Method for Taking Structured Notes from Textbooks.

Pub Date—Oct 81

Note—13p.; Paper presented at the Annual Meeting of the College Reading Association (Louisville, KY, October 29-31, 1981).

Pub Type—Guides - Classroom - Learner (051)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Content Area Reading, Higher Education, \*Study Guides, \*Study Skills

Identifiers—\*Note Taking

A method for taking structured notes from textbooks uses a set of forms applicable to the texts in almost any content area. The two major goals of this method are using all parts of the textbook chapter and placing all parts of a chapter in context. The structured notes both focus on the content and force the students to synthesize and paraphrase. The forms call for a written response to each part of the chapter and make it easier to see how one part is related to the next by condensing concepts. The form for the chapter introduction includes spaces

for the title, main idea, and minor ideas. There is a separate sheet for each subheading, which includes spaces for the main idea and five supporting points. Students also note the illustrations, writing an explanation of the tie between the illustration and the point of the text it illustrates, and list new vocabulary. A third sheet provides space for a chapter summary, either outlined from the summary in the text or extracted by the student from prior notes. A fourth sheet is provided for questions or exercises at the end of a chapter. The forms are intended for use in the first few weeks of a course with substantial reading, until each student adapts them to his or her needs. (Samples of the form containing notes are included.) (HTH)

Descriptors—\*Academic Achievement, Adult Basic Education, \*Adult Reading Programs, Adults, \*Beginning Reading, Reading Instruction, \*Reading Material Selection, \*Reading Research To establish criteria for the selection of appropriate reading materials for adult beginning readers, a study was conducted to determine such readers' instructional level and ability to answer literal and higher level questions in three types of materials: narrative, familiar content, and unfamiliar content. Twenty-one adult learners reading at the first through fifth grade levels read narrative selections from each of the three types of materials then answered eight passage-dependent questions. Instructional level in each type of material was defined as the highest level at which the subject responded correctly to five out of eight questions. The results indicated that instructional levels in the three types of materials were significantly different: the instructional level for unfamiliar content materials was lower than the levels for narrative and familiar content materials. In all three types of materials, adult beginning readers scored significantly higher on literal level questions. The results indicated that the teachers who recommended the subjects had either over- or underestimated the general reading instructional level of almost half the students with most overestimating the level. The findings suggest that teachers of adult beginning readers need to be taught more accurate means of assessing reading instructional materials. (HTH)

Descriptors—\*Compensatory Education, Elementary Education, \*Program Effectiveness, Reading Instruction, \*Reading Programs, Reading Research, School Support, \*School Surveys, \*Teacher Effectiveness

The goals of a four-year study of reading instruction conducted in 1976 were (1) to describe and analyze compensatory reading programs at grades two, four, and six; (2) to determine how compensatory programs related to student reading achievement improvement; and (3) to obtain detailed descriptions of unusually effective compensatory reading programs. The study began with a questionnaire to principals and teachers in over 700 randomly selected schools across the nation. The study ended with an intensive study of five schools with unusually effective compensatory reading programs. The results indicated that effective reading programs for poor readers did not depend upon a specific approach, a special set of materials, or particular instructional techniques. Qualities the programs did have in common included the recognition

of reading as an important instructional goal with priority assigned to it; allocation of a large proportion of instructional time to reading and language arts instruction; the use of best resources, people, and materials; the availability of a variety of materials for meeting individual reading needs; concerned teachers who were excited about and involved in the reading program; and leadership to get the whole staff behind the program. Ten concrete nouns presented in either a pictorial or a linguistic mode and accompanied by ten nonsense syllables were shown to 77 college students in a study of how pictorial stimuli varied in recall and recognition tasks. The group receiving pictorial stimuli recalled and recognized significantly more nonsense syllables than did the group receiving written stimuli. Regardless of mode of presentation, significantly more nonsense syllables were recognized than recalled, adding further support for the effectiveness of pictures in learning situations. (Author/RL)

Reporting on the construction and validation of instruments for the evaluation of students in the first stages of reading and spelling instruction, this paper first discusses how teachers themselves can determine a student's learning progress with the help of evaluation instruments. Distinguishing between formative evaluation and diagnostic evaluation, the paper then provides a discussion of the construction of a set of tests that can be used in both ways. The paper argues that the tests make it possible for teachers to apply psychological principles of learning to read to the design of interventions that will improve student reading performance. (FL)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Error of Measurement, Informal Reading Inventories, \*Oral Reading, \*Reading Tests, Scores, Scoring, Standardized Tests, \*Testing Problems, \*Test Reliability, \*Test Validity Errors in oral reading tests result from inaccuracies that tend to creep in because children are not totally consistent while taking a test and from inaccuracies caused when the examiner does not catch a word recognition error, giving credit for an answer that is more wrong than right or vice versa. Every test contains a standard error of measurement (SEM), indicating how much an individual's score is likely to fluctuate on repeated testings. Some standardized oral reading tests also report this, but

SEMs are almost totally ignored by authors of informal or standardized oral reading tests. An examination of recently published informal reading inventories revealed that three of five did not mention that the obtained score was not totally accurate and dependable. In the other two, only a sentence or two at the end of the manual hinted that the results might need to be verified. The same also is true of two recently revised standardized oral reading tests. Studies have shown how subjective the scoring of oral reading tests is and the amount of examiner error these scores contain. The score one receives definitely depends upon who is doing the scoring. Reading instructors should abandon the idea that a score on an oral reading test represents a point on a continuum and substitute for it the more reasonable notion that the score lies within a band of scores at least a grade level in range. Descriptors—Gerontology, Individual Characteristics, Lifelong Learning, \*Older Adults, \*Reading Habits, \*Reading Interests, \*Reading Research  
As the number of older adults in the United States increases, more must be understood about their reading behaviors so that adequate services might be provided for them. In addition, carefully documented reading behaviors might yield valuable clues to the early establishment of lifelong reading habits. With these goals in view, a study investigated the reading habits and interests of retired adults who were active lifelong readers. Twenty-one adults with various educational levels were interviewed in the study. The following characteristics emerged from the interviews and appeared to be consistent across the range of educational levels: (1) active retired adult readers started reading early in life with the support and guidance of family members; (2) good readers were aware of literary resources and continued to enjoy similar types of reading materials throughout their lives; (3) the adult readers added new types as environmental influences changed and discarded other types of materials when they were no longer relevant; (4) for these people, reading was personal and most were content with a minimum of social interaction related to reading; (5) as a group, these people were articulate, alert, and mentally active; and (6) the readers maintained a sense of humor and had other interests to complement their reading. Descriptors—\*Content Area Reading, Elementary Secondary Education, \*Mathematical Applications, \*Problem Solving, Readability, \*Reading Comprehension, Reading Research, Reading Skills, Vocabulary Development

Identifiers—\*Word Problems

The research focusing on students' comprehension of mathematical word problems can be viewed from the math educator's perspective, the reading educator's perspective, or a pedagogical perspective. Math educators emphasize the math aptitude of the learners, a view suggesting that students must possess certain understandings to succeed in mathematics, and that the correlation between math computation skills and the reading of math word problems should be positive and high. While the math educator's perspective has support in the research literature, certain reading skills are also important for success in solving math word problems. Vocabulary development and literal interpretation of the problem seem crucial, while textbook readability is another major factor to consider. Three experiments have demonstrated that three factors interfering with reading and solving math problems

that are amenable to instruction are absence of a diagram, presence of extraneous information, and incorrect order of numerical information. A significant percentage of the variance observed on math tests is determined by reading comprehension strategies. This suggests that the math educator's perspective must be expanded to include something in addition to math concepts, generalizations, and number facts. All three perspectives have valid support and offer assistance to educators in teaching skills for solving math word problems. (HOD)

Descriptors—\*Comparative Analysis, Elementary Education, Elementary School Teachers, Grade 3, Grade 6, Longitudinal Studies, \*Reading Instruction, \*Reading Research, Success, \*Teacher Effectiveness, \*Teaching Methods

A six-year-long study investigated the reading instructional strategies used by elementary school teachers and identified those strategies used by effective and less effective teachers. At two-year intervals, all third and sixth grade teachers who taught reading in self-contained classrooms were classified as high, average, or low effective teachers. Effectiveness was determined by comparing students' predicted end of year reading achievement with their actual performance. The 64 teachers in the study also completed questionnaires that elicited information about their instructional practices, including skill sequencing, diagnostic record keeping, group organization and instruction, and materials used. The results showed that effective teachers at both grade levels used fewer reading groups than did less effective teachers, and the more effective teachers relied upon commercial skill charts connected directly with a basal reader series, while less effective teachers relied more heavily on teacher prepared charts. All teachers in the study kept diagnostic records, but the more effective teachers placed more emphasis on basal reader diagnostic level tests and less effective teachers on teacher made tests. All teachers used flexible grouping procedures; however, effective teachers used progress as the criterion for changing students from one group to another while less effective teachers used lack of progress as the criterion. Effective teachers relied heavily on basal readers, while less effective teachers did not. (FL)

Identifiers—\*Prose Learning

As part of a larger study of the oral reading of elementary school students representing eight linguistic populations in the United States, a study was conducted to discover why readers make the same miscues at the same point in a text and to discover factors in the text that contribute to this phenomenon. Subjects were second, fourth, and sixth grade students who were Navajo, Hawaiian Samoan, Arab, and Texas Spanish second language speakers, as well as downeast Maine, Appalachian white, Mississippi rural black, and Hawaiian-pidgin dialect speakers. They were instructed to read aloud whole stories of considerable length and to recall all they could remember about the stories. Sentences that generated the highest rates of miscues per word per

reader were then analyzed for aspects that contributed to those rates. The analysis confirmed that syntactic complexity was not the only contributor to miscues. Other factors causing miscues were (1) lack of relevant prior knowledge, (2) unfamiliar or unusual use of terminology, (3) weak syntax, (4) unpredictable simple structures, (5) unusual stylized syntax, (6) complex syntax, and (7) combinations of the above. The findings suggest that text difficulty cannot be understood completely without some investigation of the interaction between readers and the text, and that miscue analysis can provide data that reveal such interaction. Descriptors—\*Content Area Reading, Grade 4, Grade 5, Intermediate Grades, \*Reading Attitudes, Reading Comprehension, \*Reading Instruction, \*Reading Research, Reading Skills, \*Social Studies, Student Attitudes, Teacher Attitudes

A study was conducted to examine and describe the knowledge and beliefs of elementary school teachers and students regarding the acquisition of reading comprehension skills during reading instruction and the application of those skills during social studies instruction. One teacher and 26 fourth and fifth grade students were observed daily over a four-month period. The focus of the observations was on the reading group discussion sessions that the teacher conducted with each of nine reading groups in the classroom. Interviews were also conducted with the teacher and with individual students. The results indicated that the teacher had developed a teaching perspective that revolved around the use of discussion of story content to teach the comprehension skills that he deemed important for lifelong reading. He had organized his social studies instruction around the practice and application of those skills. He used several plans for grouping students for instruction, and had developed his own materials for teaching comprehension. The children's ideas concerning reading and reading instruction included the following: (1) reading is comprehension, (2) reading is reading aloud, (3) workbook exercises do not help in understanding a story or in developing reading skills, (4) children who read aloud with the teacher have difficulty with reading, and (5) reading skills learned in elementary school will help in high school. (Excerpts from teacher/student discussions are appended.) (FL)

Identifiers—\*Prose Learning, \*Story Grammar

A study was conducted to determine the role of story grammar in children's ability to detect misplaced information in simple narratives. The subjects, 27 second grade and 25 fifth grade students, each read six stories that had been developed for the study. The stories were one-episode narratives comprised of six grammatical categories with two propositions per category. The six categories were setting, initiating event, internal response, attempt, consequence, and reaction. Six event sequence orders

were used in the stories, five representing either the movement of the internal response or the consequences, and the sixth representing the correct event ordering. After reading a story, each student was asked to answer a series of probe questions about it to discover how readily he or she had noticed the order violations. After answering the questions, the student was asked to construct a better story using the same sentences. The results indicated that children judged correctly ordered stories to be "well-formed" and "sensible," but frequently identified disordered stories as being "flawed." Developmental differences were found in the children's ability to use expectations for the sequence of a story, in determining when the story made sense, and in correctly reordering it. (FL)

Identifiers—\*Prose Learning  
Most popular strategies, including illustrations, for improving prose processing consist of procedures that force attention either to the text's macrostructure or to the organization and interconnections of its propositions. These strategies are assumed to enhance students' comprehension of the text as encoded, as well as to afford students an efficient storage and retrieval scheme for long-term recall of text information. However, with expository or instructional texts containing factual information that is unfamiliar, complex, abstract, or simply difficult to remember, comprehension strategies of the kind just described may not be suitable for enhancing long-term recall. Rather, mnemonic strategies that are designed expressly for storage and retrieval of difficult-to-remember information would seem to be preferable. This view is supported by several recent experiments showing that prose-learning strategies combining the critical components of comprehension-directed techniques with those of memory-directed techniques will ultimately prove to be the most successful. Descriptors—\*Cognitive Processes, Discourse Analysis, Higher Education, Learning Theories, Literary Devices, \*Reading Comprehension, \*Reading Research, \*Short Stories, Undergraduate Students

Identifiers—\*Schemata, \*Story Grammar  
An experiment was conducted in which the story schema, an idealized representation of the parts of a typical story and the relationship among those parts, was derived inductively by examining a large number of actual published stories to extract their common properties. In addition to developing a schema that simultaneously defines the essential nature of stories and represents the psychological reality of story characteristics for readers, the project also sought to improve on previous story schema research by avoiding the use of self-generated or adapted stories or fairy tales. To minimize the possibility of subjects' previous familiarity with the stories, relatively obscure works were selected. Forty students were chosen from three classes of an undergraduate education course to assure a minimum reading and writing competence among the subjects. Each reader was asked to read and then retell one of the stories. The retelling was then analyzed to determine the degree to which it reproduced the schematic elements as they appeared in the original

text of that story. The findings indicated: (1) strong support for the accuracy of the tested schema as representing the cognitive framework that readers use to interact with stories, (2) that retelling is superior to probing for "real" stories, (3) that the traditional category of "setting" is not indigenous to stories in the same way that the other schematic properties are, and (4) that stories vary in schematic density. Descriptors—\*Classroom Techniques, Higher Education, \*Teaching Methods, \*Writing Instruction, \*Writing Processes, \*Writing Skills  
Identifiers—Audience Awareness, Outlines, \*Revision (Written Composition)

Writing teachers can use several techniques to focus student attention on revision and to guide students, revision processes. Asking students to make an outline of what they have already written (after the draft is complete, just before the conclusion is drafted, or when the writer is blocked and does not know what to write next) enables a writer to see the structure of what she or he has been saying. After the draft is complete, the outline functions as a basis for revision. Teachers can focus student attention on the rhetorical context by having them write brief descriptions of purpose, audience, and occasion on the cover sheets of their papers.

Discussion of rhetorical context in class also helps student writers realize when revision is needed. Another way to help students see the potential in revision involves helping each student develop an individualized revision heuristic. The heuristic can be prepared by analyzing students' strengths and weaknesses as writers, or by having students choose questions from coursework and textbooks, then rephrase the questions to focus attention on individual weaknesses. Descriptors—Age Differences, \*Aging (Individuals), \*Cognitive Processes, College Students, \*Language Processing, \*Language Research, \*Long Term Memory, Older Adults, Recall (Psychology), Semantics, Word Recognition

Three studies tested the theory that long term memory consists of a semantically organized network of concept nodes interconnected by leveled associations or relations, and that when a stimulus is processed, the corresponding concept node is assumed to be temporarily activated and this activation spreads to nearby semantically related nodes. In the first study investigating semantic interference, it was found that both elderly subjects and college students took longer to call out the ink color when the printed word was semantically related to designated words held in memory than when it was not related. In the second study, elderly subjects showed at least as much semantic priming as younger subjects, that is, pairs of letter strings were identified as words more rapidly if the words were semantically related than when they were unrelated. In both studies the stimuli were highly associated with each other, so a third study was conducted, varying the degree of association, to see whether age differences in priming would appear for less highly associated pairs. Participants were asked to state whether pairs of letter strings printed one above the other were words, with the response time recorded. The results showed that the magnitude of the priming effect did not vary with age or with associativity of word pairs, thus indicating that automatic processes do not change during aging. (HTH)

Following a statement of philosophy for developing an elementary school language arts curriculum, this paper presents a list of assumptions to serve as a guide to the many criteria that should influence educators' decision making as they plan language arts programs. The assumptions, developed by a committee of teachers and administrators from one public school district, include the following: (1) children have a right to their own language; (2) teachers should accept and use children's language patterns as springboards for instruction; (3) learning experiences should reflect sound principles of psychology and children's developmental characteristics; (4) teachers should recognize each child's best mode of learning and provide appropriate instruction and experiences; (5) learning occurs as the result of an interaction of previous experiences, subject matter, teaching methods, and materials; (6) the goal of instruction should be the development of creative and competent producers and consumers of language, which is best achieved through an emphasis on the creative arts of English; (7) the student should be an active participant in learning; (8) student centered approaches should be used whenever appropriate; and (9) evaluation should include a variety of procedures and should be based on the goals to be accomplished. Langer, Judith A.  
What Students Know and What They Write: Ways to Focus a Writing Conference.

Pub Date—81  
Note—9p.  
Pub Type—Guides - Classroom - Teacher (052)  
EDRS Price—MF01/PC01 Plus Postage.  
Descriptors—Cognitive Processes, Higher Education, \*Prewriting, \*Prior Learning, Student Teacher Relationship, Writing (Composition), \*Writing Instruction, Writing Processes

Identifiers—\*Teacher Student Conferences  
During writing conferences, many teachers impose their own ideas and attitudes on the student's essay, and often are not sure how else to help their students arrive at changes that will improve their writing. Understanding or assessment of a student's prior knowledge about the topic can be very helpful to a teacher in shaping the conference and paper under discussion. Brainstorming is a powerful pre-writing activity that helps students draw upon previous experience to discover what might be relevant about their writing topic. Students who know little about a topic need a special kind of conference that focuses directly on building the ideas or concepts being written about and provides suggestions for sources of further information or alternative topics. When students do know something about a topic but have not thought it through, the first draft often serves as a way to develop ideas. In this case, a productive conference might focus on what the student knows about the topic and how aspects of that knowledge are related to each other. A conference focusing on the linguistic or organizational aspects of a paper can be helpful for students who know a good deal about a topic and have thought it through already. (HTH)

Swenson, Dan H. And Others  
Reducing the Number of Teacher-Graded Papers in the Teaching of Informational Business Writing.

Pub Date—Oct 81  
Note—10p.; Paper presented at the Annual Meeting of the American Business Communication Association (Phoenix, AZ, October 14-17, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)  
EDRS Price—MF01/PC01 Plus Postage.  
Descriptors—\*Business Correspondence, \*Classroom Techniques, \*Grading, Higher Education, Teacher Role, \*Technical Writing, \*Writing Instruction

A study was conducted to test the notion that

effective business writing can be taught with half the "usual" number of teacher-graded papers, thereby allowing teachers to devote more of their time to more creative teaching strategies. Ten instructors and 29 sections of an informational writing class were involved in the study. The design of the study included two phases: a pretest-posttest analysis of each of the two instructional methods as well as a comparison of their relative effectiveness, and a regression analysis to predict posttest scores or final grades on the basis of American College Test (ACT), College Qualification Test (CQT), or pretest scores of writing ability. Although no significant predictor of writing achievement was found, the results indicated that information business writing can be taught effectively with fewer teacher-graded papers. (Author/RL)

**The Transactional Theory of the Literary Work:**

Implications for Research.

Pub Date—Oct 77

Note—33p; Paper presented at the Buffalo Conference on Researching Response to Literature and the Teaching of Literature (Buffalo, NY, October 1977). Best copy available.

Pub Type—Information Analyses (070)—Opinion

Papers (120)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Discourse Analysis, \*Educational Research, English Instruction, Higher Education, Literary Criticism, \*Literature Appreciation, \*Reading Processes, \*Research Needs, Secondary Education

Identifiers—Author Reader Relationship, \*Reader Response, \*Transactional Analysis

The tendency to think of a literary work as an object or entity existing apart from author and reader has been the greatest stumbling block in literary criticism and the teaching of literature. The transaction between a reader and a text involves the reader in a highly complex, ongoing process of selection and organization. Keeping the reader's active process of evocation of the work central will have important implications for questions raised and methods used in both teaching and research. However, little has been done to help the student assimilate the aesthetic mode of relating to a text. Students need to learn to select and handle both the referents of the verbal signs and what they trigger within themselves. More studies are needed on the actual literary transaction or reading event. There is also a need for research on the differences between aesthetic and effortful (e.g., nonaesthetic, expository, or nonfictional) reading, at all levels, and on the kinds of elements in a written or oral response that can be judged to reflect the inward-looking, synthesizing activities leading to the crystallization of a sense of "the work." In both content analysis and intuitive study of responses, it is important to recognize that various factors will have affected what is expressed as a response. As for teaching, research should focus on the transactional model, with its emphasis on the total situation in which the relationship with the text occurs. Moreover researchers must realize that the community, the ethos of the school, the total curriculum, and the cumulative emphases of the literary texts presented are settings for any encounter between a reader and a text in a classroom. **Principles for Teaching Non-English Speaking Students in the Regular Classroom.**

Pub Date—Nov 81

Note—13p; Paper presented at the Annual Meeting of the National Council of Teachers of English (71st, Boston, MA, November 19-22, 1981).

Pub Type—Guides—Classroom—Teacher (052)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Classroom Communication, Elementary Secondary Education, \*English (Second Language), \*English Instruction, \*Non English Speaking, Oral Language, Peer Teaching, \*Second Language Instruction, Student Participation, \*Teacher Role, \*Teaching Methods

Regular classroom teachers who, in addition to teaching their regular students, have to deal with students who do not speak English should follow certain principles in planning curricula and lessons for their non-English speaking students. These teachers should (1) distinguish formal classroom talk from informal talk; (2) allow opportunities for

language learners to communicate with native speakers; (3) look for language patterns, words, and phrases that recur; (4) maintain a positive and encouraging attitude; (5) concentrate on the most important aspects of language first, rather than correcting every error that language learners make; (6) establish student-to-student relationships for the non-English speaking student; (7) provide oral tasks for the language learner first, then reading and writing tasks; and (8) prepare exercises based on the essential cultural elements the non-English speaking student must learn. These principles suggest an approach that makes as much use of peer tutors as possible so that the teacher is free to deal with the rest of the class. Also, working with peers involves the English language learner as much as possible in real communication situations. (HOD)

Note—9p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—\*Community Involvement, \*Media Research, \*Newspapers, News Reporting

Identifiers—\*Media Role, \*Media Use

Going beyond the loosely defined but evocative ideas of previous research linking newspaper readership with ties to the local community, the two studies described in this report carefully distinguish between readers' sense of identification and their actual involvement in the community. The first study discussed in the report examines the impact of community involvement on newspaper use, explicating five components of community involvement: awareness, cognitive orientation, relating, correcting, and working for change. The second study detailed examines the relationship of newspaper use and community identification. The findings presented in the report reveal that both involvement and identification with the local residential community as a geographic place are more strongly related to newspaper use than are involvement and identification with any communities defined in terms of either formal or informal social groups. This manual is intended to assist elementary school teachers in developing classroom writing experiences. The sections in the first part of the manual address the individual stages of the writing process (prewriting, writing, and postwriting/editing) by reviewing research, presenting case studies of children's writing, and outlining activities, topics, and techniques for teaching each stage. The section on postwriting also examines self-editing techniques, peer editing, and holistic scoring. The second part of the manual provides selection of strategies for teaching the writing process by using resources such as newspapers, advertisements, literature, pictures, and teacher-generated ideas and materials. **Using Experimental Psychology in Technical Writing.**

Pub Date—May 81

Note—5p; Paper presented at the Annual Meeting of the International Technical Communication Conference (28th, Pittsburgh, PA, May 20-23, 1981).

Pub Type—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Cognitive Processes, \*Experimental Psychology, Models, \*Reinforcement, \*Short Term Memory, \*Technical Writing, Writing Skills

Identifiers—\*Gestalt Psychology

A psychological model can show the technical writer how to present information for effective communication by explaining how readers perceive, understand, learn, and remember. The principles underlying the model are the reader's psychological set, the mind's pattern-forming tendencies, the span of short-term memory, and the mind's need for reinforcement. The psychological set explains the disposition of readers to think or act in a particular way, and interference occurs when a communication does not match the reader's mind set. The main reason people read technical literature is to know how to do something, so technical publications should be task oriented. Gestalt psychology suggests that the mind tends to seek meaningful patterns in perceiving, understanding, learning, and remembering. Therefore, the technical writer's objective should be to supply cues for forming helpful patterns and to avoid cues that may form misleading patterns. The fact that the capacity of short-term memory is 7 plus or minus 2 items has numerous implications for presenting information: sentence length, number of items to include on a chart, and the number of parts into which to divide a comprehensible whole. Information is simple when the number of items presented does not exceed the span of short-term memory. Reinforcement helps the reader review material, verify interpretation, and see information in alternative ways. Technical writers should organize information so it will be easy for the reader to review. (HOD)

Descriptors—Childhood Needs, \*Childrens Literature, Elementary Education, Figurative Language, \*Imagination, Language Arts, \*Learning Theories, \*Reading Comprehension

Identifiers—Author Reader Relationship, \*Schemata

Schema theories have proposed that comprehension results from the activation of generalized knowledge structures, called schemata, stored in memory. These schemata represent abstract conceptual models of reality that children construct in their minds on the basis of their experience in the world. Unfortunately the comprehension of literature places some rather special demands on the child. The world of literature is an imaginary place—the imaginative creation of the writer—and one where anything can happen and often does. In literature, imagination overturns reality and imposes a new reality which is instantiated through the language of literature. New schemata must be developed, new predictions made, and new hypotheses tested to accommodate the new realities encountered. From the interaction of the children's receptivity to the world of the imagination and the author's portrayal of this world, comprehension results. In this sense, children recreate the literature they read on the basis of the imaginative capacity they bring to reading. In schools educators must ensure that they do nothing to diminish this capacity. It is necessary for children to enter and inhabit the fanciful worlds of their literature, and to explore and delight in the inner complexity and imaginative potential of these worlds. (HOD)

Identifiers—Aboriginal People, Australia

There can be little doubt that one of the main reasons for the present interest in the study of the varieties of English and their implications for language teaching is the way in which these varieties impinge on one another. Mixed populations from different ethnic sources, geographical areas, and language backgrounds find their representations in and out of the classroom. Studies of the effects of language varieties in the classroom (especially of Australian Aboriginal children) are being carried out in association with the Mount Lawley Language Center in Western Australia. These studies show that in the classrooms where different language varieties are found, students often do not respond to the teacher's control, directions, or questions. It is necessary to study whole interactions to see whether delayed communication acts are not random lapses, but part of an alternative communication strategy on the part of the children who use them. Teachers and all others in "interventive" situations require as full and detailed an awareness as possible of the features, the communication conventions, and the cultural assumptions of the particular variety of English which they themselves use and of the language varieties with which they are most likely to be dealing. Teachers thus aware of the effects of varieties, and with a range of appropriate skills from which to choose will be able to build in their students from the earliest stages of language learning a similar sensitivity toward their own and other varieties of English. Descriptors—Adults, \*Classroom Techniques, Higher Education, \*Individualized Instruction, \*Nontraditional Students, Writing (Composition), \*Writing Instruction

Identifiers—\*Writing Laboratories

A writing center course designed for adult learners offers features that will work in either a credit or a noncredit course. The classroom provides an informal setting and contains a variety of workbooks and audio visual materials, indexed for easy student reference. Sample paragraphs and essays illustrating different composition formats are kept on file, including famous speeches. A presentation easel containing sheets with explanatory material on grammar and structure eliminates the need to repeat instruction when individual problems arise. After giving each student a grammar test and an essay assignment, the teacher evaluates the essay and plans an individualized program of instruction with each student, which includes a contract specifying the amount of work to be done and the time allotted for it. The writing instruction progresses from grammar to paragraph development to essays, allowing students a choice of topics. Problems with this system include the time consuming entrance and exit interviews, nontraditional students who often refuse to sign contracts, and audiovisual materials that may be insulting to adult students. The successful features of the approach include the availability of materials, the student files, and teaching assistants or tutors to keep the student/teacher ratio low. (HTH)

Adult Writers: Some Factors That Interfere with Effective Writing.

Pub Date—79

Note—12p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adults, \*Middle Management, Occupational Surveys, \*Technical Writing, Writing Processes, \*Writing Skills

Identifiers—\*Writing Apprehension

In an effort to identify some factors that interfere with effective writing in adult writers, a three-page questionnaire was administered to 165 adults, most with technical degrees, who worked in the Washington, D. C., area. Respondents were top to middle management personnel who spent a significant portion of their time on the job writing and who were responsible for originating substantive written documents. After a tabulation of the findings, the questionnaire was refined and administered to an additional 89 people from other business groups. The original questionnaire consisted of 20 questions—13 asking for information about the respondents' background and how they write, and the remaining 7 asking the respondents to manipulate the language. Results indicated that the majority of respondents did not know that they needed to make preparatory decisions before starting a writing task, or, if they did know, how or when to make them. From the second questionnaire it was determined that many of the respondents had negative feelings about writing. From this survey it appears that lack of knowledge about the value of preparation and no method by which to do it are at the root of adult writing problems. These problems cause adults to be anxious, defensive, and reluctant to approach their writing tasks until the last minute, with the result that they produce disorganized and ineffective writing. Descriptors—Bibliographies, \*Books, Children, \*Childrens Literature, \*Foreign Language Books, Interpretive Skills, Publishing Industry, Reading Materials, \*Translation

Despite the international concern for having books available to children and the fact that thousands of books for children are being published in numerous languages, relatively few of these books are being translated into English. One of the reasons that publishers are reluctant to produce books in translation is the complex nature of the translation process and the difficulty of finding a highly qualified person to translate the book successfully. The uppermost task for the translator is to try to create the work as if the author were actually writing in the translator's own language. Children's books in translation often do not sell well because award winning titles are not highly publicized, and because of the impression that translated books are "heavy-reading" and more thought provoking than action oriented. Fortunately, the last ten years have witnessed an upsurge in the number of attractive and appealing translations for children. Reading books about young people in other countries gives children a reflection of life in other areas, and acquaints them with different customs and points of view. (A bibliography of children's books in translation is appended.) (HTH)

Identifiers—\*Freshman Composition, \*University of Texas Austin

This report provides information drawn from a study that compared two components of the freshman English program at the University of Texas at Austin. The first chapter of the report contains background material and describes the two course components—the analytic option, which emphasizes writing skills in the context of complete pieces of writing, and the synthetic option, which works from individual discourse parts to paragraphs to complete

essays. The second chapter discusses the research design and procedures, while the third chapter analyzes some features of high and low quality student essays. Chapters four and five offer comparisons of essays written by students in the analytic option with those written by students in the synthetic option. Chapter six discusses the influence of writing apprehension on student performance in freshman composition, and chapter seven outlines the predictors of writing quality and course grades. The final chapter places the study in the larger context of writing research conducted at other universities and presents a summary of the study's findings, its limitations, and its implications for teaching and research. Descriptors—Grade 6, Intermediate Grades, Program Descriptions, Program Evaluation, Spelling, \*Student Teacher Relationship, Teaching Methods, \*Time on Task, \*Writing Exercises, \*Writing Instruction, \*Writing Processes, \*Writing Research

Noting that American elementary schools over the years have emphasized reading to the detriment of writing, a study examined the efficacy of a writing program that places the student and the teacher in direct contact with the writing process by (1) requiring daily student writing and suggesting the teacher frequently write with the students, (2) providing writing models through the process of spelling dictation, and (3) teaching the students proofreading and editing skills and placing the students in situations that required use of these skills. Since the emphasis throughout the program was to increase the time that students and teachers spent on the writing task, a daily free writing period was the keystone. In the beginning, the writing period was about five minutes in length, but it was gradually lengthened to about twenty minutes. A quasiexperimental-control design was used to evaluate the effectiveness of the writing program on sixth grade students. The data indicated that while both experimental and control groups showed gains in writing scores from the beginning to the end of the school year, the treatment groups showed significantly more gains. (Appendixes include a list of proofreading symbols and a list of writing topics.) (HOD)

Identifiers—\*Graphology

Using the methods of study developed by the International Graphoanalysis Society, this book offers practical suggestions that parents and teachers can use to understand children through their handwriting. Following a brief history of handwriting analysis, the first four chapters of the book explain how variations in children's writing—slant, pressure, size, and the letter "t"—expose their inner feelings. Chapter five reveals how children's writing can expose the extent of their emotional insecurity and the nature of their fears, while chapter six explains how handwriting analysis can be used to help children cope with their fears. Chapter seven offers ideas for using handwriting analysis in the school setting, and chapter eight describes how it can be used to uncover a child's interests and strengths. Chapter nine outlines ways of using handwriting analysis with preadolescents and adolescents, while chapter ten suggests how to analyze the "squiggles" of preschool children and the writing of primary school children. The final chapter, addressed to teenagers, explains how they can analyze their own handwriting. (FL)

The need for effective communication is reflected in the increased number of privately sponsored technical writing workshops and in the increased demand for business and technical communication courses on campuses. In these learning situations the traditional methods that have been used to teach

adolescents how to write become inappropriate. Writing done by professionals in business and industry is a uniquely difficult form of communication that demands conformity to conventions while simultaneously encouraging individuality. The emphasis on the conscious presentation of persons, or public self, distinguishes courses in technical composition classes. Ignoring this realistic need to present the self deprives adult writers of the opportunity to develop the rhetorical skills that will permit them to perform successfully in their professional lives. Rhetorical development is impossible without the ability to confront, to interpret, and to evaluate the needs of each situation as it arises. Technical communication is more than simply reporting factual information, and failure to recognize this is a disservice to those who seek to learn the craft and those who teach. (HOD)

Judy, Stephen N. Judy, Susan J.

An Introduction to the Teaching of Writing.

Report No.—ISBN-0-471-06222-7

Pub Date—81

Note—193p.

Available from—John Wiley & Sons, Inc. One Wiley Dr., Somerset, NJ 08873 (\$10.95 paper).

Pub Type—Books (010) — Guides - Classroom - Teacher (052)

Document Not Available from EDRS.

Descriptors—Classroom Environment, Elementary Secondary Education, English Curriculum, \*Interdisciplinary Approach, \*Teaching Methods, \*Writing Evaluation, Writing Exercises, \*Writing Instruction, \*Writing Processes  
Identifiers—\*Audience Awareness

Intended for writing instructors at all educational levels, the chapters in this collection discuss the philosophy and principles of the teaching of writing in an effort to capitalize on the current public interest in writing. Chapter topics are (1) the basics of teaching writing; (2) teaching the composing process; (3) writing assignments and activities; (4) interdisciplinary writing; (5) revising, editing, and correcting; (6) audiences for student writers; (7) designs for writing courses; and (8) assessment and grading. Appendixes include writing curriculum artifacts, a list of contests and places to publish writing, and a list of composition journals and professional organizations. (HOD)

Handwriting Resource Book, Grades 1-7.

British Columbia Dept. of Education, Victoria. Curriculum Development Branch.

Report No.—ISBN-0-7719-8588-6

Pub Date—81

Note—91p.

Pub Type—Guides - Classroom - Teacher (052) — Books (010)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—\*Cursive Writing, Elementary Secondary Education, \*Handwriting Instruction, \*Handwriting Readiness, \*Handwriting Skills, Lesson Plans, \*Manuscript Writing (Handlettering), Resource Materials, Teaching Methods

Designed for use by both the elementary and the secondary school teacher, this resource book provides information and guidance on the teaching of printing and cursive writing skills. In the first part of the book, which deals with preparation, the physical requirements of handwriting are discussed and program planning suggestions offered. The second part concerns handwriting objectives and activities and focuses on the method whereby a student acquires and develops strong handwriting skills. The stages outlined take the student from readiness activities to printing, and from printing to refined cursive writing. The third part sets out some specific printed and cursive letter models, together with suggestions on how students can best be taught to imitate them, while the fourth part deals with the preparation and teaching of a handwriting lesson. This section identifies four distinct types of handwriting lesson, discusses the structural components of a lesson plan, and provides a chart containing suggestions for preparatory activities. It also includes sample lesson plans (one for each type of lesson). The fifth part covers evaluation and remediation and offers advice on how to isolate handwriting defects and take remedial measures. A list of resource materials and a bibliography are included. Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC02 Plus Postage.**Descriptors—Affiliation Need, Behavioral Science Research, \*Behavior Patterns, \*Communication (Thought Transfer), \*Communication Research, \*Friendship, Interpersonal Competence, \*Social Exchange Theory  
Identifiers—\*Dependency (Personality), \*Independent Behavior

A study was conducted to investigate the practical management of interactions sustaining close friendships. Ten pairs of close friends were interviewed individually on two occasions and together on a third occasion. An interpretive analysis of subjects' remarks identified a dialectical principle governing the communicative organization of friendship. The dialectic of the freedom to be independent/freedom to be dependent conceptualizes the patterns of availability and mutual support in a close friendship. Basically, while each person is free to pursue individual interests apart from the other and without the friend's interference or help, each retains the liberty to rely on the other for help. In granting each other a combination of these two freedoms, the individuals cocreate a basis for patterns of interaction in their relationship that may curtail their individual liberties. This being so, the appropriate enactment of either type of communicative behavior within a relationship must be continually, though not always explicitly, renegotiated. (RL)

**Reflections on Communicologists in Gerontology:****A Credibility and Visibility Gap?**

Pub Date—Jul 81

Note—17p.; Paper presented at the Meeting of the Speech Communication Association Summer Conference on Communication and Gerontology (Edwardsville, IL, July 22-24, 1981).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Gerontology, Higher Education, \*Older Adults, \*Specialists, \*Speech Communication, Speech Curriculum, \*Teacher Role

Communication specialists, or communicologists, have several problems to overcome before their contributions to the study of gerontology can receive the recognition they deserve. Communicologists, for example, need to define their discipline and expertise more clearly and succinctly. In order to be credible to gerontologists and other professionals in the field, communicologists also need a sound, broadly based understanding of the various aspects of the processes of aging, as well as the social, physical, and economic problems that society imposes on the elderly. Such knowledge can have a profound effect on the communicologist's own perspectives and effectiveness. Communicologists must also become more visible by participating in gerontological programs on campuses and in the community and at major conferences in other disciplines. Finally, communicologists need to share in research involving professionals in other disciplines, and to undertake more research on their own. (FL)

Descriptors—\*Codes of Ethics, \*Cultural Awareness, \*Ethics, Higher Education, Moral Issues, \*Multicultural Education, \*Speech Communication, Speech Curriculum, Teaching Methods

Identifiers—\*Intercultural Communication

Ethical concepts, when taught, should be operational and placed in context. Applying the operational criterion is tough enough in a single culture; however, in a course in intercultural communica-

tion, difficulties are multiplied. The teacher of an intercultural communication classroom should embrace the position that many ethical principles are relative, because they are the products of different cultures. A few are universal, because they are valid in all cultures. In addition, the teacher should stipulate particular definitions for morals, ethics, and culture. Two principles that are universal are that no action is ethical if it harms persons, and the action that benefits persons accumulates ethical quality. A class seeking theories and hypotheses for managing ethics cross culturally should grapple with the basic issue of whether the human animal is capable of accepting values other than its own. Thus, a final building block in the "stance" of a teacher of ethics in intercultural communication must be recognition of how limited human beings are when they try to respect persons who are fundamentally different. Descriptors—\*Aggression, \*Behavioral Science Research, Child Development, Cognitive Development, Elementary Education, Grade 2, Grade 5, Kindergarten Children, Programming (Broadcast), Social Development, \*Student Behavior, \*Television Research, Television Viewing

Much of the television American children watch is violent in content. The evidence indicating that this programming increases children's aggressive behavior is not clear-cut, and some studies have shown a decrease in children's aggressive behavior. A study was conducted to test a more developmental perspective on the effects of violent television: that the impact of televised aggression will vary according to the child's cognitive and social developmental level. In an experiment using 119 students from kindergarten, second grade, and fifth grade, the subjects' free playroom play was observed during a one-week baseline period, a two-week experimental phase, and a one-week follow-up period. During the experimental phase, subjects were randomly assigned to view for 20 minutes each day either exclusively aggressive or exclusively nonaggressive programming, after which their playroom behavior was observed and rated according to 13 categories ranging from physical threat to passive social interaction. The results showed that the older the subjects, the better their comprehension and recall of the shows. Female aggressive behavior was quite low throughout the experiment, but aggressive behavior in boys decreased after they viewed the aggressive segments. Kindergarten children showed more decrease than did fifth grade students, although the fifth grade students better understood the programs they had viewed. (HTH)

Descriptors—Administrative Policy, \*College Administration, Communication Skills, Higher Education, \*Organizational Communication, \*Speech Communication, Teacher Administrator Relationship

Identifying many of the goals and objectives of academic administrators can reveal the pervasive impact of speech communication on the potential effectiveness of administration in higher education. Such objectives include (1) disseminating information, (2) engaging in consultation, (3) reaching decisions, (4) discovering information, (5) obtaining advice and counsel, (6) persuading persons and groups, and (7) stimulating intellectual thought. The consulting process probably holds the key to successful shared governance at universities and colleges. Effective consultation involves many critical decisions, such as who will prepare a draft of a solu-

tion to an issue, how much time will be allotted, and who will be consulted. Failure to achieve an appropriate balance between consultation and decisiveness is a recurring problem that exemplifies administrative effectiveness. Efforts to reach consensus can sometimes result in general paralysis, while so many groups may respond to issues that decisions remain unmade for long periods of time. Engaging in genuine consultation and trying to accommodate what one hears are important objectives. Given the special competence in understanding and practicing speech communication, faculty members of this discipline can assume leadership roles in faculty and university governance. (HTH)

Descriptors—Course Descriptions, Curriculum Development, Higher Education, Integrated Curriculum, Law Students, \*Legal Education, \*Speech Communication, \*Speech Curriculum

There is a growing interest in the field of speech communication by legal educators and a mutual interest in the legal process by communication educators. One dimension of this interest is the development of undergraduate courses that focus on communication in the legal process. One such course is offered at the University of Massachusetts, Amherst, and at the University of Arizona. The three-credit course is offered as an elective to juniors and seniors and is predicated on the belief that lawyers, judges, litigants, and jurors face numerous communication problems on a daily basis. It gives particular attention to the literature related to verbal and nonverbal aspects of communication as they apply to the legal concerns of interviewing, negotiating, and litigating. The course is organized into five units: (1) introduction to communication theory and the legal process, (2) communication theory and practice in interviewing and counseling, (3) communication theory and practice in negotiating and pretrial strategies, (4) communication theory and practice in the trial process, and (5) special topics in judicial communication. Descriptors—\*Classroom Communication, \*Communication Research, \*Discussion (Teaching Technique), Higher Education, \*Questioning Techniques, \*Speech Communication, \*Speech Instruction, Student Teacher Relationship, Teacher Role

Identifiers—\*Communication Apprehension

A study tested a method for teaching preservice teachers enrolled in a basic speech course how to

lead classroom discussions. In addition, the study examined the effects of communication apprehension and size of audience on students' satisfaction with the assignment. The students were administered a measure of communication apprehension and assigned to one of two groups. Those in the first group led discussions within a small group of five or six students, while those in the second group led discussions before the entire class. Students in both groups were required to adhere to the following format: (1) introduce the discussion topic; (2) ask a preplanned question and wait for an answer; (3) react to the audience's response with a comment, a probe, or a reflective summary; (4) ask another question and repeat the third step; and (5) summarize and conclude the discussion. Student reaction to the assignment was measured with a questionnaire. The results confirmed that classroom discussion was perceived as an effective teaching method by students. In addition, students who lead small group discussions were less apprehensive than those who lead entire class discussions, and highly apprehensive students rated small group discussion assignments among their preferred assignments more frequently than did low apprehensive students. (The student questionnaire is appended.) (FL)

Descriptors—\*Academic Advising, \*Education Work Relationship, Employer Employee Relationship, Faculty Advisers, \*Internship Programs, Occupational Surveys, \*Organizational Communication, \*Speech Communication, \*Speech Instruction

As the business world has recognized the practical value of college programs designed to prepare students for careers, internships have begun to receive increasing attention as valuable additions to the speech communication curriculum. To discover the problems both interns and their faculty advisers face during the course of an internship, questionnaires were mailed to internship coordinators at 130 speech departments and to 62 student interns who had been identified on the faculty questionnaire. The questionnaire elicited information concerning task related and intrapersonal and interpersonal problems that occurred most frequently and were perceived as most important. Forms were returned by 55 faculty members and 31 interns. Two problems were consistently ranked high by both faculty members and interns in terms of importance and frequency: insufficient task instruction and insufficient feedback about task performance. In terms of intrapersonal and interpersonal problems, "intern unclear about learning objectives" was ranked as the most frequent and important problem by faculty members and as the most important by interns. Lack of feedback ranked as the next most important and frequent problem from the intern's perspective, and both faculty members and interns felt that job supervisors occasionally failed to solicit feedback from interns. Descriptors—\*Attitude Change, Behavioral Science Research, Change Strategies, \*Child Development, Childhood Attitudes, \*Children Television, \*Communication Research, Early Childhood Education, Educational Television, \*Influences, Motivation, \*Motivation Techniques, Socialization, Student Behavior, Student Reaction, Television Viewing  
Identifiers—\*Ridicule

A study tested the effectiveness of ridicule as an

educational and social corrective in children's educational television programs. Arbitrary activities involving a novel object were presented to 69 four-year-old and 83 six-year-old children via videotaped presentations and demonstrations. In each of three types of motivational message (ridicule, command, suggestion), a highly specific action was discouraged, another was encouraged, and a third was unmotivated. Subject gender was employed as an additional factor. The frequency with which subjects played with the novel object as discouraged, encouraged, and unmotivated was assessed. Four-year-old children consistently responded most effectively to correction when commands were given. In contrast, six-year-old children were most responsive to ridicule, followed by suggestion. Sex Differences in Appropriateness of Communication through Multiple Nonverbal Channels.

Pub Date—Aug 81

Note—18p; Paper presented at the Annual Meeting of the American Psychological Association (89th, Los Angeles, CA, August 1981).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Students, \*Communication Research, \*Communication Skills, Females, Higher Education, Interaction Process Analysis, \*Interpersonal Relationship, Males, \*Nonverbal Communication, \*Sex Differences

A study investigated the use of nonverbal cues by male and female subjects during relatively pleasant and unpleasant interactions. Five nonverbal behaviors found to be effective in controlling both the quantity and the quality of interactions were examined: gaze, smiling, arm position, interpersonal distance, and personal space. It was expected that females would exhibit more appropriate use of nonverbal cues, but that this advantage would be limited to a favorable, open interaction. The 40 male and 40 female college students participating in the study were instructed to establish a pleasant or to avoid an unpleasant interaction with a male or female stranger. Results showed that women used nonverbal cues more appropriately and in more congruent patterns than did men, but only when endeavoring to be pleasant. Men were somewhat more appropriate and congruent in their nonverbal cues when avoiding unpleasant interaction. The results qualified previous findings that women were better encoders of nonverbal information and suggested that the purpose of the communication is an important mediator. (RL)

Descriptors—Aggression, \*Behavior Patterns, \*Communication Research, \*Interpersonal Relationship, \*Nonverbal Communication, \*Personality Traits, Theories

Identifiers—Interpersonal Communication, \*Type A Behavior

Research has documented two behavior patterns known as Type A and Type B. Type A behavior is characterized by competitive striving, a sense of urgency, and hostility, while Type B behavior is less aggressive and more relaxed. It has been theorized that individuals exhibiting Type A behavior have a strong need to maintain control over their environment and that they react more strongly than other individuals when they experience threat. Two studies were conducted to investigate nonverbal responses by Type A individuals to interpersonal threat. In the first study, 80 college students participated in a sales transaction and assumed the role of either a customer or a salesperson. The customer role provided a situation wherein students expected a threat to their behavioral freedom, while the salesperson role lacked such a threat. The results indicated that an interpersonal interaction characterized by threat to freedom can produce nonverbal reaction. Overall, the subjects in the customer and salesperson roles used nonverbal behav-

iors in separate and distinct ways. More importantly, Type A and Type B individuals differed in the use of personal space and interpersonal distance while in the customer role—a role that subjects in the second study confirmed was threatening. (FL)

The Evaluation and Prediction of Affective Response to Graduate Teaching Assistants' Classroom Communication.

Pub Date—Nov 81

Note—20p; Paper presented at the Annual Meeting of the Speech Communication Association (67th, Anaheim, CA, November 12-15, 1981).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Classroom Communication, College Students, \*Communication Research, Higher Education, Self Concept, Speech Communication, Speech Instruction, \*Student Evaluation of Teacher Performance, \*Student Teacher Relationship, \*Teacher Effectiveness, Teacher Improvement, \*Teaching Assistants, Teaching Styles

A study was conducted to determine whether graduate teaching assistants in speech communication were aware of the affective components of their classroom behavior and of the student responses to them, and whether the instructors' awareness of the affective dimensions of instruction related to the student evaluative responses. Subjects were 640 students enrolled in 30 sections of a basic communication course taught by 18 instructors. During the last week of a semester, the students were administered the Index of Teachers' Affective Communication (ITAC), along with the objective teacher evaluation instrument traditionally used by the university. In separate circumstances, the teaching assistant in each course section was asked to examine the ITAC and predict what the mean student response would be for each of the items on the measure. The results suggested that the teaching assistants had poor sensitivity as to how they were perceived by their students. While most instructors scored well on the ITAC according to their students, many were unable to predict their scores. The results support the generalized use of the ITAC as an effective evaluation instrument of classroom communication. (FL)

Descriptors—Advertising, \*Cable Television, \*Communications, Computer Science, Consumer Protection, Information Services, Mass Media, \*Television Commercials, Videotex

Identifiers—\*Cablesop

"Cablesop" is an experimental cable television service offering three- to seven-minute broadcast segments of product or community information and using a combination of telephone, computer, and video technology. Viewers participating in the service will have a choice of items ready for viewing listed on a "menu" channel and may add a particular item to the list by dialing a local telephone number followed by a special number that will connect them to a computer. The item then will be listed along with the time and channel on which it will be shown. Segments might include information on what to look for when buying a car or house, specials at local stores, or product demonstrations. Cablesop will be test marketed to approximately 8,000 subscribers, serving as a representative sample of the national population, in Peabody, Massachusetts, which has an operational system with 52-channel capacity. Cablesop president Trevor Lambert believes viewers will accept the idea of Cablesop because they are interested in straightforward, noncompetitive information about a product, and they like the idea of being able to decide when they will see the segment. The commercials shown by the Cablesop may require the advertising industry to extricate itself from the idea of the 30-second hard-sell commercial. (HTH)

Development of an Oral Communication Assessment Program: The Glynn County Speech Proficiency Examination for High School Students. Glynn County Board of Education, Brunswick, Ga. Pub Date—81

Note—85p.  
Pub Type—Reports - Descriptive (141)  
EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Action Research, \*Communication Skills, \*Competency Based Education, Educational Assessment, Employment Interviews, \*Evaluation Methods, High Schools, Interpersonal Competence, \*Program Development, Public Speaking, \*Speech Communication, \*Student Evaluation

The rationale, development, and structure of a high school oral communication assessment program are described in this paper. Following information on competency based education and the need for developing and testing students' oral communication skills, the development of an assessment instrument by the Glynn County (Georgia) school system is discussed. This discussion reports on the selection of primary and alternate speaking tasks (primary—speaking before a simulated public hearing, alternate—participating in a job interview); how raters were trained to evaluate speech performances; how cutoff scores were established; what resources were needed to conduct the assessment; and the effects of the use of the assessment instrument on student and staff development during a pilot program. Appended materials include guidelines, forms, and records used by students and teachers during the pilot assessment program. (RL)

Descriptors—Career Education, \*Communication Problems, Course Content, \*Geriatrics, Gerontology, \*Health Personnel, Higher Education, Older Adults, Speech Communication, Speech Curriculum

Since the elderly are a significant population of health care consumers, health care professionals should be trained to deliver health services to them as effectively and humanely as possible. While the primary tool for delivery of health care services to people is human communication, there is evidence that the communication between the providers and consumers of health care is in need of improvement. Researchers advocate the development of educational programs, such as a health communication course, that will help prepare people for occupations that deal with the problems and concerns of the elderly. Ten primary topics for study in such a course relate to the specific communication needs of the elderly: (1) the relationships between health care and human communication, (2) the use of language in the delivery of health care, (3) the importance of nonverbal communication in health care, (4) health care interviewing, (5) therapeutic communication in psychological and emotional areas, (6) group communication in health care, (7) the role of conflict in health care delivery, (8) intercultural communication in health care, (9) communication in medical organizations, and (10) communication with the terminally ill. By offering strategies for improving communication in health care, perhaps at least some situations that might be problematic will be handled more sensitively and effectively by communication trained health care professionals. Interpreting Congruent and Incongruent Verbal and Nonverbal Classroom Communication Cues.

Pub Date—81  
Note—11p.; Paper presented at the Annual Meeting of the International Reading Association (26th, New Orleans, LA, April 27-May 1, 1981).  
Pub Type—Reports - Research (143) — Speeches/-

Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.  
Descriptors—\*Childhood Attitudes, Children, \*Classroom Communication, \*Communication Research, Elementary Education, \*Expectation, \*Neurological Organization, \*Nonverbal Communication, Self Concept, Student Teacher Relationship

Happy, neutral, and unhappy visual expressions were combined with positive, neutral, and negative intonations of positive, neutral, and negative messages to investigate congruent and incongruent verbal/nonverbal classroom communication. The 53 students in the study viewed pictures of their teacher, listened to a recording of their teacher, then indicated whether the picture and the spoken sentence matched. Seeking to expand on right-left brain functioning, the researchers conducting the study presented the picture tachistoscopically to the students' right or left visual fields. The data showed that the expression on the classroom teacher's face and the intonation of the teacher's verbal statement had a greater impact on the subject's response time and accuracy level than did the content of the verbal statement. When a contradiction existed between the verbal and nonverbal cue presentations, the children relied on the nonverbal component of the presentation as the indicator of the accuracy of the communication event. Presentations to the right hemisphere produced more accurate interpretations of the nonverbal components of the messages than presentations to the left hemisphere. (Suggested readings related to self-concept, classroom expectations, and hemispheric processing are attached.) (RL)

Cheatham, T. Richard  
Decision Making in Times of Scarce Human & Financial Resources.

Pub Date—Nov 81  
Note—12p.; Paper presented at the Annual Meeting of the Speech Communication Association (67th, Anaheim, CA, November 12-15, 1981).  
Pub Type—Opinion Papers (120) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.  
Descriptors—\*Administrative Problems, Budgeting, College Faculty, \*Decision Making, \*Educational Planning, Higher Education, \*Resource Allocation, \*Speech Communication, \*Speech Curriculum

In times of scarce resources, college faculty consider the decision making process to be too time consuming in light of the potential pay-off, and in times of scarce human resources, universities frequently face the problem of overworking a few bright individuals. Speech faculty members' survival depends to a large extent upon their extensive participation in university-wide decision making bodies, while departments must use all the available means of persuasion to see that their most appropriate members are appointed to significant committees, such as curriculum, academic foundations, and budget. In addition, in times of scarce resources, the decision making process will involve and increase the number of negative decisions. In such instances the decision making process will need to rely more heavily upon predetermined policy choices rather than on-demand, individual-case decisions. The speech department is in a position to make more rational decisions relevant to coping with budget cutbacks when those cutbacks are only potential or probable. Departments should also establish departmental guidelines for promotion and tenure that are more stringent than the university-wide standards. Furthermore, departments can no longer afford the luxury of approving a new course each time a new faculty member is hired. Rather, they must approve courses that serve as components of quality. To cope with all these changes, departmental decisions must be made more systematically. (HOD)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Academic Deans, Alumni, Curriculum Development, Faculty, Higher Education, \*History, Oral Interpretation, \*Speech Communication, Speech Curriculum, Theater Arts

Identifiers—\*Northwestern University IL

This book presents a concise history of the first 100 years of development of the school of speech at Northwestern University (Illinois). Following an introduction that provides an overview of the school, the first chapter focuses on both the efforts of Robert McLean Cunnock to found a school of oratory on the principles of elocution and the school's first years under his direction (1878-1913). Chapters two and three discuss the administration of Cunnock's successor, Ralph Brownell Dennis, and his efforts to broaden the school's curriculum (1913-1942). The administrations of the third dean, James H. McBurney (1942-1972), and of his successor, Roy V. Wood (who is the current dean), are explored in the fourth chapter, as is the school's departmentalization into the areas of interpretation, public speaking, theatre, speech reduction, and radio. Chapter five presents brief biographies of the faculty members of the school's 100 years and describes the changes in educational focus brought about by these instructors, while chapter six deals with notable alumni of the school. Chapter seven describes the numerous organizations stemming from and associated with the school. A concluding chapter speculates on the future of the school and is followed by a list of the faculty members and the dates of their appointments to the university. (HTH)

Identifiers—\*Electronic Mail  
Recent developments in telecommunications technology have made possible local information networks that can connect individuals within organizations of any size, configuration, or purpose. To better understand the impact of such technology, a study of a recently implemented computer based messaging system (CBMS) was undertaken at a large, private university. Questionnaires were administered to and interviews conducted with 74 high level administrative users of the system and to 67 computer services personnel who were experienced CBMS users. The results showed that, overall, the users were satisfied with the system. Other findings were that the system produced positive, but not extreme, benefits; that usage of it reached early stability and then declined; that the users generally agreed upon the tasks for which the system was appropriate; and that it brought about an increase in the users' communication networks. (FL)

Peterson, Polly E. And Others  
Do Pro-Nutritional Television Messages Improve Children's Eating Behaviors? Empirical Findings and Recommendations for Further Research.

Pub Date—Aug 81  
Note—20p.; Paper presented at the Annual Meeting of the American Psychological Association (Los Angeles, CA, August 1981).  
Pub Type—Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.  
Descriptors—Advertising, \*Attitude Change, Behavior Patterns, Change Strategies, \*Childrens Television, Commercial Television, Communication Research, Early Childhood Education, \*Eating Habits, Kindergarten Children, \*Nutrition, \*Programming (Broadcast), \*Television Research

**Identifiers—\*Media Effects**

The educational effects of pronutritional programming on kindergarten children were investigated in a pretest-posttest control group design involving 56 children from four kindergarten classes. These children were exposed to a series of five 20-minute videotapes over a period of six class days. The videotapes were compiled from popular children's programming and public service announcements with themes stressing healthy eating habits and the pronutritional qualities of foods. Effects were measured by a behavioral eating test, a pretend eating test, and a 20-item questionnaire designed to measure nutritional knowledge. No significant results were obtained on the nutritional knowledge, food preference, or food consumption measures, thereby suggesting that the pronutritional treatment package had little educational impact on the children. **Ethics in Persuasion: An Integrated Teaching Approach for Increasing Student Awareness of Ethical Issues in Persuasion.**

Pub Date—Nov 81

Note—8p.; Paper presented at the Annual Meeting of the Speech Communication Association (67th, Anaheim, CA, November 12-15, 1981).

Pub Type—Opinion Papers (120) — Guides — Classroom — Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Course Descriptions, Course Objectives, \*Ethics, Higher Education, Integrated Activities, \*Persuasive Discourse, \*Speech Communication, Speech Curriculum, Speech Instruction, Teaching Methods

Despite a professional commitment to "teach ethics," speech communication literature and textbooks contain almost no advice or help on how to accomplish this task. An integrated teaching approach, however, can involve students more directly in the ethical issues that may arise in a persuasion course. The first element in increasing student awareness of ethics is emphasis on ethics as a serious matter in the course. The second element requires each student to write two or three sentences on what they consider to be the "general ethical problem or issue" in persuasion, then share their statements with others in the class and comment on them. This discussion of the various individual positions leads to the third element, the assignment of materials on ethics in the course textbook. The next formal element that focuses on ethics develops from two speech assignments: one that requires the students to use the ethical statement they wrote earlier as a guideline for a persuasive speech, and a second that requires them to meet the ethical standard established by the teacher. The last element of the course is the term paper. Students are required, based on course experience and readings, to rewrite their personal ethical standard prepared at the beginning of the class and to evaluate the ethics of the persuasive event they analyze using that standard. By including a statement of ethics as a course objective, the students and teacher are reminded, from the beginning, that ethics is a matter of serious concern in persuasion. (HOD)

**Assessing Corporate Training Programs in Business Communications.**

Pub Date—Oct 81

Note—16p.; Paper presented at the Annual Meeting of the American Business Communication Association (Phoenix, AZ, October 14-17, 1981).

Pub Type—Reports — Research (143) — Speeches/Meeting Papers (150) — Numerical/Quantitative Data (110)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Business Communication, Communication Skills, \*Formative Evaluation, \*Interviews, \*Professional Training, \*Technical Writing, \*Workshops, \*Writing Skills

The purpose of this study was to assess the long-term effects of a corporate training program in business and technical writing. Subjects were 135 employees who attended ten three-day workshops during the course of one year. The effects of the workshops were assessed in two stages: immediately after the training through an evaluation form and one to two years later through an interview. The interview consisted of 6 open-ended questions and 42 closed-ended questions. Results indicated that

(1) those elements of the writing workshop that remained most useful to the participants were those relating to organizing material and exercises in writing clearly and concisely, (2) the training in writing skills did appear to have some carry-over effect to reading skills, and (3) those areas of the training program that might be changed for best effect are the format (three-day), and the scheduling (Monday-Tuesday-Wednesday). Business communication consultants can improve their working relationships with their clients by offering such long-term follow-up assessments as part of their portfolios. (Appended is the interview guide for the follow-up assessment of the corporate seminars on written communications.) (HOD)

**Boston (WGBH) Field Testing of a Qualitative Television Rating System for Public Broadcasting.**

Corporation for Public Broadcasting, Washington, D.C. Office of Communication Research.

Report No.—ISBN-0-89776-071-9

Pub Date—Jun 81

Note—59p.

Pub Type—Reports — Research (143) — Numerical/Quantitative Data (110)

EDRS Price — MF01/PC03 Plus Postage.

Descriptors—Adults, \*Evaluation Methods, Field Tests, Predictive Validity, \*Programming (Broadcast), \*Public Television, Rating Scales, \*Television Research

Identifiers—Media Use

A field test was conducted to examine the efficiency of a paper-and-pencil television diary for collecting viewer evaluations of public and commercial television programs. Six hundred individuals in Boston, Massachusetts, kept qualitative viewing diaries for one week. The results indicated high and enthusiastic cooperation by the total sample. The diary was determined to be easy and convenient to use, with acceptably low nonresponse rates on each of the four qualitative scales used to evaluate programs. The resulting profile for public television lent credence to the notion that public television programs cannot and need not be evaluated solely on the basis of audience size. In addition, the data collected proved highly relevant to program development, scheduling, promotion, and evaluation, both for the local Boston station and for stations at the national level. Sample pages from the diary are appended. (Author/FL)

**Assessment of Audience Feedback Systems for Research and Programming.**

Corporation for Public Broadcasting, Washington, D.C. Office of Communication Research.

Report No.—ISBN-0-89776-069-7

Pub Date—81

Note—86p.

Pub Type—Information Analyses (070)

EDRS Price — MF01/PC04 Plus Postage.

Descriptors—\*Audiences, \*Communications, \*Feedback, Programming (Broadcast), \*Public Television, Research Tools, \*Technological Advancement, Television Viewing

Identifiers—\*Audience Response, Interactive Systems

Defining audience feedback systems as technical configurations that allow viewers in their own homes to respond electronically to television programming via telecommunications networks, this report examines research into the use of audience feedback systems as a means of reducing the cost and labor of eliciting viewer opinions and attitudes to a level that local public television stations can afford. The first section of the report specifies four applications in which audience feedback systems could benefit public television stations: pretesting, qualitative ratings, public opinion polling, and interactive programming. The second section defines these applications, describes them in terms of their uses and operational limitations, and offers examples of how each application could be implemented. The third section of the report covers the cost, limitations, and appropriateness of each of the possible applications, while the fourth section discusses the general barriers to the use of the systems. The fifth section compares each system to conventional feedback methods and to its competitors, and the sixth section notes the best technologies suited for each application. The systems are listed in an appendix. (FL)

**The Acceptance of Television Commercials among Black Consumers.**

Pub Date—Aug 81

Note—42p.; Paper presented at the Annual Meeting of the American Psychological Association (Los Angeles, CA, August 1981).

Pub Type—Reports — Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—Adults, \*Black Attitudes, \*Blacks, \*Ethnicity, Perception, \*Television Commercials, \*Television Research

A great deal of research has examined the effects of the racial composition of advertisements on their acceptance by the black consumer. From this literature two antithetical findings have emerged: (1) television commercials that use black models are more meaningful to black viewers than are those using white models, and (2) black models in advertisements have a negative effect on black consumers. A study was undertaken to address these contradictory findings by examining the contribution of black consciousness level in mediating the acceptance of television commercials among black consumers. The Developmental Inventory of Black Consciousness (DIB-C) was used to assess the psychological location of an individual along the black consciousness continuum. More than two hundred black adults then were asked to give "interesting" and "convincing" ratings to four types of television commercials (black models, white models, integrated cast, and neutral-with no models). Recognition and recall data were also collected. The findings indicated that the subjects gave black commercials the highest ratings and remembered them the best. When subjects viewed white commercials, the results showed that blacks were more likely to give favorable ratings in accord with their level of black consciousness as measured by the DIB-C with those possessing the lowest level of consciousness giving the most favorable ratings. **Community College Administrator Involvement with Forensics Programs.**

Pub Date—Nov 81

Note—10p.; Paper presented at the Annual Meeting of the Speech Communication Association (67th, Anaheim, CA, November 12-15, 1981).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—\*Administrative Organization, \*Administrative Problems, \*Community Colleges, \*Community Involvement, \*Extracurricular Activities, \*Speech Curriculum, Theater Arts, Two Year Colleges

Identifiers—\*Forensics

The administration at Normandale Community College in Bloomington, Minnesota, has had tremendous influence on the college's forensics program. The first positive administrative decision made was to involve every full-time person hired in speech and theatre in the activity part of the program. Another positive aspect of the administration is its relatively constant and consistent moral and financial support. On the negative side is (1) the loss of a protected "activity fee" that was identified separately from tuition and allocated through a process which involved students, faculty, and administrators; and (2) the "split" personality that faculty develop as they teach "under" one associate dean and engage in speech and theatre activities "under" another associate dean. Not only does this mean that there is not one administrator who has responsibility to understand all of the speech program, but it also carries with it the preparation of two separate budgets and the artificial separation into two parts of what ought to be one whole. Suggestions for improving a speech activity program would include making the speech activity program a cocurricular program by involving the whole community and learning how to do more with less by bringing forensic tournaments closer to home. Faculty and administrators must devote the best of their efforts to "save" the community colleges for a complete communication program—both curricular and cocurricular. (HOD)

You Can't Play Marbles—You Have a Wooden

Hand: Communication with the Handicapped.

Pub Date—Nov 81

Note—30p; Paper presented at the Annual Meeting of the Speech Communication Association (67th, Anaheim, CA, November 12-15, 1981).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Childhood Attitudes, \*Classroom Communication, Communication (Thought Transfer), \*Communication Problems, \*Communication Research, Elementary School Students, \*Mainstreaming, \*Physical Disabilities

A two-year long study investigated the influence of being in a mainstreamed classroom on nonhandicapped children's abilities to communicate with the handicapped. The study involved three groups of students: (1) 66 nonhandicapped, nonintegrated (those in classes without handicapped children); (2) 24 nonhandicapped, integrated; and (3) 55 handicapped only. To measure the ability of a child to adapt communication to a specific listener, each subject was shown a series of eight drawings illustrating handicapped and nonhandicapped children doing different things and asked what he or she would say to communicate a certain intention to the child in the picture. The subjects' responses were coded for their empathic adaptation to each handicap. The subjects were tested at the end of the first year of a mainstreaming program and again at the end of the second year of the program. The results indicated that both nonhandicapped and handicapped children had difficulty communicating with their handicapped peers. Being in a mainstreamed class had no impact on the communication skills of the nonhandicapped children, and no differences were found between children studied at the conclusion of the first or second years of the mainstreaming program. Descriptors—Adult Development, Aging (Individuals), Assignments, \*Classroom Techniques, Communication Skills, Course Content, Gerontology, Higher Education, \*Instructional Materials, \*Interpersonal Relationship, Older Adults, Resource Units, \*Speech Communication, \*Speech Curriculum, Teaching Guides

Identifiers—\*Aging Education

The components of a college course on communication and aging are described and discussed in this paper. The first section of the paper focuses on appropriate assignments, their underlying strategies, and necessary materials for enhancing young people's communication with older adults and their appreciation of the situations that elderly people face. Subsequent portions of the paper provide a syllabus for a course on communicating with older adults, a quiz on the myths and realities of aging, a questionnaire designed to clarify different ways of defining oneself as old, guidelines for conducting an interview with older persons, the simulation of a chronic condition or age-related impairment (hearing or vision loss) and guidelines for writing a report about the experience, the procedures for assigning students to a "fantasy trip" to imagine and describe an age-related experience (such as retirement), an intergenerational communication map on which students indicate their interpersonal communication patterns with others, a list of popular music items whose subject matter is aging, suggested assignments for papers and studies on aging, and a case study for class discussion. A bibliography on aging also is included. (RL)

Descriptors—Administrator Attitudes, Elementary Secondary Education, Evaluation, Feedback, Foreign Countries, \*Instructional Materials, \*Material Development, Publishing Industry, Resource Materials, State Curriculum Guides, State Standards, Teacher Attitudes

Identifiers—\*Ontario, Ontario Department of Education (Canada)

To help Ontario (Canada) meet its goal of high quality education, researchers examined the processes by which learning materials are developed, educators' perceptions of both the processes and the materials, and the problem of maintaining high quality in learning materials while enrollments are declining. Questionnaire surveys of Ontario teachers, school board members, and publishers of commercial educational materials, together with interviews of Ministry of Education personnel and analyses of book industry journals, yielded data about influences on instruction and on commercial and local learning materials, methods of evaluating learning resources, school boards' allocations for learning materials, the ministry's book purchases and approval of materials, improvements needed in commercial and local materials, and information sources on learning materials. The report discusses the ministry's planning for materials development, commercial publishers' problems in developing materials, teacher and board assessments of ministry-approved materials and of materials developed by local boards or teachers, and alternative methods for developing, testing, and evaluating educational materials. Among the report's recommendations are that research be conducted on learning materials' effects on student learning, that teacher feedback be incorporated into learning material development, and that a provincial learning materials development center be established. Identifiers—\*USSR

Examination of the history and present structure of Soviet education reveals a number of potential lessons for educational planners in developing countries, according to the authors. This report traces the course of Soviet educational reforms from the 1910s to the 1970s in four areas: general (elementary and some secondary) education, vocational training, higher education, and "specialized secondary" (technical) education. The authors note general education's evolution from underfunded, experi-

mental forms after the revolution into a well-financed, centralized system, and they stress the coordination of all levels of Soviet education with economic and manpower planning. Among the characteristics of Soviet education mentioned are its technical or utilitarian emphasis, widespread use of supplementary informal education, willingness to expand without adequate resources, efforts to equalize educational access and facilities, overspecialization at the vocational and higher education levels, and orientation to the urban industrial sector. The authors cite nine implications for developing countries to explore, including the need for general education as a basis for technical and professional training, integration of economic development with education, emphasis on universal primary education, standardization of school facilities and equipment, and the necessity to educate women and national minorities. Identifiers—\*Sweden

To develop a mass education structure that met the goals of both equality and efficiency, Sweden carried out extensive educational reforms between 1950 and 1975, starting at lower educational levels and moving in gradual stages to the highest levels. This report looks at the background, nature, and history of these reforms. Its chapter on the economic and political background of the reforms notes Sweden's economic development and gradual nationalization of national income in this period, as well as the success of the ruling Social Democrats at staying in power and building pro-reform alliances with elementary teachers, labor, and other political parties. The next chapter examines the creation of single nine-year comprehensive schools from separate elementary and lower secondary schools between 1950 and 1970. The report then describes the changes in upper secondary schools from 1960 to the early 1970s, when academic "gymnasium" schools were combined with vocational-technical schools. Following is an analysis of the attempts in the 1970s to restructure higher education by combining academic and "practical" education and by opening universities to a wider range of students. The final chapter briefly considers the implications of Sweden's experiences for other nations. (RW)

Release from Stress.

Pub Date—81

Note—89p; Occasional pages may not reproduce clearly.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—\*Administrators, \*Change Strategies, \*Coping, Elementary Secondary Education, Occupational Information, Office Management, \*Prevention, Problem Solving, Role Conflict, School Personnel, School Secretaries, Self Help Programs, \*Stress Variables, Worksheets

An overview of the most recent ideas on managerial stress is presented along with worksheets and exercises for a program to help educational administrators, their staffs, and secretaries cope with and reduce organizational and personal stress. Research cited includes the author's survey of 1,200 Oregon school administrators and over 200 secretaries from schools and district offices. The first part of the program involves completion of stress logs to note all the different kinds and sources of stress as well as to observe the daily patterns and weekly cycles of stress. This is followed by a series of exercises to identify all possible on-the-job stressors, assess the relative impact of each, list the most bothersome ones, and decide the amount of control one has over each. A stress management program

can begin with the self-diagnosis of stressors. The top five stressors are to be listed and categorized into external and internal control factors. For those stressors where internal control is possible and the actual cause of the stress can be attacked, the "Seven Steps to Managing Stress" process is recommended. The process is explained and work sheets provided. (MLF)

Descriptors—\*Bilingual Education, Delivery Systems, Educational Assessment, Elementary Secondary Education, \*Instructional Student Costs, Parent Participation, \*Program Costs, Teacher Characteristics

To gather empirically based data to assist in the formulation of federal rules for the nation's bilingual education programs, the authors studied six school districts in the western United States. All the participating school districts had well-established bilingual programs. Data were collected through structured interviews with superintendents, bilingual program directors, budget directors, school principals, teachers in both bilingual and monolingual English programs, and instructional aides. Three major questions were addressed in the study: How does provision of bilingual education vary among school districts? Why do these variations arise? How do these variations affect cost? The study revealed wide variation in the timing and emphasis placed on the content of bilingual education, in the delivery mode used, and in the availability of qualified teachers. Concentrating on analysis of the added cost for instructional personnel in bilingual programs, the authors found that the programs add between \$100 and \$500 to the per-pupil cost of instruction. The total added cost of these programs ranges from \$200 to \$700 per pupil. The study presents a new method of computing added costs derived from economic principles. (WD)

Compensating the Administrative Team. The Administrative Team Career Development Series, Book 2.

American Association of School Administrators, Arlington, Va.; National School Boards Association, Washington, D.C.

Pub Date—81  
Note—33p.; Prepared for the AASA Committee for the Advancement of School Administration (CASA). Reviewed and approved by the Joint AASA-NSBA Committee.

Available from—American Association of School Administrators, 1801 North Moore Street, Arlington, VA 22209 (Stock No. 021-00844; \$3.50; quantity discounts).

Pub Type—Guides - Non-Classroom (055)  
EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Administrators, Career Development, \*Compensation (Remuneration), Fringe Benefits, Merit Pay, Recognition (Achievement), Rewards, Salaries, Salary Wage Differentials

As part of the Administrative Team Career Development Series, this booklet outlines several factors to consider in establishing compensation structures for school district administrators. Such structures must balance the needs and interests of the employee, the school system, and the public. Salary, working conditions, and fringe benefits must all be considered in promoting fair treatment of administrators and fostering productivity, loyalty, and high morale. Steps for evaluating a district's current compensation structure should include rating each administrative position according to equity, rationality, competitiveness, retention, job performance, responsiveness, and career growth. After the monetary value of each position is determined, districts can develop their compensation plan using one of five alternatives—the traditional single-step schedule, a traditional schedule with steps based on

merit, a traditional schedule with noncumulative performance awards, a traditional schedule with cumulative performance awards, and a variable schedule. The variable compensation schedule is generally the most responsive to district needs, but it adds administrative problems. Districts must also consider factors such as "grandfather" clauses, transition, union contracts, and market forces. Additionally, it is suggested that further study be undertaken by school board members, superintendents and administrative personnel, incorporating information from the AASA/NSBA publication "Compensating the Administrative Team—Full Report." Descriptors—\*Board Administrator Relationship, Board of Education Policy, \*Board of Education Role, Elementary Secondary Education, Political Power, \*Power Structure, Social Influences, \*Superintendents

Recent research on the historical and political influences affecting the relationship between local school boards and superintendents is summarized and discussed in this paper. Following a brief summary of the historical development of the superintendency in the nineteenth and twentieth centuries, the author contrasts the opposing viewpoints of Callahan and Tucker and Zeigler regarding the actual balance of power between boards and superintendents. Callahan believes the evolution of superintendencies has provided boards and superintendents with a system of checks and balances while still giving citizens a voice in the schools. Tucker and Zeigler see instead a lack of balance, rising superintendency dominance, and a loss of citizens' power. The paper next examines the status of superintendents today. It cites Zeigler and Jennings book, "Governing American Schools," which concludes that the superintendent is clearly dominant over the school board, and contrasts this view with the positions of Cuban and Boyd, who assert that a variety of political and social factors influence the relative power of superintendents. The author concludes that the local boards themselves are in the best position to decide what role they want to play. (Author/JEH)

Identifiers—Australia (New South Wales), \*Permanent Part Time Teaching

Rising Australian unemployment in the 1970s, increasing part-time employment, and large fluctuations in teacher supply and demand has made Australian teachers interested in more flexible employment patterns. One such pattern, permanent part-time teaching (PPTT), involves teaching at

least 12 hours of school per week at fixed times with prorated salaries and fringe benefits. To find teachers' attitudes toward PPTT, the author surveyed 653 secondary teachers in 17 urban and rural public schools in New South Wales (Australia). Questionnaires sought data on respondents' age, sex, marital status, teaching experience, spouse employment, and child dependents and on their perceptions of PPTT's impact on working conditions, teacher supply and demand, teaching effectiveness, administrative costs, and social relationships. Using analysis of variance, the author reached 23 conclusions about teacher attitudes. Responding teachers thought that PPTT would help improve working conditions, increase teacher effectiveness with pupils, restore equilibrium in teacher supply and demand, and better teachers' ability to cope with social relations problems. Identifiers—Australia (New South Wales), \*Permanent Part Time Teaching

Because of disequilibrium in the 1970s between Australia's supply of and demand for teachers, there has occurred a gradual increase in part-time teaching in elementary and secondary schools. This has included job sharing and, especially in South Australia, permanent part-time teaching (PPTT). PPTT is defined as employment for at least two school days per week with fixed hours, prorated salaries and fringe benefits, and normal job and promotion rights. Potential part-timers include teachers with differing training, lifestyle, or career needs. A survey of 653 New South Wales secondary teachers and administrators in 17 urban and rural public schools sought information on respondents' personal characteristics (age, sex, marital status, teaching experience, spouse employment, and child dependents), administrative status, and perceptions of PPTT's impact on working conditions, teacher supply and demand, teaching and administrative effectiveness, and social interaction. Statistical analysis using correlation coefficients and analysis of variance yielded 19 conclusions about teachers' attitudes toward PPTT, including that males more strongly support PPTT, that administrators impute higher costs to PPTT, that teachers see more benefits than costs from PPTT, and that PPTT would improve working conditions. Descriptors—Elementary Secondary Education, Employment Patterns, \*Job Layoff, Long Range Planning, Personnel Policy, \*Reduction in Force, \*Retrenchment, Teacher Dismissal

Identifiers—Oregon

This document focuses on the issues involved when changes in school district staff size are planned and revises the 1977 document, "Reduction in Force." Because local Oregon school districts have statutory and constitutional authority to reduce force and lay off staff, they need to develop plans for such actions when procedures are not included in their collective bargaining agreements or when supplements to those agreements are needed.

When planning for a necessary change in staff size, districts must still ensure that equal educational opportunities are available to all students, that equal student activities are offered for males and females, and that affirmative action procedures and state standard requirements remain intact. Additionally, procedural requirements of the Oregon Fair Dismissal Law and local collective bargaining agreements must be followed. Position descriptions are needed for each type of position to ease reassignments. In writing a plan, districts should establish clear procedures for determining that reduction is needed. Specific programs that can be eliminated should be identified along with alternatives and considerations for retained personnel. Districts must also have policies intact for recalling employees to work. Finally, the board should officially adopt the plan and disseminate it. A brief list of printed resources and organizations that can be contacted for assistance is included. (MMJ)

Descriptors—Academic Freedom, Accountability, Administrative Policy, \*Authoritarianism, \*Civil Liberties, Court Litigation, Elementary Secondary Education, Power Structure, School Organization, Student Teacher Relationship, \*Teacher Administrator Relationship, Teacher Attitudes, Teacher Behavior, \*Teacher Dismissal

In the context of a high school teacher's dismissal for refusing to participate in hall supervision on ethical grounds, the author discusses the authority structure of public schools and the role and responsibilities of professional educators. Past contract conditions that regimented the private and professional lives of teachers are reviewed, as are court decisions in defense of teachers' civil liberties. The rights of teachers to follow the dictates of conscience in defiance of authority are considered in connection with the legal emphasis on educational accountability. The author contends that the provisions included in much of the current accountability legislation and procedures conflict with the personal convictions of some public school teachers. She stresses that the prevailing autocratic structure of the school is an anomaly in a political democracy. Teachers are urged to be practicing intellectuals, build support systems within the school, examine curriculum policy and decision-making within the school, and pursue issues surrounding authority. Identifiers—\*City Managers

This report describes the sources and substance of conflicts as revealed by city managers and superintendents. The data presented are from interviews conducted for a study that compares and contrasts the conflict management behaviors of 52 superintendents and 52 city managers and the conditions that are associated with them. The purpose of the descriptive study is to address two questions: How much conflict from various sources do superintendents and city managers report? What is the substance of the conflict? The first question is based on

the assumption that, in addition to generalized conflict, city managers and superintendents respond to demands from a variety of sources (the elected board or council, other administrators, other governments, or segments of the community). The second question involves a comparison of the range in the substance of conflicts faced by superintendents and city managers. These questions are discussed in terms of the two groups' relationships with the public, legislative bodies, and their internal organizations. (Author/MLF)

Descriptors—Administrators, Citizen Participation, \*City Officials, Comparative Analysis, \*Conflict Resolution, \*Educational Administration, Elementary Secondary Education, \*Governance, School Districts, \*Superintendents

Identifiers—\*City Managers

The major purpose of this study is to further understanding of conflict management in educational governance. The study compares and contrasts the conflict management behaviors of 52 superintendents and 52 city managers and the conditions that are associated with such behaviors. The sample was drawn from the San Francisco (California) and Chicago (Illinois) areas. Data are presented by geographical location as well as by interview position. Similarities between school district and council-manager institutions are discussed. The researchers examine how the respondents both perceive and handle citizen involvement and involvement by other interested parties. In accounting for differences between the two groups, the three dimensions of the nature of conflict (source, substance, and scope of intensity) are explored. Educational and municipal governments are compared for the levels of conflict arising from various sources: the legislative body, segments of the community, staff members, and other levels of government. The discussion of substance concerns how school districts and municipalities are affected by various types of conflict issues, such as those that evolve from collective bargaining, state or federal regulations, or other kinds of tensions within the community. The discussion of the scope or intensity of conflicts focuses on the number and characteristics of parties involved and the duration of the conflict. (Author/MLF)

Descriptors—Case Studies, \*Decision Making, Disabilities, Elementary Education, Lay People, Power Structure, \*Professional Recognition, Role Theory, Special Education, \*Speech Communication, \*Status, \*Student Placement

Identifiers—\*Professional Role, Role, \*Technical Language

In observing 51 decisions made in a school district over the period of a year concerning the placement of elementary students in special education, the author noted that most decisions seemed to be presented and accepted rather than debated. To discover why, he analyzes one meeting and placement decision of the district's eligibility and placement committee. After describing the district's student referral process and the paths followed by

special education students, the author lists the four phases of the committee's proceedings, including information presentation, decision-making, parents' rights explanation, and student goal-setting. Analysis of the language used by the meeting's participants in the information-presentation phase shows that the professional participants presented (without interruption) test-based academic information, using mystifying technical language. However, the nonprofessionals' observational, emotion-based information was elicited by questions, was frequently interrupted, and was communicated in everyday language. Further, the nonprofessionals depicted the student in situational, historical, and biographical contexts while the professionals did not. The author concludes that the roles of professional and layperson are embedded in the language used in the meeting, and that the different authority assigned to these roles explains the acceptance without debate of the professionals' recommendations. Identifiers—\*Property Disposition

To improve parent and citizen involvement in school closing decisions, this guidebook discusses the methods and requirements for effective participation. Chapter one covers the background of school closings and declining enrollment, including national demographic and lifestyle changes and their effects on schools and other institutions. Chapter two lists eight components of successful citizen involvement programs, including appropriate definition of the problem, establishment of priorities, widespread information-sharing and debate, and a cooperative, problem-solving spirit. Different methods of getting involved and various courses of action are described in chapter three, while chapter four notes eight topics, such as enrollment and finances, about which involved citizens will need credible information. The fifth chapter suggests 13 strategies to consider in handling enrollment decline and school closure. Among the suggestions are boundary shifts, curriculum changes, staff sharing, and school space sharing. Chapter six offers ways to ease the transition after a school closes. The summary chapter emphasizes eight key points, including the need for adequate time to involve the community and for school reuse plans. Two appendices provide questions citizens should ask about school property reuse and a list of national citizen-advocacy organizations in education. (RW)

Choice, School Role, School Support, State Church Separation, Values  
 Identifiers—First Amendment

Drawing on the writings of scholars in the field, this report presents the case for increased parental control over the education of children. It begins by maintaining that the American public school has fallen from favor mainly because of a decline in academic achievement and the replacement of the teaching of basic skills with social engineering. The author sees the humanistic curriculum and subjective values as the roots of the crisis. The author maintains that education is basically religious and neither can, nor should be, the value-free institution that today's educators strive for. Advocating reforms based on more family control and less state control of education, the report attempts to demonstrate that the Constitution and a number of Supreme Court decisions guarantee the primary rights of parents in the education of their children. Court decisions illustrating the legal tension between family rights and state control are cited. Finally, current proposals for increasing family choice in education are presented and explained, ranging from voucher systems to minimum competency requirements to moral education classes. The paper concludes that in this democratic, pluralistic society, all families should be free to train their children according to the values and beliefs they cherish. (Author/JM)

Identifiers—California, District of Columbia

Based on the view that tuition tax credits will benefit all taxpayers, this report examines the history and economics of educational financing to furnish a background for an explanation of current proposals to provide tuition tax credits. The author begins with five theoretical economic models of school finance designed to explain the logic of tuition tax credits. The report then looks at several historical models of school finance including the New York public school system and the economic bases for free and for compulsory schooling. The rationales for current proposals to establish tax credits are then examined and some criticisms of tuition tax credits are refuted. The report then makes a case for a potential gain for taxpayers from education tax credits based on the contention that they will generate competition throughout the school system and bring down the cost of education. Early origins and recent federal proposals for tax credits are then examined, including Tom Paine's education tax credit system, U.S. federal tax credit and tax deduction schemes until 1977, the Packwood-Moynihan Proposal, and the 1979 tuition tax credit bill. The report concludes with descriptions of education tax credit proposals in California and Washington, D.C., and a comparison of tax credits and vouchers. (Author/JM)

Identifiers—City Taxes, Income Groups, Income Taxes, State Taxes, \*Tax Equity, \*Tax Limitations

Researchers gathered data on all state, city, and property taxes in ten cities in three states to find whether tax limitation measures have changed the distribution of tax burdens among income classes. The ten cities—representing a range of tax rates, economic bases, income levels, demographic characteristics, and revenue systems—comprised Kansas City and Wichita (Kansas); Camden, East Orange, Montclair, and Newark (New Jersey); and Cerritos, Compton, Los Angeles, and Oakland (California). All three states had passed fiscal limitation measures in the 1970s. After discussing theories of the distribution of tax burdens (or tax "incidence"), the researchers constructed models allocating property and other tax burdens among five income classes. They then calculated the change in tax burden among the income classes and between renters and owner-occupiers caused by the fiscal restraints. Results indicate that tax burdens were reduced in all California and New Jersey cities; that the lowest income group had the highest tax burden both before and after tax limitation, and that tax burdens became more progressive in all cities except Montclair and Newark, chiefly because progressive state income taxes were substituted for regressive property taxes. Identifiers—Advisers, Student Activity Directors

Extracurricular activities in secondary schools are an important part of student preparation for adult life. This document presents guidelines on the components, administration, and evaluation of student activities. It suggests that a comprehensive activity program should include student government, publications, cultural activities, service clubs, sports, honor societies, and special interest groups. In reviewing the administration of student activities, the author discusses the activity program's objectives, the principal's role, the responsibilities of the student activities director, and the criteria to use in selecting and compensating activity advisers. Eleven criteria for evaluating student activities are presented, including participation levels, the variety of activities available, skill development, school and community service provision, and adequacy of accounting and supervision. The document also stresses the importance of viable student councils and student governments. Six brief profiles are given of school activities in secondary schools in Mississippi, Colorado, Idaho, and Virginia. (RW)

Descriptors—\*Adolescents, Agency Cooperation, Elementary Secondary Education, Family Planning, Federal Programs, Financial Support, Health Services, Parenthood Education, \*Parents, \*Pregnant Students, \*Public Policy, Sex Education, Social Services, State Programs

Identifiers—\*Adolescent Parents

To help state policy makers and program developers, researchers gathered information on government policies regarding adolescent pregnancy and parenthood. Data were compiled through a questionnaire survey of health, education, and social service agencies in the federal government and all 50 states. The report describes federal programs relevant to pregnant adolescents and adolescent parents, including food supplements, mother and child health services, family planning, and Medicaid. A sixty-page table summarizes all the states' policies and programs concerning adolescent pregnancy or parenthood in seven areas, comprising the policies' legal frameworks; interagency cooperation within states; funding sources; state-level committees currently considering these problems; education on sex, pregnancy, and parenthood; and the issue of minors' consent for family planning services. The report also gives a state-by-state narrative description of relevant policies and programs, before concluding with recommendations for model policies on adolescent pregnancy and parenthood. Among the researchers' findings are that there is increasing recognition of adolescent pregnancy and parenthood as a problem, but that most states lack adequate data, funds, and interagency coordination to handle it. Appended are a copy of the survey questionnaire and a list of key contact persons the survey used. (Author/RW)

Identifiers—\*Leadership Effectiveness, Participative Decision Making, School Based Management, Stress Management, Time Management

Based on the assumption that the survival of the nation's schools and their leaders depends on these leaders having real influence over the quality of schooling, this volume draws from the work of many authorities to look at leadership from three perspectives: the person, the structure, and the skills. Chapters focusing on the person who holds the leadership position look at characteristics of today's educational leaders, at what makes an effective leader, at the scarcity of female and black school leaders, and at leadership style. The part of the volume focusing on structure looks at the organizational supports that underlie school leadership. It examines school-based management, management support teams, participative decision-making systems, and determinants of school climate. Chapters on leadership skills highlight several abilities administrators must master to be effective leaders in education today. This part of the volume looks at such skills as communicating, leading meetings, managing time and stress, managing conflicts, and solving problems.

Practical suggestions for using this information in schools are offered throughout. (Author/JM)

ership, \*Leadership Qualities, Literature Re-  
views, Personality Traits, Principals, \*School  
Administration

Chapter 1 of a volume on school leadership, this  
chapter looks at research findings concerning the  
characteristics of leaders. The author begins by  
looking at those characteristics resulting from acci-  
dents of birth or early environmental influences and  
concludes that leaders are usually more intelligent  
than nonleaders, not firstborn, used to making deci-  
sions from an early age, and from a higher socioeco-  
nomic group than followers. The next section  
focuses on leaders' traits and skills in the area of  
human relations. The research cited concludes that  
leaders are better than average at interacting with  
others, enjoy socializing, and are good talkers and  
listeners. The final section concerns character quali-  
ties of the effective school leader. This section sug-  
gests that successful principals and other  
educational administrators have some traits that  
distinguish them from those who are less successful.  
These characteristics are clear goals, enough  
security not to resist change, and ability to be  
"proactive"—to initiate or lead rather than passively  
react. Practical implications of these findings for the  
selection, evaluation, and training of educational  
leaders are included. The chapter is intended to be  
especially helpful to those who hire school adminis-  
trators or plan their training programs. (Author/JM)

Leadership, Literature Reviews, Principals, \*Racial  
Discrimination, School Administration, \*Sex  
Discrimination, Superintendents

Chapter 2 of a volume on school leadership, this  
chapter examines the ethnic background and sex of  
educational leaders, concluding that, even after  
decades of civil rights and feminist activities, nearly  
all educational administrators are white males. The  
authors make a case for the value of diversity in  
educational leadership, then present their findings,  
concluding that there are today fewer women or  
minorities in educational administration than there  
were thirty years ago. The attitudes and practices  
that foster this situation are explored. Finally, the  
authors make specific suggestions for remedying the

situation. The chapter is especially intended for  
those in charge of hiring administrators, those who  
work with women and blacks, and for women and  
blacks who are educational leaders or aspire to edu-  
cational leadership. (Author/JM)

Chapter 3 of a volume on school leadership, this  
chapter reviews theories of leadership style. After  
defining leadership style simply as "how the leader  
leads," the author presents and explains significant  
ideas about the important components and environ-  
mental determinants of leadership style. The author  
looks at leadership style theories that stress deci-  
sion-making, theories that stress ways of looking at  
subordinates, and those that stress the leader's em-  
phasis on people or the job. After asking what the  
best style is and whether leaders can change their  
styles, the author examines many of the conflicting  
answers to these questions offered by researchers  
and writers. The final section presents specific ways  
in which important aspects of each leadership style  
theory can be translated into action in schools. The  
chapter is especially intended for leaders who want  
to examine and evaluate how they function, for  
those who want to explore how they might function  
as leaders, and for those who are interested in the  
theoretical reasons behind and implications of lead-  
ers' behaviors. (Author/JM)

Budgeting, \*School Based Management

Chapter 4 of a volume on school leadership, this  
chapter is a revised version of the issue of "School  
Management Digest" entitled "School Based Man-  
agement." It draws from the work of many authori-  
ties to define, explain, and make a case for  
school-based management, a system of educational  
administration in which the school is the primary  
unit of decision-making. The author begins by ex-  
amining in detail the school-based management  
concept. He relates the rationale underlying decentral-  
ized management to the criticisms of centraliza-

tion on which it is based. Examples of successful  
school-based management are described in Florida  
and California and in the school districts of Lansing  
(Michigan), Edmonton (Alberta), and Cherry Creek  
(Colorado). The key role of the principal as the true  
leader of the school is discussed, along with the  
complementary role of the central office in support-  
ing and evaluating the schools. It is noted that the  
school board still sets goals and policies and makes  
final decisions. The school site's control over cur-  
riculum, personnel, and budget matters is examined,  
followed by a review of the increased roles of the  
staff and community in the decision-making process.  
The author concludes that the rewards of au-  
tonomy and feelings of ownership are well worth the  
extra time and efforts spent on school-based man-  
agement. (Author/JM)

Chapter 5 of a volume on school leadership, this  
chapter reviews the literature to define and explain  
management teams and to describe several success-  
ful management team arrangements. The author be-  
gins by noting that team management has recently  
enjoyed a resurgence as a response to collective  
negotiations, but beyond this function can have  
value in its own right as a way of improving school  
administration. The author emphasizes that for a  
team arrangement to be successful, trust among all  
parties—administrators, superintendent, and board—is  
important and that the superintendent's commit-  
ment to power sharing is essential. Additionally, he  
maintains that the design of the team management  
system is crucial, especially its communication  
channels. He notes that the team agreement need  
not be in writing and describes different types of  
team arrangements for different sized districts. The  
author emphasizes that the primary purpose of the  
management team is to bring middle-echelon ad-  
ministrators into the district's decision-making pro-  
cesses. Using information from interviews and  
articles, three examples of successful teams are de-  
scribed, in Yakima, Washington, Rio Linda, Cali-  
fornia, and in Attleboro, Massachusetts.

Descriptors—\*Decision Making, Elementary Secondary Education, Power Structure, Principals, \*School Administration, \*Teacher Administrator Relationship, \*Teacher Participation, Teachers Identifiers—Connecticut (Mansfield), \*Participative Decision Making, Teacher Involvement Project

Chapter 6 in a volume on school leadership, this chapter makes a case for the use of participative decision-making (PDM) at the school-site level, outlines guidelines for its implementation, and describes the experiences of some schools with PDM systems. It begins by citing research indicating the advantages of PDM, including better decisions, higher employee satisfaction, and better relationships between management and staff. The authors then discuss guidelines offered by a number of authorities to help administrators implementing PDM. They advocate that administrators vary their decision-making styles. In addition they make suggestions about who should be involved in which decisions and touch on the extent, areas, and forms of involvement. The advantages of going slowly when moving to a more participative form of decision-making and of providing necessary training are noted. The authors describe two successful experiences with PDM, the San Jose (California) Teacher Involvement Project and the Mansfield (Connecticut) public schools. They conclude that when utilized correctly, PDM can be one of the most effective techniques a leader can use to motivate others to strive willingly for group goals. (Author/JM)

Descriptors—Academic Achievement, Administrator Role, \*Educational Environment, Elementary Secondary Education, \*Improvement Programs, Measurement Techniques, Norms, Principals Identifiers—Organizational Climate Description Questionnaire

Chapter 7 of a volume on school leadership, this chapter defines, describes, and suggests ways to improve climate at the school building level. After citing a number of definitions of school climate, the authors conclude that school climate is the feel an individual gets from experiences within a school system, or the global summation of the individual's perceptions of how personnel and students behave and interact. Beginning with the "Organizational Climate Description Questionnaire," the authors discuss several climate assessment instruments to be used as a first step in a climate improvement program. Research linking school climate to student achievement, behavior, and attitudes is cited, leading to the conclusion that improving school climate is worthwhile. How to improve school climate is the focus of the next section, with an emphasis on the role of the principal and on the necessity of changing the norms in the school through techniques such as organizational development. Many practical suggestions are cited, together with the deduction that almost any approach to improve school climate undertaken with energy and optimism can be successful in improving morale, communication, and relationships with staff, students, and community. Descriptors—Administrator Role, \*Administrators, \*Communication (Thought Transfer), \*Communication Skills, Group Dynamics, \*Organizational Communication, Principals, \*Public Relations, School Community Relationship

Chapter 8 in a volume on school leadership, this chapter is a revised version of "Communications in the Open Organization." It offers suggestions from a number of authorities for administrators who want to learn how to communicate more effectively with a variety of groups within and outside the school. It begins by explaining the human communications process within the school and how it can be facilitated and improved. Such techniques as paraphrasing, behavior description, perception checking, and feedback are explained and illustrated, and exercises for improving communication are suggested. How and why a principal should communicate effectively are emphasized. The second half of the chapter deals with communications between the school and the outside world. An effective public relations program, the author emphasizes, does not just happen but is carefully planned. It is recommended that school administrators assess public opinions about the school, specify the objectives they want their public relations program to meet, and then carefully plan what and how to communicate to the public. More specific public relations suggestions to use with particular groups—parents, citizen groups, the media, and "key communicators"—are also given. (Author/JM)

Chapter 10 in a volume on school leadership, this chapter lists practical suggestions from many diverse sources for managing time and reducing stress. The author begins by noting attitudes and concepts that block or facilitate time or stress management. A number of time management strategies are suggested, including goal-setting, using a daily time log, and reducing time-wasters. External time-wasters discussed include visitors, telephone calls, meetings, paperwork, and coworkers' needs. Internal time-wasters are inability to say "no," inability to schedule and prioritize, inability to delegate, and tendency to procrastinate. Suggestions are made for dealing with both these kinds of time-wasters. The section on stress management begins by noting the overlap between time management and stress management problems and strategies. Stress is defined and the Social Readjustment Scale which ranks the stress of life events is reproduced. The author suggests keeping a daily stress log to increase awareness of specific problem areas. She then recommends ways to handle two kinds of stressors—those that can be controlled and those that cannot. The author concludes that managing time and stress develops the dedication, determination, and serious purpose necessary for lasting leadership. (Author/JM)

Descriptors—Administrator Responsibility, \*Administrator Role, Communication (Thought Transfer), \*Conflict, \*Conflict Resolution, Elementary Secondary Education, Problem Solving, School Administration

Chapter 11 in a volume on school leadership, this chapter draws from the work of many authorities to define and classify conflict and present techniques for its management in schools. Emphasizing that conflict can have positive or creative as well as negative or destructive results, the author notes that all conflict need not be resolved. He offers several typologies of conflict based on such things as the kinds of issues involved and the severity of conflict. Three primary sources of conflict are identified: communications problems, organizational structure, and human factors. Stages of conflict are identified, ranging from anticipation to discussion to open conflict. With a warning that there is no one best method for managing conflict, the author explains several ways of dealing with it. Merely avoiding conflict is mentioned as sometimes valuable but often only a temporary answer. The author cites writers who recommend the creation of superordinate goals or the institution of mutual problem-solving. The use of compromise or arbitration is touched on as is the use of authority to settle disputes. The author lists several ways to manage conflict by altering organizational structure. The chapter ends with a caution: more important than knowledge of conflict management is actual experience in dealing with conflict. (Author/JM)

Identifiers—Brainstorming, Consensus, \*Delphi Technique, Ellenstown School District WA, \*Nominal Group Technique, Paramus Public Schools NJ, Skyline Wide Educational Plan

Chapter 12 in a volume on school leadership, this chapter cites the work of several authorities concerning problem-solving or decision-making techniques based on the belief that group problem-solving effort is preferable to individual effort. The first technique, force-field analysis, is described as a means of dissecting complex problems into their major parts or forces. According to the authors, once a problem is broken down into its components, an administrator can more easily plot a course toward its solution. The second problem-solving technique, the nominal group technique, is characterized as a means of generating alternative solutions to problems by asking group members to first formulate solutions independently, then share and discuss them. Applications of the technique and its advantages over conventional brainstorming

techniques are described. The third problem-solving technique presented here, the Delphi technique, is described as a way to develop consensus on complex issues. According to the authors, several experts are asked to respond to a series of questionnaires that usually funnel the group toward consensus on the issue being discussed. Variations of the technique and several applications in schools are described. (Author/JM)

What Research Has to Say to Administrators of Secondary Schools About Effective Teaching and Staff Development.

Pub Date—Jul 81

Note—38p.

Pub Type—Information Analyses (070)—Opinion Papers (120)—Reports—Descriptive (141)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Basic Skills, Classroom Environment, \*Faculty Development, Inservice Teacher Education, Models, Secondary Education, \*Teacher Effectiveness, Teacher Improvement, \*Teacher Workshops, Teaching Skills

A review of research literature on the effective teaching of basic skills in secondary education and a description of a model staff development program provide guidelines for school administrators in improving teachers' skills. The literature identifies both classroom- and school-level factors influencing teacher effectiveness. Classroom factors involve teacher organization and planning on the first school day, students' time on task, task variety, teacher-student interaction during instruction, and the size of instructional groupings. School factors include school climate, absences and tardiness, policies regarding classroom intrusions, grading systems, teacher access to student achievement data, and parental support. Administrators wishing to foster the development of teacher skills in these areas can choose from a variety of training workshops for teachers. The author describes a model workshop program that includes a pretest phase to find what skills the staff needs, an informational phase linking theory and practice, a phase for guided practice, and a posttest or followup phase to assess changes in teacher behavior. The author also lists 15 necessary conditions for this model program. An appendix details the seven workshops that comprise the program. (RW)

Identifiers—\*Administrative Routine

A case study of curricular change compares two leading models of organizational change. One model stresses the uncertainty and disorder of major changes and views them as dramatic events. The other model sees major organizational shifts as the result of ordinary day-to-day processes and emphasizes their routine nature. For this study, the researchers analyzed the introduction of microcomputers into the classroom in one school district in an upper-middle-class Chicago suburb. Data for the case study were gathered through interviews, observation of administrative meetings, and content analysis of documents and speeches, using a method developed by political scientist Robert Axelrod. Microcomputers, seen by the superintendent as a major curricular change, were successfully introduced in the district without upheaval or drama. The researchers identify two methods by which the superintendent achieved this. First, routine administrative meetings over several years, at which the microcomputers were discussed, accustomed the principals, staff, and board members to their use. Second, the superintendent in his speeches and writings tied the microcomputers to audiovisual techniques, skill acquisition, literacy, and other familiar educational concepts. The authors suggest that such orderly, routine organizational changes should be studied more often.

Descriptors—Elementary Secondary Education, Evaluation Methods, \*Minority Group Children, Organizational Objectives, Private Schools, Resources, Role Models, \*Self Evaluation (Groups), \*Student Evaluation, \*Student Recruitment Identifiers—\*Support Systems

To help improve private schools' recruitment of minority students, this handbook discusses where and how to begin, recruitment strategies, applicant assessment, and the need for in-school support systems for minority students. The authors stress that each school should begin by analyzing its own objectives, attitudes, and admission program. Included in this analysis should be examinations of the school's goals and motivations in recruiting minority students, its commitment to racial diversity, its responsibilities and resources, the experiences of its past minority students, and the attitudes of its admissions staff. In discussing recruitment strategies, the authors recommend using minority parents, organizations, and other resources. They make ten suggestions on how to inform resource people about the school. The handbook's review of minority applicant assessment looks at school expectations and standards, admissions interviews, transcripts, references, standardized tests, other predictors of school success, and financial aid. Support systems for minority students, say the authors, should include older minority students, minority parents, and adult role models and should take into consideration faculty perceptions of students, student advisers, skills improvement, and maintenance of racial identity. Descriptors—Admission (School), Curriculum Development, Educational Counseling, Elementary Secondary Education, English (Second Language), \*Foreign Students, Guidelines, Private Schools, \*Student Personnel Services, \*Student Recruitment

Identifiers—\*Immigration Law

To strengthen private elementary and secondary schools' recruitment and education of international students, this handbook offers guidelines for solving potential problems involved in recruiting, admitting, teaching, and providing services for international students. Its first chapter defines international students as those whose cultural experiences differ markedly from those of traditional American students. Also discussed is the school's responsibility to analyze its reasons for wanting international students and to prepare itself for change in order to meet these students' needs. Chapter two reviews problems in admission policies and procedures as well as questions about graduation requirements, credentials evaluation, and English language proficiency. In chapter three the authors provide tips on recruiting international students through overseas contacts or trips abroad. Curriculum changes and student support services are covered next, including staff and student orientation, advising and counseling of international students, academic program changes, discipline, medical services, food, and billing and other business concerns. Chapter five examines college placement re-

sponsibilities, such as academic planning, testing, and financial aid application. The final chapter discusses immigration law and procedures and the obligations of schools and students. Seventeen appendices present checklists, directories, bibliographies, and other resources. (RW)

Descriptors—\*Administrator Guides, \*Check Lists, Educational Finance, Elementary Secondary Education, Food Service, Insurance, Money Management, Nonprofessional Personnel, Personnel Policy, \*Private Schools, Purchasing, Records (Forms), Risk, \*School Business Officials, School Maintenance, Student Transportation

The business office guides of the departments of education of Illinois and New Jersey served as the basic resource documents in forming this guide for independent school business managers. The checklists are grouped under the following headings: financial management, insurance and risk management, records retention, purchasing, nonacademic staff, food service, maintenance, and transportation service. After completing a particular checklist, business officials can identify strengths and weaknesses and develop realistic plans for outlining and reaching goals, meeting needs, and making improvement. Statements on the checklists are purposely designed to elicit a definite response, "Yes," "No," or "Not applicable" (N/A). The "correct" answer will depend on the school and its policies, practices, requirements, and circumstances. The checklists are arranged in looseleaf format to permit addition or alteration of whole sections or of individual pages. (Author/MLF)

Descriptors—\*Administrator Education, Comparative Analysis, \*Educational Administration, \*Educational Needs, Foreign Countries, \*Management Development, Postsecondary Education, Principals, Teacher Education

Identifiers—England, West Germany

Twenty-five short papers discuss educational management training in England and West Germany. The papers outline current provisions for training educational administrators, compare training needs with the training provided, and note training trends and problems common to the two countries. After a brief foreword, the first paper explains the rationale behind educational management training. Two papers then describe the English and West German educational systems. Two further papers review the educational management programs currently available in England and West Germany. Nine papers on England and seven on West Germany—each set preceded by a short introduction—present administrators' responses to questions on the training of regional educational administrators and principals as well as teacher educators' responses to questions on their methods of training teachers. The final paper summarizes the administrative training needs identified in the preceding articles, including training in school and labor law; in general planning, administrative, and financial tasks; in communications and human relations; and in public governmental processes. **Descriptors**—Academic Achievement, Disadvantaged Youth, Elementary Secondary Education, Family Characteristics, \*Family Influence, Federal Aid, Parent Aspiration, Parent Influence, \*Parent Participation, Parent School Relationship, Predictor Variables

An introduction and annotations of 37 research reports review evidence regarding the effect of parental involvement on student achievement in elementary and secondary education. The annotations cover studies from 1966 through 1980 that analyze such variables as family background and socioeconomic status, parent powerlessness, parents' expectations of their children's academic achievement, family and student self-image, educational activities in the home, and parents' involvement in parent-teacher associations and other in-school activities. The introduction briefly traces the development of research on parental involvement, starting with James Coleman's 1966 study, "Equality of Educational Opportunity." The author concludes that the form of parental involvement in education, whether in or out of school, is not important as long as the involvement is well-planned, comprehensive, and long-lasting and serves to integrate students' experiences at school with those at home. Further research is needed, the author says, on methods of home-school collaboration and on the need for federal aid to continue parental involvement. (Author/RW)

Identifiers—\*Satisfaction, Tennessee

A statewide questionnaire survey of 180 Tennessee public school principals examined their perceived degree of participation in decision-making in six policy areas and compared it with their degree of satisfaction with the decisions made in those areas. The principals were selected from three sets of school systems: those which had had formal professional negotiations before the 1978 Tennessee Education Professional Negotiations Act; those which had had negotiations only after the passage of the act; and those which had never had formal negotiations. The six policy areas comprised curriculum and instruction, finance and business management, educational facilities and auxiliary services, school-community relations, pupil personnel, and certified personnel. Using analysis of variance, the researchers found that there were not significant differences in levels of satisfaction among the three groups of principals in any policy area except certified personnel; in this area, the principals from systems with pre-1978 negotiations were least satisfied and least active in decision-making. The findings also indicated that principals from non-negotiating systems participated least in decision-making in two areas: finance and business management and educational facilities and auxiliary services. **Descriptors**—Administrator Attitudes, \*County Officials, \*Educational Finance, Elementary Secondary Education, \*Expenditures, \*Financial Support, School Support, State Aid, State Surveys, Taxes

Identifiers—Tennessee

In a survey of 96 county commissioners in 20 central Tennessee counties—a state where county commissioners determine the funds available for local public school systems—researchers used a seven-item questionnaire to elicit commissioners' attitudes on issues of public educational finance. The survey asked about local educational expenditures, methods of generating educational revenues, sources of educational income, and the adequacy of available funding for education. Analysis using a chi-square test for statistical significance indicated that the commissioners support additional local funding for educational expenditures pertaining to instruction, discipline, and auxiliary services, but not for sports, extracurricular activities, or teachers' cost-of-living raises. They oppose giving school boards the power to levy taxes; prefer using state and local sales taxes to raise educational revenues; and believe the primary source of public educational funding should be the state government. A copy of the survey questionnaire is attached to the report. (Author/RW)

Identifiers—Georgia

Five papers collected in this monograph provide information and suggestions regarding the potential role of educators in contemporary society. The first article suggests that, in many families, economic conditions requiring the employment of both parents will place greater responsibility for the development of children's moral and ethical standards on educators. The growing emphasis on educational accountability is discussed in the second article which focuses on the steps taken by the State of Georgia to improve student performance via the Georgia Educational Accountability Act. The next paper stresses the role of education in allocating opportunities, status, and rewards to citizens and the importance of adequate teacher training programs in the preparation of educators capable of meeting the demands of modern society. The fourth article explains the need to overcome the self-oriented attitudes of our students by encouraging both self-sufficiency and the desire to serve society at large by sharing energy and talents. Finally, an article on special education points out the need to change deeply entrenched practices by encouraging a better understanding of the behaviors and needs of special education students. **Descriptors**—Administrator Attitudes, Board of Education Policy, Civil Liberties, Elementary Secondary Education, \*Employment Qualifications, Race, Residence Requirements, Sex, \*Teacher Attitudes

Identifiers—\*Chicago Public Schools IL

A Chicago (Illinois) Board of Education rule effective September 1, 1980, requires that all employees, except those then living in the suburbs, must reside within the city limits of Chicago. The authors surveyed 188 teachers and administrators in the Chicago school system to determine their reactions to the ruling. While controlling for race, sex, residence, occupation, and other variables, they sought respondents' attitudes on their willingness to change residence, the rights of individuals and of the city, their own schools' quality, and the likely effects of the board's ruling on integration, school-community relations, quality of city and school life, and school system funding. The findings indicate that most educators opposed the residency requirement but that opinions varied by race and residence; that most respondents believed the board's policy would not improve the schools; and that most felt the ruling violated their individual rights. Respondents were undecided, however, about whether they would move or quit because of the residency requirement. (Author/RW)

Identifiers—Participative Decision Making, \*Rules and Regulations

Eight secondary schools participated in this study of the relationships among school policies, principal leadership style, teacher behavior, and student behavior. Data were gathered through student and teacher observations, student and teacher questionnaires, student absence records, observations of the physical environment, and interviews with principals. As one facet of the study, all teachers participated in the Stallings Effective Use of Time Training Program. A number of major findings emerged: (1) in schools where policies and rules were clearer and more consistently enforced, teacher morale was higher and there were fewer classroom intrusions, less litter and vandalism, a lower absence rate, less class misbehavior, and more time spent on task; (2) in schools with more administrative support services and fewer burdensome duties, teacher morale was higher and there was less classroom misbehavior; (3) in schools where the principal was more collaborative and respectful, teachers had higher morale and students perceived teachers and students as more friendly; (4) in schools with more supportive principals, more teachers implemented the training program; (5) in schools where the policies and rules were clear and consistent, more teachers changed their classroom behavior as recommended by the program; and (6) in schools where the teachers implemented the training program, students spent more time on task. Descriptors—\*Citizen Participation, \*Collective Bargaining, Community Involvement, Decision Making, Elementary Secondary Education, \*Labor Relations, Parent Influence, \*Parent Participation

The influence of citizens on educational collective bargaining was examined in this study of eight school districts in California and Illinois. Data were collected through interviews with persons active in collective bargaining and observation of bargaining sessions and other meetings. The study revealed that citizens rarely participate directly in collective bargaining but may have strong influence over it through school board recall votes or elections. The authors differentiate between client participation (in which parents act as representatives of their children's rights) and citizen participation (in which parents attempt to alter organizational policy and practice) and discuss causes for movement from the former to the latter. The authors identify three decision-making arenas: legal/political, professional/bureaucratic, and labor relations. They suggest that the criteria that citizens use in deciding whether to participate in a particular arena are permeability of the arena, efficacy of entering that arena, and efficiency of influencing decisions in that arena. The report concludes that since the criteria used by citizens in deciding how and when to participate leads them away from direct participation in collective bargaining, public policy attention ought to be focused on encouraging citizen influence rather than on furthering direct participation. Identifiers—Education for All Handicapped Children Act

The notion of intervention strategies is introduced in this paper to explain why and when certain change efforts are successful. It is argued that the choice of control points and the selection of control linkages are determined by characteristics of the task in the implementing agency. Many implementation failures can be attributed to the selection of the wrong control point and the wrong linkage. Linkage refers to the kind of reporting required and the kind of positive or negative inducements used. Control points are selected as the relevant variable, whether implementation controls are mainly exercised on input, output, or process variables. Input controls relate to allocated funds and characteristics of the professionals and are associated with adaptive implementation. Output controls involve the implementer in saying something about what has been done and can either enlarge or reduce the implementer's discretion depending on the specificity of disclosure. Process controls are directed at internal behavior and are concerned with the way services or products are provided, thus reducing day-to-day discretion. This paper focuses on situations where the task does not always lend itself to routinization and where professional discretion is important. The implementation of the Education for

All Handicapped Children Act of 1975 is selected to illustrate the unforeseen consequences of inappropriate intervention strategies. (Author/MLF)

Descriptors—Aademic Ability, \*Achievement Tests, Criterion Referenced Tests, \*Educational Testing, Elementary Secondary Education, Minimum Competency Testing, Norm Referenced Tests, \*Standardized Tests, \*Testing Problems, Test Interpretation, Test Reliability, Test Theory, \*Test Use

Identifiers—School Effectiveness

Standardized achievement tests are often misused as indicators of a school's quality or effectiveness relative to other schools. This is an incorrect use because it ignores variation among schools in student abilities, family support of education, student mobility, and other factors. People also misuse tests because they impute to them more statistical reliability and validity than they actually have. An example using the Iowa Tests of Basic Skills illustrates the possibilities for reliability errors with both single tests and retesting over time. The use of norm-referenced tests to evaluate Title I programs, under the Elementary and Secondary Education Act, is incorrect because it makes the doubtful assumptions that national norms are valid and that one can compare either different groups of students or students with and without Title I treatment. However, criterion-referenced tests have similar problems—with reliability, neglect of some learning areas and processes, and arbitrary choice of satisfactory performance levels. Hence it is unsound to use criterion-referenced tests alone in minimum competency testing, because the tests do not account for the range of student abilities, the student's employability, or educators' possible failure to solve a student's learning disability. Descriptors—\*Administrator Role, Cost Effectiveness, Elementary Secondary Education, Input Output Analysis, Institutional Characteristics, Measurement Techniques, \*Organizational Effectiveness, Predictor Variables, \*Productivity, Teacher Characteristics, \*Teacher Effectiveness

Identifiers—Opportunity Costs, \*School Effectiveness

To help administrators improve school efficiency in a time of financial constraints, this document reviews research on school productivity, points out possible improvements suggested by the research, and discusses several problems in measuring school costs and effectiveness. The author first explains the analytical concepts of school productivity, input-output analysis, and productivity functions. His review of school productivity research, covering studies of teacher, school, and program effectiveness, notes a number of variables that influence productivity, including teacher experience and verbal ability, teacher-student interaction, use of computers or other advanced technology, school climate, class size, and socioeconomic factors. Administrators wishing to apply the research findings to their

schools, says the author, should also be aware of the opportunity costs—the alternatives lost—when a particular method or reform is adopted. The document also explains how difficulties in choosing among multiple educational goals and in selecting appropriate test instruments can create problems in measuring educational output. The author concludes that administrators can make a difference, however, by finding ways to make schools more productive and effective. (RW)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Administrator Role, Elementary Secondary Education, Evaluation Criteria, \*Evaluation Methods, Evaluation Needs, \*Teacher Evaluation, \*Teacher Improvement, Teacher Supervision

Seeking to clarify the purpose of teacher evaluation, the author advances a strategy in which improvement of instruction is the primary goal of evaluation. The paper divides the activities and strategies involved in evaluation into three broad categories: observation, judgment, and assignment of value. It recommends a process in which only those teachers most in need of improvement are identified and evaluated. This evaluation is followed by implementation of specific measures that focus on improving individual behaviors. The author also discusses the role of consensus and agreement over the purpose and nature of the evaluation process, the reliability and validity of the measurement standards employed, and student learning. The author concludes that the primary task in evaluating teachers is to finish with statements that relate to an acceptable theory of instruction rather than to teachers' personal characteristics. Descriptors—Centralization, Decentralization, \*Decision Making, \*Educational Policy, Educational Resources, Elementary Secondary Education, Organizational Change, Organizational Climate, Organizational Theories, Participation, \*Policy Formation, Postsecondary Education, Public Opinion, Redundancy

Identifiers—Incrementalism (Decision Making), Rationalization (Decision Making)

Policy analysts approach problems of decision-making from two distinct perspectives: rational-comprehensive and incremental. This paper examines the theory behind both perspectives and argues that incrementalism may be a more appropriate strategy for applied decision-making in education. In considering the appropriateness of applying incrementalism to a specific situation, the following environmental characteristics must be assessed: threshold on critical mass effects, structural decomposability, sleeper effects, and the issue attention cycle. In addition, the organizational characteristics of redundancy of resources, distribution of power, and maturity of the organization must be evaluated. Educational organizations are precluded from disruptive shifts in policy and thus are characterized by an incremental, additive approach to policy. Rationalization of educational policy in the United States is made difficult by the decentralized character of the system, the jealously guarded prerogative of local control, the predominance of short-term issues, and sudden swings in public demands. All of these

conditions seem to call for incrementalism. Other characteristics showing a predisposition for incrementalism are abundance of resources (found in the redundancy in organization at the local and state levels), the availability of a bargaining arena, and organizational maturity. (Author/WD)

Descriptors—Administrator Role, Arbitration, \*Conflict Resolution, Court Litigation, Elementary Secondary Education, \*Grievance Procedures, \*Legal Problems, Ombudsmen, Parent Grievances, \*School Law

Many people in our society turn to courts for the resolution of every problem. By delegating to judges the authority to declare our legal rights we diminish our individual and collective liberties. This trend of legalism can have important consequences for school administrators. Rather than resist or evade the law, school officials can obviate judicial intrusion by employing several approaches. Administrative channels already in existence within the school system offer the most obvious means for resolving conflict. Another approach is the formation of a grievance committee, composed of people of divergent perspectives that can be called in when administrative channels prove unsatisfactory. Arbitration, in which an impartial third party conducts binding or advisory fact finding, is yet another alternative. A final mechanism is the use of the ombudsperson, an in-house arbiter found in larger institutions. These alternatives can be costly in terms of time and energy but may prevent many disputes from reaching an advanced stage. (JEH)

Descriptors—Administrator Role, Classroom Techniques, \*Computer Assisted Instruction, \*Computer Managed Instruction, Computer Oriented Programs, Educational Media, Elementary Secondary Education, Instructional Innovation, Recordkeeping

Identifiers—\*Computer Uses in Education

The availability of compact, low-cost computer systems provides a means of assisting classroom teachers in the performance of their duties. Computer-assisted instruction (CAI) and computer-managed instruction (CMI) are two applications of computer technology with which school administrators should become familiar. CAI is a teaching medium in which students respond to computer displays. The ability of computers to interact with students distinguishes CAI from most instructional media. The computer may provide corrective feedback or present new information based on the student's response. The forms of interactive CAI include drill, practice, tutorial programs, problem-solving, instructional simulation, and testing. CMI provides information to the teacher that assists in the management of learning activities, and facilitates the processing of student information. CMI systems alleviate the burdens of recordkeeping and thereby enhance decision-making. School administrators should provide the appropriate leadership and support for the use of CAI and CMI in the educational process. (JEH)

To provide basic information on new educational methods and programs, this catalogue describes 315 projects designated as exemplary by the Joint Dissemination Review Panel of the U.S. Department of Education (DOE). The catalogue is divided into 12 categorical sections, including (1) adult education, (2) alternative schools and programs, (3) bilingual and migrant education, (4) career and vocational education, (5) early childhood and parent involvement programs, (6) physical, environmental, and social sciences, (7) educational organization and administration, (8) preservice and inservice training, (9) mathematics and language arts, (10) special education and learning disabilities, (11) fine arts and communication technology, and (12) health, physical education, special interest, and gifted-child programs. Data on each project comprise the title, capsule summary, target audience, description, evidence of effectiveness, financial and implementation requirements, services available, and name and address of a contact person. Projects are indexed by state, categorical section, ERIC descriptors, and title. Appendices list 54 projects added since the catalogue's last edition and exemplary projects that receive DOE funds for disadvantaged or handicapped children or for follow-through programs. (RW)

To help new school board members gain a quick understanding of their job, this handbook's seven chapters and five appendices present useful guidelines and information. The first chapter discusses the general nature of school board membership, lists 12 characteristics of a good board member, and pre-

sents the Illinois Association of School Boards' code of conduct for school board members. Chapters two and three describe the structure of Illinois school government and of local school boards. The school board's powers and duties, including policy-making and school district monitoring, are addressed in chapter four. Chapter five looks at school board operations and meetings and suggests how to conduct effective meetings. The last two chapters introduce the new board member to school finance and collective bargaining. The appendices add further hints for conducting productive board meetings and provide a list of additional readings as well as guidelines for a board's relations with its chief administrator. (RW)

Descriptors—Communication Skills, Elementary Secondary Education, Evaluation Methods, \*Interpersonal Relationship, Nonverbal Communication, Self Esteem, Speech Communication, \*Supervisors, \*Teacher Administrator Relationship, \*Teacher Evaluation, \*Teacher Supervision  
To make teacher evaluation more effective and meaningful, supervisors must ensure that two-way communication takes place in all phases of the evaluation process, including planning and the collection and use of information. The easiest way to evaluate teachers is to look only at outcomes—the method recommended in management-by-objectives (MBO) procedures. However, to guarantee good interpersonal interaction the MBO evaluation method should use a team of evaluators. Supervisor interaction with teachers must also overcome several barriers. First, supervisors' feedback and their offers of assistance must not threaten teachers' self-esteem and must promote teacher-supervisor trust. Feedback focused on the teaching job and oriented to the future is most effective. To be able to communicate in the most useful way, supervisors should also acquire skills in different verbal styles. Another barrier supervisors must overcome is verbal and nonverbal blocking behavior (by teachers, supervisors, or both), which can restrict teacher-supervisor interaction. Supervisor communication with teachers during evaluation is further improved when the supervisor knows his or her own behavior, needs, and skills as well as those of the teachers and students. (RW)

Identifiers—Incident Reporting

This handbook offers administrators specific advice on developing the skills, knowledge, and techniques needed for coping with problems of school crime and violence. The guide begins by advising administrators that having security information available at all times helps determine the climate of the school. Instructions are given for preparing written security reports. In addition, a standard category of offense code and an incident reporting form are provided. The remainder of the handbook deals with the following specific types of violence or vandalism: arson, assault, bomb incidents, burglary, drugs/narcotics/alcohol, extortion, larceny/theft, robbery, sex offenses, trespassing, vandalism, and weapons. The offense is defined, subcategories

listed, and prevention strategies, response procedures, and investigative techniques provided in the form of a checklist of instructions. The concluding chapter deals with hostage/terrorist/childnapping and search and seizure. Reference materials and a bibliography are included. (MLF)

Pub Type—Historical Materials (060) — Reports - Descriptive (141)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—\*Administrative Organization, Curriculum, Educational Administration, Educational Finance, Educational Research, \*Educational Trends, \*Education Work Relationship, Enrollment Trends, Federal Aid, Federal Legislation, Federal State Relationship, Financial Policy, School District Autonomy, School Organization, School Statistics, Tables (Data), \*Vocational Education

Summarizing recent trends and developments in public and private education in the United States, this report examines Constitutional and statutory provisions for education, discusses recent federal legislation, and describes the role of state and local authorities in the governance of elementary, secondary, and higher education. Expenditures, curricular issues, organizational structure, and statistical trends are presented. One section discusses the role of the federal government in current educational research, focusing especially on the National Institute of Education. The report also addresses the interaction of education and work. It provides an overview of the role of vocational education in preparing youth and adults for entry into the world of work and concentrates on the actions taken by the United States to strengthen and develop programs that link education and work. The report ends with a set of appendices that include a list of national advisory committees, selected references, and statistical tables. (JEH)

Presented in this paper is a framework to examine environmental influences on learning. The framework identifies factors from several environments—the home, the community, and the larger sociocultural context—and links them with school policy and operations. Methodological considerations important to further investigation of these environmental links are also discussed. This introductory inquiry into the topic of community influences is intended to set forth a paradigm guiding research at the University of Oregon's Center for Educational Policy and Management. To do so, research linking environmental influences to schooling and student learning is reviewed. The manner in which these influences affect school governance, student learning, and management of human resources at the school and classroom levels is explored and several theoretical approaches to studying these links are discussed. Finally questions

flowing from this inquiry are proposed in the form of a research agenda. (Author/JM)

The Research and Development Exchange (RDx) is a network of regional educational laboratories and university-based research and development centers working to support state and local school improvement efforts. Initiated by the National Institute of Education in 1976, the RDx is composed of eight Regional Exchanges and four central support services. In 1979 members of the RDx agreed to collaborate in the development of a resource base on the identification and validation of promising educational programs, practices, and products. This paper provides a brief history and description of the following validation processes: the Joint Dissemination Review Panel (JDRP); Identification, Validation, Dissemination (IVD); Sharing Business Success (SBS); Project Information Packages (PIPs); and the National Education Practices File. Some of the issues in validation discussed in the paper include replication versus adaptation, the evaluation experience of the project staff, state responsibilities before validation, the degree of rigor applied in validation, and the nature of on-site visits. A bibliography on validation processes and the abbreviated form of original IVD submission requirements are appended. (Author/MLF)

Members of the Research and Development Exchange (RDx) agreed to collaborate in the development of a resource base on the identification and validation of promising educational programs, practices, and products. State activities in validation and state concerns about and recommendations concerning current nationally used processes are the subject of this report. Questionnaires were sent by the regional educational laboratories to the states in their regions concerning: (1) the extent to which procedures to validate exemplary programs are being used by state departments of education; (2) the nature of the validation process in use; (3) state implementation procedures for validation and the scope of state validation efforts to date; (4) state organizational arrangements for validation and the nature of state support for the dissemination of validated programs; and (5) the extent of state collaborative validation activities. An overview of current state validation practices is shown on a chart. Survey results, organized by region, are presented in 17 tables accompanied by descriptions. A

brief section discusses concerns and issues about the validation of educational programs and practices. In the appendices are summaries for each state, a list of state contacts, a description of validation processes, and the survey form (MLF)

Descriptors—Educational Improvement, \*Educational Practices, Elementary Secondary Education, Federal State Relationship, Information Dissemination, National Surveys, \*Program Effectiveness, \*Program Validation, \*Quality Control, Regional Laboratories, Research and Development Centers, State Departments of Education, Tables (Data), \*Validated Programs

Survey findings on state educational validation procedures show that of the 50 states surveyed, 45 have some form of established procedure for validation promising educational practices. Approximately two-thirds of the states that have validation programs employ either the Identification, Validation, Dissemination (IVD) procedure or some modification of it. Roughly a third of the states reported that they use their own state-developed validation processes. Forty-three states conduct site visits, following prescreening, to verify projects' status on the state's validation criteria. Significant variation occurs in the length of the site visits, the number of team members, and the composition of the teams. Twenty-seven states reported that they provide support to both the developer/demonstrators and the adopter/adapters of validated programs. Close to three-fourths of the states reportedly are involved in some form of cooperative activities with other nearby states. However, the cooperative activities center primarily on implementation of the validation procedure. Few if any states cooperate by actually sharing validated programs. A number of recommendations are made in the general areas of coordination and communication, funding, diffusion efforts, and the scope of the Joint Dissemination Review Panel (JDRP) programs. An Approach to Speech and Language Instruction for the Spanish-Speaking Preschooler.

Pub Date—Feb 81

Note—16p.; Paper presented at The Council for Exceptional Children Conference on The Exceptional Bilingual Child (New Orleans, LA, February 18-20, 1981, Session F-24).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cognitive Development, \*Expressive Language, \*Intervention, \*Language Acquisition, \*Language Handicaps, Language Tests, Models, Paraprofessional Personnel, Parent Education, Preschool Education, \*Program Descriptions, Semantics, Socialization, \*Spanish Speaking, Theories

Identifiers—\*Limited English Speaking, Saint Marys Hospital AZ

Principles of language assessment and instruction for Spanish speaking preschoolers at St. Mary's Hospital in Tucson, Arizona, are presented. Basic definitions and program model (which looks at the child's communication skills based purely on semantic content contained in spontaneous language samples) are explained. The program's theoretical bases include the assumption that socialization and cognition provide an initial basis for language emergence and continue to interact with language development. The speech and language assessment process examines cognitive precursors to language, receptive language, medical/developmental history, oral peripheral facility, and expressive language (involving analysis of 50 spontaneous utterances elicited during play). The intervention component involves instruction in new syntactic forms, training of parents and paraprofessionals, selection of the language in which therapy is provided, and the use of a scoring system to facilitate monitoring of progress. Six attachments (in Spanish) are used in the parent/paraprofessional training program. (DB)

Family Training Program for Atypical Infants and Children. The Third Year Report.

Catholic Center for Learning, Buffalo, N.Y.

Spons Agency—Office of Special Education (ED), Washington, D.C.

Pub Date—18 Mar 81

Grant—G007701809

Note—397p.

Pub Type—Reports - Evaluative (142) — Numerical/Quantitative Data (110) — Tests/Questionnaires (160)

EDRS Price - MF01/PC16 Plus Postage.

Descriptors—Data Collection, \*Demonstration Programs, \*Developmental Disabilities, \*Diagnostic Teaching, \*Infants, Intervention, \*Parent Education, Program Evaluation, Records (Forms)

Identifiers—At Risk (for Handicap)

The final report describes the Catholic Center for Learning's Family/Infant Program, a 3 year demonstration project to enhance the growth and well being of developmentally disabled and at risk infants by helping family members become more effective caregivers and teachers. The first section covers the target population, provides a brief history, and outlines a statement of philosophy. The second section reviews the program and a variety of program outcomes and products. Separate subsections address the Center Program, Satellite Centers, and the Specialized Family Program. Noted among the program products are a family orientation notebook, a family oriented curriculum, and family program activities. A final section discusses procedures and contains tables and forms on collecting data relating to changes in program participants. Documents from all program areas are appended. Included are brochures, papers, policy and procedure statements, forms, evaluation materials, examples of various curricula, and dissemination products. The bulk of the document consists of evaluation forms such as the Family/Infant Program Developmental Checklist which assesses gross motor, fine motor, cognitive, language, and social/emotional skills. Competency Goals and Performance Indicators K-12: Educable Mentally Handicapped Learners Supplement.

North Carolina State Dept. of Public Instruction, Raleigh. Div. for Exceptional Children.

Pub Date—[80]

Note—143p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—\*Competency Based Education, \*Educational Objectives, Elementary School Science, Elementary Secondary Education, Health Education, Language Acquisition, Language Arts, \*Mild Mental Retardation, Physical Education, Reading Skills, Secondary School Science, Social Studies, Vocational Education

Identifiers—Mathematics Skills

The collection of competency goals and performance indicators is designed to assist regular and special educators in creating curriculum and instructional programs to maximize the learning potential of educable mentally retarded students. The competency goals and performance indicators are identified in most program areas by grade level categories (K through 3, 4 through 6, 7 through 9, and 10 through 12) and significant secondary level courses. Program areas covered include the following (sample subareas are in parentheses): healthful living (health, physical education, safety); languages (writing, speaking, listening); mathematics; reading (prereading skills, comprehension, word analysis, study skills, vocabulary); science; social studies; and vocational education. (SB)

Descriptors—\*Disabilities, Elementary Secondary  
Education, English (Second Language), Handicap  
Identification, \*Language Proficiency, \*Language  
Tests, \*Minority Groups, Screening Tests, \*Student  
Evaluation, Student Placement

Identifiers—\*Limited English Speaking

The steps in the manual are designed to ensure  
that developmentally normal limited English pro-  
ficiency (LEP) students are properly placed and to  
increase the validity of the special education refer-  
ral-assessment-placement system. The construct of  
LEP is explained, and procedures for selecting two  
language proficiency tests are outlined. Criteria for  
decision making for the four phases of the screening  
assessment process are listed: Phase 1—informal lan-  
guage screening with the student/home language  
questionnaire; Phase 2—formal language assessment;  
Phase 3—formal educational screening; and Phase  
4—additional testing. (SB)

Descriptors—\*Cognitive Development, \*Concept  
Formation, \*Conservation (Concept), Females,  
\*Gifted, Intelligence Quotient, Intermediate  
Grades, \*Problem Solving

Identifiers—Concrete Operations, Formal Opera-  
tions, \*Piagetian Tasks

The formal operations skills and problem solving  
performance of 60 gifted girls (grades 4 through 6)  
were investigated. Ss were given Piagetian tasks  
which involved conservation of mass and weight,  
use of proportion, oscillation of the pendulum, and  
projection of shadows. Among findings were the  
following: (1) no relationship between IQ and either  
concrete operations (CO) or formal operations (FO)  
total scores; (2) positive association between age  
and total FO scores; (3) inverse correlation between  
time and IQ, CO, FO, and total Piagetian test score;  
and (4) precocity in 9 to 10 year old gifted girls on  
standardized intelligence scales and ability to solve  
Piagetian tasks quickly and correctly. Tables with  
statistical data are provided and descriptions of Pi-  
agetian tasks are appended. (SB)

Woods, Thomas S.

The Development of Stimulus Control as a Behav-  
ior Management Technique.

Pub Date—Apr 81

Note—13p.; Paper presented at the Research  
Forum of the Annual International Conference of  
The Council for Exceptional Children (59th, New  
York, NY, April 12-17, 1981, Session B-10).

Pub Type—Reports - Research (143) — Speeches/  
Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Autism, \*Behavior Modification,  
Early Childhood Education, \*Operant Condition-  
ing, Stimulation

The study was designed to make a 6 year old  
autistic child's learning sessions more productive by  
reducing three self stimulatory rituals. Treatment  
involved structured academic sessions involving the  
S and one other child in basic motor and vocal imi-  
tation training which was done according to Dis-  
crete Trial Format followed by structured play. In  
addition, consequences of brief immobilization were  
applied if the S emitted any of the target behaviors.  
Sessions began with the investigation placing a  
small beach hat on the S's head. S's self stimulatory  
behavior was almost totally eliminated in the pres-  
ence of the beach hat. (SB)

Descriptors—\*Cerebral Palsy, \*Communication  
Skills, \*Computer Assisted Instruction, Comput-  
ers, Linguistics, Problem Solving, \*Screening  
Tests, Severe Disabilities, \*Spatial Ability,  
\*Visual Learning

Identifiers—\*LOGO System

The authors review their work on helping physi-  
cally handicapped persons gain spatial cognition  
through the interactive graphics learning environ-  
ment of a computer LOGO system. The findings are  
said to demonstrate that the LOGO tasks are a vi-  
able part of a school curriculum for students with  
cerebral palsy, as shown by severely/profoundly  
handicapped students 7 to 8, 11 to 13 and 17 years  
old. The LOGO system allowed the students a  
source of experience in visuospatial problem solving.  
Efforts to develop computer based methods of as-  
sessment are discussed. Possible reasons for demon-  
strated deficits in visuospatial functioning are noted  
to include lack of experience and the effects of brain  
damage. The system's role in studying linguistic  
problems and improving communication skills is  
considered, and future research topics are listed.

ment, \*Communication Skills, \*Computer Assis-  
ted Instruction, Computers, Educational  
Diagnosis, \*Severe Disabilities, \*Spatial Ability,  
\*Theories

The proposal outlines a study to assess the role of  
computers in assessing and instructing students with  
severe cerebral palsy in spatial and communication  
skills. The computer's capacity to make learning  
interesting and challenging to the severely disabled  
student is noted, along with its use as a diagnostic  
tool. Implications for theories on cognitive develop-  
ment are suggested, especially regarding the role of  
sensory motor learning in concept formation. The  
proposed study is outlined, in which eight severely  
cerebral palsied children (6 to 14 years old) will be  
tested to determine their cognitive development in  
terms of Piagetian tasks. The development of com-  
munication via a computer system will also be ex-  
amined. (CL)

Descriptors—\*Adolescents, Career Awareness, \*Family Relationship, \*Individual Development, \*Interpersonal Competence, Mainstreaming, \*Physical Disabilities, Vocational Education  
Identifiers—\*Personal Independence

Written by disabled persons and intended for teenagers with physical disabilities, the booklet focuses on ways to become more independent. Family relationships are examined and suggestions are made for overcoming feelings of dependence and dealing with parents' overprotectiveness. The disabled teenager's social life, including dating and developing friends, is considered. Suggestions for coping in a regular school are made, and the importance of joining in regular activities is emphasized. Career choice, college decisions, vocational rehabilitation services, and job interviews are among topics covered in a final chapter. (CL)

Identifiers—\*Education for All Handicapped Children Act

The report by the General Accounting Office examines the status of education for handicapped children in 10 states. P.L. 94-142, the Education for All Handicapped Children Act, is reviewed briefly, and the states' compliance with the following aspects was assessed: eligibility criteria, individualized educational programs, and provision of a free appropriate public education. The controversy over the estimated number of handicapped children given by the Office of Special Education is addressed (6.2 million estimated as opposed to 3.9 million actually identified). Resulting problems in misclassifying children as handicapped to increase state childcount are discussed, and it is recommended that the 12% prevalence estimate be discontinued. Among the eligibility questions cited are unclear definitions in the law and legislative history and insufficient guidance in program regulations. The lack of compliance with individualized education program (IEP) requirements are documented, including IEP content problems and missed deadlines. Comments from local education agency officials are summarized regarding the increased time, personnel, and funds needed to provide a free appropriate public education to all handicapped children. The report further suggests that state education agencies have been inadequately staffed to carry out P.L. 94-142, and that the initial federal administration of the program was inadequate. Each section concludes with recommendations to the Secretary of Education and responses by the Department of Education. (CL)

The "Institute for Change," a proposed modular training project to improve the quality of educational services to linguistic minorities in special education, was pilot tested with 12 college trainees. Nine modules were delivered in 60 hours of training, with individual training plans developed (samples are included). The project forms the basis of a 3 year effort to train college faculty in understanding bilingual/bicultural issues in special education. The 3 year institute involves modular training, a local school and college practicum, and an integrating seminar. (CL)

Identifiers—\*Handicapped Children's Early Education Program

The booklet contains proceedings of a conference for minority project administrators in the Handicapped Children's Early Education Program (HCEEP), a federal program to develop exemplary services for young handicapped children. Part 1 includes topical presentations reflecting the expressed interests of participants related to model programs. Chapters have the following titles and authors: "Trends in Cultural Pluralism and Assessment of Minority Group Children" (J. Wofford); "Planning and Implementing Program Evaluation" (P. Gandara); "Developing, Implementing, and Disseminating the Educational Model" (H. Hankerson); "Cultural Awareness—Working with Parents of Handicapped Children" (T. Brito); "Facilitating Communication—The Action Planning Approach" (B. Coppock, Jr.); and "Liaison with Other Programs and Agencies" (B. Ramirez and Y. Galiber). A list of recommended strategies for model development follows each chapter. Part 2 summarizes the content of two panel presentations dealing with minority involvement in professional organizations and federal program resources. A final section contains supplementary information regarding the Minority Leadership Consortium and the workshop itself—agenda, names and addresses of workshop resource persons, and the workshop evaluation report. Descriptors—Child Development, Cognitive Development, \*Curriculum Evaluation, Developmental Stages, \*Disabilities, \*Early Childhood Education, Educational Psychology, \*Educational Theories, Instructional Materials

The paper examines the theoretical constructs that underlie currently used curricula for young handicapped children and suggests guidelines for selecting and evaluating curricula. Three developmental perspectives are reviewed: the age related developmental milestones identified by A. Gesell and adhered to by diagnostic prescriptive advocates, the Piagetian perspective of cognitive development, and the functional perspective based on the principles and technology of applied behavior analysis. The authors propose a set of questions as guidelines for staff personnel to use in selecting curricula for young handicapped children. Among the questions posed are the following: Is the curriculum based on a theory of early development and learning? Do the goals of the curriculum complement the existing goals of the program? Are the objectives designed to accomplish the terminal goals of the curriculum? And Are the items developmentally relevant and logically sequenced? Appended are lists of early childhood curriculum materials and references. (SB)

Descriptors—\*Communication Skills, Curriculum Guides, \*Multiple Disabilities, Physical Disabilities, \*Severe Disabilities, Severe Mental Retardation, \*Student Evaluation, \*Teaching Methods Identifiers—\*Comprehensive Communication Curriculum

The Comprehensive Communication Curriculum is designed for teaching basic communication skills to severely or profoundly retarded, physically handicapped students. An introductory section mentions the purpose of five major program components: caregiver interview, identification of child's wants and needs, training the child to request wants and needs, training to initiate interaction and request wants and needs, and environmental manipulations to facilitate spontaneous requests. A section on parent involvement and the initial assessment contains a sample caregiver interview and examples illustrating interpretation of the caregiver interview. Procedures for identifying reinforcers via environmental manipulation are the focus of the section on identification of wants and needs. Request training is discussed in another section in terms of goal and rationale, three decisions in request training, and request training objectives and procedures. The goals and rationale, description, procedures, criterion, and generalization information are offered for training in requesting more, requesting through choice, training the child to initiate communication, and manipulating the environment to facilitate spontaneous use. Appended materials include a report on facilitator training, a sample caregiver interview and teacher questionnaire, blank data sheets, guidelines for planning and managing a communication board, guidelines for selecting a primary communication mode, and a review of response development and data collection. Descriptors—\*Family Involvement, \*Multiple Disabilities, \*Parent Participation, \*Parent Teacher Cooperation, \*Severe Disabilities, \*Teacher Role

Identifiers—\*Comprehensive Communication Curriculum

The guide is designed to facilitate communication training in the classroom and at home through involvement of parents in the education of their severely multiple handicapped child. Section 1 addresses the advantages of family involvement in the areas of assessment, programming, classroom assistance, and advocacy. The next three sections deal with issues regarding teacher-parent interactions and parental readiness to be involved. Subsections cover special concerns for parents; initial reactions; resources; implementation of a family involvement program (initial contact letter, followup telephone call, initial group meeting, caregiver interview); and continued involvement (which involves such activities as periodic and daily communication, home visits, inservice activities, and workshops). A final section emphasizes to the teacher the importance of involving the handicapped student's entire family in the educational program. Parent group autonomy is discussed with attention given to assertiveness

training, additional interaction strategies, and parents assuming responsibility for the group. Appendixes include a suggested outline for the initial contact letter, sample information sheets, and a sample daily parent report form. (SB)

Descriptors—\*Communication Skills, Family Involvement, Information Sources, \*Multiple Disabilities, Parent Participation, \*Parent Role, \*Severe Disabilities

Identifiers—\*Comprehensive Communication Curriculum, \*Parent as a Teacher, Parent Materials

The parent's guide provides information on a home based communication program designed to develop basic communication skills in severely, multiply handicapped children. The guide consists of three sections: an introduction, information on communication training in the home, and a list of resources. Following the brief introduction is a discussion of advantages of parent involvement in the areas of assessment, programming, classroom assistance, and advocacy. Initial reactions of parents to a handicapped child are mentioned, and the availability of resources for the family is considered. Also covered in the first section are implementation of the family involvement program, parent groups, and total family involvement. The communication training section is designed to help parents evaluate their child's current communication system, to make suggestions which will help in selecting appropriate goals for improving the child's communication skills, and to suggest ways of arranging the child's daily environment which may facilitate communication development. Various components of the Comprehensive Communication Curriculum are covered including the caregiver interview; identifying and developing wants and needs; "more" requests; requesting through choice; requesting through symbols (speech, manual sign, communication boards); training the child to initiate interactions; and environmental manipulation to facilitate spontaneous use. Discussed are some activities for developing communication skills at home. The final section, the resource guide, is divided into two sections—first, an alphabetical list, and second, a cross index which categorizes the list into 40 topic areas. Entries include name of the organization/association, address, and telephone number. (SB)

Descriptors—\*Black Youth, Compliance (Legal), Cultural Differences, Culture Fair Tests, \*Disabilities, \*Handicap Identification, Intelligence Tests, \*Student Evaluation, \*Test Bias Identifiers—Education for All Handicapped Children Act

Practical and theoretical issues regarding assessment and treatment alternatives for Black exceptional children are presented, including: problems in the evaluation of assessment practices; a review of critiques of large and small studies on assessment

practices of Black children, with emphasis upon the insights they yield for improved assessment designs; a review of culture fair and bias of intelligence tests; and a discussion of issues unique to assessment requirements of Public Law 94-142, the Education for All Handicapped Children Act. The paper concludes with suggestions for assessment practices of Black exceptional children, such as the inclusion of ancillary personnel in the assessment process and identification of specific educational needs rather than inferred intellectual deficits. Educational Implications of Behavioral Disordered Children's Classifications of Moral, Conventional and Personal Issues.

Pub Date—Apr 81

Note—28p.; Paper presented at the Annual Meeting of the American Educational Research Association (Los Angeles, CA, April 13-17, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Behavior Problems, Classification, Emotional Disturbances, Intermediate Grades, \*Moral Values, Values

To investigate how behavioral disordered (BD) children conceptualize moral, conventional, and personal issues, 20 BD and 22 normal fourth graders were asked to respond to a set of cartoon strips in which actions were depicted that violated either an explicitly stated rule or generally held cultural expectation. Ss were asked to rank the acts from "most wrong" to "least wrong/not wrong," and to supply reasons for the ranking. Ss were then asked to indicate actions depicted that they considered wrong regardless of a governing rule, and finally which of the actions should be considered the person's own business. Results indicated that BD Ss discriminate among actions in the moral, conventional, and personal domains. As expected, BD and normal Ss were more likely to identify moral than conventional or personal acts as wrong in the absence of governing rules. BD Ss judged the seriousness of moral transgressions essentially as normals. Other findings included that BD Ss were less likely than normals to identify personal actions as matters of prerogative and gave different reasons for event classifications. (CL)

Striking a Balance in Educational Aid to the Handicapped: Some Thoughts on General Education and PL 94-142.

Pub Date—[80]

Note—32p.

Pub Type—Guides - Non-Classroom (055) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Administrative Problems, Community Role, Compliance (Legal), Cost Effectiveness, \*Decision Making, \*Disabilities, \*Educational Planning, Models, Needs Assessment, \*Policy Formation, \*Resource Allocation Identifiers—\*Education for All Handicapped Children Act

A social anthropologist suggests that other decision making models besides the consensual one (which assumes that the public behaves in accordance with values and attitudes) should be adopted by education as a result of shrinking resources, and discusses approaches to making decisions resulting from P.L. 94-142, the Education for All Handicapped Children Act. He suggests that planning should be oriented to multiobjective needs of each school district and determined locally rather than formed by distant bureaucratic standards. Needs assessments and cost benefit studies should be undertaken to determine the local payoff for the district, the tradeoffs available to administrators, and the degree of equity achieved to teachers and students. Charts depict steps for assessment of community development, the application of an impact assessment model to local school systems, and tradeoff planning and assessment. (CL)

Descriptors—Behavior Problems, \*Counseling, \*Curriculum Development, \*Enrichment Activities, \*Gifted, \*Inservice Teacher Education, Intermediate Grades, Junior High Schools, Middle Schools, \*Minicourses, Program Development, Program Evaluation, Talent

A model program was developed and implemented for a Middle School population of 129 gifted and talented students in a suburban Philadelphia School System. Administrators, parents, students, regular, and special teachers were involved. The model included a tutorial program for gifted underachievers, a special counseling program for gifted students experiencing disciplinary problems, and specially designed minicourses developed to meet the needs and interests of Middle School gifted students. A program of teacher training in giftedness and education of the gifted was conducted. Avenues of communication were established between gifted program teachers, parents, students, and regular program teachers; and an evaluation was undertaken at two stages of program development. The academic aspects of the model were implemented in a second district secondary school the following year. (Appendices include gifted program student selection standards, teacher inservice training information, gifted students' behavioral system forms, gifted students' tutorial program information, minicourse descriptions, communication examples, a sample individual educational program, field trip information, and all program evaluation questionnaires.) Ten papers focus on aspects of special education in Britain, Canada and Sweden. "The Meaning of Handicap" by J. Bicknell presents a dynamic view of handicaps and discusses the effects of others' reactions to the disabled child. M. Cooley ("A Study of Parental Response to Pre-School Provision for Handicapped Children") reviews a survey that documented widespread use of existing services. Establishment of a college course for 16 year old educationally subnormal school leavers is discussed in "A College Certificate Course for Less Able Students" by R. Case. H. Brayton discusses a similar approach in "An Assessment and Work Preparation Course for Less Able Students." E. Cronk ("Leisure and Recreation Training for the Handicapped: An Assessment of A Canadian Programme") describes a course designed to give disabled persons increased independence in leisure time decisions. H. Huddart presents "An Analysis of Vocational Education for the Handicapped in Sweden." A program designed to help the transition from school to work is described by M. Thomas in "Changing Pattern of Provision for the SSNM Leaver in the Portsmouth Area." Findings of a study conducted on the curriculum needs of slow learners are reported by B. Hancock. R. Wood ("A New Concept in Boarding Provision for the Maladjusted Pupil") describes a residential program for disturbed children. In a final paper, H. Hayhoe asserts that the inclusion of requirements for integration in the 1976 Education Bill may actually be determined for mentally handicapped people. (CL)

Descriptors—\*Aural Learning, \*Deafness, Elementary Education, \*Lateral Dominance, Listening Skills

Cerebral laterality was examined for third, fourth, and fifth grade deaf (N=30) and hearing (N=30) Ss. The experimental task involved the processing of word and picture stimuli presented singly to the right and left visual hemifields. The analyses indicated that deaf children were faster than the hearing children in overall processing efficiency, and that they performed differently in regard to hemispheric lateralization. The deaf children processed the stimuli more efficiently in the right hemisphere, while the hearing children demonstrated a left hemisphere proficiency. This finding is discussed in terms of the hypothesis that cerebral lateralization is influenced by auditory processing. (Author)

Descriptors—Compliance (Legal), Court Litigation, \*Disabilities, Elementary Secondary Education, Evaluation Methods, Federal Legislation, Mild Mental Retardation, \*Minority Groups, \*Sociocultural Patterns, \*Test Bias, Test Interpretation Identifiers—System of Multicultural Pluralistic Assessment, Wechsler Intelligence Scale for Children (Revised)

Issues surrounding the concept of nonbiased assessment, particularly with economically disadvantaged minority students, are analyzed. The legal requirements are focused on thorough discussion of litigation and legislation. The second section explores research on the use of the Wechsler Intelligence Scale for Children-Revised (WISC-R). Research touches on the many definitions of bias, construct validity/content bias, item bias, atmosphere bias, and bias in test use. The author states that conclusions regarding the validity and bias of the WISC-R with minorities vary depending on the definition of bias. A definition is proposed based on the outcomes of test use for the individual. Prerequisites to nonbiased assessment are identified, including good fundamentals and ethical practices, clarification of purpose, and multifaceted assessment. Research on the System of Multicultural Pluralistic Assessment are reviewed, followed by a discussion of assessment of adaptive behavior with mentally retarded persons. Requirements of P.L. 94-142, (the Education for All Handicapped Children Act) that the child's sociocultural background and primary language be taken into account are considered. The continuing problem over defining mild mental retardation is examined. The author concludes by emphasizing the importance of multifaceted assessment and of viewing nonbiased assessment as a process rather than a specific number of instruments. (CL)

Descriptors—\*Adjustment (to Environment), Culture Fair Tests, Educational Testing, Eligibility, Handicap Identification, \*Intelligence Quotient, Intelligence Tests, \*Mild Mental Retardation, \*Sociocultural Patterns, State Standards, Student Evaluation, \*Test Bias, \*Test Norms

Identifiers—Adaptive Behavior Inventory for Children, Iowa, System of Multicultural Pluralistic Assessment

Findings from the Iowa Assessment Project are examined regarding the assessment and use of information on adaptive behavior and sociocultural background in decisions about students with mild mental retardation. Background aspects reviewed include terminology regarding mild retardation; research, litigation, and legislation on the topic during the 1970s; and an analysis of the System of Multicultural Pluralistic Assessment (SOMPA) and the Adaptive Behavior Inventory for Children (ABIC). Scores of 100 White and 100 Black third graders on the Wechsler Intelligence Scale for Children-Revised, the SOMPA, the ABIC, and the SOMPA Sociocultural Measures (SCM) were analyzed. Among findings were that the mean ability (academic aptitude) level among Iowa school age children is significantly above the national population average and the ABIC norms are accurate for Iowa children. Policy implications include justification of higher IQ cutoff score in Iowa than suggested by the American Association on Mental Deficiency; recognition of limitations of the ABIC; and the need for further research on SOMPA SCM validity and reliability. (CL)

Descriptors—\*Adolescents, \*Anxiety, \*Behavior Problems, \*Emotional Disturbances, Interpersonal Relationship, Secondary Education, Stress Variables, \*Student Teacher Relationship, Teacher Attitudes, Teacher Response

Robert Bloom considers the difficulties faced by teachers of disturbed and disruptive adolescents. He depicts common situations in which the teacher experiences anxiety, is unaware of the personal stress and conflict, and reacts in inappropriate ways. Examples portray such reactions as anger at coworkers, envy of the young, and retreat into professional neutrality. Reactions to Bloom's paper include thoughts by William Morse on the built in tension between adults and adolescents, a review by Michael Piersack of the importance of the adolescent feeling acceptance and security, a discussion of remedies by Virginia Rezmierski, and identification of other obstacles to teaching (such as changing federal, state, and local guidelines) by Ann and Thomas Vorhees. Bloom briefly responds to the reaction papers to conclude the discussion. (CL)

Descriptors—\*Diagnostic Teaching, \*Gifted, \*High Achievement, Intermediate Grades, \*Intervention, \*Learning Problems, Program Development, \*Remedial Programs

Identifiers—\*Structure of Intellect

The practicum was designed to identify and remediate the weaknesses in the learning abilities of 26 students in a top homogeneously grouped fourth grade class. Individual strengths and weaknesses for each student were identified by various factors and the 24 subtests of the Structure of the Intellect-Learning Abilities Test (SOI). An educational intervention program to remediate the specific deficiencies was matched to the individual weaknesses. SOI Exercise Sheets and the SOI Sourcebook were included in the curriculum. Evaluation following anticipated attainment for each student in each area of weakness proved successful. Factors which contributed to the success of the program were skillful and regular teaching to the weaknesses, teacher and staff dedication to the improvement of deficiencies, and the comprehensiveness of the intervention program. Appended are tables with statistical data. (Author/SB)

Descriptors—\*Multiple Disabilities, \*Parent Participation, Parent Role, Parent Teacher Cooperation, Preschool Education, Program Descriptions, Program Development, Student Evaluation, \*Visual Impairments

Identifiers—\*Parent as a Teacher, Project ForSight

The manual provides an overview of Project ForSight, a program to assist parents in teaching their preschool multihandicapped, visually impaired children at home. Chapter 1 presents background information and describes procedures for locating, screening, assessing, and programming the children it serves. Also offered are procedures for replicating the program. Chapter 2 reviews the Project's philosophy of homebased early intervention programs, including strategies for determining an appropriate setting for a program, selecting staff, and developing a framework. Emphasis is placed on the importance of parental involvement with the handicapped child and his educational program. Chapter 3 expands upon the philosophy of how he/she views the role of the professional who works with parents in the home. Appendixes contain instructions for using the Vision-Up Curriculum (which is the basis for assessing and programming children served by the project); instructions for using the Parent Needs Inventory (developed to assess the needs and concerns of parents); a listing of books, articles, and audiovisuals that the project considers useful in working with parents of multihandicapped visually impaired children; and sample forms. Descriptors—\*Budgeting, \*Compliance (Legal), \*Disabilities, Elementary Secondary Education, Federal Legislation, \*State Departments of Education, \*State Federal Aid

Identifiers—\*Education for All Handicapped Children Act

The study examined how nine State Departments of Education allocate and manage their P.L. 94-142 (the Education for All Handicapped Children Act) funds. The introduction explains that a single question lies at the core of the study—Should additional or revised procedures concerning the use of program funds be instituted to help states better meet the intent of P.L. 94-142? Section II describes how the nine states allocate their P.L. 94-142 funds and how compatible the program is perceived to be with the states' regular and special education finance formulas. Section III discusses how these nine states manage their P.L. 94-142 programs; and a final section reviews study findings and draws policy implications. Among findings were the following: the nine states sampled allocated their funds consistent with the P.L. 94-142 formula; the most common use of discretionary funds was for grants and contracts to local education agencies and intermediate education agencies; funds were most frequently targeted for vocational special education; the method of allocating discretionary funds varied from state to state; state management of P.L. 94-142 varied and depended on established state procedures and staff; and states, in general, were holding districts accountable for what they, in turn, were being held accountable for by the Office of Special Education. Among implications listed are that states appear to be using discretionary funds to meet state needs and that most states appear to have procedurally complied with P.L. 94-142. (SB)

Identifiers—\*Saint Elizabeths Hospital DC

The author supports the promotion of mental health for deaf individuals through improved and expanded mental health services. To illustrate the psychological, educational, vocational, and social implications of deafness, Chapter 1 presents a profile of the deaf individual with emphasis on the communication barriers which exist at each stage of life. Chapter 2 reviews categories of illness (functional psychoses, neuroses, personality disorders and certain other nonpsychotic mental disorders, psychophysiological disorders, transient situational disturbances, and behavior disorders of childhood and adolescence) and considers the relationship between mental illness and deafness in terms of causes and incidence, difficulties of detection, and occurrence of specific types of illness. A third chapter defines four types of therapies and describes ways in which the treatments are adapted to deaf patients with particular reference to the Mental Health Program for the Deaf (MHPD) at St. Elizabeth's Hospital (Washington, DC). Theory, purpose, and operating procedures are discussed for psychotherapy (individual, group, and family therapy); behavior therapy/modification; activity therapies (self expressive activity therapies, occupational and/or vocational therapies); and somatic therapies (pharmacological and physical therapies). A final chapter focuses on training and research in mental health and deafness with sections on training programs in the MHPD, new directions in academic training programs, and new directions in research. Crawford, Michael E.

Facilitation of Communication Responses through Naturalized Sensory Reinforcement in Blind Mute/Profoundly Retarded Adults.

Pub Date—[80]

Note—35p.

Pub Type—Information Analyses (070) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Adults, Behavior Change, \*Behavior Modification, Blindness, Communication Skills, \*Contingency Management, Language Acquisition, \*Manual Communication, Multiple Disabilities, \*Multisensory Learning, Reinforcement, \*Severe Mental Retardation

The literature on symbolic forms of communication was reviewed, and an experimental program was designed to teach a single set of vocabulary to a group of four institutionalized profoundly retarded blind/mute adults through the use of gestures. Literature about deaf/blind persons suggested the use of coactive movement techniques and facilitation of body image and body schema. Behavior therapy studies supported the use of manual communication with varied contingency and experience variables. Finally, from experimental and behavioral psychology, the use of systematic training and engineered environments seemed appropriate considerations. Three phases were planned within the design: first, an attempt was made to identify reinforcers maintaining self stimulatory behaviors and sensory extinction procedures were then implemented; second, Ss were taught a simple set of vocabulary through the use of gestures in a controlled environment; and third, the adaptation and generalization of high frequency words from the training room to daily situations was facilitated. The teaching strategy involved sensory input, motor output, and reinforcement. Applying the general behavioral principle of reinforcement, Ss learned to respond appropriately after exposure to the teaching strategy and reinforcement contingencies. Among recommendations were the following: although generalization to the living environments was not highly effective, the use of naturalized reinforcers and success encountered in the training room suggest future potentials; greater training success was experienced with receptive object identification concepts than with expressive action related words; and elaboration for future experimental teaching strategies might include discriminating between two objects by touch and signing given a verbal cue. Descriptors—\*Disabilities, \*Driver Education, Equipment, Hearing Impairments, \*Individualized Education Programs, Instructional Materials, Legislation, Partial Vision, Physical Disabilities, Program Development, Secondary Education, Task Analysis, \*Traffic Safety

Identifiers—Assistive Devices, Oklahoma

The booklet provides direction for driver education instructors, special education teachers, and school administrators in the planning and implementing of effective traffic safety education programs for handicapped youth. Section I focuses on understanding state and federal laws with subsections on P. L. 93-112 (the Rehabilitation Act of 1973), P. L. 94-142 (the Education for All Handicapped Children Act), and the Oklahoma Department of Public Safety rules and regulations relative to the medical aspects of driver licensing. Section II on program management addresses instructional delivery systems, special populations, the least restrictive environment, instructional equipment and materials, reimbursement for handicapped students in driver education, length of course, and adults and out of school youth. Developing individualized education programs (IEPs) is the topic of a third section. Section IV considers general objectives for driver education, driving task analysis, additional tasks for the physically handicapped, limited sight and hearing students, behind the wheel instruction, driving simulation for handicapped students, special education assistance, and the physically handicapped. A final section provides information on institutions offering assistance for handicapped drivers, adaptive equipment, and instructional materials. Appendixes include a list of manufacturers of handicapped driver assist devices, a selected bibliography, handicapped insignia and parking certificates information, directions for transfer from wheelchair to car, use of the adapted van, and manual communications for deaf students. Identifiers—Michigan (Bloomfield Hills)

Designed by the Bloomfield Hills (Michigan) multidisciplinary evaluation team, the document suggests procedures and enabling activities to implement the assessment and identification of learning disabled students. Individual sections address five areas (ability, achievement, severe discrepancy, exclusionary clause, and need for special education services) in terms of definitions, discussion, and suggested procedures/ measures for assessment. Following a bibliography (with references on ability, adaptive behavior scales, and achievement) are appended materials which include Michigan special education rules for learning disability, inter/intra test analysis, definitions, standard score conversions, examples of the formula for determining the severe discrepancy level, a general education intervention form, a multidisciplinary evaluation team summary report, and a summary of implementation procedures. Descriptors—\*Child Development, \*Developmental Stages, \*Gifted, Infants, Interpersonal Competence, Language Acquisition, Preschool Education, Psychological Characteristics, Psychology, \*Social Development  
Identifiers—\*Psychosocial Development

The author reviews the literature on infant behaviors in relation to the psychosocial development patterns of gifted children during the first five years of life. Among the milestones discussed are infant crying, smiling, language development, social cognition, and social curiosity. It is pointed out that research data indicates gifted children age 3 to 5 exhibit superior skills on measures of social cognitive abilities and in language development. In regard to the relationship between social cognition and preschool behaviors, progressive play patterns and stability of friendship choices, gifted preschoolers seem to share behavior patterns similar to their non-gifted peers. Thus the trajectory of social growth among gifted preschoolers represents a combination of both divergence and convergence in relation to B. White's "average" developing children. (Author/SB)

Descriptors—Adolescents, \*Career Choice, \*Learning Disabilities, \*Mainstreaming, Secondary Education, \*Student Attitudes, \*Student Placement, Vocational Education, \*Vocational Maturity

The study investigated the extent to which four groups (N=50 in each group) of learning disabled (LD) adolescents differed on career attitudes as related to making a sound career decision. Sa included 50 LD students enrolled in regular secondary classes, 50 LD students enrolled in secondary LD classes, 50 LD students enrolled in secondary vocational training classes, and 50 LD students enrolled in regular secondary classes and receiving additional resource center support beyond that ordinarily provided in regular classes. The attitude scale of the Career Maturity Inventory was used to determine career attitudes. Results suggested that LD adolescents in regular classes were superior to the other groups studied in career attitudes. An additional finding was that significant differences in career attitudes exist in the four LD groups. (Author/SB)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Elementary Secondary Education, \*Learning Disabilities, \*Questioning Techniques, Student Teacher Relationship, Teaching Methods  
Identifiers—\*Interpretation of Pupil Answers

The author discusses the importance of questioning techniques in the instruction of learning disabled students. Factors affecting students' responses to questions are the strengths and weaknesses of the learner and the type and difficulty of the question asked. A systematic method of providing or following up on students answers, termed Interpretation of Pupil Answers (IPA), is explained. Definitions and examples of five types of interpretation related to IPA are given: (1) a positive evaluation in which the student is provided with information about their work that is favorable; (2) a negative evaluation in which the judgment of the student's work is unfavorable; (3) a prompt in which the teacher provides a hint or clue so that the student can arrive at the desired answer; (4) an expand in which the student is asked to give a justification, an explanation, or an example; and (5) a refocus in which the student is

reminded that he/she has only answered part of the question or has overlooked some component of the instructions. It is suggested that it may be necessary to interpret correct as well as incorrect answers and silence, that more than one interpretation-questioning exchange may be necessary, and that teacher silence may be the best policy on occasion. Descriptors—\*Academically Gifted, Achievement Tests, Behavior Rating Scales, \*Discriminant Analysis, Elementary Education, Nonverbal Tests, \*Predictive Validity, \*Screening Tests, Standardized Tests, Student Characteristics, \*Talent Identification

Identifiers—\*Screening Programs

The paper describes the application of discriminant analysis to the identification of academically gifted elementary grade students. The principles of discriminant analysis are explained to provide a weighted profile of scores across predictor variables which are then compared with a criterion measure. An illustration of the method's used with 64 possibly gifted students in Garden City, Kansas, is given. The screening procedure focused on three predictor variables: student standardized achievement test scores, teacher ratings, and student performance and response rates on a series of nonverbal tasks. Additionally, 85 experts in gifted education were asked to indicate the prevalence of specific behaviors in gifted and nongifted children and the relative importance of each characteristic. Experts rated cognitive factors as the best predictors of giftedness. Teachers identified four factors as most predictive of giftedness: creativity, diligence, high level cognition, and criticism of self and others. Among nonverbal tasks found to be predictive were the Maze Tracing Speed Test, the Identical Pictures Test, Addition/Subtraction Test, Story Sequence Test, and Number Comparison Test. A score of 125 or higher on the Wechsler Intelligence Scale for Children-Revised was used as the criterion measure to classify students into gifted and nongifted groups. Use of the method to identify students for individualized testing would have led to a 26% reduction in individual testing time while being 90% accurate in the identification of gifted students. (DB)

Descriptors—Demonstration Programs, Extended Family, Infants, \*Inservice Education, Intervention, \*Mental Retardation, Nuclear Family, \*Parent Education, \*Rural Education, Young Children

Identifiers—\*Family Infant Toddler Project, Tennessee

The paper describes the Family, Infant and Toddler (FIT) Project, designed to provide educational and supportive services to rural middle Tennessee families with young mentally retarded children. Noted are the project background (including sporadic outreach efforts) and conceptual orientation, and an ecological perspective which stresses the role

of both the nuclear and extended family. Project goals include development of a demonstration service program, developing a replicable inservice training program for local professionals, and expanding educational services to young retarded children in rural areas. Program implementation has involved providing screening and evaluation services and a weekly 3 hour educational clinic for 21 children (mean age 17 months) and their parents in three locations. Clinic activities include group parent-child training, individualized parent-child training, home planning, and a parent-family training and discussion group. Additional clinics are offered periodically to involve members of the child's extended family. The inservice training programs for 23 local allied professionals in the three communities involve a 9 month program in 4 week cycles consisting of two half day seminars in the local community, a day of centralized training activities, and a half day practicum locally. The PIT project staff are also using the media to make the public more aware of the needs and resources available for young retarded children and providing technical assistance to local agencies. Continuation of the program through state, local, and private support is seen as evidence for its effectiveness. (DB)

**Special Education Teacher Burnout: A Three Part Investigation.**

Spons Agency—Bowling Green State Univ., Ohio. Pub Date—Apr 81

Note—22p.; Paper presented at the Annual International Convention of The Council for Exceptional Children (59th, New York, NY, April 12-17, 1981, Session A-13).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, Emotional Disturbances, Learning Disabilities, \*Mild Disabilities, Mild Mental Retardation, \*Special Education Teachers, \*Stress Variables, \*Teacher Burnout

The study investigated the frequency and intensity of stress among 135 teachers of educable mentally retarded (EMR), learning disabled (LD), and emotionally disturbed (ED) children and the relationship of stress levels to certain demographic variables including years of experience, grade level, educational background, category of student, age, and sex. In addition, differences among teachers with regard to factors which contribute to stress and factors which help teachers guard against stress were examined. The Maslach Burnout Inventory (MBI) and the Special Teacher Response to Stressors (STRESS) were used to elicit responses from the teachers by mail. The results indicated: (1) male teachers were more depersonalized by their jobs than female teachers; (2) teachers with 4 to 5 years experience (compared to teachers with less experience) and teachers with only a bachelor's degree (compared to those with master's and specialist's degrees) perceived themselves to care frequently and intensely about the needs of their students; and (3) teachers between 26 and 30 years of age perceived themselves to be more depersonalized by their experiences than older teachers. LD and ED teachers cited legal concerns, lack of administrative and peer support, and lack of support services as extremely stressful. ED teachers in particular were fearful of being attacked verbally and physically, and rated their overall job responsibilities as significantly stressful. LD and ED teachers felt that exercise and outdoor programs and confiding in significant others (i.e., wife or husband) were helpful in combating stress. EMR teachers felt peer support was helpful. Descriptors—Adolescents, \*Antisocial Behavior, \*Behavior Change, Children, Cooperation, Elementary Secondary Education, \*Emotional Disturbances, Imitation, Interpersonal Competence, \*Modeling (Psychology), Severe Disabilities, \*Social Adjustment, \*Television Viewing, Videotape Recordings, Withdrawal (Psychology)

The study examined the effectiveness of videotapes showing cooperative prosocial interaction between models on the behavior of 6 female and 14 male severely emotionally disturbed withdrawn children (aged between 9 and 14 years old). An introductory review of the literature considers general modeling theory, variables of the modeling act and their effects on behavior, and classification of modeled behaviors. The study's experimental Ss, paired in same sex dyads, viewed a tape showing two models engaged in verbal and nonverbal cooperative interactive play with marble raceways. Control Ss viewed a tape showing the models playing independently with the raceways. Ss were observed for a 5 minute preintervention and a 10 minute post-intervention period playing with the raceway toys. Results indicated: (1) experimental Ss engaged in more associative and cooperative behaviors than control Ss following the videotape; (2) in particular, experimental Ss demonstrated more prosocial proximal and face to face body movements than did control Ss; (3) experimental Ss used more prosocial language; and (4) experimental Ss did not produce a greater quantity of total language. Descriptors—\*Delivery Systems, Demonstration Programs, \*Disabilities, \*Parent Education, Parent Participation, \*Preschool Education, Program Descriptions, \*Rural Education, Student Educational Objectives

Identifiers—\*Family Infant Toddler Project, \*Regional Intervention Preschoolers Parents, Upper Cumberland Early Intervention

The paper describes the proposed Upper Cumberland Early Intervention Project (UCEIP), a project designed to serve 20 handicapped preschoolers a year over a 3 year period in rural Tennessee. The project involves continuation and expansion of two service delivery models for rural areas and is funded under the Developmental Disability Services Act, 1978. One of the two centers will utilize the Regional Intervention Program for Preschoolers and Parents model which is designed to provide short term (mean length of treatment 8 months) intervention assistance as an alternative to residential programs, and upon termination, to seek the least restrictive learning environment appropriate for the child. Characteristics of the model include parent implementation first with their own children and then in training other parents, modular organization, daily monitoring of child and parent performance, and a resource staff of professional consultants. The other center will utilize the Family, Infant and Toddler Project: Early Intervention with Rural Families with Retarded Children model. The model involves weekly training sessions with children and families who are trained to implement an educational program at home. Short range goals and objectives are set for implementation during a 3 month period of observation and discussion with parents at which time long term educational goals are established in the following domains: gross motor development, personal social skills, hearing and speech skills, nonverbal communications, eye-hand coordination skills, manipulation skills, cognition skills, and verbal and gestural imitation skills. Both models were originally funded through the Handicapped Children's Early Education Program and UCEIP will provide temporary funding while local funding, administrative, and transportation procedures are being established. Identifiers—\*Brain Research

The study investigated the possible correlations between brain growth stages and creative art work through the evaluation of 549 samples of children's art by children in grades K through 6. The absence of a valid instrument led to the development by the investigator of a criterion referenced rating scale for evaluation of the art work. The data clearly indicated an observable relationship between achievement in the visual arts and H. Epstein's brain growth periods. Children in brain growth spurt periods achieved higher scores than children in plateau periods. The data indicated a sharp drop in creative achievement in kindergarten and fourth grade, both of which occur during a plateau period as defined by Epstein. Appended are the detailed scoring results of the three judges. (Author/DB)

Descriptors—\*Cross Cultural Training, \*Cultural Differences, \*Disabilities, Elementary Secondary Education, \*Handicap Identification, \*Inservice Teacher Education, Language Handicaps, Linguistics, Special Education, \*Teacher Attitudes

Identifiers—\*Limited English Speaking, Montgomery County Public Schools MD

The paper discusses principles of a Montgomery County (Maryland) program to train regular teachers in approaches to cross cultural assessment. The program originated because of overreferral of limited English proficient (LEP) students for special education evaluation and placement. The program stresses four major areas: (1) changing the teacher's attitude toward students who are bilingual and/or speak with different intonation/structural patterns through knowledge of applied and sociolinguistics; (2) helping the teacher acquire skills in distinguishing between "normal" and interference patterns and true language disabilities; (3) offering the teacher insights into the reading problems of linguistically different students; and (4) offering the teacher insights into linguistic problems of the LEP student which interfere with test taking. The county also stresses linkages between special education and English as a Second Language/Bilingual Programs which have helped LEP teachers identify potentially handicapped students and special education teachers understand linguistic and cultural differences which can account for "temporary" handicaps in LEP students. Descriptors—\*Black Youth, Case Studies, Elementary Education, Home Instruction, \*Learning Problems, \*Low Income Groups, \*Mild Disabilities, Paraprofessional Personnel, \*Parent Education, Preschool Education, \*Tutoring

The panel presentation includes three papers de-

scribing the development and implementation of two parent oriented intervention programs currently serving low income Black families in Kansas City, Kansas. Both programs are home based and utilize trained community paraprofessionals as parent trainers. One program trains parents of preschool physically and mentally handicapped children to teach their children new skills. A home visitor from the community acts as parent, trainer, and advocate. The second program teaches parents in a single session to tutor their elementary school aged children who are at least one grade level behind in academic areas. The first paper gives an overview of both programs while the two remaining papers provide detailed case studies of the use of the program with a slow learning speech handicapped 6 year old, a mentally retarded 7 year old, a fourth grade student failing in spelling, and a 6 year old having difficulty with math facts. Descriptors—Compliance (Legal), \*Cultural Differences, \*Disabilities, Elementary Secondary Education, \*Handicap Identification, Minority Groups, \*Multicultural Education, \*Nondiscriminatory Education, \*Student Evaluation, Test Bias

Identifiers—\*System of Multicultural Pluralistic Assessment

The paper describes the System of Multicultural Pluralistic Assessment (SOMPA), a method of meeting the nondiscriminatory assessment requirements of P.L. 94-142 (the Education for All Handicapped Children Act). The need for nondiscriminatory assessment and types of nondiscriminatory tests (such as culture fair, culture specific, and Piagetian tasks) are briefly described. Basic purposes of SOMPA (such as reducing stigmatization and fostering multicultural education) are noted as are SOMPA assumptions (such as the equivalent value of all cultures). SOMPA is described as being composed of three assessment models: (1) the medical model which attempts to screen for biological anomalies and includes measures of physical dexterity, vision/auditory acuity, and health history; (2) the social systems model which evaluates whether the child is meeting social norms of his/her own group and includes such measures as the Adaptive Behavior Inventory for Children with scoring based on cultural group norms; and (3) the pluralistic model which determines learning potential and uses the Social Cultural Scales and the Wechsler Intelligence Scale for Children-Revised with scores interpreted using social-cultural norms. The assessment procedure and suggested division of labor on assessment teams are outlined. The text of federal regulations pertaining to nondiscriminatory assessment is provided. The paper concludes with consideration of conceptual and statistical criticisms of SOMPA including the large numbers of students declassified as handicapped when it is used and problems of determining predictive validity. Identifiers—\*Education for All Handicapped Children Act, \*Pacific Trust Territories

Problems facing the Pacific Basin Territories' attempt to implement P.L. 94-142, the Education for All Handicapped Children Act, include lack of felt need for services to mildly handicapped students, lack of accommodation for cultural values in the law, and confused communications concerning the development of special education. Further difficulties directly related to cultural values are encountered in the identification/assessment mandate, the process of planning individualized educational programs, placement and services, and personnel preparation. Encouraging trends have included funding of a successful technical assistance project, development of special education degree programs in Guam and Micronesia, and an effective approach to inservice training in American Samoa. Identifiers—University of Nebraska Lincoln

The development of the Mainstream Curriculum Integration Model at the University of Nebraska-Lincoln, designed to prepare regular educators to deal with handicapped children, is chronicled. Faculty is explained to have identified 10 content areas (including awareness and attitudes, litigation and legislation, and classroom and student behavior management) and to have delineated specific objectives within the clusters. Examples of ways in which the curriculum has been integrated into specific courses (such as Fundamentals of Development for Education) as well as the program for students in elementary education (including exposure to a mainstreamed setting in student teaching) and educational administration. Procedures for continuing the approach after termination of project funding are noted, as are efforts to monitor the program's effectiveness. (CL)

Descriptors—\*Disabilities, \*Handicap Identification, \*Intervention, Models, \*Preschool Education, Program Descriptions

Identifiers—Ontario (London)

Problems in and guidelines for developing an early identification/intervention program for handicapped students are discussed. The author cautions that appropriate education should first be based upon the child's learning process, and that ongoing review should replace single stage identification procedures. Problems are listed for consideration in the areas of basic medical/social data, labeling, resources, and interventions. The early identification model currently used in London (Ontario) is reviewed and its apparent effectiveness noted. Sample forms used in London are included. (CL)

Low Elevated Lead Levels and Mental Retardation.

Pub Date—Apr 81

Note—18p.; Paper presented at the Annual International Convention of The Council for Exceptional Children (59th, New York, NY, April 12-17, 1981, Session B-4).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, \*Environmental Influences, \*Lead Poisoning, \*Mild Mental Retardation, \*Rural Areas, \*Rural Youth

The relationship between low elevated lead absorption and mild mental retardation was investigated in 40 rural children (preschool to grade 12) without demonstrable cause for their retardation. Trace mineral analysis of hair samples from Ss and a control group (N=20) indicated the mean hair lead concentrations for the retarded Ss were considerably higher than those of control Ss. Potential sources of lead included deteriorating paint chips, illicitly distilled whiskey, and exposure through fertilizers and pesticides containing lead. (CL)

Descriptors—\*Disabilities, \*Handicap Identification, Preschool Education, Program Descriptions, \*Screening Tests, Student Evaluation, Young Children

Identifiers—\*Child Find, New Jersey, \*Screening Programs

The paper describes the New Jersey Child Find project, a program to locate and identify all unserved handicapped children between the ages of 0 and 21 years. Noted are four project objectives (such as conducting community awareness campaigns), background of the project (including early efforts to identify handicapped children as a result of a rubella epidemic in the 1960s, and requirements of federal legislation. Community awareness activities including a yearly statewide media campaign, a "Child Find How-To" kit for local schools, and an information and referral hotline for identification of children with suspected handicaps are summarized. The screening program includes screening of speech/language, vision, motor, and hearing conducted by trained Child Study Team members and a manual for screening preschool children. Assess-

ment of children referred through the screening process involves evaluation of the cognitive, language, and social/personal development of each handicapped preschooler. Briefly noted are program placement after assessment and interagency collaboration to reduce duplication and delay in delivery of services. Appendixes include the Child Find How-To Kit, guidelines for Project Child Find intake and screening, the manual on screening children ages 3 to 5, and guidelines for Project Child Find assessment. Casterlow, Ingrid E.

Enhancing Parental Effectiveness.

Pub Date—Feb 81

Note—10p.; Paper presented at The Council for Exceptional Children Conference on The Exceptional Black Child (New Orleans, LA, February 15-17, 1981, Session T-12).

Pub Type—Speeches/Meeting Papers (150)—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Disabilities, \*Minority Groups, Parent Education, \*Parent Participation, \*Parent Teacher Conferences, \*Parent Teacher Cooperation, Workshops

Teachers of minority handicapped children can enhance their relationship with parents by understanding that parents cannot be forced to participate and that the teacher cannot expect to have the same authority with parents as with children. It is important for teachers to begin parent training programs with high success activities, focus on individual parental needs, identify areas of parent proficiency, and establish criteria for evaluating program success. Parent participation may take the form of such actions as applying teaching procedures in the home with and without the assistance of a teacher and exchanging ideas and teaching skills at informal functions. Procedures for enhancing parental effectiveness begins before the start of school and extends through ongoing discussions, conferences regarding the child's individualized educational program, and workshops in which parents can help construct materials. Descriptors—\*Gifted, Intermediate Grades, \*Reading Attitudes, \*Reading Habits, \*Reading Interests, \*Recreational Reading, Sex Differences, \*Student Attitudes

Identifiers—Missouri

The study examined the reading interests, attitudes, and habits of fourth, fifth, and sixth grade gifted students. The data were gathered from the 69 state assisted gifted programs in Missouri by means of a survey developed by the investigator. The Ss were limited to the fourth, fifth, and sixth grade gifted children whose program coordinators participated in the study. The data gathered from the 19 program respondents were analyzed in terms of means, standard deviations, and cumulative percentages. The analysis of data indicated that gifted children had a highly positive attitude toward reading. The data also revealed that the favorite reading interests of gifted children were comedy, mysteries, adventure, myths and legends, and stories about boys and girls their own age. However, the data compiled on reading habits indicated many differences related to the sex of the reader. Various form letters, the survey, and statistical analyses are appended. (Author)

Descriptors—\*Community Programs, \*Delivery Systems, Demonstration Programs, \*Disabilities, Family Problems, \*Family Programs, Program Descriptions

The document provides summaries of 53 programs from around the country demonstrating innovative approaches to identifying needs and developing and delivering services and materials to families. Chapters are organized according to broad themes which underlie their programs' design. Chapter 1 (10 programs) examines programs which explore informal service approaches and the use of natural support systems. Chapter 2 (16 programs) concerns programs which focus on particular groups' needs. Among these are children of families in crisis, hospitalized children, retarded children, persons with multiple sclerosis, children with spina bifida, and single parent families. Chapter 3 (11 programs) focuses on programs which address issues of the parent-child relationship. The last chapter (16 programs) describes programs which seek to help the family develop as a strong adaptable unit. Program descriptions include program name, address, contact person and phone number, source of nomination, and a several hundred word description. A subject index to the programs is also provided. The instructor's manual for an inservice training program for teachers concerned with handicapped children is in two volumes comprising 42 modules in five sections: awareness of exceptionality, diagnosis and assessment, methods and materials, classroom management and organization, and use of resources. Each module is introduced by a color coded page which lists module title, objective, time required for the presentation (usually 30 minutes), equipment needed, materials to be duplicated, packet contents, and resources and references. Modules typically include an overview, information on any precession arrangements, detailed paraphrasing of the instructor's presentation, and sample handouts and transparencies. Sample modules include the following: simulations of test anxiety, hearing impairment, mental retardation, and or-

thopedic handicaps; matching reader ability and text through use of the cloze procedure; matching job duties and learner profiles; analyzing instructional materials; procedures for simplifying written communication; using the textbook as a learning tool; special considerations of hearing impairment, learning disabilities, and behavior disorders; motivational deficiency and positive reinforcement; constructive confrontations in the classroom; individualizing instruction; techniques for interaction such as recognizing feelings and clarifying issues; time management; instructional resources available in the school; and community resources. A final module consists of a followup sharing session by participants. A chart shows the scope and recommended sequences of all the inservice training models. (DB)

Descriptors—Administrator Attitudes, \*Educational Philosophy, Elementary Secondary Education, \*Gifted, Needs Assessment, \*School Districts, State Surveys, Teacher Attitudes

Identifiers—\*Missouri

To poll the facilities of Missouri's gifted programs to gather data concerning the programs and the philosophies of those who conduct them, a survey instrument mainly using a Likert scale was developed and mailed to an administrator, a classroom teacher, and a gifted resource room teacher from each of the sixty-nine districts receiving state aid for their gifted programs. The information from the surveys was tabulated by computer and yielded frequency data in terms of means, standard deviations, and cumulative percentages. The conclusions drawn were that there is no one best program for all gifted children, that each district must plan its program according to its needs, and that a committee formed to develop a program philosophy is an initial step. In addition, strong inservice programs to train teachers of the gifted, and university degree programs in gifted education are urgently needed in Missouri. (Author)

Descriptors—\*Disabilities, Educational Diagnosis, Educational Needs, \*Knowledge Level, \*Measurement Techniques, \*Special Education Teachers, \*Student Evaluation, Test Interpretation

Two studies were carried out to determine proficiency of special education teacher diagnosticians (N=95 and 39) in knowledge and application of basic measurement concepts (including reliability, validity, norms, criterion referenced interpretations, measures of central tendency and variability, and interpretive aids). Findings showed that both groups scored lower than college students in an introductory measurement course and achieved correct total score responses of 50% and 44% (100% maximum). Results suggested that the educational diagnosticians needed training in basic measurement concepts essential for appropriate test interpretations and decision making about identification and placement. Identifiers—\*Program to Develop Efficiency Visual Functioning

The final report describes a project to facilitate the efficiency with which legally blind persons use their remaining vision. The project developed a diagnostic assessment procedure, a design for instruction which includes 150 sequenced lessons, and a sourcebook on low vision. The reliability and validity of the diagnostic assessment procedure were evaluated with 112 legally blind students. Reliability and content validity were found to be high, but some questions existed about the test's construct validity. The entire program was field tested by 11 teachers of legally blind students who responded to questionnaires on the kit's effectiveness and on each specific component. A number of problems in the materials were identified and corrected, resulting in the final version, Program to Develop Efficiency in Visual Functioning. (CL)

Identifiers—\*Parent as a Teacher, Parent Materials

Intended for parents, the booklet focuses on the speech and language development of children with language delays. The following topics are among those considered: the parent's role in the initial diagnosis of deafness, intellectual handicap, and neurological difficulties; diagnoses and single causes of difficulty with speech; what to say to professionals and neighbors; significant behaviors of a language disordered child; preliminary exercises for developing speech; expressive language; articulation problems; and children with special language problems (stuttering, cleft palate, cerebral palsy, mental retardation, and emotional disturbance). A final section

touches upon relationships with other children and adults. (CL)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—\*Adjustment (to Environment), Demography, \*Family Characteristics, \*Family Involvement, Family Relationship, \*Mental Retardation, \*Planning, Residential Programs

The paper explores the relationship between 330 families' adaptations to their mentally retarded children and the manner in which parents plan for future residential and vocational opportunities. B. Farber's theory of minimal family adaptation is tested to see whether family characteristics (such as demographics and family career), child's characteristics (such as severity of the disability, sex, and age), and the family's involvement in informal and formal social networks affects parents' planning. A literature review applies the concepts of family career and individual life cycles to families with mentally retarded children as they plan for future services. Forward stepwise regression analyses were performed on data gathered from a mail survey questionnaire of 330 parents of mentally retarded children from birth to 21 years old. In general, strong support was found for Farber's theory of minimal adaptation. The strongest predictors of parents' planning were family career, child's characteristics, and community support. Family demographics were found to be the least significant predictors. (Author)

Descriptors—\*Child Abuse, \*Child Neglect, \*Clinical Diagnosis, \*Definitions, \*Family Characteristics, \*Intervention, \*Mass Media, \*Policy Formation, \*Prevention, \*Publicity

A series of four documents address the definition and identification of child abuse and neglect. In the first, which is designed for professionals, a historical review is followed by discussion of clinical and social evidence of abuse. Resources for managing child abuse are described, and personnel functions are outlined. The second document, intended for nurses, midwives, social workers, teachers, and parents, defines child abuse and discusses indications for traumatic and nontraumatic pathology. Characteristics of parents and children at risk are outlined. Examples of intervention and prevention are described. The final document, designed for policy makers, charts physical and behavioral indicators of child abuse and neglect, considers characteristics of neglectful and abusive parents, and addresses effective treatment and prevention approaches. Among six policy needs are for an agreed upon definition and for a system of reporting suspected abuse and neglect. The final document addresses the role of the mass media specialist in increasing public awareness of child abuse and neglect. (CL)

Pub Type—Guides - Non-Classroom (055) — Collected Works - Serials (022)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—\*Disabilities, Early Childhood Education, \*Handicap Identification, \*Mainstreaming, \*Mass Media, \*Prevention, \*Publicity, \*Screening Tests, \*Social Attitudes

Four documents, intended for specific audiences, touch on screening and social integration of handicapped children. The first, for policy makers, reviews classification categories and describes early detection devices and prevention measures. Policy implications of integration within families, communities, and schools are considered. The second document, intended for nurses, midwives, social workers, teachers, and parents, defines disability conditions and provides a simple checklist for screening. Social integration and mainstreaming provisions are discussed. The third document, for academic level workers and professionals, covers the role of screening in medical practice, primary prevention, and screening in early childhood. Support needed by families in order to take advantage of social integration is discussed. The final document covers the subjects of screening and social integration for mass media specialists. (CL)

Intended primarily for persons or agencies responsible for providing training to professionals and interested citizens involved in delivery of services to abusive and neglectful families, the manual addresses the importance of training in the identification, reporting, diagnosis, treatment, and prevention of child abuse and neglect. Chapters focus on the following topics (sample subtopics in parentheses): why training in the prevention and treatment of child abuse and neglect is vital (mandatory report-

ing, professional responsibility, and benefit to families in stress); when training should be conducted (preservice training, inservice training, and continuing education); who should be trained (reaching all levels, interdisciplinary training, and using the existing structure); who should train (screening the trainer, employing a multidisciplinary approach, and sources of trainers); the training program design (content, structure, evaluation, and cost); and training resources (staff, materials, and funding). Among the eight appendixes are federal standards applicable to training, a listing of physical and behavioral indicators of child abuse and neglect, and suggested training techniques. (DB)

Identifiers—Sweden

Preliminary results of an ongoing investigation of the effects of regular school placement on hearing impaired children in Skane, Sweden, are reported. A pilot survey of about 20 pupils, their parents, teachers, and headmasters was conducted for the purpose of developing a questionnaire. Questionnaires were sent to parents, teachers, and headmasters. Pupils have been interviewed. Initial observations include the following: (1) owing to poor acoustics, many pupils seem more disturbed than helped by audiological equipment; (2) teaching situations in which the hearing impaired pupil cannot hear what classmates are saying are accepted as a matter of course; (3) hearing impaired pupils frequently have to carry a teacher's microphone and other bulky equipment from one classroom to another; and (4) insufficient attention has been paid to the problems of pupils with one-sided deafness, who do not usually wear hearing aids. The project is currently involved in observations, combined with videorecordings of the school situation of a limited number of pupils and a follow-up of pupils who have discontinued or concluded their schooling and of a limited number of

hearing impaired adults. (DB)

Identifiers—Washington

The curriculum guide for special education students is intended to serve as a supplement to the Washington 1980 State Traffic Safety Education Curriculum Guide. The guide is also correlated with two popular traffic safety texts. Each of the 21 modules contains a goal statement, a list of vocabulary words that might be difficult, a check sheet that lists requirements for both the special education teacher and the traffic safety teacher, samples of any materials or worksheets, and a module evaluation section. Modules are concerned with the following areas: introduction to traffic safety, preparing and controlling the vehicle, maneuvering in limited space; intersections; traffic flow; lane changes; passing; critical driving tasks; vehicle malfunctions and breakdowns; city and freeway environments; obtaining your driver's licence; signs, signals, and pavement markings; human functions—defensive driving; roadway variations; limited visibility and lessened traction; special driving conditions; vehicle characteristics, motorcycle awareness; nonmotorized traffic; internal and physical factors, alcohol and other drugs; vehicle maintenance; planning for travel; legal and postcrash responsibilities; and individual responsibilities and opportunities, fuel conservation, and system improvement. Also included is a pre/posttest. (DB)

Descriptors—\*Cost Effectiveness, \*Disabilities, \*National Surveys, \*Program Costs, \*Special Education

The document contains the data files created by a Rand Corporation study on the cost of special education based on information from a 1977-78 national survey of 50 local education agencies in 14 states. The project objective is to improve decision-making on special education programming and finance by providing information on the services provided and the costs of alternative types of educational placements for children of different ages and with various types of handicap. The study includes data needed to calculate both (1) the relative cost of special education in relation to general education and (2) the absolute cost of special education measured in terms of the actual resources devoted to a handicapped child. Included are: documentation of teacher interview data, documentation of the related services data file, and documentation of the district data file. Appended are codesheets for each of these categories. Analyses of the data will be provided in subsequent Rand reports. (DB)

Identifiers—Montana

The manual is intended for use in training institutes for persons providing respite care for families of children with developmental disabilities in Montana. Expectations for participants and objectives for training are outlined in preliminary sections. Each chapter contains a brief statement of the chapter's main point or points, a selected bibliography, and a discussion. Topics covered include normalization, the developmental approach, basic rights of the disabled, nature of developmental disabilities, language and communication, behavior management, basic needs of the disabled child, programming activities, and general medical problems. Also included throughout the manual are instructions for lifting and carrying the child; suggested methods of dressing and undressing, special adaptations for the blind; suggested recordkeeping form; a seizure report; a medication administration record; and a medication glossary including common abbreviations used in administration of medications. A brief description of the Developmental Disabilities Training Institute concludes the manual. (DB)

Descriptors—\*Definitions, \*Disabilities, \*Educational Policy, Elementary Secondary Education, \*Inservice Teacher Education, \*Mainstreaming, \*Student Placement

Identifiers—Education for All Handicapped Children Act

The policy interpretation paper was developed in cooperation with the National Inservice Network and involved an examination of all existing federal policy as well as background federal materials that directly or indirectly affect the issue of regular educator responsibilities for handicapped children as related to inservice education efforts under P.L. 94-142, the Education for All Handicapped Children Act. The discussion centers on the following issues: the definition of a handicapped child, definitions of special education and related services, the definition of the least restrictive environment, the definition of supplementary aids and services, existing federal regular education inservice policy, and the suggested contents of regular education inservice

programs. It is concluded that placement in a regular class is only appropriate when the handicapped child can learn from the instruction that most skilled regular educators can provide, with assistance as needed from support personnel as well as other aids and services. Proper evaluation and placement procedures, supplementary aids and services, and regular inservice education are seen to lead to appropriate and least restrictive placement for handicapped students. Movement Based Language: The Van Dijk Model.

Pub Date—May 79

Note—10p.; Paper presented at the Regional Workshop of the Southeast Regional Center for Deaf-Blind Children (Nashville, TN, May 6-9, 1979).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Cognitive Development, Communication (Thought Transfer), \*Deaf Blind, \*Developmental Stages, \*Language Acquisition, \*Parent Child Relationship, Psychomotor Skills

The paper examines the development of language in the deaf blind child with emphasis on the child's motoric behavior and imitation as the initial step in language acquisition. Discussed are the following early developmental stages: symbiotic (the close physical and emotional identification of child with the mother to be or new mother); resonance (in which the child responds physically to stimulation); and nonrepresentational reference (in which the child learns to identify important objects such as parts of his body). Coactive movement (in which the child and adult explore the child's environment together) should lead to imitation of motoric action and conceptualization. The use of natural gestures by the adult to reinforce communication efforts should lead to use of an arbitrary language system including speech, fingerspelling, reading, and writing. (DB)

The proceedings of a 1979 Missouri symposium on doctoral programs in special education includes the texts of major addresses and position papers as well as summaries of conclusions of small working groups. The keynote speech by R. Erdman was entitled "Higher Education in the 1980's: Implications for Doctoral Programming." The speech deals with futuristic considerations for the generic field of higher education and implications on doctoral programs in special education. The working groups produced chapters concerned with the following areas (sample recommendations in parentheses): considerations for doctoral programming (the need for formalized recruiting procedures and providing practicum experiences); continuing education for doctoral faculty (establishment of criteria for faculty advisors of doctoral candidates and development of a model for continuing education); student rights (recognition of the right of doctoral students to take an active role in planning their doctoral programs); and future support for doctoral programs in special education (encouragement of national needs assessment surveys and national guidelines or accreditation standards). The seven position papers have the following titles and authors: "Considerations for the Evaluation of Doctoral Programs" (E. Meyen); "Expected Generic Competencies of Future Gradu-

ates of Special Education Doctoral Programs" (M. Lilly); "Anticipated New Job Roles in Special Education—Implications for Doctoral Programs" (J. Melcher); "Continuing Education Needs of Doctoral Advisors in Special Education" (V. Hardin); "Research Training and Experience in Special Education Doctoral Programs" (H. Prehm); "Doctoral Practice—What, Why, How" (J. Paul); and "One SEA Professional's View on Preparing Leaders to Work in Special Education Settings—Implications for Doctoral Programs" (N. Wusterbarth). Descriptors—\*Accessibility (for Disabled), Diabetes, Epilepsy, Hearing Impairments, \*Physical Disabilities, Secondary Education, Student Evaluation, Teaching Methods, Visual Impairments, \*Vocational Education

Identifiers—Illinois

Intended to assist Illinois educational personnel to provide vocational education services for students with physical disabilities, the handbook's eight sections focus on program and facility modification to accommodate physically disabled students in regular vocational education programs. Section I introduces the topic, provides an historical perspective, and describes the "Accessibility Decision Making" model. Section II describes specific disabling conditions: hearing and vision disabilities, disabilities of the nervous system, musculoskeletal disabilities, other health disabilities, and multiple disabilities. Section III, on assessment of the physically disabled student, considers teacher made assessment instruments and assessment by interview and observation. The next three sections offer specific guidelines and diagrams for accessibility to school buildings, vocational labs, and equipment. Section VII provides suggested techniques for teaching physically disabled students with hearing disabilities, visual disabilities, orthopedic disabilities, and consciousness disabilities (usually epilepsy and diabetes). The final section provides a listing of resources including materials in print; organizations; equipment suppliers; Illinois agencies (concerned with vocational education, special education, and rehabilitative services); and funding sources. Also included is a booklet containing a condensed version of the Accessibility Standards developed by the Capital Development Board under Public Act 79-978, "Facilities for the Handicapped Act". EDRS Price - MF01/PC16 Plus Postage.

Descriptors—\*Disabilities, Elementary Secondary Education, \*Group Activities, Individualized Education Programs, Legislation, Parent Education, Parent School Relationship, \*Parent Teacher Cooperation, \*Program Development

Identifiers—Arkansas

The resource guide is intended to assist local Arkansas school districts to establish a program for improving the parent educator partnership in planning and implementing appropriate educational programs for handicapped students. The guide should be used in conjunction with a needs assessment of parents and educators to identify appropriate topics. Program planners would then refer to the section of the resource guide corresponding with the need and select appropriate activities from that section. The first section contains resources and suggested activities necessary for a public awareness campaign. Sections 2 through 5 provide information to topics such as laws affecting the handicapped, characteristics of handicapping conditions, preparation of parents and educators to function as a team, and development of the individualized education program. One major activity is provided in each section followed by several supplemental activities. The appendix contains such items as a parent educator dictionary, a parent involvement bibliography, a listing of organizations for parents of the handicapped, and a sample program planning form. Also contained are a booklet offering practical advice to parents on special education, several Arkansas brochures for parents, and a listing of Arkansas organizations for handicapped students. (DB)

Identifiers—Texas (Flour Bluff)

The resource guide for regular teachers provides policies and procedures of the Flour Bluff (Texas) school district regarding special education of handicapped students. Individual sections provide guidelines for the following areas: the referral process; individual assessment; participation on student evaluation and placement committee; special education placement; the individualized educational plan; special education programs and services (including direction, diagnostic, instructional, and related services); program and/or related service review; suspension from school; and dismissal from special education. Additional reference material includes brief descriptions of assessment tests arranged by area assessed, definitions of handicapping conditions, a statement on parent and handicapped students' rights, abbreviations for special education terms, and eligibility codes. Descriptors—\*Board of Education Policy, \*Disabilities, \*Educational Media, Elementary Secondary Education, Guidelines, \*Instructional Materials, \*Learning Resources Centers, School Districts, Special Education

Identifiers—Texas (Flour Bluff)

The guide to the Special Education Resource System (SERS) of the Flour Bluff (Texas) school system contains policies and procedures regarding organization, services, and process of the system. Noted is the SERS purpose of providing information and access to appropriate instructional media and materials for special education personnel. Briefly considered are the annual SERS needs assessment and SERS organization (including responsibilities of the Director of Special Education or his representative, special education teachers, and SERS advisory groups). SERS services are itemized and include loan of instructional items, training activities, a centralized catalog system, an information retrieval program, information dissemination, and demonstration of instructional equipment and materials. Specific procedures concerned with such aspects as eligible users, ordering materials, loan of materials, purging, receipt of materials, and the information retrieval system are explained. Policy regarding access to other resources including textbooks for special education, materials for the visually handicapped, and technical assistance is summarized. A reference section includes suggested criteria for the selection of instructional materials, an "Analysis of Instructional Material" form and suggestions for its completion, a requisition form, a materials inventory sheet, and a subject code guide. Descriptors—\*Bilingualism, Case Studies, Children, \*Developmental Disabilities, \*Language Acquisition, Literature Reviews, Spanish Speaking

Assessment and educational programing for linguistically different children who are also experiencing developmental disability is complicated by a number of controversial issues, including lack of developmental data on the course of bilingual language acquisition and the problem of differentiating between a language disorder and linguistic interference. A brief review of research on Spanish/English developmental bilingualism is provided, followed by illustrations of individual linguistic abilities in three bilingual children experiencing developmental problems. It is concluded that research does not support the notion of a linguistic delay due to child bilingualism. The three case studies of three boys (aged 4 1/2, 8, and 9 years) indicate that bilingual proficiency cannot be considered beyond the grasp of a developmentally disabled child. (Author/DB)

Performance Based Teacher Training-It Really Works.

Pub Date—Feb 81

Note—61p; Paper presented at the Meeting of the American Association of Colleges for Teacher Education (Detroit, MI, February 17-20, 1981). Best copy available.

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—\*Competency Based Teacher Education, \*Disabilities, Higher Education, Program Descriptions, \*Special Education Teachers, \*Teaching Skills

Identifiers—\*University of Northern Iowa

An operational, noncategorical, performance based teacher education program for the preparation of teachers of the handicapped at the Department of Special Education, University of Northern Iowa is described in the text of a panel presentation. Panel members address historical perspectives of the training program, key features of the program, supervision and evaluation of trainees, and perspectives of a school administrator. A major portion of the paper consists of the specific performance criteria for the four major components of the educational process (assessment procedures, programing designs, instructional strategies, and evaluation techniques). Also included are figures which compare the current performance based training program with traditional programs, list philosophical axioms of the program, and chart the sequence and staff organization of the program. Current Mental Retardation Research in the Soviet Union.

Pub Date—Mar 81

Note—18p; Paper presented at the Meeting of the EERA Convention (Philadelphia, PA, March, 1981).

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Associative Learning, Emotional Development, Foreign Countries, Genetics, \*Learning Processes, Literature Reviews, Memory, Mental Retardation, Metabolism, Neurology, Problem Solving, Research Methodology, \*Severe Mental Retardation, Theories

Identifiers—\*USSR

The paper consists of a review of 24 studies on mental retardation published in two Soviet journals between 1970 and 1980. An introductory section focuses on the theoretical framework for mental retardation research in the Soviet Union with a differentiation between oligophrenics (who have organic brain damage) and the intellectually backward (or mildly retarded). The studies are grouped as follows: those dealing with physical or neurological

issues; genetic or metabolic aspects; memory, learning, and problem solving skills; and emotional/affective factors. It is noted that 10 of the studies are descriptive, nine experimental, and only five correlational. Findings which confirm experimental results in the United States include the following: a higher incidence of males than females among oligophrenic and seriously emotionally disturbed children, a higher percentage of oligophrenic mothers than fathers among children who are oligophrenic, and the presence of an associative clustering defect among oligophrenics. Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Captions, \*Deafness, Editing, Guidelines, Material Development, \*Readability, \*Reading Materials, \*Syntax, \*Vocabulary

Identifiers—\*Inference

Developed by the Multi-level Captioning Project, the manual provides guidelines for linguistically controlling reading materials for the deaf. An introduction describes the three proposed reading levels based on difficulty of vocabulary, syntax, and inference. Chapter 1, on vocabulary, considers word list sources, guidelines for controlling vocabulary, strategies for handling difficult vocabulary, and ways to define words in captioned materials. The second, and major chapter, by R. Wilbur is on syntax and includes the research basis for the syntax guidelines, approaches to language analysis, and the theoretical foundation of the guidelines. Most of the chapter consists of the specific guidelines concerned with such syntactical structures as determiners; demonstratives and adjectives; verbs and auxiliaries; prepositions, particles, and prepositional adverbs; negatives; questions; comparatives and superlatives; and relative clauses. A chart provides an overview of the syntactical guidelines for common relational words. The third chapter, by K. Wilson, is on inference and includes sections on the role of inference in language comprehension, categories of inference, an example of the use of inference, a perspective on the inferential process, deaf children's inferential abilities, and the guidelines for editing inferential material. The final chapter, by N. Decker, is on application of the guidelines and considers the editing and evaluation of news reports, basal readers and trade books, documents and instructions, and television scripts. (DB)

Identifiers—\*Alaska, \*Project TEACH

The final report of project TEACH, a project to identify and serve handicapped infants and preschoolers in Alaska, presents the program accomplishments organized by specific objectives within five major goals. The five goals are as follows (sample accomplishments within parentheses): to stimulate infant learning to the fullest extent (25 of 27 enrolled children are currently receiving services); to improve the parenting skills of the parents of children enrolled in TEACH (most parents successfully taught most of the assigned skills to their children); to establish programs to serve children in isolated communities of Central Alaska (18 referrals were received from remote villages); to coordinate

services to young handicapped children (evaluation staffings were attended by representatives of nine different community agencies or services); and to provide opportunities for professional development for TEACH staff (weekly interdisciplinary meetings of staff were held). Charts detail program accomplishments. It is noted that continuation funding from the state of Alaska has been procured. (DB)

Assessing and Developing Cognitive Skills in Handicapped Children Through Art. Final Report, 1979-1980.

New Rochelle Coll., N.Y.

Spons Agency—National Inst. of Education (ED), Washington, D.C.

Pub Date—Dec 80

Grant—NIE-G-79-0081

Note—55p; Print is poor in parts.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—\*Art Therapy, \*Cognitive Development, \*Concept Formation, Creativity, \*Disabilities, Elementary Education, Program Effectiveness, Self Esteem, Test Validity

Identifiers—\*Silver Test of Cognitive Creative Skills

The study evaluated the effect of art therapy on the development of basic academic concepts with 84 handicapped children (ages 7 to 11 years). The children were given the Silver Test of Cognitive and Creative Skills which uses drawing tasks to assess the child's understanding of the concept of a class or group of objects, the concept of space, and concepts of sequential order and conservation. Ss were also given tests of mental ability and reading and arithmetic achievement. Children received an art therapy program for approximately 40 minutes a week for 12 weeks. The program stressed the development of concepts of class, space, and order as well as creativity and self esteem. Results indicated that experimental Ss showed higher, though not significantly higher, gains in cognitive skills and achievement than did control Ss. Results suggested the validity of the Silver Test as a nonverbal measure of cognitive skills and the probable value of the art therapy program. Charts provide detailed analyses of findings. (DB)

A Career Education Program for Students with Physical Disabilities.

Human Resources Center, Albertson, N.Y.

Pub Date—81

Note—26p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Career Education, Career Exploration, Decision Making, Elementary Secondary Education, Locus of Control, \*Physical Disabilities, Program Descriptions, Program Evaluation, Self Concept, Special Schools, Vocational Maturity, Work Experience

Identifiers—\*Human Resources School NY

A model career education program for physically disabled students in grades K through 12 was designed, implemented, and evaluated at Human Resources School (HRS), a school for the physically disabled, in Albertson, New York. The major objectives of this program are to enhance development of students' self concept, decisionmaking ability, and career maturity. The elementary program consists of four components: teacher developed curriculum, speakers' bureau, simulated business and work experiences, and field trips. The secondary program focuses on preparing students to assume a more active role in exploring career interests through five sequential components: a career guidance course, prevocational evaluation, observation of Human Resources Center (HRC) employees, paid work experience with HRC, and paid work experience in private businesses, hospitals, government agencies, and schools. A pre/post and postdelayed testing schedule of HRS students was conducted using three standardized instruments, reflecting the three objectives of the program. Among results were that HRS high school students became significantly more internally controlled in the interval between pre- and posttesting, and that HRS students in grades 7 and 8 developed more positive self concepts and became more independent in making career related decisions though not as career mature as nondisabled students. (Author/DB)

Descriptors—\*Behavior Modification, \*Behavior  
Problems, Blindness, Case Studies, \*Multiple  
Disabilities, Program Descriptions, \*Severe  
Disabilities

Identifiers—New York Institute Education Blind

The paper reports on a program to change behav-  
iors of six blind multihandicapped adolescents with  
severe behavior disorders at the New York Institute  
for the Education of the Blind. Examples are drawn  
of the program's effects on a 17 year old male, Joe.  
Program principles include reduction of stressful  
situations for the students, expansion of receptive  
and expressive communication skills, and a 1 to 1  
staffing ratio. Target behaviors were identified and  
a behavior plan developed for each student. Im-  
plementation of the program for 3 months has led to  
reduction in frequency and severity of Joe's tan-  
trums. Appended are sample forms used for char-  
acterizing behaviors, suggested guidelines for developing  
a behavior plan, and a treatment plan for dealing with  
Joe's tantrums. (DB)

Effects of Cooperative Learning on the Social  
Acceptance of Mainstreamed Academically  
Handicapped Students.

Johns Hopkins Univ., Baltimore, Md. Center for  
Social Organization of Schools.

Spons Agency—Bureau of Education for the Hand-  
icapped (ED), Washington, D.C.

Pub Date—[81]

Grant—G008001494

Note—27p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Cooperation, Elementary Educa-  
tion, Intermediate Grades, \*Interpersonal Rela-  
tionship, \*Learning Disabilities, \*Mild Mental  
Retardation, \*Peer Acceptance

The study investigated the effects of a cooperative  
intervention designed to allow 40 academically  
handicapped (learning disabled or mildly retarded)  
and normal progress students (in third, fourth, and  
sixth grades) to work cooperatively on academic  
materials in improving social relationships between  
these groups of students. In the cooperative treat-  
ment, students studied mathematics in heterogene-  
ous teams that were rewarded as a group for  
improvements in the performance of the individual  
members. This treatment was compared to a control  
treatment in which students worked individually on

their mathematics work and were rewarded as in-  
dividuals for improvement in performance. Results  
indicated that the cooperative techniques improved  
social acceptance, in that rejection of academically  
handicapped students was decreased, but friend-  
ships were not increased. Gains in academic  
achievement and self esteem were found for the  
combined sample of students in the cooperative  
learning treatment. (Author/DB)

Descriptors—\*Certification, \*Disabilities, Eleme-  
ntary Secondary Education, \*Occupational Informa-  
tion, \*Paraprofessional School Personnel,  
\*Salaries, \*Special Education

Three issues (job descriptions, salary schedules,  
and credentials) in the employment of paraprofes-  
sionals in special education and other educational  
programs for the handicapped are examined in the  
report. A sampling of a variety of paraprofessional  
job descriptions leads to the strong recommendation  
that detailed job descriptions be provided para-  
professionals. Sample job descriptions and seven  
guidelines for their development are given. A review  
of salary schedules indicates a wide range with in-  
creases tied to seniority, education, and competen-  
cies. Eight questions to consider when developing a  
salary schedule are offered. Issues of certification  
considered include the difficulty of developing a  
model certification standard. Approaches to certi-  
fication of paraprofessionals implemented by Louisi-  
ana, Texas, Kansas, and Vermont are described.  
Fifteen issues (such as the choice between state or  
local standards) are identified as important in the  
decision making process. Sample certification  
standards of Kansas, Wisconsin, Vermont, and  
Louisiana are appended. (DB)

## ED 209 884 EC 140 601

Descriptors—\*Compliance (Legal), \*Delivery Sys-  
tems, \*Disabilities, Elementary Secondary Edu-  
cation, \*Program Development  
Identifiers—Education for All Handicapped Chil-  
dren Act, \*New Hampshire

The report describes results of a project to review  
the implementation of various laws, regulations,  
procedures, and programs for handicapped students  
which have evolved during the last 5 years in New  
Hampshire. Accomplishments since passage of P.L.  
94-142 (the Education for All Handicapped Chil-  
dren Act) include development of a 5 year plan for  
serving educationally handicapped students for  
each local school district and an emerging aware-  
ness of the complexity and the interrelatedness of  
agencies, services, laws, and funding serving han-  
dicapped students. Suggestions are offered regard-  
ing four objectives related to delivery of programs and  
services: obtaining an equitable distribution of qual-  
ity services and programs across the state; assuring  
that the programs and services are resulting in in-  
creased student progress at a level sufficient for the  
effort expended; insuring a more cost effective  
delivery of programs and services; and redefining  
the roles of the state and the special education sec-  
tion in a consolidation effort. Recommendations of-  
fered include stabilization of programs and funding  
for 2 years; redefinition of the state and special edu-  
cation's leadership, authority, and responsibilities;  
and initiation of an evaluative study of student pro-

gress and program input. Appended is a summary of  
the report along with a discussion guide. (SB)

## ED 209 885 EC 140 602

Tarver, Sara G.  
Characteristics of Learning Disabilities: A Selec-  
tive Review.

Wisconsin Univ., Madison. Research and Develop-  
ment Center for Individualized Schooling.

Grant—OB-NIE-G-80-0117

Note—22p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Attention, Cognitive Development,  
Elementary Secondary Education, \*Individual  
Characteristics, Intelligence, Interpersonal  
Competence, Language Acquisition, \*Learning  
Disabilities, Peer Relationship, Verbal Develop-  
ment

Based on an empirical study of over 3,000 learn-  
ing disabled children and on a review of research,  
the paper outlines intellectual, attention and verbal  
mediation, social-effective, and oral and written  
characteristics of learning disabled students.  
Among the findings reported are the following: the  
median educational retardation is one grade below  
the mental age reading grade expectancy; there may  
be a characteristic Wechsler Intelligence Scale for  
Children-Revised profile for the learning disabled  
group, but few individual learning disabled children  
actually conform to this pattern; children identified  
as learning disabled generally demonstrate a 2 or 3  
year developmental lag in the ability to attend selec-  
tively; learning disabled children are less socially  
accepted and more unpopular than their peers; and  
learning disabled children are more deficient in non-  
meaningful than meaningful aspects of language.

**Descriptors—**\*Disabilities, Elementary Secondary Education, \*Group Activities, \*Play, Program Development, Program Implementation, Recreational Activities

The newsletter offers guidelines for conducting playdays or large group activities for handicapped students. Among the factors to consider when planning activities are total number participating, levels of physical and mental abilities, age span, sex, and assistance needs. Activities should meet the needs and interest of the students, include a game or sport with which students are already familiar, include new programs students like to try themselves or see others perform, not include sports or activities teachers considered inappropriate for their groups, and match ability levels represented in groups. Other considerations involve staffing, facilities and equipment, refreshments, transportation, lead up and followup, scheduling, onsite preparation, publicity, cohesiveness, first aid, and financing. Appended are sample schedules. (SB)

Written by computer specialists, teachers, parents, and students, the 23 articles emphasize the role computers play in the development of thinking, problem solving, and creativity in gifted and talented students. Articles have the following titles and authors: "Computers and Computer Cultures" (S. Papert); "Classroom Computers—Beyond the 3 R's" (F. Bell); "Reflections of a Computer Language Nut" (S. Bloch); "It Started with Games" (C. Karnes); "Two Programs from a Young Eighth Grader" (S. Bahcall, H. Nelson); "Teaching Parents About Using Microcomputers" (T. Dwyer, M. Critchfield); "Children and Home Computers—Some Observations on the First Generation" (B. Banet); "An Apple a Day Keeps a Kid Occupied" (R. Buszta); "Microcomputers for Gifted Microtots" (A. Doory); "Kids and Computers—The Future Is Today" (S. Larsen); "Micros 'GOTO' School" (D. Piele); "The Hampton City Schools

Computer Program" (N. Harkavy); "The Paducah Tilghman High School for Gifted Students" (S. Davis, P. Frothingham); "Computers...Are All Dinosaurs Dead?" (D. Glover); "The Talcott Mountain Science Center" (D. Barstow); "Computerics—A Course in Computer Literacy" (P. Bird); "Bringing Microcomputers into Schools" (G. Ropes, H. Gaylord); "Statewide Educational Computer Systems—The Many Considerations" (K. Hausmann); "Van Helps Schools Select the Right Computer" (B. Staples); "Some Thoughts on Computers and Greatness in Teaching" (T. Dwyer); "The Hacker Papers"; and "Educational Software" (D. Lubar). Lists of printed materials, vendors and manufacturers, and resources on using microcomputers in schools and classrooms conclude the document. (SB)

Wilson, Barry And Others

**The Evaluation of Transition Programs: A Quantitative and Qualitative Look.**

Pub Date—81

Note—41p.; Paper presented at the Annual Meeting of the American Educational Research Association (Los Angeles, CA, April 13-17, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC02 Plus Postage.**

**Descriptors—**Academic Achievement, Behavior Patterns, Case Studies, \*Intervention, Kindergarten, Parent Attitudes, Primary Education, Program Effectiveness, Student Characteristics, Student Evaluation

**Identifiers—**\*At Risk (for Handicap), \*Transition Programs

The study involving 43 kindergarten students was designed to describe some of the behavioral and academic characteristics of transition students (students with potential learning difficulties), examine whether or not the program philosophies and goals influence the effectiveness of the program for individual students with different characteristics, evaluate the behavioral and academic progress of students in transition classrooms, and determine how parents of these students view and understand the program. Data were collected using the Pupil Rating Scale (PRS), which measures behavioral characteristics in auditory comprehension, spoken language, orientation, motor coordination, and personal-social behavior; the Clymer-Barrett Pre-reading Battery (C-B), which assesses visual discrimination, auditory discrimination, and visual motor skills; and a parent questionnaire. Among findings were that referring kindergarten teachers rated students lower than either of the transition teachers on all three scales, parents' reactions to the program were generally positive, and significant progress was made as indicated by PRS ratings and C-B scores. Four illustrative case studies offer achievement data, teacher ratings and perceptions of the child, and the investigator's observations of classroom behavior. (SB)

**Identifiers—**\*National Technical Institute for the Deaf

The paper reports conclusions of a study group established to develop a Career Development Model for National Institute for the Deaf (NTID) students. An executive summary gives an overview of the group's most important conclusions, including that all students should have at least one good receptive language skill. Listed among the skills needed by students to begin their major program are mathematical competency, English language competency, ability to make career decisions, and receptive skills. Findings related to the career development of students include: personal/social skills should not be used as criteria for entry into the program; there are few programs which actually

have formal prerequisites or entry requirements; and there is little reliance on test scores in terms of deciding which students can begin their major coursework. There was broad support for some type of preparatory program which would allow students more time and more data on which to base a career decision; allow for more interaction with students and more thorough assessment of students' abilities by faculty and staff; and allow time for appropriate skill building in the areas of information reception, math, English, and career decisionmaking. Appended is a summary of results from structured interviews with 36 members of the NTID professional staff. (SB)

**Identifiers—**\*National Technical Institute for the Deaf

The paper suggests the application of a research and development (R and D) process in an ongoing project at the National Technical Institute for the Deaf. Four phases/stages of the process are discussed: research, development, implementation, and maintenance. It is pointed out that the objective of the project has been to train normal hearing peers to tutor and take notes for deaf college students enrolled in regular college classes. Results of the tutoring/notetaking project are seen to suggest that the four phase process can enhance the probability of bringing about innovation through R and D efforts. Stressed is the importance of increasing "user" involvement within each stage of the process. (SB)

**Descriptors—**College Students, \*Deafness, Higher Education, \*Student Attitudes, Tests, \*Test Validity, \*Vocational Maturity

**Identifiers—**\*Career Maturity Inventory (Crites), \*National Technical Institute for the Deaf

The study involving 149 National Technical Institute for the Deaf summer orientation program students evaluated the use of the Career Maturity Inventory-Attitude Scale (CMI) with a deaf college student population. The original form of the test and an adapted version were used with two groups of students who were tested three times during a 2 1/2 year period. Results showed that the adapted version of the CMI is more feasible than the original form for use with a deaf population. A high correlation was found between language ability and mature career attitudes. A finding not anticipated was that students in the upper quartile changed their college majors more often than students in the lower quartile. Implications for the use of the instrument are discussed. (SB)

Fifty-three deaf and thirty-three hearing college students observed a videotaped lecture followed by a 15 minute period of reviewing prepared class notes. Two days later, half of each group again reviewed the notes before taking a test measuring learning outcomes in four areas: recall, recognition, concept acquisition, and problem solving. Multivariate analysis of variance showed that repeated review was much more helpful to deaf students than to hearing students on the recall and recognition measures but not on the higher level learning outcomes. It was further shown that hearing students outperformed deaf students on each of the four dependent measures. (Author)

Identifiers—\*Learning Strategies, National Technical Institute for the Deaf  
The study involving 112 deaf undergraduate students at the National Technical Institute for the Deaf (NTID) was designed to review recent educational and psychological literature relating to learning strategy knowledge and use, to determine which cognitive strategies might be most effective for learners, and to pilot a questionnaire for assessing strategy use among deaf students. Through the review of educational and psychological literature, four areas (imagery, questioning, paraphrasing, and understanding concept relationships) were identified as areas in which training students processing strategies may benefit comprehension and retention. By developing sets of items, administering them to NTID students, and factor analyzing responses, nine scales were identified that measure student's strategies for processing instructional material. The nine Learning Strategy Questionnaire scales are: Study Flexibility, Imagery, Application, Creative Elaboration, Relationships, Understanding, Sign Language and Reinforcement, Ease of Studying, and Selection/Retention. Tables with statistical data are appended. (Author/SB)

Identifiers—\*Tennessee Self Concept Scale  
The Tennessee Self Concept Scale (TSCS) was administered to 109 students newly enrolled at the National Technical Institute for the Deaf. Consistent with earlier research literature, test results indicated that the deaf students had lower levels of self esteem than did the normative hearing population. Subsequent interviews with 30 members of the study sample revealed, however, that many of the deaf students had interpreted the test stimuli peculiarly, thus affecting their scores on the TSCS in a negative manner. It was suggested that questionnaire type measures of affective variables (or psychological well being) which fail to take into consideration the linguistic and experiential deficits of the deaf respondent may create false impressions of psychological maladjustment. A sample copy of the TSCS is appended. (Author/SB)

Identifiers—\*Learning Strategies, National Technical Institute for the Deaf  
The paper focuses on networking, a process of identifying and understanding the relationships among concepts in prose passage, as a learning strategy for deaf college students. It is explained that students using the technique perform three basic overlapping processes, one of which, identification and understanding of concept relationships, is the subject of a literature review. Reported are findings of evaluations conducted during three networking training sessions involving 56 students from the National Technical Institute for the Deaf (NTID). During each session, NTID students were trained on the networking procedure and then asked to study prose passages and use their new study strategy. Findings using the relatively short (500 word) passages in sessions I and II suggested that networking has a greater impact on long term retention of prose than on immediate test performance and that networking has more of an impact when students write out their networks than when they network material in their head. There were mixed results regarding the performance on the longer (1,000 word) articles of session III. Appended is information on definition, example characteristics, result, and compare/contrast relationships. (SB)

Descriptors—Adjustment (to Environment), \*Deafness, Literature Reviews, \*Psychological Testing, \*Research Methodology, Research Problems, \*Self Concept, Test Bias  
The paper reviews some of the research literature relating to self concept and deafness. In summarizing the relevant research, attention was given to the types of questions to which researchers have sought answers, the theoretical orientations which have guided investigations, and the kinds of methodological problems which have characterized research in this field. It was noted that the severest limitation in research with the deaf rested with the inappropriateness of testing devices, a situation not uncommon to research on personality attributes of other groups of persons. Moreover, the need to investigate self concept from a developmental perspective was viewed as central to the task of better understanding the life adjustment of the deaf individual. (Author)

Descriptors—College Students, \*Communication Skills, \*Deafness, Higher Education, \*Sex Differences, \*Spatial Ability  
Identifiers—\*Field Dependence  
The hypotheses that deaf students would be more field dependent than hearing students and that their competence in communication skills would be related to field dependence were supported for a group of 77 male and 67 female deaf students at the National Technical Institute for the Deaf. Stepwise multiple regression analyses of the data showed that for females, spatial skills followed by communication skills were significant predictors of field dependence; for males, spatial skills followed by the extent of hearing loss were significant predictors of field dependence. Sex differences found on tests of field dependence and spatial relations were consistent with those obtained from the hearing population. Results supported the notion that socialization experiences and competence in communication skills may influence development of field dependence in deaf students. (Author)

Descriptors—College Students, \*Course Evaluation, \*Deafness, Higher Education, \*Student Attitudes, \*Teacher Evaluation

The study involving 385 students enrolled in the National Institute for the Deaf investigated the dimensions used by hearing impaired students to make judgments about their instructors and whether these underlying dimensions are similar to those reported for hearing students. Data from a large scale field test of a student rating of instruction form were factor analyzed. The underlying dimensions of the instrument were identified, labeled, and then compared to the dimensions frequently reported in the literature on student rating of instruction. Results indicated a strong similarity between the dimensions used by hearing impaired students and their hearing counterparts in making judgments about instructors and courses. Tables with statistical data are appended. (Author/SB)

Descriptors—\*Context Clues, Elementary Education, \*Hearing Impairments, \*Listening Skills, \*Word Recognition

Two experiments involving 44 normal hearing and 26 hearing impaired children (7 to 12 years old) investigated children's use of sentence context to identify words in sentences that are not clearly intelligible. In Experiment 1, Ss read incomplete sentences and chose which of two word pictures best completed the sentence. From these responses, 12 sentences were identified (eight sentences in which rhyming test words were predictable from the context and four in which one word from the test word pair was not predictable). In Experiment 2, twenty-one of the same hearing impaired children, who met strict speech discrimination training criteria, heard variations of the 12 sentences over headsets in which the relationship between a context word and one of a rhyming test word pair was either reasonable, unreasonable, or neutral. After each sentence, the child decided whether he had heard the test word or its alternative which differed in either the initial or final consonant. Significantly more correct identifications were made on the reasonable and neutral sentences than on the unreasonable ones. Average means were 81% on the reasonable sentence, 64% on the neutral ones, and 34% on the unreasonable ones. (Author)

Descriptors—\*Career Development, Career Education, \*Deafness, Literature Reviews, \*Models, \*Research Needs, \*Theories

The paper looks at the value and need for theory, specifically as it relates to career development/career education for the deaf. A review of the literature provides an overview of major theoretical ideas regarding career development. An interactive adjustment model is described which incorporates four parameters: personal characteristics, environmental interactions, learning activities, and social experiences. The career development model is outlined in terms of corresponding postulates, deductions, and definitions. Several research hypotheses related to career development of the deaf are offered. Tables and figures illustrating the model conclude the paper. (SB)

Descriptors—Aptitude Tests, College Students, \*Deafness, Higher Education, \*Standardized Tests, Student Evaluation, \*Timed Tests Identifiers—\*Differential Aptitude Test

The study involving 614 hearing impaired students investigated the adequacy of time limits currently followed in the administration of two subtests of the Differential Aptitude Test battery when used with young deaf students. Thirty-six students who did not complete the Space Relations portion of the battery under the timed condition, and 11 who did not complete the Abstract Reasoning subtest within the time allowed were instructed to complete the test on a separate answer sheet. Examinees' initial and revised measurements were compared for statistical equivalence in terms of the standard error of measurement computed from independent sample data. No evidence was adduced to indicate that deaf examinees would profit from an extension of testing time. (Author)

Descriptors—Abstract Reasoning, \*Cognitive Tests, College Students, \*Deafness, Higher Education, Mathematics, Postsecondary Education, Reading Tests, Spatial Ability, \*Student Evaluation, \*Test Construction, Test Reliability, Test Validity

The study involving approximately 300 deaf students entering the National Technical Institute for the Deaf was designed to determine the extent to which four cognitive measures could be reduced in overall length without serious threat of information loss. The measures investigated were the California Reading Comprehension Test, the Mathematical Skills Program, the Abstract Reasoning Test, and the Space Relations Test. In all instances, the correlation between reduced and full length tests is very high and positive, indicating that control over the distribution of the difficulty indices associated with the items in a test produces efficient tests requiring substantially fewer stimuli than those included in the original design sets. Moreover, the effects of test stimuli reduction on recomputations of the reliability estimate for each test reveals negligible decreases. In summary, the findings showed that the number of test stimuli comprising the four instruments studied could be reduced by an average of 54%. (SB)

Report No.—NTID-PS-39

Pub Date—Jan 81

Note—51p.; For related documents, see EC 140 611-630.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Academic Achievement, \*Hearing Impairments, Literature Reviews, \*Locus of Control, Psychological Characteristics

The authors review research on locus of control (LOC), particularly as it pertains to the instruction of hearing impaired students. According to social learning theory, the LOC construct is explained to theorize that two distinctly different types of persons may be identified—"internals" who assume responsibility for their activities and "externals" who are likely to ascribe the consequences of their behavior to forces outside their influence. Studies addressing specific research questions are organized under seven categories—dimensionality, correlates, instruction, deafness, disabilities, changeability, and amendments and contributions of attribution theory. Among the findings noted are the following: when we account for situational and affective features contributing to a person's LOC, a bipolar, unidimensional construct with "internality" and "externality" comprising the extremes emerges; hearing impaired learners are relatively external in their LOC orientation as compared with hearing counterparts; specific experiences of short duration can produce predictable shifts in control orientation in either direction along the LOC continuum; and externality is related to poorer achievement and less effective study habits and attitudes. Appended is a paper by J. Porter titled "The Foundation Series—An Internal Review of the Dowaliby and Pagano Paper." (SB)

Descriptors—\*College Students, \*Deafness, Higher Education, \*Lecture Method, \*Memory, \*Recall (Psychology), \*Time Factors (Learning), Written Language

Two experiments involving 36 deaf college students investigated the amounts of information remembered by students from the different quarters of a lecture and the effect of printed vs. interpreted presentation of lecture material. In the first experiment, 20 deaf college students received an interpreted, videotaped presentation of one lecture and a printed presentation of a second lecture. In Experiment 2, sixteen deaf students received one interpreted presentation and, then, a second interpreted presentation on a different topic. In both experiments, students wrote down the information they remembered immediately after each presentation. Recall protocols were scored for the distribution of ideas recalled from each quarter of the lecture. The principal findings were that students recalled: more information from the first two quarters than from the second two; more information from a printed than an interpreted presentation; and more information from a second interpreted presentation than from a previous interpreted one. Implications are drawn for providing educational support to mainstreamed deaf students. (Author/SB)

Descriptors—\*Check Lists, \*Deafness, \*Instructional Films, \*Media Selection

Identifiers—\*Film Evaluation Checklist

A Film Evaluation Checklist, developed at the National Technical Institute for the Deaf, describes instructionally relevant film characteristics. The instrument is organized in terms of structural characteristics of the medium, modes of concept emphasis using film techniques, and organization of instructional material. Raters independently rated three captioned films repeated at three weekly sessions. Interrater agreements exceeding 70% were reached for each single viewing. It was concluded that films may be reliably and accurately rated after a single viewing. The Film Evaluation Checklist should be useful for selecting films for instructional use or identifying films with certain instructionally relevant characteristics. Appendixes include a brief history of the Visual Media Research Project, a list of project consultants and reviewers, a copy of the Film Evaluation Checklist, a copy of the Master Criterion Rating Checklist, a description of films and criterion ratings assigned to films, a rater's guide to the Film Evaluation Checklist, an outline for film rater training, tables with statistical data, and a copy of the Revised Film Evaluation Checklist. A study of National Technical Institute for the Deaf students who are cross registered into the other colleges of the Rochester Institute of Technology was part of an ongoing research project on mainstreaming. The initial study addressed three issues: the best methodology to employ, the research hypotheses which might be generated from the data collected, and the possibility for researchers and instructors to cooperate for mutual benefit. Observations were conducted during the regular summer quarter in Social Work classes. Classroom observation was supplemented by formal and informal interviewing for data collection. Findings of the study yielded the following conclusions: it is advantageous to use a number of information sources for naturalistic research; a combination of qualitative and quantitative techniques, of observation and interviewing, and incorporating both the view of the insider and the outsider, are all important for a valid picture of the classroom; instructors are chiefly responsible for the active participation of hearing impaired students in the activities of the class; and it is possible for researchers and instructors to cooperate for classroom research to the benefit of both. Descriptors—\*Contrastive Linguistics, \*Discourse Analysis, \*Error Analysis (Language), French, Grammar, Interpretive Skills, Language Research, \*Linguistic Theory, Poetry, Second Language Instruction, Semantics, Teaching Methods, Textbooks, Verbs

Papers that address implications of linguistic theory for applied linguistics are presented. In "Some Semantic Properties of Some Conjunctions," W. Abraham is concerned with the function of "but" and its translation equivalents in German and other languages. In "Is It Possible and Necessary to Write Text Grammars?," T. P. Krzeszowski examines the theoretical status of text-grammars and the use of sentence connectives. In "Esquisse d'une theorie de 'Do'" (Outline of a Theory of 'Do'), H. Adamczew-

ski examines the anaphoric function of the verb "do" in English texts, and its use as a marker of modality or some other semantic qualification. In "Notes sur l'expression verbale de l'assentiment et de la confirmation en anglais" (Notes on the Verbal Expression of Assent and Confirmation in English), C. Heddesheimer considers research conducted on the speech acts of assent and confirmation. In "Some Metalinguistic Problems in Communicative Language Learning," C. N. Candlin considers research conducted on the rhetorical properties of discourse between doctor and patient. In "Interpretive Procedures and the Importance of Poetry," H. G. Widdowson examines the problem of teaching discourse, concentrating on the problems of interpretation. In "Interpretive Procedures: Seeing, Reading, and Understanding Discourse," S. P. Corder compares the interpretation of discourse with visual perception and the interpretation of pictures. In "Error Analysis and Pedagogical Ordering," A. Valdman describes the use of the results of a systematic error analysis to devise a language teaching syllabus. In "De la necessite de fonder l'enseignement de langues secondes sur l'etude de la langue maternelle" (On the Necessity of Basing Instruction of Second Languages on the Study of the Mother Tongue), E. Roulet considers metalinguistic knowledge development in the learner. (SW)

Essays that consider the way that women are portrayed in foreign language textbooks are presented. The selected essays were submitted to a competition sponsored by the Federation Internationale des Professeurs de Langues Vivantes, which requested that language teachers assess such concerns as: (1) whether women were described in a stereotyped way; (2) whether the descriptions reinforced certain prejudices; (3) whether the view presented by the textbook was a true representation of women's role in the society in which they lived, as well as the country in which the target language is spoken; and (4) the attitudes associated with their textbook activities. The essays are as follows: "Hungarian Women in Reality," Kata Ittess; "Italiano Vivo and Its Women," Dino Bressan; "The Seven Sisters," Sandra D. Lingskov; "Sexism in the Foreign-Language Classroom," Jean S. Bidwell; "The Limits of My Language Are the Limits of My World," Fairlee W. Identifiers—Canada, \*French Canadians

A teacher's French-English guide to a cultural module that is designed to provide introductory reading materials for students of French as a second language is presented. The module, "La Fête de la Ste-Catherine," aims: (1) to develop an awareness in the students of a few of the special events that reflect the multicultural nature of Canadian society,

(2) to introduce the students to the history and customs of the French Canadian fête de la Ste-Catherine, and (3) to have the students experience some of the fun associated with this festivity by making taffy. The module is designed for students age 10 to 12 who have a minimum of one year of French instruction and have acquired basic French reading skills. Students who are age 9 and have had two to three years of previous French instruction, including a year of French reading skills, will be able to profit from the module. Background information is presented concerning the festival, the taffy pull, and Marguerite Bouregoys, who has always been associated with the custom of taffypulling. Sample lesson plans, suggested activities, suggestions for project work, and information about evaluation of the module are presented. Duplicating masters, answer keys, and a selected bibliography are included. (SW)

Descriptors—Bilingual Education, Book Reviews, \*Cross Cultural Training, Cultural Awareness, \*Cultural Images, Elementary Secondary Education, Evaluation Criteria, \*Evaluation Methods, \*Latin American Literature, Puerto Rican Culture, Puerto Ricans, \*Rating Scales, Research Methodology, Sociocultural Patterns, Textbook Content, Textbook Evaluation

Training of four Puerto Ricans and four non-Puerto Ricans to assess the portrayal of Puerto Ricans in a sample of ethnic literature using a holistic approach is described. Basic assumptions involved in a holistic reading or scoring are as follows: (1) readers judge each textual unit as a whole and also within the context of the range of categories of a particular instrument; (2) the group develops evaluative criteria from the content; and (3) the analytical task occurs after the readers have formed their initial perceptions. The training had three major objectives: to interpret the categories of the instrument, to develop criteria to determine the positive or negative image of the principal character, and to enable the reviewers to reach a reasonable degree of consensus in their analysis of the literature. An analytic scale provided specific data regarding the character's image. Three different responses to the same content during the early training period indicated the need for adjustment and further content clarification in order to achieve the purpose of the training: group consensus. Generally, the ratings varied more among individuals than between ethnic groups, with one exception. With the exception of a story that concerned indiscriminate sexual behavior, use of drugs, and confrontations with legal authority, the consensus of the readers drew closer, and an analysis of variance of the nine readers' ratings of six stories indicated a significant decrease in variability on each dimension from the onset of the training to its conclusion. Implications of cross-cultural training for the bilingual classroom are addressed. References and instructions for coding the image of principal characters are appended. (SW)

Descriptors—Communicative Competence (Languages), Elementary Secondary Education, Higher Education, Language Skills, \*Language Variation, Learning Processes, Linguistic Theory, \*Second Language Instruction, \*Second Language Learning, \*Student Role, Student Teacher Relationship, \*Teacher Role

The effect of language variation on language teaching is considered. It is suggested there has been a shift away from the notion that a language can be perceived by learners as a fixed system to an emphasis on its negotiability in a social context. This is not precisely the shift from grammatical concerns to functional ones, for it arises out of methodology rather than linguistic description. Examples of descriptive procedures that have been adapted to language teaching include notions and functions, and procedural syllabuses. On the other hand, the methodological tradition promotes greater student freedom of maneuver than was customary in the past and alternatively ignores linguistic grading. The methodological model emphasizes language learning rather than language teaching, and views teachers as facilitators of language acquisition. Differences between teaching and learning that make it impossible to view them as obverse processes are addressed. It is suggested that teaching is the performance of certain rituals, while learning is the effective acquisition of knowledge or ability. Teaching may be viewed as being primarily about availability, while learning may be thought of as effective internalization. Teachers implement a syllabus and correct students; learning occurs in the process of using language and improvising language samples presented through teaching. It is suggested that this distinction of teaching and learning provides a partial explanation for the attraction of methodological solutions to the problem of language variation, accords with a functionalistic approach to language acquisition, and is consistent with the intuitions of many experienced teachers about how they operate in language classes. ## Information Structures and Pedagogic Applications.

Pub Date—Sep 81

Note—18p.; Paper presented at the Annual Meeting of the British Association for Applied Linguistics (Sussex, England, September 18-20, 1981). Faint type.

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Paragraphs, \*Reading Comprehension, Second Language Instruction, \*Structural Analysis (Linguistics), \*Writing (Composition), \*Writing Evaluation, Writing Processes

The underlying structure of meaning in a text is to a certain extent belied by the surface structure, or sequential organization, of the text. The underlying information structures (IS) organize information according to cognitive and cultural factors. It may be demonstrated that just three major IS with various subvarieties can describe any text: (1) "processes" represent events, (2) "constitutives" represent states, and (3) "comparatives" represent a second level as they must involve two other IS that are being compared. The major IS may be graphically diagrammed. A preferred pattern of exposition of information varies according to factors that are either stylistic or linguistic. A well-written text contains "markings" which reveal the information structure and make comprehension possible no matter how much information is being presented. Paragraph analysis based on the IS concept is useful in ascertaining readability of texts for use in, for instance, the second language classroom. IS offer the added advantage of permitting objective evaluation of writing. (JB)

Descriptors—\*Abstract Reasoning, \*Child Language, Cognitive Ability, Comprehension, Concept Formation, Fundamental Concepts, Generalization, \*Language Acquisition, Language Skills, \*Linguistic Competence, Preschool Children, Proximity, \*Time Perspective

Linguistic and cognitive competencies of preschoolers were revealed by interviewing them about routine activities. It was found that freeing preschoolers' speech from constraints inherent in talking about the immediate context results in their demonstrating control over a variety of language-related skills that are generally assumed to be beyond their competence. These include: (1) the simple ability to talk about, and thus presumably to represent, events not taking place in the here-and-now; (2) the ability to, and preference for, talking about these in general rather than specific terms; (3) the use of timeless reference; (4) the sensitivity to the temporal structure of activities and the ability to move "backwards" within a temporal structure to effect a "repair"; and (5) the appropriate use of a variety of relational terms that are infrequent in context-bound speech and that preschoolers appear not to understand in direct tests of comprehension. Attention is focused on the way in which the use of "if" and "or" indicated the flexibility and complexity of preschoolers' representations of familiar activities, and on the possibility of interpreting many of their "if" statements as timeless hypothetical references. In addition, the evidence that preschoolers' knowledge of familiar activities includes a representation of alternative and conditional pathways suggests that questioning them about such activities might provide a means of assessment of their ability to use the verb forms "could" and "would." ## But of Course Preschoolers Understand the Meaning of "But!"

Spons Agency—National Inst. of Child Health and Human Development (NIH), Bethesda, Md.

Pub Date—Oct 81

Grant—ST32HD07196

Note—16p.; Paper presented at the Annual Boston University Conference on Language Development (6th, Boston, MA, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Child Language, \*Discourse Analysis, \*Language Acquisition, \*Language Processing, Language Research, Language Skills, \*Linguistic Competence, Logical Thinking, Preschool Education, Semantics

The ways in which preschoolers use the word "but" were studied. It was found that the eight preschoolers, who ranged in age from 3;9 to 5;5, were able to use "but" to express a number of different types of adversative relationships. "But" introduced clauses containing information that: (1) contrasted with shared knowledge about the usual state of affairs, (2) described a condition under which the situation described in the preceding clauses did not hold, (3) denied an inference that might be drawn on the basis of the preceding statement, (4) explicitly contradicted a prior statement, and (5) introduced a temporal repair. The cognitive prerequisites that could be assumed to underlie and motivate each of these types of "but" statements also are considered. Statements contained in categories one and two indicate knowledge of optional pathways in the occurrence of an event, while statements contained in category three indicate at least an emerging ability to recognize the implications of one's own statements, and possibly to take the listener's perspective and make inferences about her inferences. Statements in categories four and five indicate knowledge of and adjustment to discourse conventions. The subjects' productions are divided into categories and discussed on the basis of whether the contrast signaled by "but" was directed toward the text of the statement, or toward the discourse process per se. It is suggested that the analyses indicate a somewhat surprising level of sophistication in children's understanding of discourse conventions and their ability to adjust their speech in accord with such conventions. ## Pictographic Metaphors as Vehicles of Symbolic Meaning toward Cross-Cultural Understanding.

Pub Date—81

Note—14p.; Paper presented at the Conference of the International Council of Psychologists (1981). Best copy available.

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Patterns, \*Chinese, \*Chinese Culture, Cross Cultural Training, \*Cultural Awareness, Cultural Context, Human Body, Imagery, Knowledge Level, \*Metaphors, \*Orthographic Symbols, Physical Environment, Psycholinguistics, Self Concept, Semantics, Sociocultural Patterns, Sociolinguistics, Symbols (Literary), Written Language

Identifiers—China

Symbolic meaning expressed by Chinese language characters is helpful to non-Chinese persons in understanding Chinese culture. The implicit metaphors in Chinese characters present pictographic descriptions of the meaning in the form of a story, situation, or symbol which places the otherwise abstract concept in a cultural context. All languages depend to some extent on metaphor for their meaning but the metaphorical meanings of language are most obvious in the Chinese language. Implications of understanding metaphors for non-Chinese counselors working with a Chinese cultural setting are addressed. Body parts are anthropomorphized to denote qualities of behavior and abstract concepts in very literal forms. The person is seen in a context of complicated features acting in or out of harmony with one another. Behavior in the context of nature imagery is seen through a series of small stories that illustrate abstract concepts and establish the context of their meaning. The accumulation of knowledge as a process is likewise described comprehensively by analogy. In respect to the concept of identity, the Chinese characters suggest what is

expected of a person. Differences between the traditional Chinese and English-speaking cultures are noted that account for Chinese children developing a cognitive style favoring interdependence of relationships, and for American children analyzing and classifying a stimulus complex in a more independent manner. Other characteristics of Chinese culture relating to the expression of hostility, family ties, and conformity are considered. (SW)

## A Bibliography of Texts and Materials for Teaching English Listening Comprehension.

Pub Date—Oct 81

Note—24p.; Materials prepared for dissemination among teachers of English as a second language in Japan.

Pub Type—Reference Materials - Bibliographies (131) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Annotated Bibliographies, Audiotape Recordings, \*English (Second Language), Independent Study, \*Instructional Materials, \*Listening Comprehension, \*Media Selection, Postsecondary Education, \*Second Language Instruction

Currently available British and American materials for teaching English listening comprehension to non-native speakers are covered in this bibliography. Most items listed include student's workbook and teacher's manual, and most are accompanied by tapes. Materials are grouped under four headings: (1) materials whose primary focus is conversation, (2) materials for teaching comprehension of narrative passages, (3) comprehensive (four-skill) courses and other materials which have good listening components, and (4) other materials. Each entry provides bibliographic information and a brief four-part classification, which indicates level, variety, source (authentic or scripted), and suitability for independent study. Materials that the authors have used are given additional annotation. Seventy-four items are listed, almost all dating from the 1970s or 1980s. Five pages of suggestions for choosing and evaluating listening comprehension materials are appended. (Author/JB)

## Overcoming Fossilized English.

Pub Date—Oct 81

Note—26p.; Paper presented at the Annual Washington Area Teachers of English to Speakers of Other Languages Convention (2nd, Catonsville, MD, October 2-3, 1981).

Pub Type—Guides - Non-Classroom (055) — Speeches/Meeting Papers (150) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—College Second Language Programs, College Students, \*English (Second Language), \*Error Analysis (Language), Error Patterns, Feedback, Grammar, Higher Education, \*Interlanguage, \*Linguistic Performance, Pattern Drills (Language), Pidgins, \*Remedial Instruction, Second Language Instruction, Speech Communication, Student Evaluation, Student Motivation, Student Placement, Writing Skills

Identifiers—\*Fossilized English

Causes of language fossilization and ways to overcome it are considered. Fossilization is the relatively permanent incorporation of incorrect linguistic forms into a person's second language competence. The discussion is focused on fossilization of incorrect syntactical rules, based on experiences with learners of English as a second language at the University of Maryland, Baltimore County. Students who have been in the United States for years often demonstrate fossilization. While they can communicate basic needs and some may communicate at complex levels, the students have developed their own personal, idiosyncratic interlanguages, which are simplified versions of English. The causes are lack of formal instruction and insufficient corrective feedback from native speakers and classroom teachers. It is suggested that helping students overcome fossilized items requires positive affective feedback but negative cognitive feedback when fossilized structures are used. A problem for educators is to convince the students that they need remedial assistance without intimidating or antagonizing them. Placement essays and grammar tests can be used to determine whether students need a remedial course or can proceed to an English as a second language composition course.

tion course. In the remedial class, the span in levels of proficiency causes problems. Tutorial help for less proficient students and extra language lab work, as well as individualized instruction, are possible solutions. The remedial class includes formal grammar instruction, oral exercises with corrective feedback, substitution and sentence manipulation drills, written exercises, short composition assignments, and dictations in class. Dicker, Susan J.  
Applying the Monitor Model to the Editing of Compositions.

Pub Date—Jul 81

Note—17p.; Paper presented at the Annual TESOL Summer Meeting (3rd, New York, NY, July 24-26, 1981).

Pub Type—Speeches/Meeting Papers (150) — Guides—Classroom—Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Editing, \*English (Second Language), \*Error Analysis (Language), \*Grammar, Higher Education, Interlanguage, Secondary Education, Second Language Learning, Self Evaluation (Individuals), Student Writing Models, Syntax, \*Writing (Composition), Writing Processes, Writing Skills, Written Language

Identifiers—\*Monitor Model

An approach to promote student editing of their own compositions, to be used in intermediate English as a second language classes, is discussed. Although editing or monitoring may not improve the communicative accuracy of a written message, it may give the message a more native-like quality. Monitoring works best on morphemes which are acquired late but which are easy to conceptualize, such as the third person singular "s" on simple present tense verbs. Learning language rules is distinct from learning the language itself; the rules do not always have to be presented before acquisition. Krashen (1978) has described the monitor under-user, who appears to be uninfluenced by most error correction, and the monitor over-user, who relies strongly on conscious linguistic knowledge. It is suggested that before teachers can expect students to apply a rule to their writing, they must ascertain that the students know how to apply it correctly in a discrete-point task. Then, it is necessary to bring the rule out into the students' consciousness (and, perhaps, convince them of the importance of applying the rule to their own writing). The teacher can elicit the rule by asking the student to state the rule and write it down for future reference, and by stating the rule directly. Editing of compositions by students at the end of a writing session may make the actual writing process easier for the student. The editing time could be divided into two sessions, the first for improving communicative accuracy and the second for improving grammatical accuracy. This approach is an applied version of Krashen's Monitor Model. (SW)

Louda, Svata  
Avoidance Ruled Out by Similarity.

Pub Date—Apr 81

Note—45p.; Paper presented at the Central States Conference on the Teaching of Foreign Languages (Omaha, NE, April 9-11, 1981). Faint print.

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Interference (Language), Language Processing, \*Language Typology, \*Learning Processes, Psycholinguistics, Second Language Instruction, \*Second Language Learning

Avoidance as a strategy for error-free production in a second language is shown to be unavailable to the student when the second language is linguistically similar to the native language. In avoidance, the student "steers around" those aspects of the grammar of the target language with which he/she is unfamiliar. By restricting linguistic production to those aspects of the language over which he/she has mastery, the student attempts to avoid all errors. However, in attempting to communicate an idea in a second language similar to his/her native language, the student will be forced to rely on that similarity in choosing a mode of expression within his/her grasp; the possibility that the successful execution of that mode will differ in the target language from the native language entails risk for the student, who is likely to make a phonological, morphological, or syntactic error. Moreover, the similarity be-

tween the two languages provides, through conceptual proximity, alternative pathways to error-free production. The coexistence of hazardous (learning-inhibiting) and secure (learning-enhancing) spheres in the grammar of the second language indicates directions for learning strategy and teaching methods. The latter will involve a certain amount of drill and multisensory reinforcement. (JB)

Descriptors—Adults, \*Child Language, \*Language Acquisition, Language Research, Listening Comprehension, \*Semantics, Young Children

Identifiers—\*Causatives (Grammar)

This study focuses on meaning differentiation among different causative expressions. Semantic differences between lexical and periphrastic expressions are reviewed. A picture comprehension task was administered to 32 adults and 99 children between the ages of 32 and 70 months. The children were asked to select the picture that matched a sentence read to them. Because it was thought that verbalizations would interact in many ways with pictured situations, item content was controlled by presenting different verbalizations with the same picture sets. Each subject heard two different verbalizations for each picture, and subjects were split into two groups so that on certain items the effect of four different verbalizations could be assessed. Responses for each item were categorized by the qualitative nature of the picture selected. Each item set was scored in terms of whether or not individual subjects switched their choices of picture due to the verbalization. The data from the adults were evaluated to determine the degree of match between their responses and the pattern hypothesized on the basis of the analysis above. Also considered were factors such as the semantic features of lexical items and real-world knowledge about the situation and participants involved. (JK)

Descriptors—Adverbs, \*Child Language, \*Language Acquisition, Language Research, Oral Language, Preschool Children, Syntax, \*Time Perspective

This study focuses on the development of the ability to talk about events in time - to specify occurrence in time with reference to the present as well as to locate events in time with reference to each other. The child's learning of how to mark the different kinds of relationships between two events is discussed. This study of current relevance involves use of constructions that permit reference to a time other than the event time in order to make some statement about event time and the event itself. A number of linguistic means used by the subjects in making utterances "currently relevant" are reviewed. Primary concern is with the young child's early use of adverbial particles to encode this type of relevance. These particles are non-explicit means of encoding relevance. They mark the predication as being relevant to two or more points in time without altering the core propositional meaning of the utterance and without specifically mentioning the two times in full surface propositions. The study of these particles has semantic, syntactic, and pragmatic application to the study of language acquisition. (Author/JK)

Two issues in language development are explored—the emergence of the ability to communicate and the relationship between emerging forms and functions. Solutions to these problems involve the notion of interpretation and depend on the fact that adults interpret children's behaviors as if they were meaningful according to the adult system. The language development of five children between ages 0;1 and 2;6 was investigated. Focus was on these children's emerging ability to converse on different topics in interaction with their mothers. Conclusions are that: (1) children come to communicate because they are interpreted as communicating; (2) for an accurate picture of language development to be achieved, topic types initiated by children must be accounted for; and (3) the emergence of topic types accompanies the emergence of the appropriate communicative behaviors to express these topics. Therefore, in asking whether means of expression or topic type come first, the question of the relationship between emerging forms and functions is raised. A solution to the form/function or expression/topic question points to function preceding form in some cases and form preceding function in others. Adult interpretation of children's communicative behavior is important in both types of development. (JK)

Descriptors—\*Child Language, Cognitive Development, Communicative Competence (Languages), Comprehension, Discourse Analysis, Error Analysis (Language), \*Language Acquisition, Language Research, Language Skills, Linguistic Competence, \*Narration, Preschool Children, \*Time Perspective, Vocabulary Skills

Forty-three children, 2;11 to 3;6, described six familiar activities: making cookies, going to the grocery, having a birthday party, going to a restaurant, getting dressed, and having a fire drill. They described each event three times. The descriptions were elicited by initially asking "What happens when..." or "What do you do when..." and then providing non-directive probes such as "Can you tell me more?" and "Anything else?" Reviews of the children's descriptions indicate that the request for description of events divorced from the immediate context elicits a sophistication in temporal structure and relational vocabulary that is often not accessed in either experimental or free-play settings with preschoolers. Performance in such settings can considerably expand what is known about preschoolers' cognitive and linguistic abilities. The baseline competency demonstrated in these settings can provide the foundation for more controlled research that attempts to establish how experimentally based competency gradually develops into the more abstract, decontextualized knowledge that characterizes adults' understanding of relational terms. Identifiers—\*Count Nouns, \*Mass Nouns

The count/mass distinction is often considered to be a semantic one because it distinguishes those nouns that refer to countable things from those that refer to non-countable things. However, exceptions indicate that semantic properties alone are not sufficient to determine noun sub-categorization. Therefore, such sub-categorization must be defined syntactically for the mature language user. This syntactic definition is couched in terms of distributional properties such as privileges of occurrence within a set of syntactic contexts. Membership within a category or subcategory is defined over a set of linguistic environments into which lexical insertion of that category is permissible. The acquisition of a set of selection rules on quantifiers is examined that invokes the count/mass distinction and serves to partially define the distinction itself from a syntactic distributional viewpoint. Results of an experiment are presented that suggest certain overgeneralizations over this set of syntactic contexts. The results illustrate that in acquiring the count/mass distinction, children must learn that: (1) mass nouns may not be pluralized; (2) certain quantifiers exclusively select for either count or mass nouns; and (3) certain quantifiers take singular count nouns even though plural quantities are being referred to. The Acquisition of Copula and Auxiliary "be"

Forms.

Stanford Univ., Calif. Dept. of Linguistics.

Pub Date—Nov 81

Note—8p.; In its Papers and Reports on Child Language Development, Number 20, p78-83, Nov 1981.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Child Language, Discourse Analysis, \*Language Acquisition, Language Research, \*Linguistic Theory, Longitudinal Studies, \*Oral Language, Preschool Children, Sentence Structure, Speech Communication, \*Syntax, Verbal Learning, \*Verbs

The acquisition of the copula and auxiliary "be" forms of "am," "is," and "are" was studied with 16 children. Spontaneous social speech samples were obtained from each child. One child's speech was sampled for approximately one hour per week from age 2;5 through 4;0, and for one-half hour per week from age 4;1 to 5;0. A second child's speech was sampled for approximately one hour per week from age 1;11 to 3;6. A weekly one hour sample of speech was obtained from the other children for six consecutive weeks. The speech samples were analyzed for omissions, incorrect uses, and correct uses of "be" allomorphs in specific sentential frameworks (e.g., copula "are" following "they" and preceding a prepositional phrase in the declarative). Results include the following: (1) In the acquisition of a "be" allomorph, the predominant pattern was one in which children learn to use the allomorph in quite specific contexts. This was true both for the child's initial uses of the form and the subsequent stable acquisition of the form. (2) Children do not seem to learn all members of the copula or the auxiliary "be" class simultaneously; in addition to varying patterns of initial uses, differences were found in regard to age of final acquisition (i.e., 90 percent correct usage in obligatory contexts). (3) Copula "be" forms tended to be earlier stable acquisitions than auxiliary "be" forms. (4) Most "be" forms were acquired (90 percent criterion) in declarative contexts before yes-no question contexts and "be" forms also tended to be acquired (90 percent criterion) in yes-no question contexts before "wh" contexts. Descriptors—Case (Grammar), \*Child Language, Comprehension, Concept Formation, Generalization, Grammar, \*Language Acquisition, Language Research, Logical Thinking, Preschool Children, \*Sentence Structure, Structural Analysis (Linguistics), \*Syntax, Verbal Learning, \*Verbs

Preschoolers' ability to understand grammatical relations in passives and to generalize was studied using animate referents. Three- to five-year-old children were taught to produce passive sentence descriptions of events in which animacy of the actor and acted-on object were varied. After pretesting to determine passive sentence comprehension, the experimenter used toys to enact 32 actor-plus-action-plus-object events, and described 20 events in passive sentence form. Then the child was asked to describe the event without benefit of the experimenter's example. Three types of toys were used to enact the events: (1) animate (e.g., girl, horse); (2) dynamic inanimate (e.g., train, ball); and (3) static inanimate (e.g., house, piano). Training conditions were as follows: animate actors acted on dynamic inanimate objects; dynamic inanimate actors acted on animate objects; and the acted-on objects were static inanimate things. It was found that when the referents in the event coincided with particular word order propensities, production preceded comprehension. Children who were unaware that the grammatical subject and object in passives correspond to the underlying object and subject still produced sentences which observed these relations. Apparently, a linguistic rule is not always the base for correct word order. It is suggested that the discrimination between animate and inanimate actors that emerged may not involve the entity's capacity for independent action, but may involve the child's naming a referent in preverbal or in postverbal position according to the referent's relative salience. Icons and Morphemes: Models of the Acquisition of Verb Agreement in ASL.

Stanford Univ., Calif. Dept. of Linguistics.

Pub Date—Nov 81

Note—10p.; In its Papers and Reports on Child Language Development, Number 20, p92-99, Nov 1981.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Child Language, Deafness, Discourse Analysis, \*Language Acquisition, Language Research, \*Linguistic Theory, Morphemes, Morphology (Languages), Parent Child Relationship, Preschool Children, Sentence Structure, \*Sign Language, Syntax, Verbal Learning, \*Verbs

Identifiers—\*American Sign Language

Two possible iconic models of the acquisition of verb agreement in American Sign Language (ASL) are developed and contrasted with a third, morphological account of the acquisition of this aspect of ASL. Additionally, data from spontaneous conversation of deaf children who have deaf parents are considered to test these three models. An iconic model of the acquisition of ASL assumes that the child is capable of making a direct comparison between the form of a sign and the form (or characteristic motion) of its referent. Furthermore, the ability to make this comparison facilitates comprehension or production of iconic signs. Either mime or spatial analogy may facilitate the acquisition of ASL verb agreement. Alternately, typological features may influence the acquisition of both signed and spoken morphologies. Predictions based on the three models were tested against longitudinal data from two deaf children of deaf parents. The subjects were each videotaped on a monthly basis, and detailed transcriptions were made of all contexts where the grammar of ASL required that a verb agree with the real-world location of an argument. All linguistic contexts which permitted optional agreement with a second argument also were examined. Age at which verb agreement was acquired, use of single-indexing and double-indexing, and the use of citation forms were assessed. The data indicate that the acquisition of verb agreement in ASL is neither early nor error-free. The data strongly support the morphological model: verb agreement was not acquired until after the third year, single-indexing was preferred, and the citation forms of verbs were used inappropriately before verb agreement was acquired. The question of whether children's accentuation strategies are determined by the linguistically established context was studied. A second investigation determined whether the difference between distinctive and nondistinctive information is marked by the speaker's accentuation, focusing the listener's attention upon the crucial information. In the first study, 9 adults and 30 three- to six-year-old German children produced descriptions of sets of four objects. Children did not use accentuation to mark information that was crucial for the listener to differentiate the target from all other relevant alternatives. Children's accentuation was dependent on what had previously been said, but not on the distinctiveness of the information with regard to the context of referential alternatives. The second study asked the question of whether distinctive, as opposed to nondistinctive, information is systematically stressed when there is no distinction present between given and new information. Accentuation of one of two modifiers was found to be exclusively dependent upon its syntactic position, irrespective of whether it was distinctive or nondistinctive information. Neither experiment supported the assumption that children or adults use accentuation to mark that information that is crucial for the listener's identification of the referent. (SW)

Descriptors—\*Abstract Reasoning, \*Adjectives, \*Child Language, Cognitive Development, Comprehension, \*Concept Formation, Discourse Analysis, Infants, \*Language Acquisition, Language Research, Linguistic Theory, Longitudinal Studies, Mathematical Concepts, Mothers, Oral Language, Parent Child Relationship, \*Semantics, Verbal Learning

The range of meanings of "big" and "little" that mothers and their three children under age two expressed in relatively natural communication situations was studied. Longitudinal data from transcripts of conversations of middle-class mothers and their children were analyzed along with diary records kept by parents of their children's use of size words for three months or longer. Size words included "big," "little," and "tiny." The distribution of uses for mothers and children were similar, indicating that children are exposed to and begin to use these terms in a variety of ways at a very early age. For both groups, at least half of the uses of "big" and "little" clearly referred to physical size or size relationships among objects. References to isolated objects were the most typical use for both groups. In addition, both mothers and children used whole phrases containing size words to comment on aspects of objects or situations that were not necessarily size-related. Despite their similarity to mothers, children appeared to be doing more than imitating input from others. The two groups were distinguished by their choice of size words. Mothers relied almost exclusively on "big" and "little" while children used a variety of terms. Evidence was found in support of integrating the exemplar and feature approaches that are used to characterize the acquisition of dimensional terms. The findings suggest that abstraction processes and the use of exemplars are closely intertwined in learning word meanings. (SW)

Sandner, Gerhard W. Wagner, Edith  
Vocal Communication with a Three-Month Old Baby.

Stanford Univ., Calif. Dept. of Linguistics.  
Pub Date—Nov 81

Note—10p; In its Papers and Reports on Child Language Development, Number 20, p116-123, Nov 1981.

Pub Type—Reports - Research (143)  
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Language, Discourse Analysis, Infants, Interaction Process Analysis, Intonation, \*Language Acquisition, Language Research, Mothers, \*Oral Language, \*Paralinguistics, \*Parent Child Relationship, Speech Communication, Verbal Learning

The ontogenetic development of human vocal utterances and their role in early interaction processes were studied with a three-month-old baby. Recordings were made of infant vocalizations in the home and the sounds were classified. During a five-minute segment between the mother and infant, the infant produced 59 utterances, 93 percent of which had features typical of flats (i.e., having a fundamental frequency that is smooth, comparably low, approximating pure harmonic tones, and having a similarity to vowels). A computer program was developed to plot the fundamental frequency, intensity, and time pattern of the vocal utterances of both partners. The amount of turn-taking suggests that the infant not only produced a series of vocalizations but actually engaged in a kind of conversation. Those phrases that the baby responded to had a common feature: they exhibited a very similar pitch contour. Fifteen out of a total of 18 utterances with a rising contour were responded to by the infant during a segment. There was a surprising conformity between the utterances within each episode: in some cases the mother imitated the baby and in others the baby was able to copy the pitch contour of the mother's voice within certain limits. Reciprocity, imitation, and the use of bell-contours appeared to be important to the success of the exchange. The mother intended to talk with the baby and used infant-oriented speech, which the baby responded to within a few seconds. It is suggested that the rising contour vocalizations were used by the mother as turn-markers, strongly compelling the infant to respond. (SW)

Strage, Amy A. And Others

"Is That Any Way to Talk to Your Friend?": Mothers' Input and the Development of Role-Appropriate Discourse among Peers.

Stanford Univ., Calif. Dept. of Linguistics.  
Pub Date—Nov 81

Note—10p; In its Papers and Reports on Child Language Development, Number 20, p124-132, Nov 1981.

Pub Type—Reports - Research (143)  
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Language, \*Communication Skills, \*Discourse Analysis, Interaction Process Analysis, Interpersonal Competence, \*Language Acquisition, Language Research, Mothers, Parent Child Relationship, \*Parent Influence, Peer Relationship, Play, Preschool Children, Social Behavior, Socialization

The way that mothers' input assists children with the use of their linguistic resources for negotiating peer interaction was studied. Two two-year-old girls and their mothers were videotaped once a month for eight months while the foursome met at a weekly playgroup. The mothers' language was analyzed in terms of the following questions: (1) Does the input to the children relate to their potential or actual involvement in a joint activity? (2) Do they suggest that one child invite or join the other? (3) What do they say during the course of an established joint activity that threatens to fall apart? (4) When the children do not pick up on the first cues from the input, what modifications do the mothers make in reiterating their suggestions? (5) Given that the mothers intervene to support the joint activity, do they withdraw and steer the peers to each other, and if so, how? The mothers were found to make explicit the means for and advantages of soliciting and acknowledging cooperation. This was particularly obvious in the breakdown of the input as a function of child familiarity with the activity. The mothers stressed establishing shared frames to permit mutual comprehension. It also was found that mothers' input can serve to teach their children how to respect the more open-ended discourse demands of joint

peer activity, when to ask, when to tell, and how to converse about what they were doing. Therefore, the input can be seen as a socialization vehicle for helping the child learn to use her existing formal resources to mediate social interaction. (SW)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Language, Discourse Analysis, Infants, \*Language Acquisition, Language Research, \*Linguistic Theory, \*Oral Language, Phonetics, \*Phonology, Semantics, Speech Communication, \*Surface Structure

Identifiers—\*Homonyms  
Sound-meaning correspondences produced by an infant were studied under conditions of early rampant homonymy (i.e., production by a very young child of a small set of noncontrastive surface forms or phonetic sequences to refer to objects/events that on the basis of adult standards require the production of numerous contrasting surface forms). The speech of a male twin (H), who was 1;4 years at the outset of the initial three months of evaluation, was assessed. Data were drawn from a 10-month study of the infant, his fraternal twin, and their mother. The data were analyzed in the framework of word-based phonology and phone class analysis. Phone classes for H were restricted to voiced bilabial (/b/ and /m/), alveolar (/d/), and velar (/g/ and /h/ or /k/) sound segments. H's productions were restricted to a point where high levels of homonymy would be expected. Three referents (e.g., cookie, book, and apple), which at first were produced with distinctive and resolvable surface forms, coalesced and took on a common surface form. H's tolerance for homonymy, therefore, could not be tied to the absence of resolvability. Attempts were made to analyze a representative selection of H's homonymous forms on the basis of both phonetic substance and referential substance. It is suggested that a charge of relative incompetence at the phonetic level does not adequately explain homonymy. Analyses that link homonymy at least in part to the phenomenon of overextension demonstrate that a young child with few productive surface contrasts is capable of controlling more of the ambient language than is reflected in his first linguistic performance. (SW)

The status of foreign language in the elementary school (FLES) is discussed in an attempt to dispel the myth that there are few successful FLES programs in the U.S. Results of an eight-state survey show that 18% of the responding elementary schools report that they do teach foreign language. Descriptions of eighteen innovative programs confirm that there are highly successful programs of the following types: (1) language immersion (programs in which most of the elementary school classes are taught in the foreign language); (2) partial immersion (programs in which up to 50% of the classes are taught in the foreign language); (3) curriculum integrated foreign language instruction (programs in which the daily language class is conducted in the foreign language and is supplemented by additional culture and language study in the regular class-

room); (4) FLES (programs that have foreign language from one to five days a week and emphasize oral communication); and (5) foreign language experience (FLEX) (programs that aim at exposing children to basic concepts of foreign language). Recommendations for elementary foreign language programs cover the following topics: definition of goals, articulation, language assessment, program administration and cost, parent and administrator support, resource materials, teachers, and supplemental classroom activities. The literature review covers optimal age for learning a foreign language and program design and evaluation. An extensive bibliography including curriculum resource guides completes the volume. (NCR)

Identifiers—Washington  
State-funded programs in Washington for providing vocational and English-language training for Indo-Chinese refugees were evaluated. The evaluation was conducted by means of a survey and site visits. Although data show both strengths and weaknesses, programs share some common positive features: (1) dedication of program staff, (2) use of a wide range of materials and services (i.e., eclecticism), and (3) provision of services beyond those stipulated (resulting in orientation as well as education). In many institutions, the programs receive special assistance and consideration. The data strongly suggest that the programs have a positive effect on the students' efforts to learn English and make their way in the American society and economy. Although there is room for improvement, there is no doubt that a program of vocational and English-language instruction is required. Recommendations to Superintendent of Public Instruction are included. The evaluation instruments are appended. (JB)

A FLES Handbook: French, Spanish, German, Grades K-6. Third edition, revised.

Winthrop Coll., Rock Hill, S.C.  
Pub Date—79

Note—102p.

Language—English; French; German; Spanish

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Classroom Techniques, Cultural Education, Elementary Education, \*Fles, French, German, \*Second Language Instruction, Spanish, Teaching Methods

Classroom activities for foreign language in the elementary school (FLES) are presented. The languages covered are French, Spanish, and German. Suggestions are offered for use of repetition in the classroom for reading and writing, for testing, and for creating lesson plans. Classroom techniques such as dramatics, songs, and team competition are covered. French, Spanish, and German culture are treated in individual chapters. Vocabulary and grammar structure are dealt with. Finally, chapters are devoted to teaching the following notions: names, numbers, clocks, colors, clothing, calendar, parts of the body, commands, animals, foods, and house and family. (JB)

Identifiers—British Columbia

Guidelines for secondary French instruction are presented in an articulated system of six levels. The articulation is flexible enough to allow for different degrees of preparation in elementary school, and for different degrees of achievement and preparedness at the end of high school. Learning outcomes are presented for each level in terms of attitudinal, linguistic, and cultural goals. The linguistic goals are further subdivided according to basic skills (speaking, listening, reading, writing). A scope and sequence chart is attached as a means of standardizing the order of acquisition of grammar and vocabulary. Some brief philosophical considerations of second language instruction are appended. (JB)

Identifiers—Georgia

In addition to presenting detailed guidelines for foreign language curriculum development in Georgia public schools, this guide includes illustrations of a variety of classroom approaches to meeting course goals. The overall rationale for the guide is to bring programs and curricula at all levels in line with both societal needs for language-skilled adults and with the benefits, both personal and professional, students can derive from possessing language skills. Programs are conceived as falling under foreign language in the elementary school (FLES), middle-school programs (grades 5 to 8), and secondary school programs. These last receive the greatest emphasis. Specific educational strategies focus on skill development, teaching culture, evaluation (testing), and classroom and curriculum management. A great deal of emphasis is laid on career education. Ample lists of resources are scattered throughout. In addition to the model instructional materials in the body of the guide, an appendix presents samples of course outlines, teacher effectiveness aids, and various daily instructional units. French is the language most emphasized, followed by Spanish and German. (JB)

These materials illustrate the ideas presented in the "Guide for Foreign Languages in Utah." Learning activities, materials, and evaluation procedures have been written to help the language teacher who has never had a methods course, as well as the experienced teacher who is searching for new ideas. The materials begin with a basic unit similar to those found in a methods textbook, but the main part of the unit is outlined with detailed instructions as to what the teacher must do to help the student develop the language skills described in the unit objectives. Model lessons in elementary, intermediate, and advanced placement French are presented as a means of illustrating practical applications of teaching goals and techniques outlined in the Utah curriculum. The lesson plans present the instructional objective, the lesson content, and the methodology

as well as cross references to the course of study. In addition to the model lessons, a special resource section is included to help teachers prepare to teach an advanced placement class in French language or literature. (Author/JB)

Descriptors—Adult Education, Classroom Techniques, \*Conversational Language Courses, \*Discussion (Teaching Technique), \*English (Second Language), Postsecondary Education, \*Second Language Instruction, \*Speech Instruction

Fluency practice in the English as a second language (ESL) classroom is the subject of this book. Ways are suggested in which students may be induced to talk in the classroom using the vehicle of discussion. Part 1 isolates and generalizes a number of elements that are essential for a good discussion, such as interesting topics, group work, role play, the task as focus, and organization of process. Part 2 consists of practical examples of discussion activities based on exercises that have been found effective in actual classroom practice. These include brainstorming activities such as guessing games, organizing activities including comparing and combining, and compound activities such as composing letters and conducting debates and surveys. Although some of the ideas are useful with beginning students, most have greater applicability to intermediate and moderately advanced students. (Author/JB)

Descriptors—\*Cultural Education, Curriculum Development, \*Educational Trends, Elementary Secondary Education, \*Global Approach, Material Development, \*Second Language Instruction, \*Teacher Improvement

The demand for cross-cultural understanding and a global approach to education can be met only by introducing culturally and globally oriented content into instruction across a spectrum of subjects. While each subject area defines its own contribution to enhancing awareness of other cultures and of the interconnectedness of learning and the world, foreign language teachers are in a unique position to focus on cultural studies. The introduction of a global element into the foreign language classroom is most effective when the teacher is in dialog with teachers of other subjects; this helps assure complementarity of instructional content. Emphasis on global education will enhance professional development, in that teachers will be active co-learners with their students and will require new skills. The direction in which education is headed, in conjunction with the need to fit in the global component, points to a complete revision of curricula and instructional materials over the next decade. The teachers who want to begin a global emphasis immediately can examine their approach to cultural education according to several criteria. (JB)

Descriptors—\*Cultural Education, Elementary Secondary Education, \*Ethnic Studies, Global Approach, \*School Community Relationship, Second Language Learning, Uncommonly Taught Languages

Identifiers—\*Ethnic Schools

The thousands of ethnic mother-tongue schools in the United States represent an untapped resource for increasing multicultural awareness and interest in second language learning among American students. The ethnic schools are mentioned in the report of the President's Commission on Foreign Language and International Studies and in its background papers, but little in these documents goes beyond recognition of the schools' existence. Milwaukee and Chicago offer just two examples of cities with extensive ethnic and second-language programs. Ethnic schools encourage tolerance of diversity insofar as they represent an enrichment of and not a withdrawal from American society. Cooperative undertakings between the schools and the greater society will benefit from agreement on proficiency and achievement standards. Conventions and symposia provide forums for contact between school personnel and representatives of the educational community as a whole. Ethnic schools can provide a community with cultural activities, as well as with an alternate source of academic credit. The commonly taught languages are not slighted by ethnic studies, since the latter serve to render second language instruction a matter of course. (JB)

Descriptors—\*English (Second Language), Realia, \*Refugees, Second Language Instruction, \*Second Language Programs, Teaching Methods

Identifiers—\*Hmong People, Kentucky (Berea)

The instructional program in English as a second language (ESL) followed by a family of 12 Hmong refugees in a small midwestern town is described. Eight of the younger members of the family met for one hour three times each week. Instruction was under the guidance of two teachers, thus allowing for individual help. Other volunteers assisted from time to time. Course content focused largely on natural situations; realia were used almost constantly. Currency was used to introduce counting as well as principles of money management. Cuisine and realia lent themselves to representing a variety of objects, shapes, and physical characteristics. Class members themselves and teachers became realia in exercises in weights and measures, giving directions, activities with the hands, and personal names. Although there was some adaptation of textbook material, the reliance of texts on urban situations forced the extensive use of personally

developed word lists. A list of useful addresses and materials is appended. (JB)

Descriptors—\*Art Education, Classroom Techniques, Postsecondary Education, Secondary Education, \*Second Language Instruction, Teaching Methods, Visual Aids, \*Visual Arts

In beginning and intermediate foreign language instruction, art has been neglected both as an instructional aid and as enrichment. Squeezed out by popular culture, the contemporary scene, and a perception of elitism, the visual arts nevertheless offer a rich resource in acquainting students with both the depth and the breadth of another culture. The careful selection and manipulation of visual material lends itself to surprising diversity in both content and methodology of instruction. Many techniques, some of them already familiar to most foreign language teachers, are possible: art criticism in miniature, construction of tableaux (challenging the "director's" verbal skills), various question-and-answer games, descriptive writing and speaking assignments, and role-playing in the world of art are all among suggested class activities. (JB)

Descriptors—\*Literary Criticism, \*Poetry, Postsecondary Education, Secondary Education, \*Second Language Instruction, Teaching Methods

Although poems have fallen into disuse as vehicles of second language instruction, they are by no means as inaccessible as many think. A teacher's choice of poems for classroom use will begin with a consideration of learning goals; these govern choice of tone, subject, point of view, and the like. Variety is important, and several varied poems by the same author would be ideal. Class discussion of poems begins with a discussion of basic tools of analysis (point of view, language, theme, structure, and literary ambience). Garcia Lorca's poem "Las seis cuerdas" provides an example for analysis. Form, function, and structure are discussed, and the poem provides in addition opportunities for examining vocabulary and grammar. After an analysis, students may be asked to write a poem of their own. If

poems are read aloud and memorized, and if quizzes are administered based on poems, then the study of poetry reinforces all language skills. A selected bibliography is appended. (JB)

Descriptors—\*College Second Language Programs, English (Second Language), French, German, Higher Education, \*Interpretive Skills, Second Language Instruction, Spanish, \*Translation

Identifiers—\*Kearney State College NE

The undergraduate translation curriculum at Kearney State College, Nebraska, is described. The program treats translation as an academic discipline as well as a vocational skill. Students are taught the theory and practice of translation and interpretation in their choice of German, French, or Spanish. Two semesters are spent on translation followed by one on interpretation. The second semester of translation deals with literature. The sequence of courses also serves the purpose of developing the second language skills of students to the point of thorough proficiency; the curriculum provides as much basic language training as a more traditional approach. Students whose native language is French, German, or Spanish have found that the program accelerates acquisition of English proficiency. Graduates of the program have for the most part found jobs and careers related to their language training. The program has been successful in part because: (1) the departments of English, foreign language, and speech are under the direction of one dean; (2) the faculty is highly qualified to teach translation; and (3) a unique resource center has been created. (JB)

Document Not Available from EDRS.

Descriptors—\*Body Language, French, German, Nonverbal Communication, \*Second Language Instruction, \*Spanish, Teaching Methods

Because the nonverbal component of communication is culture-specific, effective communication in a second language requires knowledge of the body language typical of speakers of that language. For example, Americans and Hispanics have a different sense of proxemics, Hispanics favoring closeness during conversation. Instruction in nonverbal communication can be introduced into the classroom, beginning with inventories of body language that are available for French, German, and Spanish. After determining which gestures students are to learn, practice in them must be included in the course materials. Classroom practice may involve role playing. Kinetic and proxemic behaviors are paired with the corresponding verbal components as the latter are introduced. Students' recognition and control of nonverbal patterns should be evaluated via student-prepared mini-dramas or other activities. A catalog of kinetic and proxemic behaviors for beginning Spanish students is appended. (JB)

**Identifiers—Minneapolis Public Schools MN**

In response to requests from students for information about the role of women in target-language cultures, a curriculum was developed by the Minneapolis public schools for women's studies in the high school foreign language classroom. The focus was on women in French, German, and Spanish-speaking countries. The role of women in these cultures has been neglected both by the cultures themselves and by American textbooks. Each of the curriculum packets in the three languages provides users with student materials and teacher guidelines. One section of the materials is devoted to sexism in language; another consists of biographies of famous women both in English and in the target language. These materials are represented here by brief extracts. Finally, a short slide-tape program to accompany the materials was produced. (JB)

**Document Not Available from EDRS.**

Descriptors—Communicative Competence (Languages), \*Notional Functional Syllabi, \*Second Language Instruction, Teaching Methods

A notional-functional syllabus is a set of materials to be learned by students of a second language. While learning to perform communicative activities, students practice language structures that refer to certain situations and ideas (notions). The language structures are organized to express different interactions (functions) that are possible for different effects. These functions might be expressing sympathy, disagreement, or concern. Structures are organized in a gradation to reflect different levels of interactions (registers), from polite to less polite, for example. In Europe, notional-functional syllabi have been created to meet the specific language training needs of certain specialists, as well as to establish a threshold level of second language proficiency. Harlow, Guntermann, and Valdmann have dealt with applications of this approach to the educational situation in the United States. A workshop was conducted to help language teachers identify students' communicative needs as a guide for choosing language structures. This involves an inventory of students' roles as communicators within and outside the classroom. The traditional accoutrements of second language instruction (textbook materials, question answering) can be brought into a context of communicative function. In short, it is not necessary to wait for full-blown syllabus development for American teachers to begin to take advantage of notional-functional concepts. (JB)

Descriptors—Cooperative Planning, Departments, High Schools, \*Language Enrollment, \*Program Improvement, \*Second Language Programs

Identifiers—\*Lyons Township High School IL

The example of Lyons Township High School in Illinois is used to illustrate possibilities for increasing enrollments in high school foreign language departments. At a time of declining overall enrollment, the foreign language enrollment at Lyons increased from 33% to 55% of the student population. The first step in the process was image building, which involved assessing the student image of foreign language study as well as the expecta-

tions of parents. A generally negative image was counteracted with a variety of special activities with a public relations component (international dinners, career days, and the like). Textbooks, courses of study, and methodology were examined in a process of curriculum reform. Intradepartmental meetings became in-house inservice sessions, while communication with other departments was also improved. Ability grouping was instituted as a form of individualization. Weighted grading offered an added incentive for students to enroll. At the end of the period of growth, six languages were established in the curriculum, as well as courses in etymology. The revitalization process was concluded with an evaluation, which in turn has led to ongoing renewal. The crucial feature in the success of this effort has been involvement of a wide spectrum from the school and community, and continuing cooperation among all participants. (JB)

Descriptors—Course Content, French, German, Postsecondary Education, \*Second Language Instruction, Spanish, Teaching Methods, \*Writing (Composition), \*Writing Instruction

A text-editing approach to composition in the foreign language classroom is set forth. In a 15-week composition course meeting three times each week, students prepare a weekly composition that they will revise after an in-class text-editing session involving several student papers. The third day is devoted to grammar work. Criteria for evaluating student compositions are set forth. Progress in writing skill is enhanced by careful attention to prose style, and students are encouraged to write pastiches. Finally, students are required to keep a journal. Testing and grading are discussed, and situations commonly encountered by teachers are dealt with. Appendices include suggestions for or samples of personal assessment statement, course introduction for a basic French composition course, grammar mid-term, student evaluation of course, prose style analysis checklist, grammar review sheet, sentence-embedding exercises, and tests. Samples of student work (composition outlines, prose style analyses, and pastiches) are presented, most with the actual text-editing corrections of the teacher. The paper concludes with suggested texts for pastiche exercises. (JB)

Identifiers—\*Corporate Support

Results of a national study of corporate giving to

higher education give reason for optimism in future years. Highlights include: in national estimates, dollar amounts were at a new high at \$715 million, a 17.2 percent increase over 1977; the biggest three-year gain was seen since 1952-55; however, no gain was seen in the percentage of pretax net income given to education, and there was little change in education's share of total corporate contributions. The survey results themselves show that: funding of company foundations participating in the survey amounted to \$419 million, an increase of 46.9 percent over 1977, with foundation grants totaling \$278 million, a 15.2 percent increase; capital support grants as a share of corporate support dropped from 15.1 to 13.7 percent in the year, but unrestricted operating grants as a share of corporate support rose from 16.9 to 18.5 percent in that period. Matching gift programs accounted for 10.7 percent of the 1978 total, while departmental and research support were 17.7 percent and student support rose in dollar amount but fell in percentage of total contributions. Notes on the Internal Revenue Service's tabulation of total corporate contributions and on report definitions and biases are appended. (MSE)

Descriptors—\*Career Ladders, College Faculty, Comparative Analysis, Doctoral Degrees, Educational Background, Equal Opportunities (Jobs), \*Faculty Evaluation, Females, Higher Education, Males, Noninstructional Responsibility, Professors, Research Opportunities, Salary Wage Differentials, Scholarship, \*Sex Discrimination, \*Teacher Promotion, \*Women Faculty

The status of women faculty in colleges and universities is considered. While there has been increased hiring of women on college faculties, women faculty members still lag behind men in rank and salary, even when differences in fields, institutions, and postdoctoral experience are considered. Women presently constitute about 24 percent of the full-time instructional faculty in higher education. Most of the growth in the proportion of women faculty can be attributed to the hiring of individuals under the age of 30 to fill untenured positions. Only 46 percent of women faculty have tenure, compared to 72 percent of men faculty. Women faculty, on the average, receive 17.5 percent less in salary. One of the reasons given for the low percentage of women gaining tenure and the declining number of women full professors is the relatively low number of women who received doctorates before 1970. Once appointed to tenure-track positions, women faculty climb the academic ladder more slowly than men. Since teaching, research, and institutional service are all important factors in the evaluation of faculty for promotion and salary increases, it is necessary to determine if male and female faculty differ in the amount of time they spend doing those things. There is, for instance, a considerable difference between the teaching loads of full-time male and female faculty: women more often are involved in teaching. The evidence about the publication rates of male versus female faculty seems conflicting; however, even when the publication rates of academic women and men are identical, men are promoted more rapidly. The individual's professional visibility and service to the institution as factors often considered for advancement also are addressed. (SW)

**Identifiers**—Sloan Commission on Government and Higher Education

Issues pertaining to increasing government regulation of higher education, monetary and nonmonetary costs of such regulation, and court cases and legislation that illustrate the academic autonomy versus governmental interference conflict are considered in this book by a circuit judge. It is suggested that although colleges and universities have been involved in governmental regulations and court suits in the 1970s, they have fared well, especially when their dependence on governmental agencies for funding is considered. It is claimed that the criticism that the implementation of federal regulations is draining schools of too much money has not been substantiated. However, no one is sure how much federal regulation costs. It is suggested that as a critical element in society, education cannot expect to continue to be left completely autonomous, particularly since educational institutions have contributed to social injustices. One approach to determine the impact of governmental regulations is to study court opinions that have faced the conflict between the government's desire to implement public policies and the academicians' desire to remain autonomous from governmental interference. Significant legal developments in the following areas of special concern to educators are reviewed: employment discrimination, procedural due process for faculty, financial exigency as a ground for dismissal, procedural due process for students, Title IX, and the Rehabilitation Act of 1973. It is concluded that these developments demonstrate that the doctrine of academic abstention has remained substantially intact. It is predicted that in the next decade the disruptive effects of external regulations will likely decrease. Views expressed by the Sloan Commission on Government and Higher Education are considered. A bibliography is appended. (SW)

**Identifiers**—\*University of Virginia, Virginia (Albemarle County), \*Virginia (Charlottesville)

The economic impact and the cultural and community service impact of the University of Virginia on Charlottesville and Albemarle County were assessed. The economic activity was measured in terms of business volume, personal income, and employment, while the cultural and community impact of the university was measured by residents' use of facilities and events. It was found that in 1979-80, the University of Virginia, directly or indirectly, accounted for over \$307 million of the Charlottesville-Albemarle business volume. Through expenditures by staff, students, and visitors, additional indirect expenditures also resulted. The data were developed through the use of an adaptation of the models developed by John Caffrey and Herbert H. Issacs, and a schematic representation and description of the models are appended. The university is the largest employer of the area, and it is estimated that the university helped to generate personal income of nearly \$231 million in the area. A survey of busi-

nesses and residents indicated that the university's events and facilities available to the public could be categorized as educational, research, community service, and public events. The educational category included continuing education courses, seminars, and lectures, while research functions include use of the libraries, research and publications developed by the university, and consultations by faculty members. The community service category included medical services and career placement. The heaviest usage by both the business community and residents was for athletic, cultural, and social public events sponsored by the university. The survey methodology is described, and sample questionnaires are appended. (SW)

Wallace, H. Lew. And Others  
**An Interdisciplinary Mastery Learning Program for "High-Risk" Students.**

Pub Date—Apr 80

Note—8p.

**Pub Type**—Reports - Descriptive (141)

**EDRS Price - MF01/PC01 Plus Postage.**

**Descriptors**—\*Achievement Gains, \*Basic Skills, College Students, \*Developmental Studies Programs, Experimental Programs, Higher Education, \*High Risk Students, History Instruction, Interdisciplinary Approach, Library Skills, \*Mastery Learning, \*Study Skills, Writing Skills

**Identifiers**—\*Northern Kentucky University

A project was undertaken by three faculty members at Northern Kentucky University (a history teacher, a reading specialist, and a composition teacher) to apply their own experiences and the research of others into a systematic and comprehensive mastery learning program for developmental classes in the spring of 1980. The program was designed to help students read more efficiently, take intelligent notes, take essay and comprehensive exams, do independent problem-solving library research, and produce high quality English themes. The program was to be interdisciplinary in approach and content, and assignments were developed specifically to meet these general objectives. Summative evaluation was based on a comprehensive history examination, the results compared with those of a related but nondevelopmental class; essays read and evaluated by instructors who did not know which class they were from; evaluation of library exercises by outside instructors; and a critique by the students, a committee of faculty most involved in developmental education, and the Teaching Effectiveness Task Force on campus. Problems encountered included the fast pace of the course (with some loss of students) and imposing the course schedule on evaluators outside the program. However, results showed the highest scores registered by the high-risk students, and the class average was considerably higher than that of the other class. Some students made dramatic gains, with half the class scoring in the 90th percentile. It is concluded that 17 of the 27 developmental students would have no trouble competing in composition classes, and at least nine could be expected to do above-average work. (MSE)

**Identifiers**—Clinical Laboratory Occupations, \*Kentucky

The Kentucky Council on Higher Education used

a federal grant to develop a statewide articulation system in six allied health disciplines, one of which is the Clinical Laboratory Sciences. An in-depth study of admissions procedures, transfer policies, and curricula at the eight state-supported higher education institutions as well as private, proprietary, and vocational-technical schools in the state was conducted. Transfer policy statements and mechanisms for converting credit hours are charted for each institution. Courses were grouped in seven categories, clock-hour averages were compared for the categories, and recommendations were made for structuring programs according to need for courses. The model articulated curriculum, to be adapted to each institution's needs, is charted and allows for articulation of clinical laboratory science courses at three program levels: one-year, two-year, and four-year programs. An ongoing articulation effort is recommended that would have three phases: (1) dissemination of information gathered and compiled in the study, (2) establishment of a central articulation information and coordination clearinghouse, and (3) articulation implementation and maintenance, with feedback to the second coordination phase. Vittetoe, Marie. Morris, Frances J.  
**Techniques and Strategies in Clinical Laboratory Science Education.**

Pub Date—May 81

Note—33p; Paper presented at the Annual Meeting of the American Society for Medical Technology (June 1981).

**Pub Type**—Reports - Research (143) - Tests/Questionnaires (160) - Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC02 Plus Postage.**

**Descriptors**—Allied Health Occupations Education, \*Clinical Teaching (Health Professions), Discussion (Teaching Technique), Educational Technology, Higher Education, Interpersonal Competence, Laboratory Procedures, Lecture Method, \*Medical Technologists, National Surveys, Occupational Surveys, Questionnaires, Student Teacher Relationship, \*Teacher Effectiveness, \*Teaching Methods

**Identifiers**—Clinical Laboratory Occupations

A mailed survey sent to faculty from 132 medical technology schools, 64 medical laboratory technician schools, and 58 certified laboratory assistant schools yielded 355 responses concerning most frequently vs. least frequently used teaching techniques and most effective vs. least effective teaching techniques. Information on where and how professional attitudes and human relations skills were taught was also obtained. The raw numbers results are reported in tabular form from which rank ordered lists have been generated. In general, the teaching techniques reported to be most frequently used and most effective are those methods that are efficient (e.g., lecture and discussion) and that involve a high degree of student/faculty interaction (e.g., demonstration with return and problem-solving). Techniques reported least frequently used and least effective were lecture only, self-instruction, and programmed learning. Professional attitudes and human relations skills are reportedly taught (1) in the clinical laboratory, (2) through specific course content, and (3) integrated throughout the program. Role models, lecture and simulations were given as ways in which these skills were imparted. The data from this survey will be subjected to statistical analysis and will be reported at a later date. It speculated that differences in techniques and strategies used in clinical laboratory education have changed with educational technology and that further advances will be noted due to cultural, sociological, technological, economic and societal changes in the future. On-going studies are recommended. The survey form is appended. (Author/MSE)

**Descriptors**—\*Administrative Organization, \*Administrator Role, Budgeting, Change Strategies, College Administration, College Role, Deans,

Faculty Recruitment, Governance, Higher Education, Leadership Qualities, Models, \*Organizational Effectiveness, \*Program Administration, \*Summer Schools

Identifiers—\*University of Nebraska-Lincoln

Organizational matters and strategies useful in developing more effective collegiate summer sessions are discussed, and examples of some productive strategies at the University of Nebraska-Lincoln are reported. Four elements of organizational structure in higher education considered are organizational environment, mission and goals, governance processes, and structure and management. Issues to be addressed in each of these categories are outlined. Three models of leadership/management based on the interrelationships between summer sessions and other parts of the organization are suggested: dependent, reactive, and proactive. The role of summer sessions in three areas is questioned: in determining course offerings, in faculty selection and recruitment, and in budget and student affairs. It is suggested that directors of college summer sessions look carefully at ways to strengthen the summer sessions position in relation to each of the four elements of organizational structure. Residence and Migration of College Students. Fall 1979.

Virginia State Council of Higher Education, Richmond.

Pub Date—Jun 81

Note—19p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*College Bound Students, College Freshmen, College Students, \*Declining Enrollment, \*Enrollment Trends, Full Time Students, Higher Education, In State Students, Migration, \*Out of State Students, \*Student Mobility, Student Recruitment

Identifiers—\*Virginia

The migration of students into and out of Virginia in the fall of 1979 was examined for first-time, full-time students enrolled as undergraduate (freshmen or transfers), first-professional, graduate, or unclassified. Overall, Virginia ranks eighth in the United States in terms of students migrating into the state. It is expected that between 1980 and 1985, Virginia's 18 to 21-year-old population will decrease by over 52,000 (12 percent) and that the number of public high school graduates will decrease by 11,000 (16 percent). The decline will affect the first-time freshmen enrollment, which in Virginia is 80 percent in-state students. The anticipated decline of 18-year-olds in Virginia is modest compared to the expected decline in states drawing large numbers of Virginia students. Out-of-state institutions operating in Virginia continue to enroll significant numbers of students (especially Maryland, New York, New Jersey, North Carolina and Pennsylvania), although several states are conducting recruitment programs to keep high school graduates in their home state institutions. In the fall of 1979, Virginia experienced a net in-migration of new students. If this trend continues, higher education in Virginia can expect to maintain enrollment levels at or better than national norms. It is suggested that if out-of-state student numbers decline, Virginia should begin a program designed to reduce the number of high school graduates who leave the Commonwealth for higher education. Hairston, Cressie Finney, Ed.

A Survey of Graduates of the University of Tennessee School of Social Work.

Tennessee Univ., Knoxville. School of Social Work.

Pub Date—Mar 80

Note—90p.

Pub Type—Reports - Descriptive (141) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Blacks, \*College Graduates, Education Work Relationship, \*Employment Patterns, Females, Graduate Surveys, Higher Education, Questionnaires, Relevance (Education), \*Salaries, Salary Wage Differentials, \*Social Work

Identifiers—\*University of Tennessee

Findings are reported of a survey of the University of Tennessee School of Social Work (UTSSW) alumni conducted during 1978, which sought to identify ways to improve the school's graduate program, to strengthen its ability to serve its graduates, and to develop further knowledge in the area of

social work manpower. The first paper, "A Descriptive Study of Graduates of the University of Tennessee School of Social Work," by Cressie Finney Hairston, is the general survey report and makes up the bulk of the document. The respondents, their work settings, and their views about educational preparation and work experiences are described. Responses of persons trained in the school's treatment specialization are compared with the responses of those trained in the administration and planning specialization. Implications for curriculum development are noted. In the second article, "Profile of 20 UTSSW Black Alumni," by Art Knighton, the respondents are examined to raise issues and identify areas for future research, including why there was such a low survey response among blacks and why there were no black alumni respondents working in social welfare administration and planning areas. "Employment Patterns and Salaries of Female Graduates of the University of Tennessee School of Social Work," by Claire F. Lowry, compares male and female employment patterns, administrative responsibilities and salaries. No clear indications of the changing status of women in social work were found. The survey instrument is appended. (Author/LC)

Identifiers—Mission Statements

Statistical profiles of Virginia public institutions, community colleges, and independent institutions are accompanied by brief statements of the institution's history, purpose, commitments to instruction, research, public service, and future development. Statistical data for each of the 39 public and 31 private institutions (1977-1978) include the following: enrollments, academic degree programs, physical facilities, degree-granting levels, institutional organization, institutional operating and capital outlay appropriations, and expenditures. Enrollment data in tabular form include: total enrollment; enrollment by age, level, sex, and race; actual and projected enrollment; admissions applications by level; noncredit registrants; and percent of headcount enrollment by county. Other statistics include tenure of full-time instructional faculty, credit hours by discipline, credit hours by level, degrees conferred, direct cost per credit hour, expenditures, sources of revenues, approved degree programs, degree programs approved for initiation in 1980-82, and research expenditures by discipline. Duties of the State Council of Higher Education that affect the institutional statement of mission are briefly described in the introduction. (CC)

Identifiers—\*Mission Statements

Virginia's higher education system is reviewed in a state report that provides mission narratives from

each of the Commonwealth's state-supported and independent institutions. After a statewide statistical profile, the following issues are discussed: enrollment issues, the emerging role of Virginia's urban universities, teacher education programs, higher education finance in the 1980s, future support for research, and off-campus credit courses and programs. Factors that will influence higher education and the continued development of Virginia's colleges and universities are identified, including: (1) the period of generally stabilizing enrollments, which should be used to consolidate the resources; (2) unnecessary growth and duplication, which can be diminished by reducing expenditures for academic programs with saturated labor markets and by shifting funds and staff; and (3) the rejuvenation of the liberal arts and sciences into energy research and new careers. It is shown that Virginia ranks 22nd in appropriations per capita for higher education but has recorded the 11th greatest gain in appropriations over a ten-year period; average faculty salaries at state-supported colleges and universities are still generally below the U.S. average; and the state-supported system has added almost 70,000 students since 1974. For each of the 39 state-supported and 31 private institutions, information is presented on: its history and development; purpose; extent of the institution's mix of instruction, research, and public service; and future directions to 1990. Descriptors—Associate Degrees, Bachelors Degrees, College Graduates, \*Computer Science Education, Data Processing, \*Demand Occupations, Doctoral Programs, Geographic Distribution, Graduate Study, Higher Education, Information Science, \*Labor Force Development, Masters Programs, Postsecondary Education, \*Professional Education, Statistical Analysis, \*Vocational Education

Based on a 1974 survey of over 1500 higher education institutions, data are presented that project professional computer manpower availability. Statistics for 1966 to 1979 are provided on associates, bachelors, masters, and doctoral degree programs in computer science, data processing, information science, etc.; majors enrolled; numbers of degree programs and graduates in computer fields; estimates of manpower produced by postsecondary vocational education institutions; estimated distribution of computer staff by level of education desired for replacements (overall and by state) and of computer installations by state; estimated manpower utilization by academic departments for programs in computer science, and by computer centers in U.S. colleges and universities; and computer manpower needs and estimated production by postsecondary institutions by state. Large numbers of personnel are shown to have been able to enter the computer manpower pool in the past with little training. It is noted that large amounts of federal and state funds were poured into the vocational and two-year programs, but that there should be a weeding out of the weakest postsecondary programs. Secondary schools should provide enough computer education so that the student can learn to live comfortably in a computer-assisted environment and also to judge whether they wish to pursue a postsecondary program of study. The names of institutions reporting the offer of degree programs are appended, including the name of the degree program, the department name, majors enrolled, and graduates for 1976-1977. (CC)

Levine, Daniel U. Mares, Kenneth R.  
Relationships between Geographic Origins, Externship Placement, and Practice Location Subsequent to Graduation of UMKC School of Pharmacy Students.

Western Missouri Area Health Education Center, Kansas City.

Pub Date—Sep 81

Note—20p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Clinical Experience, Community Health Services, \*Geographic Distribution, Health Personnel, Higher Education, Institutional Research, \*Pharmaceutical Education, \*Pharmacists, Placement, \*Rural Areas

Identifiers—\*Medically Underserved Areas, \*University of Missouri Kansas City

The relationships among geographic origins, externship placement, and post-graduation practice location of University of Missouri Kansas City (UMKC) 1977-79 pharmacy graduates were studied. The aim was to help select, prepare, and encourage students to locate in underserved communities. It is assumed the data can help decide whether to retain, expand, or eliminate policies that influence practice location after graduation. Variables include: population of community of high school graduation, percentage of pharmaceutical requirements met in the community of high school graduation, population of community of first externship, population of community of second externship, percent of pharmaceutical requirements met in the community of first externship, percent of pharmaceutical requirements met in the community of second externship, sex, and type of first and second externship. The findings show that: (1) students from high schools in small- or medium-size communities and/or high- or medium-need communities are more likely to locate in small- or medium-size, high- or medium-need communities than were students who graduated from high schools in large and/or low-need communities; (2) population and need of the communities in which externships were served generally are associated with location in small or medium-size, high- or medium-need communities; (3) student's sex is not associated with location in communities classified by size or by pharmaceutical need; (4) type of externship is not consistently associated with the decision to locate in high- or medium-need communities (combined); (5) very few students from large and/or low-need communities locate in high-need communities after graduation. In general, it is suggested that if a goal of the UMKC School of Pharmacy is to place sufficient numbers of students in relatively high-need communities, some preference should be given to applicants from small- or medium-size communities, particularly during the first externship. Bebeau, Muriel J. Loupe, Michael J.  
Masculine and Feminine Personality Attributes of Dental Students and Attitudes Toward Women's Roles in Society.

Pub Date—81

Note—31p.; Paper presented at the Annual Meeting of the American Educational Research Association (Los Angeles, CA, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Androgyny, \*Attitude Measures, Comparative Analysis, \*Dental Assistants, Dental Health, \*Dental Hygienists, Dentistry, \*Dentists, Females, Higher Education, Males, \*Personality Assessment, Professional Education, Role Models, \*Sex Role, Sex Stereotypes

Egalitarian attitudes and the personality traits of instrumentality (masculinity) and expressiveness (femininity) were examined for 314 male and 71 female dental students and for women in dental auxiliary programs. The objectives were to (1) investigate their possible correlates (e.g., parental occupation, status, age) and to compare the attitudes toward societal roles of women held by professional and paraprofessional groups with the attitudes of the general population and (2) examine dental students' self-reports of masculine/feminine attributes. The Attitude Toward Women Scale (AWS) and the Personal Attributes Questionnaire (PAQ) were administered to three classes of dental students, female dental hygiene students, and women in the dental assisting program at the Uni-

versity of Minnesota. Among the conclusions are the following: (1) Women who enter dentistry are different from college women in general—stronger on the instrumentality trait and weaker on the expressiveness trait—and also hold more egalitarian attitudes towards women's roles. Except for their attitudes towards women's roles, these women are much more similar to dental men than to other women. (2) Professional men are only slightly different from college men on the masculinity trait, with slightly though significantly higher scores and slightly more egalitarian attitudes toward the roles of women. (3) A comparison between dental students and a group of established professionals seems to suggest that women entering dentistry do so because they are like the men of dentistry. Questions for research as well as for professional education in U.S. dental schools are posed on desirable gender-associated personality attributes for the dental health practitioner, and the effect of these characteristics on patient treatment styles, public access to dental care, and the individual's oral health condition. (CC)

The Federal Role in the Federal System: The Dynamics of Growth. The Evolution of a Problematic Partnership: The Feds and Higher Education. A Commission Report.

Advisory Commission on Intergovernmental Relations, Washington, D.C.

Report No.—ACIR-A-82

Pub Date—May 81

Note—67p.

Available from—Advisory Commission on Intergovernmental Relations, Washington, DC 20575.

Pub Type—Reports - Descriptive (141) — Historical Materials (060)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Educational History, \*Educational Legislation, \*Federal Aid, Federal Programs, Federal Regulation, \*Government Role, \*Government School Relationship, \*Higher Education, Lobbying, \*Policy Formation, Politics, Public Agencies, Public Policy, Tax Credits, Tuition

The federal contribution to higher education is discussed in terms of the evolution of its role from 1787 to 1958, the growing regulatory presence, the National Defense Education Act, the Higher Education Acts of 1963 and 1965, the 1972 Higher Education Amendments, and recent legislative actions. Specific chapter discussions cover the following: postwar trends, federal land grants for higher education, the Morrill Land Grant College Act, the G.I. Bill, federal research grants to universities, equal opportunity policies, the politics of regulation, Title IX, the Family Educational Rights and Privacy Act of 1964 (the Buckley Amendment), tuition tax credits, the Department of Education, policy analysis, constraints on the federal role, and speculation on the future. The following appear in tabular form: estimated expenditures of institutions of higher education, by source of funds, alternate years (1960-1976); estimated expenditures of different forms of federal aid by institutions of higher education, alternate years (1960-1970); trends in costs of implementing federally mandated social programs (1965-1975); total outlays for higher education, by source of funds, selected years (1939-1970); federal funds as a percentage of the total current income of universities and colleges, by control of institution (1939-1970); estimated expenditures of institutions of higher education, by source of funds, selected years (1960-1977); and the development of Washington representation in higher education. It is shown that the scope of the federal contribution to higher education has grown since World War II. In fiscal 1977, the federal budget for higher education was approximately \$11.75 billion and growing. Including all major forms of aid, this constitutes about one-fifth of all funds spent by public institutions of higher learning and about one-third of total private school funds. (CC)

Descriptors—\*Administrative Organization, Administrator Role, Admissions Officers, \*College Administration, Degree Requirements, \*Educational Philosophy, Educational Quality, Futures (of Society), Graduate School Faculty, \*Graduate Study, Higher Education, Organizational Objectives, Position Papers, Research Directors, Resource Allocation, Student Financial Aid Officers

A statement of principles and practices of graduate education in the 1980's offers to help institutions plan and evaluate the organization and administration of their graduate schools. It is argued that institutional goals and practices in higher education will be subject to close scrutiny and change in the coming decade. Changes forecast include budgetary shift and reevaluation of societal needs that will require assessment of traditional objectives in advanced educational programs that have been assumed in times past. A total commitment to quality of the educational experience will be demanded of academic institutions involved in graduate programs. In order for this commitment to be implemented, it will be essential for institutions to define the appropriate administrative structures and intellectual environments necessary to meet and participate in events that will shape advanced education in the future. Each institutional environment will be called upon to meet unique needs that will serve different kinds of students and programs. It is suggested that the chief graduate school officer be a person who occupies a prominent position in the decision-making processes of the academic institution. Such a person should participate directly in academic and resource allocations and administration of research. In addition, the graduate school officer should be responsible for the administration of such graduate student affairs as admissions, financial aid, examining committees, degree requirements and, jointly with the graduate council, the review of graduate programs for their educational quality. (CC)

Identifiers—\*Sweden

Information on research efforts concerning higher education in Sweden is presented. Questions that have been addressed by the Swedish research program in the past five years have included the long-term social effects of higher education activities, the knowledge traditions of higher education programs, and the conditions of research with and outside the higher education system. Specific topics include: the process by which professional knowledge is acquired in occupations (e.g., economists, engineers, doctors, and psychologists); students' concept formation and knowledge development and the manner in which they acquire attitudes and values concerning what is essential to their professions; changes in cognitive capacity and linguistic proficiency during studies and for a number of years of vocational activity, particularly among teachers, but also among engineers and doctors. The cognitive, human, and social attitudes conveyed by some of the new programs are being analyzed in a number of projects through interviews with teachers, other practitioners, and policy-makers regarding the training of nurses, social workers, and preschool teachers. Additional studies concern the history of ideas with reference to the specialization and professionalization of medical practice, research training in some of the humanities, the properties of research that influence its use outside the higher education system, and decision-making processes regarding the use of research. In addition to research projects, conferences and seminars are con-

duct, and two special advisory groups provide support for the research program. A list of current research projects and surveys, information on program costs, and the composition of the advisory groups, and a list of conferences and meetings are appended. (SW)

The need for new capital in higher education and major areas where the interests of the business and higher education communities are aligned are considered. Higher education is a major employer and makes a large contribution to the gross national product. Human capital has become the accepted term for referring to the contribution of education, advances in knowledge, and research and development to economic growth. The funding, performance, and utilization of research and development links industry and higher education directly in capital investment in knowledge. Universities and colleges (and their associated federally-funded research and development centers) perform 50 percent of the basic research, 15 percent of the applied research, and 2 percent of the development work in the United States. Higher education is beginning the 1980s with a seriously eroded capital base in that: expansion of educational facilities has slowed down, but buildings and equipment need to be renewed; equipment used in teaching and research at colleges is much older than that used in industry; faculty are losing purchasing power faster than professional workers generally; and financial reserves are being drawn down faster than they are being replenished. Recommendations include: advocating greater national support for research and development; supporting enhanced tax incentives to donors to promote voluntary contributions to colleges; and undertaking a major baseline study of the capital stock of higher education, its location, condition, and utilization, and its adequacy for meeting U.S. educational needs in the 1980s. A bibliography is appended. (SW)

Descriptors—\*Campus Planning, Case Studies, \*College Administration, \*College Buildings, Educational Finance, \*Energy Conservation, \*Fuel Consumption, Fuels, Higher Education, Industry, \*Information Needs, Public Policy, School Surveys

Current patterns of energy management within higher education institutions and energy-related information and services that are needed by senior administrators and others to develop and improve energy management and planning on campus were studied. The findings and recommendations will be used to help develop a new research and action program for the American Council on Education's Energy Task Force. Extensive interviews were conducted with top administrators, faculty, and student representatives at 10 college and university campuses. Interviews also were conducted with government and industry personnel to learn about their perceptions of higher education's energy condition, and to determine what assistance is, or could be,

available to higher education. While the clear responsibility for energy management was within physical plant operations at each campus, the styles ranged from specific staff assigned to energy conservation to simple pursuit of ad hoc efforts within the whole maintenance program. Colleges identified local utility companies and vendors as the knowledge resources they rely on most often, followed by the expertise of other administrators and professionals. Additional topics that were surveyed include: energy usage and costs, contingency planning, public relations efforts, efficient heat and electric production, additional sources of fuel, financing energy conservation, and financing capital improvements. Energy usage in higher education and industry are compared, and national policy is considered. An annotated bibliography, case studies bibliography, listing of indexes and periodicals, and a literature and services review are appended. (SW)

Identifiers—\*Mississippi State University  
Factors that influence the quality of higher education at Mississippi State University are considered. Quality in higher education is influenced by the background and competence of the faculty and staff, the kinds of students enrolled in programs, resources available, past history, and the current reputation of the university. Mississippi's system of reimbursement for a university's programs does not consider quality but is a credit driven formula. It is suggested that the board of trustees should alter the formula to acknowledge the time and effort faculty invest in doctoral programs. Efforts to increase institutional production of student credit hours, faculty loads, and credit hours per student could generate funds to support existing programs. Resources are needed to encourage innovation and promote enriching activities for students and faculty. Additional areas that pertain to educational quality include: improving the student advising system and increasing the kind and quality of interaction with students; increasing the use of library resources and making courses more challenging; encouraging alumni to be concerned about the university's academic programs; improving support services; promoting high institutional morale to create a positive climate for teaching, research, and service; defining/refining indices of quality in each discipline; and allowing for different kinds of expectations for departments. It is suggested that institutional quality and reputations are developed over a sustained period of time and that regional and national reputations are based on a university's programs in graduate education and research. cation, State Universities, \*Statewide Planning, Success, Urban Universities  
Identifiers—\*Illinois State Board of Higher Education, \*University of Illinois

The institutional goals of the University of Illinois and the Illinois Board of Higher Education during the 1960s and conflict between the two entities are examined. One goal of the University of Illinois was to develop new general purpose campuses in the urban areas of the state in order to increase its educational services to the state. One goal of the Illinois Board of Higher Education was to provide effective leadership for statewide master plans for public higher education. Attention is directed to the importance of the goals, actions blocking goal attainment, and degree of goal attainment. Differences in organizational circumstances of the two groups are examined to help determine whether the goals are central to institutional self-maintenance. The university's goal of adding new general purpose campuses was directly frustrated by the board's rejection of the plans of "The University of Illinois and Plans for the Future," and by denial of governance of the Chicago and Springfield campuses provided for in Master Plan II. The board's goal of providing strong leadership in statewide master planning was partially blocked by the mere existence of University of Illinois statewide planning initiatives. The board was able to protect its goal by denying the fruit of the University's planning initiatives. For the university, the goal of adding new general purpose campuses was important but only one among a broad set of goals typical of the comprehensive university. It is suggested that the goal of providing strong leadership in statewide master planning was central to the board's self-maintenance. (SW)

Descriptors—Behavioral Objectives, \*Certification, Course Content, Delivery Systems, Educational History, \*Educational Needs, Health Services, Higher Education, Individual Needs, Laboratory Technology, Medical Associations, \*Medical Technologists, \*Needs Assessment, \*Professional Continuing Education, Standards, Teaching Methods

Identifiers—\*American Society for Medical Technology

Ideas underlying both professional and public attitudes toward continuing education in clinical laboratory science are examined, and the history of the American Society for Medical Technology (ASMT) in continuing education is traced. Continuing education may be defined as any systematic effort developed by a clinical laboratory scientist to update and expand knowledge and skills. A pertinent issue is whether mandatory or compulsory continuing education has any demonstrable beneficial effects on the health care of the public and on the provision of timely and effective care. It is suggested that more research is needed to determine how, or if, continuing education affects the competence of the laboratory professional's performance. All continuing education programs sponsored or approved by ASMT should: identify participant's perceived needs and needs demonstrated by proficiency tests, performance evaluations, or accreditation inspections; specify financial and manpower resources; determine whether behavioral objectives correlate with needs; base course content and instructional strategies on objectives to maximize transfer of knowledge of skills; and evaluate student learning and long-term course outcomes. It is suggested that the upsurge of mandatory continuing education during the 1970s is almost certain to continue, and that licensing or certification is increasingly becoming prevalent. Examples of continued learning experiences under the following categories are identified: formalized and nonformalized learning experiences; self-directed learning, participation in ASMT at various levels, formalized tours, and program contribution for continuing education. Identifiers—\*Kellogg Public Service Research Program, Public Service, \*University of California Davis

Problems relating to cooperative efforts between universities and government are considered, and an approach used in the Kellogg Public Service Research Program at the University of California, Davis, is described. This program facilitates collaborative research on policy issues and also information dissemination between the university and

public agencies. Constraints on university-government collaboration include logistical problems, including the inability of staff to effectively align schedules, methods, and personal needs. Difficulties associated with cooperative efforts can result from organizational structures of colleges and agencies and barriers such as rapid turnover in government, timely responses to immediate needs, and funding questions. The Kellogg Public Service Research Program model involves: identification of an important issue or policy question; development of a work plan and time frame; and review of the project to assure that it meets scholarly standards and demonstrates the expected degree of collaborative contributions. The collaborative research projects are conducted by faculty and agency staff, with students serving as assistants to the faculty or as the primary link between the university and agency. Conferences, workshops, and symposia are appropriate vehicles for information dissemination and for exploring various sides of an issue, producing an action strategy, or teaching a skill. Additionally, commissioned papers make the issues known to the public as well as contribute to the institutions. The question of whether public policy research is a threat to academic autonomy and the appropriate directions for research are considered. (SW)

Identifiers—\*University of Tennessee Knoxville  
Holistic educational advancement programs at the University of Tennessee, Knoxville, that are designed to develop the potential of underprepared and disadvantaged students are considered. Obstacles to success that might confront disadvantaged students include problems in adjustment to university life, loneliness, and negative self-concept. It is suggested that support services should be integrated with and a reinforcement of the broader curriculum. The holistic approach is designed to help students persist in their studies and attain success and satisfaction. Counseling is designed to enhance the growth of personal identity, student motivation, sense of direction, confidence, skills, and involvement with the educational institution and its members. Identification and a relationship with a staff person, founded on caring personal attention, may be the key to student survival and progress in college. Academic advising promotes greater awareness of program requirements and evaluation of their needs and readiness for various course material. Individual tutoring offers more intensive and personalized presentation of important subject matter and opportunities to emphasize particularly significant foundational knowledge. Referrals to other services such as testing, financial aid, housing, health care, and the variety of learning materials at the disposal of all students completes the delivery of the wide range of assistance that should be encompassed by a total educational program. All members of the university's educational advancement program are involved voluntarily. Eligible students are invited to join the program, and faculty are selected who care about students and have the interest and expertise to teach underprepared students. A bibliography is appended. The Utilization of Social Service and Community Agencies as External Support Services.

Pub Date—Mar 80

Note—31p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Agency Role, Clinics, \*College Students, Community Colleges, Community Services, Counseling Services, Eligibility, Employment Services, Higher Education, Intervention, \*Medical Services, \*Professional Services, Public Agencies, \*Referral, Social

Agencies, \*Social Services, Special Health Problems, State Agencies, Student Needs, Student Problems

Identifiers—Central Florida Community College, Florida

Six social service agencies most utilized as resources for external support for students at Central Florida Community College are described. Individual students often have need for more specialized assistance to help them deal with the physical, social, and emotional problems of being disadvantaged, that prevent them from acquiring academic and vocational skills. The special services counselor and the learning disabilities specialist often receive referrals of students who manifest severe problems. There is coordination of effort between the college and social service agencies. The agencies are reviewed in terms of their function, eligibility requirements, and the service provided. These include: the Division of Vocational Rehabilitation; Bureau of Blind Services; Social Security Administration; Division of Family Services; CETA - Manpower; Human Resources Center (Mental Health); Division of Retardation; Veterans Service Office; Department of Community Health, Hospitals, and Clinics, civic and social clubs; State Employment Services; and State Diagnostic and Resource Centers. It is suggested that the ability to recognize when the needs of a particular student are not within the scope of one's personal resources or those of the school is a professional necessity. Personnel and agencies outside the school must be utilized because they are able to provide forms of specialized assistance not internally available. Case summaries, work evaluations, and psychological reports are presented as illustrations. A bibliography is appended. (Author/SW)

Descriptors—Academic Advising, Administrative Policy, Ancillary School Services, \*College Admission, \*Cultural Awareness, \*English (Second Language), \*Foreign Students, Guidelines, Higher Education, Intensive Language Courses, \*International Educational Exchange, Language Proficiency, Policy Formation, School Community Programs, School Orientation, Self Evaluation (Groups), \*Standards, Student Evaluation, Student Recruitment, Study Abroad Guidelines for institutional leaders as they develop policy regarding international educational exchange for their colleges and universities and community programs are presented. These standards or principles of effective practice, which will form the basis of a program of self-regulation and will promote self-evaluation and improvement efforts, were developed by the Task Force on Standards and Responsibilities of the National Association for Foreign Student Affairs. Principles are presented for institutions overall and specifically in regard to the admission of foreign students, English programs and determination of English proficiency, foreign student/scholar services, the provision of community services and programs, and U.S. study abroad. Among the principles for institutions are the following: programs in international educational exchange should be closely related to and consistent with the basic purposes and strengths of the institution; and the institution should acknowledge its responsibility to demonstrate sensitivity to cultural needs—social, religious, dietary, and housing. It is suggested that admissions materials should be sensitive to candidates' unfamiliarity with U.S. education and lack of facility in the English language, and that the foreign admissions process should be conducted by personnel who are trained and competent in the interpretation of foreign educational records. In evaluating English proficiency, both level and field of study should be considered. Principles for the provision of English support courses and intensive English programs for foreign students, and services that are needed for these students within the college and in the community are also identified. A bibliography is ap-

pended. (SW)

Identifiers—Armstrong State College GA, Georgia, Norfolk State University VA, Old Dominion University VA, Savannah State College GA, Tennessee, Tennessee State University, \*United States (Southeast), University of Tennessee, Virginia

Developments during the 1980-81 academic year concerning mergers/joint planning projects designed to eliminate unnecessary duplication of programs between historically black and white colleges in Nashville, Tennessee; Savannah, Georgia; and Norfolk, Virginia are examined. Site visits were made during the second year of operation of the programs at the merged Tennessee State University and the University of Tennessee, at Old Dominion University and Norfolk State University, which have cooperative programs using both campuses; and at Armstrong State College, which sponsors all Georgia teacher education instruction, and Savannah State College, which sponsors all business administration courses. It was found that in all three locations each campus is still largely racially identified. In Nashville, the continuing decline of white enrollments since the merger has had an effect upon faculty morale, not for ethnic reasons, but because of apprehension about job security and academic program support. In Norfolk, planning efforts for joint programs of instruction have not abated. Total institutional enrollments have not changed in any negative way, and a visible increase in "other race presence" has been achieved on both campuses. In Savannah, faculty transfers between campuses as a result of the movement of academic programs has gone smoothly. It is suggested that ethnic diversity seems to be achieved more rapidly on campuses serving primarily commuter students than on campuses that are chiefly residential, and it occurs more easily at the post-baccalaureate and upperclass student levels than at the freshman level, due in part to the maturity of students and clarity of their career goals at these upper levels. Information on enrollment and academic programs is appended. (SW)

Descriptors—Associate Degrees, Bachelors Degrees, \*Blacks, \*College Graduates, Comparative Analysis, \*Degrees (Academic), Doctoral Degrees, Higher Education, Masters Degrees, Professional Education, \*Racial Distribution, State Colleges, Teacher Education, Trend Analysis, Whites

Identifiers—\*United States (South)

Information on degrees awarded in the nation and the south, by race, for 1978-79 and trends from 1968-69 to 1978-79 are presented. For 1978-79 doctoral degrees awarded, there was a nationwide increase of 1.9 percent and a 4.5 percent increase in the South. There was a decline in the number of master's degrees awarded both nationwide and for

the South, and the number of degrees awarded at the baccalaureate level remained stable. The pattern of annual increases in the number of first professional degrees continued nationally and for the South, and the number of associate degrees awarded both national and in the South decreased. Blacks accounted for 6.8 percent of the total associate, bachelor's, master's, first professional, and doctoral degrees awarded in the nation, and for 11.3 percent in the South. Black representation nationally, and in the South, was highest at the associate level and lowest at the doctoral level. The drop in the number of master's degrees awarded to blacks was 4.6 percent nationally and 6.9 percent in the South. The largest increase in the degrees awarded to blacks in the South occurred at the associate level (16.6 percent) followed by first professional and doctoral degrees (approximately 10 percent). The 1978-79 data reveal continued lessening of the role played by historically black institutions. Blacks outpaced whites in the proportion of degrees in teacher education at the master's and doctoral levels. The field of business and management increased in popularity with blacks, and blacks increased their share of graduate degrees in engineering. (SW)

Heuristics for Planning University Study at a Distance.

Pub Date—81

Note—23p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Adult Students, \*College Students, Course Objectives, Course Organization, Extension Education, \*External Degree Programs, Foreign Countries, Higher Education, Instructional Materials, Models, \*Student Educational Objectives, Student Evaluation, Study Guides, Study Habits

Identifiers—\*Australia

A model to describe how adults work on university courses at a distance from campus was developed at an Australian university. The model was designed to describe how students define the task/goal and plan their study, based on G. Ploya's (1957) Heuristic and A. Newell's and H. A. Simon's (1972) General Problem Solver. Verbal reports were obtained from four female students enrolled in an advanced educational psychology course as external students. Each student gave a clear account of her aims for studying the course. Goals were expressed in terms of credit and assessment requirements, information in the course materials, both new information and that which was a followup to information from previous courses, interest, and application for both practical and vocational purposes. When students opened course materials, the interviewer asked the student to think out loud while she examined the study guide, course materials booklet, and other written information and directions. Two of the students expressed their goals more in terms of credit and assessment requirements, while the other two students were concerned with the interest level of the course. While the students differed in their primary goals, each showed a strong tendency to organize the course materials around assignments. It was found that students' aims were different from those of the course coordinator. It is suggested that the study demonstrates the possibility of describing distance students' patterns of study. The heuristic for studying a new course involved: defining the task/goal, devising a plan, carrying out the plan, checking, and achieving the task/goal. A bibliography is appended. (SW)

Higher Education in the 1980's: An American Perspective.

Department of Education, Washington, D.C.

Pub Date—12 Oct 81

Note—18p. Paper presented at a meeting of the Organisation for Economic Cooperation and Development (Paris, France, October 12, 1981).

Pub Type—Speeches/Meeting Papers (150) - Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Accountability, \*Adult Students, Basic Skills, Community Colleges, Demand Occupations, Educational Assessment, Educational Finance, \*Educational Policy, \*Educational Quality, Engineering, Federal Aid, \*Federal Government, \*Government School Relationship, \*Higher Education, Institutional Autonomy, Lo-

cal Government, Nontraditional Students, Private Colleges, Sciences, State Colleges, State Government, Student Financial Aid

Identifiers—Institutional Survival

The role of the federal government in higher education in the United States is considered in an address to the Organisation for Economic Cooperation and Development. The federal government is reducing expenditures in education and seeking to limit the government's involvement in developing education policy. The federal support for higher education has been primarily through assistance to students and not directly to institutions. The decline in the number of 5- to 21-year-olds and the increase in the number of adult students has shifted the focus of the pressure for governmental funding. The community and junior colleges were designed for and grew from community need, the demands of business and industry, and the needs of the nontraditional student, and they currently enroll more than 35 percent of the total enrollment in postsecondary education. Community and junior colleges receive considerable financial support from state and local governments. Another sector of higher education discussed is the private college, which educates a large percentage of the liberal arts graduates and which faces a struggle for survival in the future. Throughout the United States there is a renewed emphasis on the need for quality in education at all levels. A National Commission on Excellence in Education has been established and, among other things, it will assess what higher education can do to counteract poor preparation of college students in basic and advanced learning skills. Additionally, there is a need to train specialists in such fields as computer science, optics, engineering, and some physics and chemistry areas. Additional perspectives on financing higher education during the 1980s are considered. (SW)

Seldin, Clement A.

National Study of State Universities and Land Grant Colleges: Off Campus Inservice Activities.

Pub Date—81

Note—34p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—College Faculty, \*Extension Education, External Degree Programs, Higher Education, \*Inservice Education, Land Grant Universities, Off Campus Facilities, \*Outreach Programs, \*Professional Continuing Education, Professional Development, Rewards, \*Schools of Education, \*State Universities, Workshops

Information concerning off-campus inservice activity (OCIA) at state universities and land grant colleges in the United States was surveyed. There was a 92.5 percent response rate to questionnaires sent to 107 deans of schools, colleges, and departments of education. Inservice activities were considered to be courses, workshops, needs assessments, and other technical assistance. Findings include the following: OCIA is a significant activity of schools of education; schools, human service agencies, government agencies, industry, business, and the military are OCIA clientele; off-campus degree and certification programs are a major thrust of OCIA; off-campus Ed.D. and Ph.D. programs are a significant element of OCIA; schools of education rely on many sources of financial support; the major motivation for OCIA is community service; most faculty active in OCIA are full-time, tenured faculty; faculty bargaining units (functioning in only 22.6 percent of state universities and land grant colleges surveyed) do not have major impact on OCIA; and most schools of education have one individual to coordinate OCIA. It is recommended that faculty active in OCIA must be appropriately rewarded by the school of education and the university, and that recognition at times of reappointment, promotion, and tenure is important. Such a system should recognize both credit bearing and noncredit bearing OCIA. Suggestions for awarding credit, scheduling and funding OCIA, and modifying residency requirements for doctoral study are offered. Advantages of OCIA for the student, the cooperating organization (school, human service agency), and the university are identified. A bibliography is appended. (SW)

First Semester Retention of University of Iowa  
Students.

Pub Date—[81]

Note—18p.

Pub Type—Reports - Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—\*Academic Aptitude, \*Academic Persistence, Aptitude Tests, \*College Freshmen, Educational Background, Evaluation Criteria, Factor Analysis, Higher Education, Institutional Research, Predictive Measurement, \*Predictor Variables, Research Design, Student Attrition, \*Student Characteristics

Identifiers—\*University of Iowa

Pre-enrollment characteristics that distinguish nonpersisting students from students who persist into the second semester of their freshman year were studied at the University of Iowa in 1978. Three sources of information were used to obtain predictor variables: American College Testing (ACT) program test scores, the ACT Student Profile, and high school transcript information from the registrar. Study objectives were to reduce the large number of pre-enrollment variables to a small number of useful prediction variables and to use linear and nonlinear classification techniques to exhaust the predictive power of the predictor variables. Of the 2,850 entering freshmen in the fall 1978 cohort, there was enough information to allow factor scoring for 1,711 of the students. It was found that the difference between using 43 factors and 23 factors was negligible. There were no indications from this study or previous studies that a larger number of the pre-enrollment variables could account for more than variance of persistence; however, the 23 factors did not predict retention any better than an earlier study that used only three variables. It is concluded that pre-enrollment variables per se did not directly predict persistence. It is recommended that the smallest set of factors that maintains the current level of prediction of persistence should be developed and used in retention studies to save on costs of data storage and analysis. Academic Women in the 1970's, with Implications  
for the 1980's.

Pub Date—[81]

Note—29p.; Paper presented at the Annual Meeting of the International Council of Psychologists (39th).

Pub Type—Speeches/Meeting Papers (150) — Historical Materials (060)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—\*Academic Rank (Professional), Career Choice, College Faculty, College Role, College Students, Educational History, Educational Objectives, Employment Statistics, \*Females, Graduate Study, Higher Education, Self Concept, Single Sex Colleges, Social Change, Teacher Salaries, \*Teaching (Occupation), Trend Analysis, Undergraduate Study, \*Women Faculty, \*Women Education

Social and historical perspectives on academic women in the United States are considered. Progress of academic women during the past decade, factors associated with scholarly achievement, and prospects for the 1980s are examined. Women's entry into higher education, first as students and later as faculty members, began quite recently. At about the time that teaching became a realistic career option for women, degree-granting women's colleges were established. Some of these emphasized education to support the traditional homemaker role, while others sought to develop women's intelligence. After women graduated from baccalaureate programs, some chose to enter graduate studies, and the majority of those attaining doctorates entered academic careers. From 1969 to 1980 the percentage of women faculty in colleges and universities increased from 19 percent to 26 percent. Throughout the 1970s the majority of women faculty members served at two-year and four-year colleges, were found more frequently than men at lower academic ranks, and received lower salaries than men. Research findings concerning levels of self-esteem held by professional women and educated homemakers are considered, along with findings regarding sources of personal support that have been associated with becoming academic women, appropriate inclusion of women in expressions of language, and continued efforts to eliminate factors that curtail the development of women's talents and contributions to higher education. A bibliography is

appended. (SW)

Descriptors—\*Academic Standards, \*Accreditation (Institutions), Accrediting Agencies, \*College Programs, Curriculum Evaluation, Educational Objectives, \*Educational Quality, Evaluation Criteria, Higher Education, \*Institutional Evaluation, Organizational Objectives, Professional Associations, Program Evaluation, Perspectives concerning accreditation standards for colleges and universities and assumptions about institutional quality are considered. The various accrediting agencies and associations focus on a broad set of criteria that are generally perceived and promoted to be attributes of institutional program quality. The accrediting criteria of the six regional associations are used as guidelines to determine the extent to which institutions achieve their stated goals and objectives. The professional associations generally have developed more specific criteria. Accrediting criteria provide guidelines for program assessment, whereas standards establish baseline or minimum requirements for a number of program components (e.g., curricular structure and sequence skill development). Accrediting has two distinguishing characteristics relative to considering quality: accreditation focuses on the institution's capacity to achieve, and the extent to which it does achieve, articulated goals and objectives; and accreditation evaluations are not competitive (i.e., institutions are not compared and ranked). Although the public may view accreditation as a pass-fail assessment of institutional quality (and stability), it is claimed that in practice accreditation is an assessment that does not generally distinguish or promote high institutional performance and capacity beyond accreditation standards (guidelines and requirements). With respect to the assessment of quality in higher education, the literature suggests that accreditation describes (usually in very general terms), rather than distinguishes, the characteristics of institutional quality. Identifiers—\*Linköping University (Sweden)

Graduate studies and research at the Department of Education of the University of Linköping are described. After providing a general review of the university with special consideration to the Department of Education, research and graduate studies offered in the various departments, as well as in the new institute for theme-oriented research, are briefly covered. Project descriptions of ongoing research in each of four areas are presented: teacher education and inservice teacher training, adult education, the general educational system, and fundamental and general behavioral science problems. Attention is also directed to graduate studies in education, including the aims, qualifications for admission, course work, advisors, and examinations. Two lines of study within the doctoral degree program are available—a general line and a teaching methods line—and a masters degree in education is also offered.

Specific ongoing research projects include: experimenting with models of decentralized inservice teacher training that give the teacher a more active role and that emphasize the supportive role of central and regional authorities; integrating international questions in informal adult education; investigating obstacles encountered by workers in obtaining access to higher education; evaluating primary school education for adults with regard to the methods and work forms being used; studying possibilities for and effects of interdisciplinary project studies and increased student influence in upper secondary school; and investigating the views of students and faculty in the doctoral programs within the departments of education in Sweden. Webster, David Steven  
Early Psychological Studies of "Genius" and Academic Quality Rankings.

Pub Date—25 Aug 81

Note—25p.; Paper presented at the Annual Meeting of the American Psychological Association (89th, Los Angeles, CA, August 25, 1981).

Pub Type—Speeches/Meeting Papers (150) — Historical Materials (060)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Biographies, Comparative Analysis, Comparative Education, Educational Background, \*Educational Quality, \*Gifted, Higher Education, Individual Characteristics, \*Institutional Characteristics, Nature Nurture Controversy, Profiles, Psychological Studies, \*Rating Scales, \*Reputation, Talent, Universities

Identifiers—\*Europe, \*United States

Early psychological studies of "genius" are examined, and reasons why European studies of eminent people never developed into true academic quality rankings are considered. In Europe, and especially England, France, and Germany, the ecological origins of eminent men and women were assessed: where they grew up, where they attended school, and whether and where they attended a university. Most of those who wrote about the university backgrounds of eminent people attributed geniuses to be the product of either heredity or their environment. Alick Maclean's rank ordering of universities in England, Scotland, and Ireland that had "produced" distinguished people came close to being a true academic quality ranking. Academic quality rankings developed in the United States and were a useful means of recording the outcome of competition of universities for students and financial support. Universities in France and Germany were assured a steady source of income by the government whether or not they excelled relative to others, and in each European nation there were relatively few universities. In Europe there was not nearly as much change in the quality of universities, while in the United States there is diversity in curricular offerings and types of institutions. Additionally, European countries were much smaller geographically than the United States and European universities were much older and had established reputations regarding quality. The existence of national licensing examinations in each discipline in European countries and the fact that European students commonly attended several universities were additional reasons why rank orders of universities were not greatly needed in Europe. Distance University Students' Perceptions of the  
Influences on Their Study.

Spons Agency—Murdoch Univ., Western Australia (Australia).

Pub Date—81

Note—25p.

Pub Type—Reports - Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Access to Education, \*College Students, Comparative Analysis, \*Extension Education, External Degree Programs, Family Life, Foreign Countries, Higher Education, \*Individual Needs, \*Nontraditional Students, On Campus Students, Student Adjustment, Student Attitudes, \*Student College Relationship, Student Employment, \*Student Needs

Identifiers—\*Australia, Murdoch University (Australia)

Perceptions of Australian students studying independently at a distance regarding factors influencing their external studies were compared with attitudes of campus-based students. The 53 distance students and 51 on-campus students were enrolled

in three social and political theory courses at Murdoch University. The mean age of the external students was 33 years, with a range from 22 to 57, while the mean age of on-campus students was 26 years, with a range from 17 to 44. Responses were obtained to objective questions and by written open-ended advice to two hypothetical prospective external students. In both sets of responses, students identified family, job and life circumstances as major influences on their university work. The expressed advantages of external study were self-reliance and finances, while disadvantages were related to access to the library and understanding what academics expected. The students expressed preference for studying on campus or by the combination of campus and external courses that was available at the university. It is suggested that the opportunity to work in a mixed mode combination at Murdoch University allows a student to work out a personal adjustment around the perceived advantages and disadvantages of external study. Campus attendance for a limited number of selected courses gives access to university resources that can be applied to courses studied at home. The mixed mode enables students to exercise choice and to fit studies with the contexts of their life circumstances. A bibliography is appended. (SW)

Descriptors—\*College Students, Comparative Analysis, \*Enrollment Trends, Ethnic Groups, Females, Full Time Students, Geographic Distribution, Graduate Students, \*Higher Education, Males, \*Minority Groups, Part Time Students, Place of Residence, Private Colleges, \*Racial Differences, \*Sex Differences, State Colleges, State Surveys, Trend Analysis, Undergraduate Students, Womens Education

Identifiers—\*New Jersey  
Data on the sex, ethnicity, age, and geographic origin of undergraduate and post-baccalaureate students enrolled in New Jersey colleges and universities in fall 1980 are given, along with comparisons and trends over the past five years. Increases in the enrollment of women in New Jersey higher education between 1976 and 1980 occurred among part-time undergraduate and full-time post-baccalaureate students (38 percent and 36.5 percent, respectively). Women were the majority of part-time undergraduate students (60.1 percent), while men were the majority of full-time post-baccalaureate students. Women represented 51.1 percent of full-time undergraduate students in fall 1980 and 52.1 percent of part-time post-baccalaureate students. Blacks and Hispanics (combined) increased 19 percent between 1976 and 1980, while whites/others (Asian/Pacific Islander, American Indian/Alaskan Native, and nonresident alien) were responsible for three-quarters of the system-wide growth. Hispanics increased more than did blacks (42.1 percent compared with 11.3 percent). Changes in proportions of minority full-time undergraduate students reflect absolute increases in the public sector and relative stability in the independent sector. Whites/others continue to constitute the vast majority of New Jersey higher education enrollments (85.7 percent overall), ranging from 82.2 percent among full-time undergraduates to 91.8 percent among part-time post-baccalaureates. Conversely, the highest percentage of minorities is among full-time undergraduates (17.2 percent for blacks/Hispanics combined), followed by part-time undergraduates, full-time post-baccalaureates, and part-time post-baccalaureates (8.2 percent). Fall 1980 data for individual colleges are included. (SW)

The extent of faculty vacancies in colleges of engineering, the effects of such vacancies upon research and instructional programs, and the nature of the competition between academia and industry in hiring engineering faculty were surveyed. The focus is on permanent full-time faculty positions in the following major engineering fields: aeronautical and astronautical, chemical, civil, computer science and computer engineering, electrical, industrial, and mechanical engineering. As of fall 1980, there were approximately 16,200 permanent full-time engineering faculty positions in the 244 institutions with at least one accredited engineering program. Additional findings include: the 50 institutions with the greatest engineering research and development (R & D) expenditures accounted for 45 percent of all permanent full-time engineering positions; almost 10 percent of full-time engineering faculty positions were unfilled at the beginning of the fall 1980 term, and of these, 45 percent had been vacant since fall 1979; the top 50 institutions in engineering R & D had a vacancy rate of 8 percent, compared with a rate of 11 percent at all other institutions; over half of all institutions reported a substantial decrease in their ability to recruit or retain engineering faculty over the past five years; that proportion was 64 percent at public institutions and 29 percent at private institutions; and during 1979-80, almost 400 full-time engineering faculty voluntarily left academia for full-time employment in industry, representing 2.7 percent of the permanent, employed faculty. Technical notes and a sample questionnaire are appended. (SW)

Identifiers—\*Czechoslovakia  
As part of the Project of Further Development of the Czechoslovak Educational System, a program adopted in 1976, library education has been revised beginning in the secondary schools, extending through the university level, and providing continuing education opportunities for librarians, technicians, and researchers. Secondary school curriculums provide the basic skills through courses in library technical processes, library services, bibliographic work, and information studies, including automated systems, to prepare library technicians

for public libraries and information centers. University level work, which may lead to a doctorate, generally offers three specialties: the universal or general information librarian, the integrative or cross-discipline librarian, and the subject specialist. Core curriculums specified for these fields are supplemented by extensive opportunities for study in languages, sciences, and other specializations. A system of continuing education exists at all levels to insure professional development. The ultimate goal for professional library education is the development of a sound theoretical and scientific research base. The seven references listed are in Czech. (RAA)

Experiences in the South Pacific, Africa, and the West Indies are the basis for this examination of the professional status of librarians in developing countries, including rank and salary, faculty or comparable privileges, and opportunities for professional education. In the instances considered, factors of expatriate service, individual achievement, government support, and incipient unionism are considered to be of major importance as these nations seek to produce an indigenous professionally educated staff of librarians whose members can compete for status with faculty or other comparable staff. A pragmatic approach, dedication, and the utilization of paraprofessionals are seen as necessary to properly balance national, institutional, and individual interests if librarians are to assist their nations to meet pressing social problems. **Simulation of a Schema Theory-Based Knowledge Delivery System for Scientists.**

W/V Associates, Annapolis, Md.

Spons Agency—National Science Foundation. Washington, D.C. Div. of Information Science and Technology.

Pub Date—May 81

Grant—IST-7904896

Note—136p.

Pub Type—Reports - Evaluative (142)

**EDRS Price - MF01/PC06 Plus Postage.**

Descriptors—\*Artificial Intelligence, \*Cognitive Processes, \*Computer Oriented Programs, Databases, Delivery Systems, Epistemology, \*Information Retrieval, Information Seeking, Microbiology, \*Models, Online Systems, \*Research Tools, Search Strategies

Identifiers—Schema Theory

A future, automated, interactive, knowledge delivery system for use by researchers was tested using a manual cognitive model. Conceptualized from schema/frame/script theories in cognitive psychology and artificial intelligence, this hypothetical system was simulated by two psychologists who interacted with four researchers in microbiology to define functional measurements for computer applications. The system worked in real time to provide knowledge delivery services to real research problems through three phases of systems operations—diagnosis, search, and product design. Main systems elements included research paradigms as procedural scripts, information needs as weakly specified frame terminals, and content models as frames. The system's schema enables it to generate representations of information needs as

schemata, to plan and conduct targeted searches for relevant information, and to use its inductive and deductive inferencing capabilities. Appendices include interviewing procedures to generate topics and methodological paradigms as well as case studies of actual searches. Nineteen references are included. (Author/RAA)

**Flight Simulator: Use of SpaceGraph Display in an Instructor/Operator Station. Final Report.**

Bolt, Beranek and Newman, Inc., Cambridge, Mass.

Spons Agency—Air Force Human Resources Lab., Brooks AFB, Texas.

Report No.—AFHRL-TR-80-60

Pub Date—Jul 81

Contract—F33615-79-C-0013

Note—35p.

Pub Type—Reports - Descriptive (141) — Reports - Research (143)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—\*Computer Graphics, \*Computer Oriented Programs, \*Display Systems, \*Flight Training, Problem Solving, \*Simulation, Training Methods

Identifiers—Air Force

This report describes SpaceGraph, a new computer-driven display technology capable of showing space-filling images, i.e., true three dimensional displays, and discusses the advantages of this technology over flat displays for use with the instructor/operator station (IOS) of a flight simulator. Ideas resulting from 17 brainstorming sessions with pilots, instructor pilots, supervisors of pilot training, researchers in pilot training, and experts in human factors related to flying are outlined chronologically by meeting number. Concepts involved in these suggestions are discussed, and a brief discussion of priorities for future development concludes the report. Details of the time-varying, very-wide-field-of-view optics used are appended. (MER)

Pub Type—Guides - Non-Classroom (055)

**EDRS Price - MF01/PC05 Plus Postage.**

Descriptors—\*Cable Television, Cooperative Education, Demonstration Programs, \*Employment Programs, Federal Government, History, \*Industrial Training, On the Job Training, Program Descriptions, \*Public Agencies

Identifiers—\*Comprehensive Employment and Training Act, \*Private Industry

Intended to provide cable television company owners and operators, managers, supervisors, suppliers, and manufacturers with broad guidelines for the operation of and participation in a local or regional Private Industry Council (PIC), this handbook begins with a description of the Comprehensive Employment and Training Act (CETA); a brief history of federal employment and training; and a discussion of the administrative structure of the CETA/Private Sector Initiative Program (PSIP), the role of a PIC, and its relationship with its sponsors. A discussion of reasons why cable television operators should participate is followed by a list of 19 benefits the program would provide the cable television industry, including on-the-job training, classroom training, and targeted jobs tax credit. Descriptions provided of model programs at Worldwide Educational Services, Inc., the Maricopa County Skill Center, and Cablevision Training Center, Inc., include program type, numbers of people trained, funding levels, sources of funds, and contact persons. The appendices include resources to contact; Part 679, PSIP Regulations; frequently used acronyms; a PIC Proposal Evaluation Form; and a sample on-the-job-training agreement. (CHC)

Curriculum Planning—Is the School Librarian Relevant?

Pub Date—79

Note—29p.; Paper prepared for educational administrators in New South Wales, Australia.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Administrators, \*Coordinators, \*Curriculum Development, \*Educational Resources, Elementary Secondary Education, Foreign Countries, Instructional Development, Learning Resources Centers, \*Librarians, \*Library Role, Resource Materials, \*School Libraries

Identifiers—Australia

Although the need for adequate exploitation of limited resources is a recurring theme in discussions on school based curriculum development, surprisingly little attention in the education literature has focused on the possible role of the school librarian as school resources coordinator and contact point for resources outside the school. The implications of this role seem to have been overlooked by teachers and educational administrators but not, as evidence indicates, by school librarians. Three principal reasons for this situation are confusion amongst school librarians about their entry point in the curriculum development process; the ways in which school librarians have applied their special knowledge to information organization, retrieval, and dissemination; and the mismatch sometimes developed between resources and services promoted and the learning environment of the school. An interactive model is proposed for involving the librarian in the curriculum development process and administrators are encouraged to use their 'scarce resources' wisely, including school librarians. (Author/RAA)

Technology, Systems and School Librarians: An Approach to Continuing Education.

Pub Date—Sep 80

Note—15p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Automatic Indexing, \*Cataloging, \*Computer Oriented Programs, \*Librarians, Library Automation, \*Library Networks, Online Systems, Postsecondary Education, Professional Continuing Education, School Libraries, \*Systems Analysis

Identifiers—Australia

This paper describes a continuing education course designed to introduce school librarians to computer and communications technology as applied to indexing, cataloging, and networks, and to the principles and techniques of systems analysis. It is based on the premise that although computer and communications technology presents school librarians with great opportunities to develop more innovative approaches to information retrieval in the educational environment, education for school librarianship has only recently begun to deal with their implications and to design instruction for school librarians. The description also reviews the course objectives and scope, together with its structure and content, and examines the effect it has had on participants and library services in New South Wales. (Author/RAA)

Descriptors—Community Study, Institutional Evaluation, Library Administration, Library Automation, \*Library Expenditures, Library Extension, \*Library Facilities, \*Library Planning, Library Role, \*Library Services, Needs Assessment, \*Public Libraries, Self Evaluation (Groups)

Identifiers—\*Minnesota (Saint Paul)

This report by the City of Saint Paul's Citizens Task Force for the Library presents a documented written program of recommendations for growth and change for the next five years based on the results of three sub-studies: (1) a 'Community Analysis,' an in-depth study of the library-related needs

of the Saint Paul community; (2) a self-study of the library by its own staff and administration; and (3) a thorough analysis of the Saint Paul Public Library by an external team of consultants (HBW Associates) chosen after a national search. Recommendations are concerned with the role of the library, actions to be taken by the central library, technological changes to promote greater efficiency, restructuring of library extension services, and reorganization of library administration. Attached to this final report as annexes are 'No Growth' budget projections for the Saint Paul Library 1982-86, task force and consultant recommendations with costs projected on the 'No Growth' costs, and the final report of HBW Associates. Identifiers—\*Access to Information

Eight studies by experts in the field of information retrieval examine aspects of public use of such automated systems as online catalogs in libraries. Ward Shaw discusses "Design Principles for Public Access," outlining desirable characteristics of an information retrieval system. Allen Avner and H. George Friedman, Jr. treat problems with present information systems in "Interacting with Computer Users: Design Considerations," while Christine L. Borgman and Neal K. Kaske deal with equipment needs in "Determining the Number of Terminals Required for an On-Line Catalog through Queueing Analysis of Catalog Traffic Data." Margaret Beckman addresses system design in "Public Access at the University of Guelph Library," and Thomas T. Hewett and Charles T. Meadow's "A Study of the Measurement of User Performance" presents data on the successes and failures of information retrieval systems at various libraries. Problems encountered by novices are discussed by Mark S. Fox and Andrew J. Palay in "Machine-Assisted Browsing for the Naive User." Problems encountered by the handicapped in using information systems and solutions for individual handicaps are presented in Gregg Vanderheiden's "Modifying and Designing Computer Terminals to Allow Access by Handicapped Individuals." The final paper is Allan H. Levy's study from the health care field, "Resistance to Technology: Some examples from the Health Care Delivery System." An index is provided.

Identifiers—University of Texas Austin

A result of close cooperation between librarians at the Undergraduate Library and the English faculty, the program described in this report involves the integration of library instruction with freshman English courses at the University of Texas at Austin. The formulation of goals for this program, through which over 5,000 students each year are taught basic research skills, is discussed, as well as the program's intended audience, and the development of faculty contacts, and the instructional materials used in the program are individually described. An account is provided of the formative and summative evaluations which helped to shape the program and to demonstrate its effectiveness. Some of the questions surrounding the impact of the program on library operations are addressed, and the administrative, staff, and material resources necessary to run the program are enumerated. Included as appendices are a complete set of the instructional materials used in the 1980 academic year, a sample of the instructional materials used during the first year of the program (1975), a copy of the initial program proposal, the statements of the 1975 and 1980 program objectives, and a copy of a survey questionnaire sent in 1978 to students who had participated in the program. Identifiers—\*Boston Public Library MA

The Editing, Photoduplicating, and Distributing of the Research Library Catalogue of Boston Public Library Project, which is described in this report, was supported by grants awarded under the Strengthening Research Library Resources Program, Title II-C of the Higher Education Act of 1965 administered by the Office of Libraries and Learning Resources. Divided into two parts, the report first traces the history of the library from a gift of 50 volumes from the City of Paris to the City of Boston in 1843, to 3,000,000 volumes in 1979 when this rehabilitation project was undertaken. As the collection and catalog grew, the history of the Boston Public Library paralleled the evolution of modern cataloging processes, and the second part of the report describes the activities of the first phase of the project, as catalog cards were translated into microfiche in order to preserve millions of deteriorating bibliographic records, expand access to the research collections of the Boston Public Library, and offer insights to other research libraries planning to integrate newer styles of cataloging into existing bibliographic files. The major phases of the project are briefly reviewed and presented as a

chart. (RAA)

Library Faculty Development: Needed Now More

Than Ever.

Pub Date—Oct 81

Note—8p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Academic Libraries, \*Faculty Development, Higher Education, \*Librarians, Library Automation, Library Personnel, Online Systems, \*Professional Continuing Education, \*Technological Advancement

Identifiers—\*Faculty Publishing

This paper discusses the need for faculty development from the viewpoint of the individual academic librarian and that of the library. In the case of the librarian, issues of research and publication and continuing education to cope with technological advancement are stressed. The need for faculty development is also discussed in the context of the dramatic change in academic libraries caused by the use of changing and complex mechanisms to identify, retrieve, and disseminate information and the increasing interdependence of the academic library with other libraries and information sources. Identifiers—Earlham College IN, \*Southeast Missouri State University

Although differing in enrollment, student-teacher ratio, admissions policy, cost, curriculum content, and geographic location of students, the Southeast Missouri State University Library (SEMSU) developed a successful bibliographic instruction program based on Earlham College's Bibliographic Instruction Conference of November 17 and 18, 1977. Designed to enhance students' research skills and to give librarians a more active role in the educational process, the program provided bibliographic instruction for experimental groups from the English, History, Psychology, and Speech Departments; control groups did not receive such instruction. Presentations involved teaching the use of the card catalog and periodical indexes, search strategy, and bibliography, and a tour of the library. Responses to a 45-question evaluation questionnaire indicated that student research skills did improve, with significant differences between experimental and control groups; however, students' attitudes toward librarians and the library did not improve. It was concluded that educational philosophy and administrative policy have a greater influence on the program's success than the characteristics mentioned above. Seven references are listed. (RBF)

Identifiers—Heilprin (Lawrence B), \*Indexers,

Text Structure

An adaptation of Heilprin's model of the path of propagation of human messages is used to explore the truism that more experienced academic researchers tend to go directly to the published literature, while less experienced researchers may rely more on such secondary sources as indexes and other library reference and bibliographic services. The iconic model, which incorporates an assumption from linguistics about the indirectness of meaning in a message text, is used to examine some of the intellectual processes shared by indexers and authors, as well as ways in which the individual tasks of these persons are different. It is believed that these similarities and differences, as reflected in the texts of the two types of written messages they produce, are partly responsible for the behavior described by the truism. Eleven figures illustrate discussions of theoretical models, documents and indexes, research through references, critical research, citation indexing, the knowledgeable researcher, and the memory of research. A concluding discussion briefly reviews several other models proposed for use in library and information science, and a 34-item bibliography is attached. (RBF)

Descriptors—\*Computer Assisted Instruction, Computer Programs, Databases, Higher Education, Individualized Instruction, \*Information Retrieval, \*Man Machine Systems, \*Online Systems, \*Training Methods

Identifiers—\*Individualized Instruction for Data Access, \*Users

The realization that the facilities available for the retrieval of scientific and technical information were being underutilized resulted in a project undertaken by the Drexel University School of Library and Information Science to develop a computer intermediary capable of assisting users of scientific and technical information in the performance of online bibliographic searches. Individualized Instruction for Data Access (IIDA), the computer system developed during the project, operates in an instructional and an assistance mode, and can be used to train users to perform online searches or to aid users in search performance. The system employs a set of diagnostics which alert users to the strategic and syntactic errors they make during the search process. When IIDA was operational, a number of evaluations of the system were made, using first undergraduate computer science majors and experienced online searchers, then library science faculty and graduate students and undergraduate engineering students, and finally engineers at the Exxon Research facility in Florham Park, New Jersey. The evaluation studies indicated that individuals who had never done online searching were able, using IIDA, to do searches which produced satisfactory results. Detailed accounts of the design of the system, system operations, and the methodology of the evaluation studies are given, and the project bibliography is included. (JL)

Descriptors—Cable Television, \*Delivery Systems, Educational Change, \*Libraries, \*Library Services, Organizational Change, \*Technological Advancement, Technology, \*Telecommunica-

tions, Videodisc Recordings, Videotex  
Intended to inform librarians and educators about the technology-based delivery systems likely to affect education and librarianship in the near future and to persuade them to reap the benefits of these systems, this paper provides a non-technical review of telecommunications and media technologies. The relationship between technology and change is discussed, the developing role of telecommunications in society is outlined, broadband and narrowband telecommunications systems are defined, and a number of recent or potential uses of these systems are examined, including electronic mail, cable television (with special emphasis on Instructional Television Fixed Service-ITFS), videodisc systems, and teletext/viewdata systems. The use of teletext in closed-caption broadcast services and a number of prototype viewdata systems are described, with particular attention paid to the TELIDON system developed by the Ontario Educational Communications Authority (OECA). Some projections are made concerning the future uses of telecommunications-based systems to increase access to education and the range of educational opportunity, and the resultant changes facing librarians and educators are enumerated. Accompanying the text are three figures and a list of 12 references. (JL)

Identifiers—Mississippi State University  
Freshman botany students, graduate students, and student library assistants participated in a study to determine the effectiveness of a self-paced workbook on learning library skills in searching science literature and to determine staff and funding requirements to run larger scale instructional programs. The botany students comprised four groups. The volunteer group used the entire workbook, whereas the randomly selected groups completed portions of the workbook assignments and received additional instruction at three levels: none, library tour only, or workbook available on request. Graduate students and student library assistants were required to complete the entire workbook. Participants were given a pretest and posttest consisting of selected questions from the workbook. The results of the study indicated that students completing the workbook had statistically greater score increases on a standard test than those student groups who did not have access to the workbook. Activities involved, the amount of time to prepare the workshop material, and the cost of printing the workbook and pretests are discussed. Also discussed are the workbook, materials, time tables for assignment completion, costs, and staff. Suggested program implementation is outlined. Five tables, two figures, and three references are provided. (RBF)

Semb, George. And Others  
An Analysis of the Instructor's Role in a Personalized Psychology Course.

Pub Date—81  
Note—11p.; Paper presented at the Annual Meeting of the American Psychological Association (Los Angeles, CA, 1981).  
Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.  
Descriptors—\*Affective Measures, Classroom Observation Techniques, \*Group Dynamics, Higher Education, \*Individualized Instruction, \*Interaction, Statistical Analysis, Student Attitudes, \*Student Teacher Relationship, Teacher Attitudes, \*Teacher Role, Undergraduate Students

Identifiers—Personalized System of Instruction  
Forty-two students enrolled in an introductory child development course at the University of Kansas participated in a study which assessed student-

instructor interaction in a personalized psychology course. Using Keller's Personalized System of Instruction (PSI), the instructor's role was investigated by comparing the number of interactions between instructors, students, and proctors under two instructor conditions: active and inactive. The active instructor moved throughout the classroom, initiated interactions, and looked over students' study guides. The inactive instructor did not initiate interactions and remained seated at a desk and answered student questions from that location. Results indicated no significant differences in academic performance or rate of learning between the two approaches. However, students rated the active instructor condition more favorably than the inactive instructor role. Seven references are listed. (MER)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Contingency Management, \*Group Instruction, Higher Education, \*Individual Characteristics, \*Individualized Instruction, \*Individual Needs, \*Mastery Learning, Motivation Techniques, Pacing, Teaching Methods

Identifiers—Personalized System of Instruction  
This paper discusses a number of contingency arrangements used in studies at the University of Kansas to enhance individualized characteristics of personalized instruction. It begins with an examination of Keller's Personalized System of Instruction (PSI) and its five defining features: (1) reliance on the written word, (2) unit mastery, (3) the go-at-your-own-pace feature, (4) motivational lectures, and (5) the use of proctors. It argues that the core of personalized instruction is the unit mastery requirement which stipulates that students cannot progress from one unit to the next until the previous one has been mastered, and that all other PSI components only serve to enhance the unit mastery concept. Finally, the paper outlines several studies conducted at the University of Kansas and elsewhere which were designed to use contingencies to make personalized instruction more dynamic and flexible, and to make group-based classes more responsive to individual student needs. Ten references are listed. (MER)

Cable Library Survey Results.  
Public Service Satellite Consortium, Washington, D.C.

Pub Date—81  
Note—23p.

Pub Type—Reports - Evaluative (142)  
EDRS Price - MF01/PC01 Plus Postage.  
Descriptors—\*Cable Television, \*Communications Satellites, Community Resources, \*Library Cooperation, \*Library Networks, \*Library Role, \*Library Services, Telecommunications

This report summarizes a survey of 198 libraries which had been identified as potential cable libraries which assessed: (1) to what extent a national satellite cable library network might already be in technical existence, (2) how many libraries are connected to cooperative cable companies with satellite hardware and excess receiver capacity, and (3) of that number, how many cable libraries would be interested in participating in satellite-assisted library services and video-conferences. Questionnaire and telephone interview responses indicated that the majority of the libraries surveyed recognized the need to expand their community service roles through some use of telecommunications. It was also found that if joining with cable systems to provide satellite program receiving locations was a method of improving community services without making demands on the library's budget, the concept was worth exploring individually on an operational basis. A list of pros and cons for a national satellite cable library network, and a discussion of potential avenues for financing close-circuit satellite events are also provided. (Author/MER)

Herman, Kenneth  
The Psychologist and the Computer.

Pub Date—81  
Note—13p.; Paper presented at the Annual Meeting of the American Psychological Association (Los Angeles, CA, 1981).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)  
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Clinical Diagnosis, \*Computer Assisted Testing, Cost Effectiveness, \*Diagnostic Tests, \*Mental Health Programs, Patients, Psychological Services, \*Psychological Testing, Psychologists, Therapists

This discussion of an online, in-house computer system used in a group clinical psychology practice describes the development of a program designed to offer cost-effective testing services for patients of mental health professionals. The report provides detailed information on two psychological testing inventories rendered via computer. The first is a Sexual Adjustment Inventory, which enables therapists to survey an individual's sexual adjustment; the second is a Self Discovery Program which utilizes the computer to administer pre- and post-session tests to document behavioral and emotional changes exhibited by course participants. An outline of other available tests is provided, including a Stress Anxiety Scan, an Assertive Scale, a Fear Inventory, a Dissimilation Index, an Index of Somatic Problems, a Beck Depression and Hopelessness Scan, a Social History Scan, a Symptom Checklist, a Minnesota Multiphasic Personality Inventory, an Intellectual Screening Battery, and a Career Assessment Survey. Tests projected for future marketing are a Personality Inventory for Children, a Rorschach Interpretation, and a Visual Searching Task for diagnosing neurologically impaired patients. (MER)

Identifiers—Communications Research, Public Service  
This paper discusses the important link between social structure and communications systems and explores some of the practical policy implications resulting from this relationship. First, the concept of social structure as the basis of a pattern of communication is clarified. Then, one paradigm of communication structure typical of many Third World countries is analyzed and the criteria for communications policy implied in this structural process is summarized. Finally, an examination of the evidence of the importance of the "intermediate media" such as local public-service radio provides an example of the application of structural criteria in selecting alternative communications strategies. Thirty-six references are listed. (Author/LLS)

crocomputers, Needs Assessment, Outcomes of Education, Questionnaires, \*Research Needs, \*School Districts, Teacher Education

The study reported here was conducted in order to discover and identify ways in which microcomputers are now being used in schools, and the complex issues which surround their implementation. The purpose of the study was to assist the National Institute of Education in setting priorities for research in the area of new technology and education. Three geographically distinct school districts with a diversity of microcomputer applications at both elementary and secondary levels were studied. A research team interviewed people at all levels of the school system, and observed students using microcomputers in a variety of contexts. Six trends emerged from the study which raise important questions for future research: (1) differential access to microcomputers, (2) the emergence of new roles in response to microcomputers, (3) the lack of integration of microcomputers into elementary classrooms and curriculum, (4) the inadequate quantity and quality of software, (5) the inadequate preparation of teachers for using microcomputers, and (6) lack of knowledge of effects and outcomes. Sixty-nine references are appended. (Author/LLS)

Identifiers—\*Washington

This resource guide, which was produced to provide support for school programs which use television as part of the regular instructional program in the state of Washington, includes listings of eight characteristics of effective instructional television programs, six of effective instructional television viewing, and five of effective planning for teaching with instructional television; four television series on videotape and 124 films on videotape that are available from the Washington State Video Consortium and the contact people at the consortium; 50 instructional television programs that are broadcast on public television and the four Washington stations; the addresses of and services available from public television stations, commercial television stations, cable consortia and community action organizations; and national media action groups. Also included are the addresses of 26 sources for free or inexpensive materials with descriptions of the services of 20 of the sources, descriptions of seven active programs in schools around the state, and three sources of staff development materials and programs. The appendices include commonly asked questions and answers, a list of public radio stations in Washington, and a bibliography of 63 items. (CHC)

Visual Literacy. . . An Overview of Theory and

Practice.

Pub Date—80

Note—20p.

Pub Type—Information Analyses (070)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—\*Cerebral Dominance, \*Cognitive

Style, \*Communication (Thought Transfer),

Idiography, \*Imagery, Research Reports, \*Visual

Literacy, Visual Perception

Identifiers—Image Analysis, \*Practical Knowledge

Visual Literacy is a field that encompasses a variety of theoretical constructs and practical considerations relating to communicating with visual signs.

The theoretical constructs that influence visual communication primarily fall into two closely inter-

related categories: those that relate to the individuals involved in the communication process, and

those that relate to the visual signs. The first cate-

gory includes visual perception, hemispheric processes, mental imagery, and cognitive styles. The second category includes sign systems, visual language, image variables, and image analysis. The practical considerations include teaching about visual communication, relationships between visual and verbal learning, audiovisual materials in classroom teaching, and influences of media, especially television. EDRS Price—MF01/PC05 Plus Postage.

Descriptors—\*Computer Programs, \*Computers,

\*Flight Training, Mathematical Formulas, Math-

ematical Models, \*Programming, \*Simulation

Identifiers—\*Computer Architecture

The purpose of this study was to evaluate the parallel processing impact of multiple-instruction multiple-data path (MIMD) computers on flight simulation software. Basic mathematical functions and arithmetic expressions from typical flight simulation software were selected and run on an MIMD computer to evaluate the improvement in execution time that results from the parallel architecture of this type of computer. Recommendations as to the types of tasks which are optimally suitable for this computer architecture are made, together with the improvement in execution speed to be expected. Twenty-six references are listed. (Author/LLS)

(Data), Teacher Attitudes, Teaching Methods

Identifiers—American Society for Information

Science, Consciousness Raising, Hands On Ex-

perience

A survey conducted to document the status of online searching instruction in United States and Canadian library and information science schools specifically sought information on: reference use of technical processing and traditional search systems, consciousness raising instruction, instructional levels, physical facilities, funding sources, and faculty opinions on online searching, including develop-

mental problems and its future. It was administered by a curriculum committee established in 1979 by the User Group on Online Educators of the American Society for Information Science to improve education and online searching. Of the 116 questionnaires mailed in April 1980 to all ALA accredited library schools and to all institution members of the Association of American Library Schools and a few other schools, 72 were completed and returned. Ten interviews were also conducted in accredited library schools. The results of the survey confirmed that, although courses, instruction content, and teaching methods vary, instruction in online searching is today an integral part of library and information science education. Three educational patterns were identified: the "Single Online Course" approach, the "Large Component" approach, and the "Integrated" approach. Unedited responses to open-ended questions and summaries of the ten case studies are provided as well as 23 tables and 15 references. (RBF)

Papers, Research Libraries

Identifiers—Michigan

This collection of six papers and comments from a workshop focuses on three aspects of collection development—budget implications, communication with faculty, and written policies. Points of view are expressed by speakers from small- and medium-sized academic, private, and public libraries in Michigan. The first paper discusses the implication of knowledge explosion, information obsolescence, inflation, dwindling resources, and technology on collection development. Budgeting for library collection development at Central Michigan University is explained in this paper and for Kalamazoo College Library in the second paper. The next two papers, presented by librarians from Hope College and Washtenaw Community College, both address problems in and strategies for communicating with faculty on collection development. Written collection development policies are discussed by librarians from Tannahill Research Library (the museum library of Greenfield Village and the Henry Ford Museum) and the University of Michigan-Dearborn. Comments on the content of the presentations by the library director at Earlham College conclude the workshop proceedings. References are listed for each paper as well as further readings on collection development. (RBF)

Identifiers—Australia, \*Distance Education, Scotland, South Africa

A collection of nine commissioned papers, one each from Scotland and South Africa and eight from Australia, address provisions for and problems with distance education for librarianship. Components and applications of directed private study in Scotland and the development, educational philosophy, methods, problems, and standards of correspondence courses in librarianship at the University of South Africa comprise Part I. Part II focuses on Australian experiences in external studies in librarianship. Four of these papers describe various programs, and together they discuss program development, teaching methods, problems, degree requirements, student profile, cost, courses, student needs, and contact modes. Isolation and the external student, a feasibility study on an external study for librarianship, and an evaluation of a pilot study combining on-campus and off-campus work are the topics of the remaining three papers. A discussion by the editor of philosophies and practices of external studies serves as an introduction to the papers. References are included for six of the papers, and biographical notes on the authors are provided. (RBF)

Circulation, \*Library Collections, \*Library Ex-  
penditures, \*Library Personnel, Library Surveys,  
Reading Materials, Statistical Data, \*Trend Anal-  
ysis

Identifiers—Consumer Price Index

The National Center for Education Statistics has tabulated common library data elements and then related them to relevant institutional variables to provide the first analysis of college and university library trends in over a decade, and to supplement annual biennial reports of academic library statistics. Seven surveys provided the information on library data elements such as collection holdings for print and nonprint materials, operating expenditures, staffing, circulation, and interlibrary loan. Institutional variables used for comparison are student enrollments, expenditures, and the Consumer Price Index. The majority of the tables indicate institutional control, type, and enrollment size, and provide means and quartiles as well as totals. Selected data items on library collections, expenditures, and full-time staff are also shown by states. Analyses of the seven college and university surveys reveal substantial increases in collections, financial resources, staffing, and services. However, when changes in student population and inflation are considered, library conditions remained constant with regard to the number of books and circulation per student, and library expenditures in relation to education and general expenditures. Libraries declined in number of staff and expenditures per student, the proportion expended for library materials, and the number of books purchased. Provided are appendices, nine text tables, and 36 survey tables. (RBF)

Library II, Test Content

A low cost approach to measuring materials avail-  
ability in small- or medium-sized libraries using an  
interview questionnaire is described in detail, along  
with an application of this approach. A rationale for  
using this method is provided, as well as guidelines  
for conducting such a survey. Facts of the study are  
discussed, including objectives, methods of estimat-  
ing availability, design criteria, staff and materials  
commitments, the purpose of each of the six ques-  
tions, when and how to administer the question-  
naire, the method of coding and scoring responses,  
test limitations, and interpretation of results. Sam-  
ple questionnaires, scoring instructions, and a scor-  
ing sheet are provided. A description of a study  
conducted at the Champaign Public Library and In-  
formation Center in March 1979 to evaluate the test  
instrument and user response to it is appended. This  
report covers procedures for conducting the inter-  
view, sampling of library patrons, and the results of  
the survey, including responses used, types of  
materials requested, the success and failure rates of

materials by class and item, and the cost of the  
survey. Eleven tables and a list of 36 references are  
provided. (RBF)

Institutional Planning: A Systems Approach.

Pub Date—24 Sep 81

Note—19p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Educational Administration, \*Edu-  
cational Planning, \*Management Information  
Systems, Organizational Objectives, Postsecond-  
ary Education, Systems Analysis, \*Systems Ap-  
proach

This four-chapter report explores the possible  
contributions of a systems approach to institutional  
planning. After introductory comments, Chapter I  
reviews the management theory of Henry Fayol,  
which emphasizes management tasks, such as plan-  
ning, organizing, commanding, coordinating, and

controlling, which are "universal" regardless of the  
level or kind of organization being considered. The  
applicability of this theory to education is then as-  
sessed. Next, Chapter II defines the systems ap-  
proach to management as the implementation of a  
holistic view of an organization, focusing on the  
interactions and working relationships of its compo-  
nent parts and on the organization's interaction with  
its environment. This chapter goes on to examine  
and provide examples of organizational goals (i.e.,  
broad statements of philosophy/purpose) and objec-  
tives (i.e., desired accomplishments that can be  
measured within a given time period) and to con-  
sider their use in guiding the systems planning pro-  
cess. Chapter III illustrates the use of a management  
information system in strategic planning, manage-  
ment control, and operating control. In conclusion,  
Chapter IV re-emphasizes the applicability of the  
systems approach to higher education. (KL)

\*Mathematics Instruction, Mathematics Teach-  
ers, Nonmajors, Organizational Communication,  
Questionnaires, Surveys, Teacher Attitudes,  
Technical Education, Two Year Colleges, \*Voca-  
tional Education, Vocational Education Teachers

A study was conducted to determine the level of  
cooperation between mathematics and occupation-  
al-technical faculty in the development and delivery  
of occupational-technical mathematics courses at  
100 randomly selected two-year colleges. Level of  
cooperation was measured by obtaining the percep-  
tions of selected administrators and faculty toward  
the willingness of mathematics faculty to adapt their  
concept of appropriate mathematics for occupa-  
tional-technical programs and toward the amount of  
coordination provided by the mathematics faculty  
for occupational-technical mathematics courses. A  
campus rating was developed from these responses,  
assigning the campuses a low, moderate, or high  
level of interface. Case studies were used to provide  
in-depth studies of the six high and eight low inter-  
face colleges. Information was gathered through the  
use of campus visitations, individual and group in-  
terviews, questionnaires, and rating sheets. Five key  
factors were identified as influencing level of inter-  
face: (1) quality of informal communication; (2)  
process for development and review of content for  
occupational mathematics courses; (3) departmen-  
tal location of responsibility for occupational math  
course instruction; (4) enrollment; and (5) view of the  
college. The study report includes a review of the  
literature on organizational theories and occupa-  
tional-technical education, a description of the re-  
search design and findings, and conclusions and is  
appended by survey instruments and case studies.

Identifiers—\*Management Skills

Prepared as part of a project to help managers and  
supervisors develop practical, up-to-date  
managerial skills in a relatively short time, this in-

structional workbook provides information and exercises applicable to on-the-job situations encountered by public administrators. Unit I focuses on leadership, management theories, time and stress management, and problem solving. Unit II offers information related to accountability; planning; analytical and investigative skills; policy formulation, activation, and evaluation; labor regulations affecting public administrators; and labor agreements. After Unit III covers communication, management techniques, committees, public relations, conflict management, and motivation, Unit IV suggests personnel techniques and discusses personnel management and staff development. Six additional topics are covered in the final unit: economics, budgeting, grantsmanship, physical facilities, computer technology, and leisure management. Each unit provides: (1) a statement of overall unit objectives; (2) specific objectives for each topic; (3) suggested instructor and participant activities; (4) a list of instructional materials included; (5) a list of references; (6) information sheets defining terms, presenting the topics, and recommending activities and strategies for use in class and on the job; (7) transparency masters; (8) strategies for use on the job; (9) transparency masters; (8) assignment sheets; and (9) a review test. Identifiers—\*Management Skills, \*Self Employment

Prepared as part of Platte Technical Community College's project to help managers and supervisors develop practical, up-to-date managerial skills in a relatively short time, this instructional workbook provides information and exercises applicable to on-the-job situations encountered by independent business owner/managers. Unit I provides information about the personal characteristics of successful business people, helps the manager increase his/her knowledge of self and the chosen field, and discusses business ethics and the problem-solving process. Unit II focuses on time management, office organization, governmental regulations, employee benefits, and insurance, while Unit III stresses skills related to personnel management, communications with employees and other businesses, public relations, and conducting meetings. Five topics are covered in Unit IV: accounting, budgeting, computers, market analysis, and advertising. Unit V concludes with discussions of goal setting, risk taking, use of consultants, research development, and incorporating. Each unit includes: (1) unit objectives; (2) specific objectives; (3) suggested instructor and participant activities; (4) an instructional materials list; (5) references; (6) information sheets which define terms, present topics, and recommend activities and techniques; (7) transparency masters; (8) assignment sheets; and (9) a review test. Health Care Administrators. Project TEAMS. (Techniques and Education for Achieving Management Skills).

Platte Technical Community Coll., Columbus, Nebr.

Spons Agency—Nebraska Coordinating Commission for Postsecondary Education, Lincoln.

Pub Date—Mar 80

Note—160p.

Pub Type—Guides - Classroom - Learner (051)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Administration, Administrators, Allied Health Occupations, Change Strategies, Community Colleges, Computers, Decision Making, Learning Activities, Legislation, \*Management Development, Medical Vocabulary,

Personnel Management, Problem Solving, Professional Continuing Education, Program Evaluation, Public Relations, Skill Development, Stress Variables, Supervisory Methods, Textbooks, Two Year Colleges

The result of a project to develop short courses to help health care administrators and supervisors in developing practical, up-to-date management skills, this instructional workbook provides information and exercises applicable to on-the-job situations. Unit I covers the following leadership considerations: self-awareness, time management, problem solving, accounting principles, and grantsmanship. Next, Unit II focuses on communications, peer relationships, medical terminology, conducting a meeting, and public relations. After Unit III considers personnel considerations of recruitment, labor laws, job descriptions, motivation, and evaluation, Unit IV stresses the skills related to delegation of responsibility, personnel and conflict management, stress management, and accident prevention. Finally, Unit V investigates management theories and functions, objectives and planning, program evaluation, change strategies, major challenges facing health care administrators in the 1980s, and computers and other technological advances. Each unit includes: (1) a statement of overall unit objectives; (2) specific objectives for each topic; (3) suggested instructor and participant activities; (4) a list of the instructional materials included; (5) a list of references; (6) information sheets which define terms, present topics, and recommend activities and strategies for implementation in class and on the job; (7) transparency masters; (8) assignment sheets; and (9) a review test. Descriptors—Advertising, Budgeting, \*Business, Change Strategies, Community Colleges, Computers, Continuing Education, Decision Making, \*Industry, Learning Activities, \*Management Development, Motivation, Organizational Communication, Personnel Management, Personnel Policy, Planning, Supervisors, \*Supervisory Methods, \*Supervisory Training, Textbooks, Two Year Colleges

Identifiers—\*Management Skills

The result of a project to develop short courses to help business and industrial supervisors in developing practical, up-to-date managerial skills, this instructional workbook provides information and exercises applicable to on-the-job situations. Unit I covers the following aspects of management: leadership techniques, problem solving, decision making, planning, and time management. The topics covered in Unit II relate to personnel considerations of hiring, job standards and training, employee benefits, and labor laws. Unit III deals with internal and external lines of communication, focusing on delegation of responsibility, public relations, and the role of the new manager. After Unit IV discusses motivation, change strategies, personnel and conflict management, and stress management, Unit V focuses on the management skills related to budgeting, using accounting data, computer awareness, economics, and advertising. Each unit provides: (1) an overall statement of unit objectives; (2) specific learning objectives for each topic; (3) suggested instructor and participant activities; (4) a list of instructional materials included; (5) a list of references; (6) information sheets which define terms, present topics, and recommend activities and strategies for application in class and on the job; (7) transparency masters; (8) assignment sheets; and (9) a review test. Descriptors—\*Administrator Responsibility, Budgeting, \*Business Administration, Business Communication, Community Colleges, Computers, Decision Making, Learning Activities, Legislation, \*Management Development, Motivation, Personnel Management, Planning, Problem Solving, Professional Continuing Education, Public Relations, Skill Development, Stress Variables, Supervisory Methods, Textbooks, Two Year Colleges

Identifiers—\*Management Skills

Prepared as part of Platte Technical Community College's project to help managers and supervisors develop practical, up-to-date managerial skills in a relatively short time, this instructional workbook provides information and exercises applicable to on-the-job situations. Unit I focuses on time management, the causes and management of stress, and aspects of personnel management, including human relations, employee counseling, change strategies, and conflict resolution. Unit II provides the manager with an opportunity to increase his/her knowledge of budgeting and financial management, computer systems, and planning. Unit III covers the topics of communication (in terms of barriers to effective communication, organizational communication, and listening skills), delegation of responsibility, and motivation (covering the theories of Maslow, Herzberg, and McGregor and motivational devices). The final unit explores the government regulations affecting business, problem solving and decision making, and public relations. Each of the units is structured identically and includes: (1) overall unit objectives; (2) specific objectives related to each topic; (3) suggested instructor and participant activities; (4) a list of instructional materials included; (5) a reference list; (6) information sheets which define terms, present topics, and recommend techniques; (7) transparency masters; (8) assignment sheets; and (9) a review test. Health Occupational Program Needs in the Los Angeles Community College District. A Report of Study Results.

Los Angeles Community Coll. District, Calif.

Pub Date—Jul 81

Note—115p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Allied Health Occupations, \*Allied Health Occupations Education, \*Educational Demand, \*Educational Supply, Employer Attitudes, Employment Patterns, \*Employment Projections, Enrollment, Multicampus Districts, Needs Assessment, Occupational Information, Questionnaires, Salaries, Two Year Colleges

Identifiers—\*Los Angeles Community Colleges CA

The study described in this report was conducted by the Los Angeles Community College District (LACCD) to provide a basis for a master plan for health occupation programs and facilities that would meet the educational purposes and needs, workforce demands, and criteria for effective resource management of the district. After discussing the increased need for allied health workers and increasing fiscal constraints, the report describes the study's methodology. This involved: (1) a survey of present employment needs for trained health occupation personnel in Los Angeles; (2) a survey of local educational providers of health occupation training; (3) an assessment of current health occupation programs in the district; and (4) a forecast for future personnel needs using a Delphi survey technique. Next, the results of each of the surveys and assessment are presented. A summary section presents conclusions, such as that the demand for programs training registered nurses far exceeds any other need for health occupation personnel and includes demands for variation in both level and type of specialization. The report also indicates a growing demand for specialized technician and medical office personnel training. Appendices include data on health occupation employment opportunities and salaries; enrollment data in LACCD health programs for 1977-79; occupation descriptions; the employer survey sampling design and response rate; and all survey instruments. Generativity, Stuckness, and Insulation: Community College Faculty in Massachusetts.  
Pub Date—Sep 80  
Note—117p; Ed. D. Dissertation, University of Massachusetts.

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, MI 48106 (Order No. 81-01-308, MF \$9.00, Xerography, \$18.00).

Pub Type—Dissertations/Theses - Doctoral Dissertations (041)

Document Not Available from EDRS.

Descriptors—Burnout, \*College Faculty, Community Colleges, \*Individual Development, \*Job Satisfaction, Psychological Patterns, Surveys, Teacher Characteristics, Teacher Evaluation, \*Teacher Morale, Teacher Motivation, Two Year Colleges

This study examines the psychosocial conditions of generativity and stagnation and personal characteristics related to these conditions among senior faculty at five community colleges in Massachusetts. Chapter I outlines the problem and purpose of the study; defines "stuckness" as a lack of challenge or career options, contrasting it with burnout; details study limitations and assumptions; and suggests the significance of the research. A review of related work in higher education, psychology, and business is presented in Chapter II, where Erickson's definitions reveal generativity as a stage in human development characterized by a productive and forward-looking orientation. Chapter III details study design, which included a survey, personal interviews, and the administration of a job satisfaction/dissatisfaction scale to 27 faculty members. Chapter IV presents findings, including: (1) both generativity and stuckness were identified among the instructors; (2) faculty experiencing generativity and stuckness had distinctive characteristics rooted in their job satisfaction, hours spent on campus, attitudes toward students, satisfaction from and feelings toward teaching, and plans; and (3) insulation, a third stage related to leveling off in professional development, was identified. In Chapter V, conclusions are presented related to the needs of insulated staff and the value of staff development. Appendices contain the survey instruments and related materials. (KL)

Perry-Hill, Joseph W., Jr.  
Highlights from Two Recent Studies on the Use of Citizen Advisory Groups in the North Carolina Community Colleges.

North Carolina State Advisory Council on Education, Raleigh.

Pub Date—Aug 81  
Note—9p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Advisory Committees, \*College Curriculum, Community Colleges, \*Curriculum Development, \*Group Activities, Group Membership, \*Program Effectiveness, School Community Relationship, State Surveys, Technical Institutes, Two Year Colleges, \*Vocational Education

Identifiers—\*North Carolina Community College System

Two studies investigated the use of curriculum advisory committees by North Carolina community colleges. The first, by George Armfield of Caldwell Community College and Technical Institute, surveyed community college administrators and faculty about their use of these committees. The study: (1) identified 16 major functions of curriculum advisory committees ranging from offering advice on program development to providing awards to outstanding students; (2) identified problems involving infrequent meetings, confusion about the groups' objectives, problems of attendance, and failure to recognize the groups' contributions and to implement the groups' recommendations; (3) determined that the qualities of the committee members, such as relevant experience, enthusiasm, and availability, had a great impact on the effectiveness of the committee; (4) determined that variables including length of appointment, size of committee, member orientation, elections, and recognition of committee members' service had little effect on committee effectiveness; and (5) suggested that the effective utilization of curriculum advisory committees requires a clear set of objectives and the selection of knowledgeable and interested committee members. The results of Arm-

field's study are strongly supported by a study by Dr. Harley Affeldt at Forsyth Technical Institute, which also found that involvement of the members, college support, and implementation of committee recommendations are necessary for committee functioning. Tables showing results from Armfield's study are appended. (KL)

Adult Basic Education and English as a Second Language: Prospects for Integration of Education and Gerontology.

New York City Technical Coll., Brooklyn. Div. of Continuing Education and Extension Services.

Pub Date—[80]

Note—13p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Adult Basic Education, Adult Students, \*Agency Cooperation, Community Colleges, Community Education, \*Educational Gerontology, Educational Needs, \*English (Second Language), \*Older Adults, Second Language Instruction, Student Motivation, Two Year Colleges

Although basic education and English as a Second Language constitute core components of adult education, older persons have not been a target for language programs until recently. Research indicates a great need for and interest in adult basic education among language-restricted seniors who seek the every day rewards of language fluency. Gerontologists can help in meeting these needs through research into learning characteristics and motivation of older learners, field and evaluation research on programs serving adults in a variety of settings, training adult educators, and advising in the preparation of curriculum materials. No single discipline or profession has access to all elements critical to a successful literacy program for older students. Rather, interdisciplinary and inter-institutional collaboration among senior center administrators, social service agency workers, curriculum development specialists, and educational administrators is essential for success in the recruitment, counseling, and placement of students; the training and supervision of instructors; the preparation of instructional materials; and liaison with educational funding agencies. The ideal program delivery system must coordinate the efforts of various institutions and disciplines with the purpose of language mastery for older adults. Gerontologists can serve as a catalyst in bringing together these different elements and creating linkages within and outside the college. (KL)

Descriptors—\*Adult Programs, Community Satisfaction, \*Liberal Arts, \*Older Adults, \*Outreach Programs, \*Participant Satisfaction, \*Program Effectiveness, Program Evaluation, Quality of Life, Student Characteristics, Technical Institutes, Two Year Colleges, Urban Education

Identifiers—\*Institute of Study for Older Adults

In 1979 a project was undertaken to evaluate the Institute of Study for Older Adults (ISOA) Liberal Arts program, a unit of the City University of New York which provides noncredit, off-campus liberal arts classes for the elderly poor of New York City. The evaluation sought to determine the demographic characteristics of program participants; the relationship of learning with factors of social adjustment, self-esteem and life satisfaction in the aged; and the effectiveness of certain program operations. This seven-part report describes the Liberal Arts program as well as the evaluation effort and its results. After Part I reviews the scope and purpose of the evaluation project, Part II provides background on New York City Technical College, the Institute, and current challenges to the ISOA. Part II goes on to offer ISOA's view of general education as the application of academic disciplines to the lives of the elderly, and to outline five desired student out-

comes. Part III introduces the evaluation project and the survey methodology used. The scales used on the questionnaire determined demographics, community activities and perceptions, perceived well-being, self-determinism, social interaction, social network assessment, course and teacher evaluation, and course effects on life satisfaction. Part IV presents and analyzes the results of the study, comparing ISOA participants with control groups, and also examines student and staff responses to the evaluation. The questionnaire and data tables are appended. (KL)

Who Has the Power?

Pub Date—Jul 81

Note—13p.; Paper presented at the Transatlantic Institute (Oxford, England, July 1981).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Administrator Role, \*Educational Policy, \*Governance, Government Role, \*Government School Relationship, Institutional Autonomy, \*Policy Formation, \*Postsecondary Education, \*Power Structure

Identifiers—\*Canada

Three issues concerning educational policy making are examined in this paper: (1) Who has the power to affect major policies in Canadian post-secondary education? (2) How does a shift in power affect educational policy making? and (3) How can institutional management best respond to this power? After presenting a rationale for its focus on power, the paper lists nine groups which influence policy making and comments upon issues associated with their degree of influence over policy making. These nine groups are, in order of influence, the provincial government, the institutional boards of governors, college presidents, college faculty, the federal government, faculty unions, college students, alumni associations, and local governments. After the assertion is made that the concentration of power in the hands of the provincial government makes any resultant policy less applicable to local needs, nine suggestions are provided as ways that institutional management can extend its power to influence policy making. These suggestions include the following: develop a strong identification with the next higher power source, i.e., the board of governors; strengthen the power base by forming peer groups such as a council of presidents; find out about the value systems and characteristics of those who have power; and move to a participative administrative mode. The paper concludes with comments on the inevitability and positive aspects of conflict in matters of power. (AYC)

Voc-Ed Update.

Hawaii Univ., Honolulu. Office of the State Director for Vocational Education.

Pub Date—Jan 81

Note—20p.

Pub Type—Reports - Descriptive (141) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Affirmative Action, Articulation (Education), Federal Legislation, Federal Regulation, Futures (of Society), \*Government School Relationship, Inservice Education, Job Placement, Postsecondary Education, Program Administration, School Holding Power, Secondary Education, State Agencies, State Surveys, \*Vocational Education

Identifiers—\*Hawaii

An overview is presented of vocational education in Hawaii. The first two sections define vocational education and contrast it to employment training, emphasizing the need for coordination between secondary and postsecondary programs. Noting the impact of federal funding laws, the next section describes the composition and responsibilities of the state boards, councils and offices concerned with vocational education in Hawaii and the relationships among them. The federal role in vocational education is covered next and significant federal legislation in the field is reviewed since 1972. The accomplishments of vocational education are then illustrated in terms of steady enrollments, program completions, employer satisfaction, sex equity, and professional personnel training. The following section examines the challenges for vocational education in the 1980's. These include fiscal austerity which may require the curtailment of programs,

support services and expansion; the role of vocational education in solving national problems of unemployment, poverty, and social dislocation; increasing accessibility to programs; outreach to populations not yet served by vocational education; achieving equity in programs; and new demands for professional development activities. The report provides data tables and charts throughout. (KL)

Window Treatment Phase I and Other Energy II

Conservation Measures.

Tompkins-Cortland Community Coll., Groton, N.Y.

Spons Agency—National Association of Coll. and Univ. Business Officers, Washington, D.C.

Pub Date—[81]

Note—34p.

Pub Type—Reports - Descriptive (141) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Building Design, Building Operation, Community Colleges, Costs, \*Educational Facilities Improvement, \*Energy Conservation, \*Glass Walls, \*Heating, \*Thermal Environment, Two Year Colleges

Six different energy-saving treatments for large window areas were tested by Tompkins-Cortland Community College (TCCC) to coordinate energy saving with building design. The TCCC building has an open space design with 33,000 square feet of external glass and other features causing heating problems and high energy costs. Phase I of the window-treatment study, initiated in 1977, reviewed traditional and innovative conservation strategies and methods of measuring window treatment effectiveness. Six available window treatments were installed and tested (i.e., Plexiglas, 3M P-19 reflective film, Seco Thermoshade, thermofold drapes, Tuffak-Twinwall, and GE Lexan Sheet). Test areas were selected on the basis of the suitability of the treatment to the location, ability of testers to examine effects of the treatment, and preferences of people using the space. Concurrent with Phase I, TCCC prepared a curriculum in energy conservation, making it possible for work-study students to record field data such as temperatures and wind speed. Additionally, TCCC contracted for a mobile thermometer and monitored interior temperatures and heat flow. The six treatments were evaluated in terms of heat flow reduction, maintenance problems, delivery and installation time, cost, and acoustic, visual, and aesthetic concerns. In Phase II, insulating draperies were selected for windows in high traffic areas, and Seco Thermoshades and Plexiglas sheets were selected for low-use, difficult access areas. Tables, graphs, and technical appendices constitute the bulk of the report. (KL)

Identifiers—\*Center for the Study of Community Colleges CA, Washington

This report describes the activities of the Center for the Study of Community Colleges in Washington's Revitalizing the Humanities in the Community College Project. Introductory material describes the Center's role in the project with regard to designing and conducting surveys, planning and conducting faculty workshops focusing on strengthening the humanities, disseminating findings, and evaluating the project. Next, the report reviews the activities of the Center in these areas. The activities included the following: (1) two versions of a community survey were designed to determine what community agencies, organizations, and groups are involved in the humanities; (2) workshops were or-

ganized on designing, administering, and analyzing questionnaires; (3) an audience survey was developed for cultural events; (4) a student survey form was drafted and evaluated; (5) 14 workshops were conducted focusing on approaches to integrating the humanities into occupational programs, interdisciplinary courses, lay advisory committees for the humanities, and methods of organizing student and community surveys; and (6) articles, reports, and speeches disseminated information about the project and its activities. After an evaluation of the positive and negative results encountered so far, the report reviews the activities planned for 1981-82 in the areas of surveys, workshops, dissemination, and evaluation. Appendices include the survey instruments, workshop reports, and an inventory of current approaches to integrating humanities and occupational instruction. (AYC)

The God Factor of the Community College Ecological System: Future Studies.

Pub Date—1 Dec 80

Note—48p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—College Administration, \*College Curriculum, \*College Planning, \*Community Colleges, Decision Making, \*Futures (of Society), Prediction, \*Relevance (Education), Two Year Colleges

A rationale and plan are presented for implementing a futures approach in many areas of community college activities. After the introduction, the paper cites several characteristics of the community college and its mission which mandate planned experimentation and innovation. Next, the relationship of future studies to the educational system as a whole is examined by: (1) defining futures studies; (2) presenting reasons for studying the future; (3) looking at future studies activities by researchers, theoreticians, and business representatives; (4) comparing the purposes and uses of conventional science and futures research; (5) reviewing current futures studies activities at educational institutions; and (6) assessing the value of futures studies to the individual. The next section explores futures studies in the community college in terms of the rationale for future studies programs, the structural relationships of future studies to the community college constituency, student and academic program considerations, and degree plans with a future studies orientation. Course descriptions are provided for credit and non-credit futures courses, and instructional staff development is discussed. Additionally, this section covers non-instructional uses of futures studies in the areas of forecasting and developing institutional strategies to cope with change and of community college funding. Concluding remarks reveal the ultimate goal of future studies as the ability to control evolution itself, i.e., "The God Factor." (KL)

Directing Community College Human Services in the 1980's.

Pub Date—9 Sep 81

Note—9p; Summary of a panel presentation for the

Southern Illinois University at Carbondale School of Technical Careers' Center for Research in

Technical Education (Carbondale, IL, September 9, 1981).

Pub Type—Opinion Papers (120) — Speeches/

Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Accountability, Community Colleges, \*Community Services, Educational Finance, Federal Regulation, \*Financial Support, \*Human Services, \*Resource Allocation, State Aid, State Legislation, Two Year Colleges

The human service functions of community colleges are extremely diverse, and few are common to all institutions; however, community colleges share certain characteristics which distinguish them from other organizations providing human services.

Among these is the degree to which colleges must interact with and be influenced by the laws and regulations of state and federal governments.

Government requirements result in a need for coordination and cooperation and detract from the community college's flexibility in establishing operational objectives. Another distinguishing characteristic of the community college is its emphasis on the inherent value of the service as well as the cost

of service. Finally, community colleges have unique organizational structures, which are sensitive to changes in bureaucracy and expenditures. One approach used by community colleges to increase their flexibility in developing innovative human services programs is cross-subsidization, whereby revenues and resources of successful programs are used to support programs that are not self-sustaining. The extent to which this practice should be allowed to support activities such as needs assessment and training is an important issue, involving considerations such as fairness, demands of funding agencies, line-item budget restrictions, and decentralized decision making. If human service programs are to receive continued funding the price will be creative budgeting and fund raising, innovative programs, careful selection of target populations, and interagency coordination. Identifiers—\*Black Hawk College IL

The study described in this report was conducted at Black Hawk College (BHC) to determine the characteristics and attitudes of students enrolled in evening classes in the college's university parallel programs. After introductory material discussing the importance of adult, part-time students to today's community college and the objectives of the study, the report outlines study methods. These included a survey of the research literature on evening student needs and characteristics; and surveys of fall 1980 and spring 1981 evening students to determine their demographic characteristics, majors, needs and attitudes with regard to academic services, and preferences for courses and schedules. Next, the report presents the literature review, citing significant findings from other community college studies. Results are then enumerated with regard to the scope of previous research and the findings of BHC's fall and spring surveys; differences between the results of these surveys are noted. Next, the characteristics of BHC students are discussed in relation to other evening students, revealing that BHC students resembled other evening students with respect to age, part-time enrollment status, and educational goals, but differed with regard to sex and prior educational attainment. Conclusions and recommendations for further research are followed by a bibliography. Appendices present the questionnaires and summary reports for the surveys. (AYC)

Student Retention and Attrition in the Community

College: A Review and Research Design.

Mount Hood Community Coll., Gresham, Ore.

Spons Agency—Oregon Community Coll. Deans of Students Consortium; Oregon State Dept. of Education, Salem. Student Services Section.

Pub Date—6 Apr 81

Note—37p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Persistence, Colleges, \*Community Colleges, \*Dropout Research, Dropouts, Enrollment Influences, Followup Studies, Literature Reviews, Postsecondary Education, \*Research Design, \*School Holding Power, \*Student Attrition, \*Student Educational Objectives, Two Year Colleges

This five-part report provides background for a research design for the study of student attrition and retention in the community college. After Part I introduces the larger study of high risk students for which this paper was prepared, Part II defines the concepts of retention and attrition with respect to the attainment of student objectives rather than to graduation rates. Part III assesses the magnitude of the problem of student attrition in the community college as opposed to the four-year college. This section points out that some forms of attrition may be congruent with student objectives, examines at-

trition statistics for a typical community college, and cites findings from a statewide study of attrition in California. Part IV reviews the literature on attrition/retention in terms of: (1) student characteristics (e.g., background traits and motivational, financial, and employment patterns); (2) institutional characteristics (e.g., college image and availability of student services); (3) student-college interaction effects (i.e., the "fit" between college and student); and (4) societal factors (e.g., military draft and economic conditions). The applicability of each of these areas to the community college is assessed, revealing that some factors are more significant for four-year colleges. Part V recommends a research design for attrition/retention studies which uses the attainment of student objectives as the measure of success. An extensive bibliography is appended. (KJ)

Descriptors—\*Biology, \*Multisensory Learning, Science Instruction, \*Science Materials, Teacher Developed Materials, \*Three Dimensional Aids, Two Year Colleges, Two Year College Students, \*Visual Impairments

The instructional materials presented and described in this document were prepared as part of a project to develop enrichment materials for visually impaired biology students. A wide range of biology topics are presented, including most subjects covered in a one-semester course for nonmajors. Type-written handouts, duplicating the content of Braille and audio cassette materials which were also developed during the project, are presented along with descriptions and photographs of 20 three-dimensional models, which were developed to help students understand the biological processes and concepts presented in the handouts. After an introduction to the project, the handouts define terms and present information in brief enumerated statements related to the following topics: (1) basic chemistry; (2) carbohydrates; (3) lipids; (4) protein; (5) enzymes; (6) cells; (7) bioenergetics; (8) cellular respiration; (9) deoxyribonucleic acid (DNA); (10) DNA and protein synthesis; (11) cell division; (12) basic inheritance; (13) evolution; (14) ecology; (15) population and ecosystem dynamics; (16) nature observation; and (17) plant biology. Student use of the three-dimensional models is discussed in the appropriate sections. Special instructions for nature observation and a chapparral field trip stress the sounds, smells, and textures of nature. Finally, the descriptions and photographs of the models are presented. Descriptors—\*Advisory Committees, Community Colleges, \*Group Activities, \*Group Dynamics, Group Membership, Group Structure, \*Humanities, \*Lay People, \*School Community Relationship, Two Year Colleges

This handbook offers guidelines to community colleges interested in the formation of advisory committees to the humanities. It begins by outlining the purposes and functions of such groups. It then emphasizes the importance of faculty and administrative support for advisory committees and suggests evidence that can be presented to promote this support. After several examples are cited of ways in which lay advisory committees have been initiated at community colleges, the paper identifies several components of effective planning efforts and discusses the functions of a planning group made up of

concerned faculty and administrators. Next, the selection, characteristics, membership rotation, and size of the advisory committee are discussed, and the roles and functions of key committee members are examined, including the chairperson, secretary, and community college representative. The next sections of the guide suggest questions that should be addressed as the committee establishes its annual program of work and recommend possible committee activities in the areas of student recruitment, follow-up, and continuation; instruction; instructor quality; and community outreach. Next, guidelines are presented for conducting effective committee meetings and criteria are recommended for evaluating the meetings. In conclusion, the paper recommends additional bases for judging the effectiveness of advisory committees. Sample agendas and a list of additional resources are appended. (AYC)

Most serious staff development programs share the characteristics of strong administrative support, needs-based planning, widespread faculty participation, and a well-defined program of activities. Unfortunately, these activities are often ad hoc affairs, influenced by what is fashionable and financially feasible. Formal degree programs can provide an alternative to ad hoc faculty development. Several degree options are available, including the Doctor of Philosophy (Ph. D.), the Doctor of Education (Ed. D.) in College Teaching, the Doctor of Arts (D. A.), and the Ed. D. in Postsecondary Curriculum and Instruction. Though each of these program options has several advantages, faculty members should also be aware of several problematic considerations related to the pursuit of a degree: (1) the availability of degree programs; (2) whether they will teach full- or part-time; (3) monetary considerations; (4) their relationships with their instructors; and (5) the lack of the sense of community of many graduate programs. Once the faculty member has come to terms with these problems, he/she must decide on the appropriate degree. Several factors should influence this choice, including his/her career goals, perception of personal and professional roles, and feelings toward study and research. Whatever the instructor's ultimate choice, staff development directors and personnel can contribute in several important ways to the careers and professional development of faculty members. (AYC)

**The De Anza Model: A Philosophy of Special Education. Position Paper.**

Pub Date—8 Nov 81

Note—9p.; Paper presented at the Meeting of the California Community and Junior College Association Commission on the Handicapped (San Diego, CA, November 8, 1981).

Pub Type—Reports - Descriptive (141) — Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Accessibility (for Disabled), Community Colleges, \*Disabilities, Financial Support, Older Adults, Physical Disabilities, Program Administration, Program Descriptions, \*Special Education, \*Student Personnel Services, Two Year Colleges, \*Two Year College Students

The handicapped student services model described in this paper provides students at De Anza College with a full, balanced range of services and instruction. After an introductory section, the paper describes the strategic planning process and identifies the three strategic decisions that influenced the development of De Anza's handicapped services program: (1) to provide a full range of services and programs; (2) to maintain a balance between service and instruction; and (3) to establish a Special Edu-

cation Segment of the college. The next section enumerates the student needs addressed by De Anza's program. Next, the paper mentions some of the special aspects of the handicapped program, including the physical and psychological accessibility of the services and instruction and the special classes and services offered. After the paper examines the program's income formula, which provides flexibility and self-sufficiency by relying as much as possible on regular average daily attendance income, it lists areas in which De Anza provides special instruction. The next section begins by identifying the advantages of the Special Education Segment being one of De Anza's four major units and continues by describing the six components of De Anza's program: Physically Limited Services, Adaptive Remedial Physical Education, Educational Diagnosis Clinic, Hope-De Anza for developmentally disabled students, Adaptive Geriatric Education Program, and the Physiology Lab. In conclusion, the paper reviews the elements critical to the program's success. (AYC)

Descriptors—Community Colleges, \*Cooperative Programs, Financial Support, Industrial Training, Labor Education, \*Off the Job Training, \*School Business Relationship, Two Year Colleges

Based on the experiences of Northern Essex Community College, this paper outlines a basic process for community colleges interested in providing training for local business and industry. After the introduction, the paper cites three steps in getting started: preparing a list of contacts, assessing current program offerings and flexibility, and determining the services the college can provide. The next section focuses on contacting businesses, covering the characteristics of the ideal company and outlining three contact approaches, i.e., meeting with a number of companies to explore possibilities, using direct-sell techniques with individual companies, or meeting with individual companies to determine their needs. The paper then explains the process for designing a program which meets the company's training needs and presenting the program proposal. Next, the elements of the program proposal are enumerated, including curricular information, course schedules, entrance criteria, number of students to be served, equipment and supply requirements, company and college responsibilities, and budget. After issues to be considered in proposal design and negotiating with companies are discussed, the paper examines several aspects of the delivery system, such as recruitment, participant and faculty selection, program start-up, and evaluation. After a model for student follow-up is explained, the paper concludes with a discussion of three funding models related to profit margins, tuition reimbursement, and external funding. (KJ)

Identifiers—\*Illinois

Community college planners must be futurists, projecting institutional and program enrollments and funding from tuition and state sources. Yet it is increasingly difficult to make accurate projections even for one year, when factors do not operate as

they have in the past. Nevertheless, new trends in people, programs, finances, and facilities can be identified. Trends which concern people include an increasing proportion of older students with career-orientations and interest in high technology programs. Staffing is influenced by inflation; colleges cannot compete with business for new technical faculty, and current faculty can be granted only minimum salary increases, causing many to leave education. In addition, the trustee's role is becoming less pleasurable, and fewer good people want to invest their time. Program trends point to demands for high technology and business administration courses and adult basic education. In finances, inflation may cause schools to short-change their students, as initiatives to alter outdated local tax rates are defeated and state and federal funding curtailed. Trends in facilities indicate more maintenance and modification requirements due to building age and energy costs. Coping with these trends requires reminding the public of the need for postsecondary education, especially at the associate degree level, so that the dream of adequately funded community colleges meeting the needs of a varied student body can persist. This three-part report describes the Bridging Program at San Diego Mesa College (SDMC), a basic skills program to prepare students functioning at the 7th grade level or below and to thus provide a bridge between developmental education and adult basic education (ABE). Part I begins with a review of the program's background and a list of its services (i.e., individualized instruction in basic skills for SDMC students, a referral system for instructors, basic skills assistance to adults in ABE classes who plan to attend SDMC, and open-entry/open-exit enrollment). Next, the report describes the Bridging Lab and an English as a Second Language (ESL) class and explains the student assessment, placement, and enrollment process. Part I also describes instructional materials for the lab, student assessment procedures, and the results of a Bridging Lab evaluation. Part II examines the ESL bridging class which stresses communication skills such as listening and note taking. This section focuses on the background and purpose of the course, the referral and identification system, course outlines and materials, student assessment procedures and course evaluation. Part III considers the in-service component of the Bridging Program, based on a slide-cassette presentation on program services. The development and distribution of the slide-cassette presentation are discussed. Appendices include course outlines and formats for the individualized lab courses, record-keeping and referral forms, publicity materials, an evaluation summary, and other related materials. (KL)

Identifiers—\*Central YMCA Community College IL

**STANDPOINTS**, a model for general education which focuses on the common learning experiences crucial to the quality of personal and corporate life, was developed at Central YMCA Community College. When developing the model, time, faculty development, student involvement, and leadership constraints were recognized, and a three-phase process was used. The process involved the use of a general education consultant and public hearings to poll the college community's opinions on general education content. Subsequently, a design team of faculty members assembled the general education sequence, consisting of courses in Choice and Responsibility, Distance and Encounter, and Portent and Design; developed instructional materials for the courses; recruited instructors; and explained **STANDPOINTS** to the college community. The **STANDPOINTS** transdisciplinary, transgenerational sequence now stands at the center of the college curriculum and affords continuity, shared experience, flexibility, and relevance. In order to assure a successful shift for faculty to this integrated curriculum, two workshops were held. Additional efforts to promote **STANDPOINTS**' success were: (1) several pedagogical decisions, which focused on cognitive structures, values, sequential instructional strategies, mentoring, and group planning; (2) strategies to establish the integrity and credibility of the program on campus; and (3) several activities planned to evaluate the effects of **STANDPOINTS**. **Student Evaluations of Their Best and Worst College Experience.**

American River Junior Coll., Sacramento, Calif.

Pub Date—Jun 81

Note—25p.

Pub Type—Reports - Research (143)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—College Faculty, Community Colleges, \*Evaluation Criteria, Evaluation Methods, \*Questioning Techniques, \*Questionnaires, \*Student Evaluation of Teacher Performance, Two Year Colleges, Two Year College Students

A study was conducted at American River College to design a teacher evaluation instrument that would focus on students by asking them to describe what happens to them in the classroom and would restrict students' evaluations of their instructor to observable behavior. Over 300 potential questionnaire items were generated from a review of the literature, from other teacher evaluation forms, and from the responses of over 150 students who were asked to identify three characteristics of their best and worst teachers. From this item pool, 44 items were selected based on the following criteria: (1) the items could be reworded to describe students' in-class learning, behaviors, and feelings; (2) the items were appropriate for a frequency of occurrence or yes/no response scale; and (3) the items avoided inferring instructor traits. A total of 213 students were asked to complete evaluations of their best and worst teachers by stating, for example, the frequency that they felt they were "able to take meaningful notes in class" or their degree of agreement with statements such as "I don't see how this subject is important to my life." Correlation and multiple regression analyses were conducted to determine the relationship between each questionnaire item and the "best" and "worst" conditions. On the basis of these analyses 22 questionnaire items were recommended as reliable for teacher evaluation forms. The study report reviews arguments concerning teacher evaluations, presents statistical findings, and includes the recommended instrument. (AYC)

Descriptors—\*College Planning, Community Colleges, Employment Projections, \*Long Range Planning, Master Plans, Multicampus Districts, Organizational Objectives, Two Year Colleges, \*Vocational Education

This master plan is intended for use by the governing board, administration, faculty, and community of the Maricopa County Community College District (MCCCD) as a standard against which progress in occupational education development and improvement can be measured. After Sections I and II provide a forward and introduce members of MCCCD's governing board, administration, and task force on occupational education, Section III provides background material on the development and purpose of the five-year plan. Section IV presents definitions of key planning terms, including strategic planning, goals and objectives, and planning time periods. After Section V provides information about the planning environment, Section VI outlines underlying assumptions about political climate, future college role, local economy, enrollment trends, job training demands, population in-migration, student characteristics, staff, and flexibility and responsiveness. Section VII provides issues statements concerning external relations, internal processes, personnel issues, financial resources, public information, information needs, priority setting, student characteristics, delivery of occupational education, economic development needs, and placement. After Section VIII states the mission of occupational education in the district, Section IX presents goals and related objectives for each of the issues outlined in Section VII. Section X proposes a five-year capital plan, while Section XI reveals plans for evaluation and revision. Labor projections are appended. (AYC)

**The Three R's for Hispanics in Higher Education: Retention, Recruitment, and Research.**

Pub Date—30 Jun 81

Note—19p.; Paper presented to the College Recruitment Association for Hispanics (Lansing, MI, June 30, 1981).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Access to Education, Affirmative Action, Articulation (Education), Attendance Patterns, College Choice, College Faculty, Colleges, \*College Students, College Transfer Students, Community Colleges, Enrollment, \*Hispanic Americans, Postsecondary Education, \*Research Needs, \*School Holding Power, \*Student Recruitment, Transfer Policy, Universities

The focus of this paper is on issues and concepts in the retention and recruitment of Hispanic students in post-secondary education. First, national post-secondary enrollment declines are projected and the implications of these declines are discussed for admissions and recruitment personnel. Next, the report considers Hispanic enrollments in Michigan and reviews the significance of these findings for recruitment. Two major findings are noted: the underrepresentation of Hispanics at every level of higher education and the concentration of Hispanic students in community colleges. Questions raised by these findings are then posed. The next section suggests two-year college recruitment strategies (e.g., aim literature at non-traditional students, emphasize the transfer function and articulation, and provide satellite centers and flexible scheduling); recommends several retention strategies (e.g., insure quality curricula and staff and provide counseling before and after transfer); and suggests areas for research. Suggestions for recruitment, retention, and research regarding Hispanic students at four-year colleges are provided next, based on a report by the University of Michigan Coalition of Hispanics for Higher Education. These relate to offering Hispanic culture courses, enhanced support systems, financial aid, articulation agreements with Michigan community colleges, contacts with Hispanic communities, studies of attrition, and increasing His-

panic representation in administration, faculty, and students. (KL)

A Developmental Mathematics Program for Community College Students.

Pub Date—Oct 81

Note—13p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Community Colleges, Mathematics Anxiety, \*Mathematics Curriculum, \*Remedial Mathematics, Testing Programs, Two Year Colleges

Identifiers—\*Lower Columbia College WA, \*Mathematics Laboratories

Lower Columbia College (LCC) offers students who need developmental mathematics instruction a variety of courses and instructional formats. In 1977, the developmental mathematics curriculum consisted of two courses: Review Mathematics, offered only through the Math Lab with both desirable and undesirable effects; and Elementary Algebra, offered both in the lab and classroom. High attrition rates in Review Math necessitated several changes. First, an extensive placement testing program was initiated to determine students' mathematical level, goals, and math anxiety level. Next, Math 30, a course beginning at the first-grade arithmetic level, was proposed. Though the course was developed for students with little or no elementary mathematics training, students who have forgotten many math concepts and some foreign students are finding the course useful. The review course was then redesigned to include classroom and lab instruction, self-paced learning, competency-based instruction, and variable credit. Additionally, a one-credit Math Anxiety Workshop was developed; a new course, Introduction to Algebraic Concepts, was designed to ease the transition between the review course and Elementary Algebra; and a third method of instruction for Elementary Algebra was offered, which extends the course to two quarters. LCC's developmental math program attempts to guide students through an initial period of dependence into the regular classroom or lab, using among other techniques a decreasing number of practice tests. Descriptors—Adult Education, Adult Programs, Community Colleges, Community Involvement, \*Community Resources, History Instruction, \*Older Adults, Oral History, Outreach Programs, Two Year Colleges, \*Two Year College Students

Identifiers—\*Clackamas Community College OR  
Senior citizens can support community college humanities programs in three ways. First, they are a resource of potential students and are eager for courses providing them with historical, musical and literary knowledge. Clackamas Community College in Oregon City has responded to their interest by providing non-credit extension courses at every senior citizen center and large retirement home in the district. Courses are developed based on residents' interests, and instructors interested in initiating a new course are often advised to try it out in the retired community. Second, older adults provide younger students with a vital source of information and wisdom which relates theory and practice in the classroom. Clackamas makes use of a Retired Senior Volunteer Program to locate seniors who can explain to younger students their experiences during the depression or in war. Third, seniors can serve as a valuable resource for student projects in history and literature, as students can interact with and interview seniors and benefit from their experiences. Clackamas is planning a project focusing on life in Clackamas County during the depression of 1934. Informants from different communities and occupations have been lined up to record their memories on audio tape. Portland Community College sponsored a student film in which seniors described life on the Willamette River in the steamboat days. The

film itself has many educational uses, in addition to demonstrating the benefits of senior involvement. (KL)

A "Working Assumptions" Approach to Early Program Evaluation.

Pub Date—Apr 80

Note—30p; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Behavioral Objectives, Community Colleges, \*Course Objectives, Data Collection, \*Evaluation Criteria, \*Evaluation Methods, \*Formative Evaluation, \*Program Evaluation, Two Year Colleges

This two-part paper describes the working assumptions approach to early program evaluation and illustrates the approach with a study of a new social science curriculum in American ethnic pluralism for community colleges. Part I begins by providing a rationale for early program evaluation and describing the working assumptions approach as a model which identifies the teacher and student behaviors and activities which are critical to program success. This section also describes and illustrates the development of the working assumptions model; considers the ethnographic data-gathering methods used; and discusses the uses of evaluation results. Part II reviews the use of this approach to field test prototype units of a new social science curriculum. This section describes: (1) the two ethnic pluralism units that were field tested and the materials they used; (2) the objectives of the field test; (3) the working assumptions model, which included one objective for faculty, seven objectives for students, and four general course goals; (4) the selection of five community colleges as test sites; (5) the data-gathering methods used, including a teacher log, teacher interviews, a student questionnaire, and classroom observations/field visits; (6) methods used to analyze data and validate findings; and (7) findings and implications for further development and evaluation related to three of the eight working assumptions developed in the model. Status Report on Remediation in Higher Education.

Illinois State Board of Higher Education, Springfield.

Pub Date—2 Jun 81

Note—25p.

Pub Type—Reports - Research (143) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Board of Education Policy, Change Strategies, College Role, Community Colleges, Courses, Educational Change, \*Educational Policy, Educational Responsibility, Postsecondary Education, \*Remedial Instruction, State Boards of Education, State Colleges, \*State Legislation, State Surveys, State Universities, \*State-wide Planning

Identifiers—\*Illinois

In response to legislative mandate, this report assesses the status of remediation in postsecondary education in Illinois and presents recommendations concerning remedial education to the Illinois Board of Higher Education (IBHE). After five resolutions dealing with remediation are presented as they were adopted by the IBHE and State Board of Education, the report describes and presents the findings of two surveys on remediation. The report reveals that all of the state's community colleges and state universities were surveyed and asked: (1) to inventory and report on the magnitude of all remediation activities on their campuses; (2) to provide their rationale for offering remediation; (3) to explain how students were identified for remedial assistance and how they were subsequently evaluated; (4) to indicate if credit toward graduation was granted for remedial courses; (5) to describe the organization of remedial activities; and (6) to predict the future of remedial studies on the campuses. The report then presents operational definitions for remediation, prerequisite courses, learning skills offerings, tutoring, and special assistance programs. The remainder of the paper describes remedial efforts at public universities and community colleges, provides a summary and assessment of the steps taken by the colleges to

comply with IBHE policies, and presents further policy recommendations which are intended to facilitate progress toward the IBHE's goals of minimizing university remedial programs by 1983. (AYC)

Identifiers—\*Los Angeles Community Colleges CA

This report reviews efforts by the Los Angeles Community College District (LACCD) to meet the needs of handicapped students in its vocational education programs. The report begins with a summary of district statistics and California and federal legislation regarding access for the disabled in vocational programs. Part II focuses on the students themselves, describing their disabilities and goals and the types of accommodations, especially in equipment, that have been made for them by LACCD. Part III presents profiles of six disabled students who describe themselves, their aspirations, and their progress toward their goals. Part IV emphasizes the instructors' perspectives as they discuss their reactions to disabled students and the challenges they pose to traditional instructional methods. Special services and programs for the handicapped are enumerated in the next section of the report, including assessment techniques, in-service training for faculty and staff, research and development of appropriate instructional methods, the provision of tutors, interpreters, and readers, special equipment and materials (e.g., voice translation VORTAX), and orthopedic equipment repair. The final section of the report examines employment opportunities for handicapped students in vocational programs and develops examples from Los Angeles area firms including aerospace, computing, electronics, and banking. Identifiers—Exponents (Mathematics)

This text provides information and exercises on arithmetic topics which should be mastered before a student enrolls in an Elementary Algebra course. Section I describes the fundamental properties and relationships of whole numbers, focusing on basic operations, divisibility tests, exponents, order of operations, prime numbers, greatest common divisors, and least common multiples. Section II covers the addition, subtraction, multiplication, and division of integers, i.e., signed whole numbers. After Section III establishes the fundamental properties of fractions, it deals with performing basic operations with fractions and with proportions and complex fractions. Decimals are examined in Section IV, which covers decimal notation, basic operations with decimals, square roots, and percents. Section V looks at the use of integers as exponents and explains scientific notation. The last section presents rudiments of algebra, including like terms, multiplication and division of monomials, and literal formulas. In addition to interspersing reinforcement exercises throughout the explanatory text, each section con-

cludes with a set of review problems. Concluding the text are answer keys for all of the exercises and review problems, a pretest to aid counselors and math faculty in assessing a student's basic arithmetic background, and an index. (AYC)

Community Needs Survey.

Diablo Valley Coll. Pleasant Hill, Calif.; Field Research Corp., San Francisco, Calif.

Pub Date—79

Note—78p.

Pub Type—Reports - Research (143) - Tests/Questionnaires (160) - Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC04 Plus Postage.**

Descriptors—\*Community Attitudes, \*Community Characteristics, Community Colleges, Community Services, Community Surveys, \*Educational Needs, \*Enrollment Influences, Needs Assessment, School Community Relationship, School Schedules, Teacher Effectiveness, Two Year Colleges

A telephone survey was conducted by Diablo Valley College (DVC) in 1979 to determine the characteristics of community residents and their opinions concerning DVC's programs and services. In addition to demographic data (i.e., length of residence in Contra Costa County, age, size of household, head of household's employment and marital status, and sex), the survey sought to determine if residents were aware of DVC and its policies, programs, purposes, services, and extracurricular offerings on- and off-campus; if they had attended or considered attending classes and for what purpose; their preferences in scheduling and course offerings; and their evaluation of teaching quality at DVC. The findings of the survey included the following: (1) most residents knew of DVC, and 71% had visited the campus; (2) one-third of the respondents had taken at least one course at DVC, with men being more likely to enroll than women; (3) 40% of the respondents were aware of DVC's art exhibit, and 68% were aware of the college's athletic programs; (4) awareness of DVC and participation in activities or courses increased with length of residence in the county; and (5) among those who had not taken classes, "no spare time" was the most common reason given. The study report details methodology and presents findings in terms of demographic characteristics, awareness factors, enrollment factors, and public information. Conclusions, recommendations for further study, the questionnaire, and data tables are included. (KL)

An Investigation of Collective Bargaining in Higher Education—With Particular Reference to Collective Bargaining in the Community Colleges.

Pub Date—Dec 81

Note—73p.; Graduate seminar paper, Pepperdine University.

Pub Type—Information Analyses (070) - Reference Materials - Bibliographies (131)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—\*Collective Bargaining, Community Colleges, Educational History, \*Faculty College Relationship, Higher Education, Labor Problems, Literature Reviews, \*Postsecondary Education, Teacher Welfare

Based on a review of periodical, ERIC, and monographic literature, this paper examines the history of collective bargaining in higher education, the factors which have influenced its growth, its impact, problems and difficulties that have been reported, and suggestions that have been made to solve these problems. The introductory section of the paper focuses on the current interest in collective bargaining, its spreading impact on higher education, the purposes and significance of the paper, the materials examined in the literature review, and the scope and limitations of the study. This introduction concludes by defining key terms. Section II of the paper presents the findings of the review of the literature. It covers: (1) the history of collective bargaining; (2) factors influencing the growth and development of collective bargaining; and (3) the impact of collective bargaining on faculty-administrative relations, participants' roles in governance, faculty welfare issues, quality of education, other institutional costs, and problem solving and conflict resolution. After Section III presents a summary and conclusions,

Section IV offers recommendations and strategies for more productive and effective utilization of collective bargaining in higher education. Approximately 70 items are included in the bibliography concluding the review. (AYC)

Swedler, James A.

A Study of Reverse Transfers Who Entered Northern Illinois University during 1975-76: An Analysis of Their Academic Progress.

Northern Illinois Univ., De Kalb.

Pub Date—Nov 81

Note—71p.

Pub Type—Reports - Research (143)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—\*Academic Achievement, Academic Failure, Attendance Patterns, \*College Transfer Students, Community Colleges, Degrees (Academic), Grade Point Average, Postsecondary Education, Predictor Variables, \*Student Characteristics, Universities

Identifiers—\*Reverse Transfer Students

In 1981 a study conducted at Northern Illinois University focused on students who left a university, transferred to a community college, and subsequently enrolled at NIU. The study sought to determine the size of the reverse transfer population attending NIU, the academic characteristics of their college attendance, their success at NIU, and possible factors in their success. Of the total number of transfer students who entered NIU during 1975-76, 15% (N=269) met the criteria of the study, i.e., had been a reverse transfer student prior to NIU attendance and had earned at least six semester hours at the senior institution and 12 hours at the community college. Data were collected on the following variables: sex, age, American College Testing Program score, high school class rank, and senior and two-year institutions attended; semester hours attempted and earned, honor points earned, and grade point averages (GPAs) at the original senior institution, community college, and NIU; associate degree earned; academic status; and major. Selected findings include the following: (1) 45% of the students had been in academic difficulty at their initial senior institution, raised their GPA at the community college, and maintained a 2.0 GPA or higher at NIU; (2) students in academic difficulty were more likely to complete an associate degree; and (3) by 1981, 61.3% had completed a bachelor's degree. The study report details methodology and findings, presents a discriminant analysis of variables in relation to NIU success, and offers conclusions and recommendations. (AYC)

Cable Television in the Community College.

Pub Date—Nov 81

Note—11p.; Paper presented at the Western Cable Association Conference on Cable and Education (Anaheim, CA, November 5-6, 1981).

Pub Type—Speeches/Meeting Papers (150) - Reports - Descriptive (141)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Cable Television, Community Colleges, \*Cooperative Programs, Financial Support, Program Descriptions, \*School Business Relationship, \*Telecourses, Two Year Colleges

Identifiers—\*Coastline Community College CA

Rather than merely being a televised version of a classroom lecture, a true telecourse: uses television to present information that is best conveyed visually and employs various methods (e.g., study guides, mailed assignments, special review sessions, and exams scheduled at community sites) to replace other classroom activities. Coastline Community College (CCC) provides such telecourses cooperatively with the Public Cable Television Authority and Dickinson Pacific Cablesystems. Though CCC enrolls 4,000 to 5,000 students per semester in its telecourses, enrollments have been restrained due to the unavailability of air time during prime hours. To remedy this, CCC has established a cable origination center at its administrative headquarters which will allow telecourses to originate from CCC, as well as provide more personal services (e.g., instructors can provide review sessions on cable and answer questions phoned in by students). Even with an origination center, several problem areas may inhibit cooperative ventures between cable companies and community colleges. First, the college needs to have a dedicated channel or channels to be certain that they will have channel time available consistently. Second, funding for telecourses in California is li-

imited to those that are transferable to four-year institutions. Third, funds must be found for equipment. Finally, cable companies must provide interconnection, allowing subscribers from different companies access to college broadcasting. (KL)

Moore, Anne Joachim

A.D.N. Education: A Historical Perspective.

Pub Date—20 Nov 81

Note—11p.; Paper presented at the Conference, "Associate Degree Nursing: Achievements/Challenges, 1951-1981" (Minneapolis, MN, November 20, 1981).

Pub Type—Opinion Papers (120) - Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Associate Degrees, Bachelors Degrees, Community Colleges, Educational History, \*Futures (of Society), \*Nursing Education, Private Colleges, \*Two Year Colleges

Identifiers—\*Saint Marys Junior College MN

Events in the history of Associate Degree Nursing (ADN) are summarized and the future of nursing education is projected in this paper. The establishment of the ADN program at St. Mary's Junior College in 1964 is considered first, with respect to its roots in the diploma program of St. Mary's School of Nursing and the ideas on nursing education of Mildred Montag. After emphasizing the negative reactions initially engendered by the program, the paper cites the initiation of ADN programs in Minnesota's community colleges. Next, the paper reviews the response of the Minnesota baccalaureate degree nursing faculty, noting attempts in the 1970s to restrict the Registered Nurse (RN) titles to baccalaureate graduates, and argues for a commonly accepted differentiation of the roles and competencies of baccalaureate and ADN graduates. The future of nursing education is considered in the latter part of the paper with consideration given to the effects of the accelerating rate of change as described by Alvin Toffler and R. B. Fuller. The paper emphasizes the "humanity saving" implications of new discoveries, linking them to de Chardin's concept of the "no-osphere" and Fuller's ideas of "pre-cessional effects." Some influences of these discoveries on children and thus on the educational system are also noted. The paper concludes by citing an apparent trend away from institutionalized medical care and suggests some consequences of that trend for nursing, especially in home health care. (KL)

Stallings, Jane A.

A Description of Caregivers and Children in Family Day Care Homes.

Pub Date—Apr 81

Note—19p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Boston, MA, April 2-5, 1981).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Activities, Affective Behavior, Age Differences, \*Behavior Patterns, Certification, \*Child Caregivers, Discipline, Early Childhood Education, Ethnic Groups, \*Family Day Care, \*Infants, \*Interaction Process Analysis, Peer Relationship, \*Preschool Children, Verbal Communication

Descriptive data on a wide range of family day care homes and on children's experiences within those homes were obtained in this study. Additionally investigated were the effects on caregiver and child behavior of six central family day care issues: (1) home regulatory status, (2) number and age mix of children, (3) regional differences, (4) caregiver training or education, (5) caregiver experience, and (6) caregiver ethnicity. Findings are summarized and discussed in this report in light of other family day care studies. Caregivers were observed to interact approximately 50 per cent of the time with children, primarily in some form of teaching. Caregivers displayed negative affects very rarely during observation periods; positive affects were displayed much more often. Children were observed to play frequently with exploratory materials, to spend considerable play time alone, to engage in fine-motor structured activities, to engage in language-related activities, and to increase peer involvement with

## 108 Document Resumes

age. Among other results were the findings that (1) regulatory status desirably influenced family day care environments and (2) positive experiences were provided more frequently by caregivers with less, rather than more, experience. (Author/DB)

Kamii, Constance O'Brien, Thomas C.  
What Do Children Learn When They Manipulate Objects?

Southern Illinois Univ., Edwardsville.

Pub Date—78

Note—17p.

Pub Type—Opinion Papers (120)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—Child Development, \*Cognitive Development, Early Childhood Education, \*Educational Philosophy, Elementary School Teachers, Interviews, \*Logical Thinking, Moral Development, \*Object Manipulation  
Identifiers—\*Kamii (Constance), \*Piagetian Theory

An interview taped in 1978 with Constance Kamii, a child development researcher who studied Piagetian theory at the University of Geneva, is presented in this document. When asked what teachers of young children should keep in mind, Dr. Kamii talked about teaching to the child's level and cautioned against dealing with symbolic materials, advising teachers to incorporate manipulable objects into curricula. Kamii suggests teachers can encourage children to make predictions about the outcomes of object manipulation and thereby learn essential relationships. The importance of teaching to a child's level of cognitive development is emphasized in an anecdote about the failure of an experimenter to teach children the concept of specific gravity. Kamii maintains this experimental failure was the result of teaching beyond children's capacity for understanding formal operations. Teaching cannot be accomplished directly, asserts Kamii; rather, people can be helped to learn when teachers start with knowledge already available to the learner. Kamii's forthcoming research projects are mentioned. (Author/DB)

Young and Old Together: A Training Manual for Intergenerational Programs.

Pub Date—79

Note—49p.

Pub Type—Guides - Non-Classroom (055)

**EDRS Price—MF01/PC02 Plus Postage.**

Descriptors—Attitude Change, \*Children, Community Programs, Early Childhood Education, \*Older Adults, Program Development, Skill Development, \*Training Methods, Training Objectives, \*Volunteers, \*Volunteer Training  
Identifiers—\*Intergenerational Programs

Ideas for orienting and training elderly adults to work as volunteers with children in school and non-school settings are given in this manual. In addition, ideas for planning the goals of an intergenerational program, recruiting volunteers, and preparing children, teachers, and child care staff for interaction with volunteers are provided. Suggested content for the training program includes the rights of children, child development, behavior management, the dangers of stereotyping, and the All Handicapped Children's Act (PL 94-142). Observations of children and on-the-job experience with performance feedback from trainers are recommended as useful means of training elderly volunteers. Program goals include (1) increasing the frequency of intergenerational contact; (2) fostering positive attitudes between generations; (3) providing services for children with special needs; (4) meeting older citizens' needs for growth and development; and (5) fostering a sense of the continuity of human life. Careful program planning is stressed and evaluation of the program is briefly discussed. The document concludes with a list of resources, including books, articles, manuals, and films. (Author/DB)

Creating a Portable Hospital/Medical Play Corner: A Guide for Teachers of Young Children.

Judson House, Evanston, Ill.

Pub Date—80

Note—26p.

Available from—The Judson House, 1122 Judson Avenue, Evanston, IL 60202 (\$2.95 plus \$2.00 handling charge.)

Pub Type—Guides - Classroom - Teacher (052)

**EDRS Price—MF01/PC02 Plus Postage.**

Descriptors—Coping, \*Dramatic Play, Early Childhood Education, \*Hospitalized Children, Manipulative Materials, \*Medical Services, \*Play Therapy, Program Development, \*Stress Variables, \*Teacher Role, Teaching Guides

Ways in which early childhood educators can help children prepare for medical events through play are suggested in this pamphlet. Three qualities are seen as essential to a valuable hospital/medical play experience: (1) a focus on the child's current medical interests and experiences, (2) inclusion of information about a child's forthcoming or past medical event, and (3) formation of an environment which encourages a child to express his or her feelings about medical events through fantasy or realistic play. These qualities are discussed and "micro" and "macro" approaches to hospital/medical play are described. "Micro" play materials include small doll-sized figures and toy hospital or medical equipment for use in symbolic play. "Macro" play refers to children's dramatic or role play in which the child enacts the roles of doctor, nurse, or patient rather than having a doll or puppet figure enact the roles and activities. "Macro" play materials include hospital clothing and child-sized pieces of hospital or medical play equipment. Lists of suggested play materials for different settings as well as guides for using the play materials are provided. In addition, ideas for program planning and class activities are offered and ways teachers can aid stressed and anxious parents of ill or hospitalized children are suggested. In conclusion, sources of play materials and books related to medical and hospital experiences for children, parents and teachers are listed. (Author/RH)

McNeill, Earlene And Others

Cultural Awareness for Young Children. Revised Edition.

Report No.—ISBN-0-940908-00-X

Pub Date—81

Note—160p.

Available from—The Learning Tree, 9998 Ferguson Road, Dallas, TX 75228 (\$14.95).

Pub Type—Reports - Evaluative (142)

**EDRS Price—MF01 Plus Postage. PC Not Available from EDRS.**

Descriptors—American Indian Culture, Art Activities, Asian Americans, Black Culture, Childrens Games, \*Cultural Awareness, Dance, Eskimos, \*Ethnicity, Family Life, Hispanic American Culture, Language Acquisition, \*Learning Activities, Mexican Americans, Music Activities, \*Preschool Children, Resource Materials  
Identifiers—\*Cowboys

The activities depicted and the information provided in this book reflect the program for cultural awareness at The Learning Tree, a preschool located in Dallas, Texas. The material is presented in the hope that it will serve to increase children's acceptance of diversity and pluralism in American society. Six cultures are represented: Asian, black, cowboy, Eskimo, Mexican, and Native American. Guides for activities related to family living, creative art expression, nature and science, language development, music and dance, games and manipulative play, and special events such as festivals and holidays are provided for each of the cultures. A selected bibliography of records, films, and books for children and adults accompanies the material for each culture. A final bibliography of multi-cultural resources is also provided. Many drawings and photographs accompany the descriptions of activities. (Author/RH)

The Relationship of Security of Attachment to Exploration and Cognitive Mapping Abilities in Two-Year-Olds.

Spons Agency—Texas Univ., Austin.

Pub Date—Apr 81

Note—28p.; A version of this paper was presented at the Biennial Meeting of the Society for Research in Child Development (Boston, MA, April 2-5, 1981).

Pub Type—Reports - Research (143)

**EDRS Price—MF01/PC02 Plus Postage.**

Descriptors—Adjustment (to Environment), \*Anxiety, \*Attachment Behavior, Cognitive Ability, \*Cognitive Processes, Emotional Response, \*Preschool Children, \*Security (Psychology), \*Spatial Ability

Identifiers—\*Cognitive Mapping, Exploratory

Behavior

Children ages 30 to 34 months, assessed at 18 months for security of attachment and categorized as anxious/avoidant, anxious/resistant, or securely attached, were observed exploring with their mothers in a large-scale laboratory space. (Quality of attachment was assessed by means of Ainsworth's standard strange-situation procedure.) After learning a specific route through the laboratory space to a goal, the children were required to invent new routes to the goal. Quantity of exploration was measured by number of movements, and mode of exploration was measured by the extent of active versus passive movements. Among the results, children who had been classified as securely attached explored more independently and had less restricted patterns of exploration than did anxiously attached children. Securely attached children also scored higher on tasks of spatial ability. Findings suggest that individual differences in security of attachment, mode of exploration, and cognitive mapping abilities exert mutual effects upon each other throughout children's early development. Risk Factors, Superior Adaptive Capacity, and Characteristics of the Foster Home as Predictors of Maintenance of Foster Placement.

Pub Date—Apr 81

Note—22p.; Paper presented at the meeting of the Western Psychological Association (Los Angeles, CA, April 9-12, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—\*Adjustment (to Environment), Family Characteristics, \*Foster Children, Foster Family, \*Foster Homes, Models, \*Personality Traits, \*Placement, Predictor Variables, \*Risk, Statistical Analysis, Stress Variables

The purpose of this study was to predict maintenance of foster home placement. Fifty-one foster children comprised the sample; 47 were involved in the Casey Family Program in Montana, and four were part participants. Case files provided the first and major data base. Caseworker ratings, a second data source, were obtained on children's personal characteristics, foster family characteristics, and factors related to foster placement breakdown. The third data source involved six categories of archival data regarding foster children (for instance, placement history, risk factors, and relationship factors). Factor analysis of the data produced 324 items pertinent to predicting foster home maintenance. These items were grouped into seven domains: personal and demographic characteristics, natural family history, relationships and developmental factors, placement history, present foster family characteristics, and factors involved in placement breakdown or change. Outcome variables included occurrence of placement breakdown, as well as caseworker ratings of three factors: the child's level of functioning, the foster family's level of functioning, and the likelihood of choosing specific foster families for future placements. Results indicated foster mothers with strong emotional coherence generally correlated with high ratings of foster children's overall functioning and with stable placements. Placement breakdown was highly predictable when foster child and foster family characteristics were considered. (Author/DB)

Prevention Service Programs for Infants of Mentally-Ill Mothers. Progress Report.

Pub Date—Aug 81

Note—14p.; Paper presented at the Annual Meeting of the American Psychological Association (89th, Los Angeles, CA, August 24-28, 1981).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

**EDRS Price—MF01/PC01 Plus Postage.**

Descriptors—Home Visits, \*Infant Behavior, Longitudinal Studies, Mental Disorders, \*Mental Health Programs, \*Mothers, Outreach Programs, \*Parent Child Relationship, \*Prevention, Program Descriptions, Psychosis, Research Problems, \*Risk

This paper reports the progress of an ongoing clinical research project on prevention services for at risk infants of mentally ill mothers. This project extends the prevention focus of early education programs into the mental health field. Previous re-

search findings indicate that maximum preventive effects are achieved when programs (a) begin before the infant is 3 years old and (b) focus on facilitating specific mother-child interactions. Three types of intervention, ranging from a relatively simple nonintrusive format to a more complex multifaceted format, were proposed in the project. The interventions were designed to improve the use of community resources by target families; to help parents recognize and respond to the child's changing health and safety needs; to help parents recognize and respond to the child's needs for appropriate cognitive, social, and linguistic stimulation; and to foster more adaptive and conflict-free forms of attachment between mothers and infants. Effects of the program are evaluated by means of videotape observations, interviews, and a battery of assessment devices. Pre- and posttest measures of a variety of child-parent outcomes are assessed by an evaluation team blind to the intervention used with each family. Entrance requirements for participants are noted, and changes in the program due to community pressures and research needs are described. (Author/DB)

Identifiers—Denmark, Norway, Sweden

Four cities in Norway, Sweden, and Denmark have been engaged since 1977 in a joint study of the junior level of elementary school. (More than 5,000 pupils are involved in the study.) The Department of Education at the University of Turku joined the project in the autumn term of 1979. The purpose of the Swedish project, reported here, was to investigate, with particular attention to specific reading and writing disabilities, the cognitive and socioemotional development of children during the first three years of school. (About 700 children took part in the study.) Practical aims of the project were to improve clinical investigations of remedial education and to provide guides for planning educational assistance for children with reading and writing disabilities. Screenings utilizing multiple measures at each of three test times were made at the end of grade one (spring term 1977), at the beginning of grade two (about 6 months later), and halfway through grade three. An underachieving pupil group was defined on the basis of the results of the first and second screenings. Subsequently, a comprehensive process of investigation and treatment for the underachieving group was started at the end of the autumn term in grade two. Results are discussed. (Author/RH)

Identifiers—\*Social Policy

In this book of articles on day care, policy analyses of day care delivery are combined with recent research on the effects of day care. The authors include experimental psychologists, psychiatrists, economists, public health workers, pediatricians, and early childhood educators. Among the issues investigated are the influence of day care on parent-child attachment; the usefulness of psychoanalytic principles for the construction of quality day care programs; the developmental consequences of inconsistent caregiving for attachment behavior; the impact of verbal interaction on children's language acquisition and emotional adjustment; the influence of type of training on quality of day care; the validity and reliability of research studies of day care; the role of the federal government in day care regulation; sex, age, and temperament differences in children's responses to day care; cost effectiveness versus quality of day care; social policy options affecting delivery of quality day care; and profit versus non-profit day care. Child care tax credits are discussed as one policy option. Those families considered most likely to benefit from proposed policy options are analyzed and "Black perspective" on day care is presented. Descriptors—\*Attachment Behavior, Individual Characteristics, \*Infant Behavior, Longitudinal Studies, \*Mothers, \*Parent Child Relationship, Personality Traits, Predictor Variables

Identifiers—\*Compliance (Behavior)

In order to identify antecedents of infant's compliance with mothers' directions on how to solve four tasks (graded in terms of stressfulness to the infant), 194 high-risk mothers and their 2-year-old children were observed on videotape and assessed with a six-point rating scale. Data collected prenatally and postnatally at 3, 6, 12 and 18 months of age were used in multiple regression analyses to identify antecedents of compliance. Maternal personality variables, infant characteristics assessed shortly after birth and mother/infant interaction variables assessed at 6 months were related minimally to compliance. The quality of mother-infant attachment (assessed with the Ainsworth-Wittig (1969) Strange Situation procedure) at 12 and 18 months did predict compliance at 24 months. Securely attached infants were significantly more compliant than anxiously attached infants. (Author/RH)

Identifiers—\*Elementary Secondary Education Act Title I

This report, the second phase of a three-phase study designed to examine the feasibility of developing evaluation models for Early Childhood Title I (ECT I) programs, describes and analyzes early childhood programs currently supported under Title I. The report is based primarily on information gained from field visits to 10 state education agencies and 29 local education agencies. Additional sources of information include the literature review from Phase I of the main study; a telephone survey of state Title I coordinators; state Title I evaluation reports for fiscal year 1976; and published descriptions of exemplary early childhood Title I programs. An introductory overview of the study and a description of the field research method are presented in Part I. The description of the ECT I programs and the current evaluation practices associated with those programs are outlined in Part II. Part III analyzes particular facets of ECT I practice, including the nature of ECT I programs within the broader trends of early childhood education, the needs assessment procedures related to the recruitment and selection of children for ECT I programs, the organization of the ECT I projects, and the relationship of ECT I programs to the educational and social communities in which they reside. Finally, Part IV deals with issues related to parent education. Included are a description of parent involvement activities (both as independent projects and as components of ECT I programs) and a discussion of current methods of evaluating parent involvement. Summaries of the major information categories used for collecting data and classifying existing early

# 110 Document Resumes

childhood programs, as well as a list of the variables used when describing ECT-I projects, and a guide to the acronyms and initials used in this report, are included in the appendices. (Author/MP)

This technical summary of the second phase of a four-phase study of Early Childhood Title I (ECT-I) programs, describes and analyzes the nature of early childhood programs currently supported under Title I. The summary is based primarily on information gained from field visits to 10 State Education Agencies (SEAs) and 29 Local Education Agencies (LEAs). Additional sources of information include "ESEA Title I Early Education: Review of Literature on Evaluation and Instrumentation" (Haney, et al., 1978); a telephone survey with state Title I coordinators; state Title I evaluation reports for fiscal year 1976; and published descriptions of exemplary early childhood Title I programs. The first three sections of the report summarize the field research method and describe the ECT-I programs and the current evaluation practices associated with them. The fourth section analyzes particular facets of ECT-I practices, including the nature of ECT-I programs within the broader trends of early childhood education, the needs assessment procedures related to the recruitment and selection of children for ECT-I programs, issues pertinent to curriculum and resources, and the relationships between ECT-I programs and the broader educational and social communities in which they reside. The last section describes parent involvement activities in ECT-I programs and current practices for evaluating these activities. (Author/MP)

Details of a year-long sociolinguistic study of classroom discourse are presented in this final report, with focus on pupil perceptions of the units and features of classroom discourse. Pupils in second-, third-, and fourth-grade classrooms in a lower socioeconomic, multiethnic elementary school, viewed videotapes of language arts lessons given earlier in the day. After the 4-minute tape segments, individual pupils were asked what they had heard being said. Responses, which were printed on index cards, provided data on perceived units of classroom discourse. All index cards were placed in random array, and individuals were asked to group responses which were alike. Pupil selections and reasons for grouping provided data on salient features of classroom discourse. Comparisons were made of responses over time, across settings, and in relation to ethnicity, entering reading achievement,

and peer status. Time, setting, and peer status were significantly related to differences in pupil perceptions of classroom discourse units; time, setting, grade level, and reading achievement were significantly related to differences in perceptions of salient features of classroom discourse. Findings supported the concept that the social context determines participant behavior. (Author/DB)

Data on one aspect of a year-long sociolinguistic study of participant perspectives of classroom discourse are presented in this final report. Second-, third-, and fourth-grade pupils in a lower socioeconomic, multiethnic elementary school viewed videotapes of language arts lessons given earlier in the day. Each videotape was presented in three 4-minute segments. Responses were compared to actual transcripts of the videotapes in order to identify the types of utterances that stood out for participants. Additionally, each pupil was presented with three sets of comments uttered in the lesson; these comments included teacher questions, pupil responses, and teacher praise. Subjects were asked why they thought these comments had been made. Responses to this task provided data on pupil perceptions of the functions of questions, responses, and praise. Pupils' perceptions of the functions of the three elements in the school setting were compared to their perceptions of videotaped family conversations. Among the results was the finding that few significant relationships existed between perspectives of classroom discourse and ethnicity or other variables. Strong relationships existed among pupil perceptions of classroom discourse, participation in class discussions, and academic success. Pupils were alert to the incongruent functions of questions at home and at school. (Author/DB)

Data gathered during a year-long sociolinguistic study of participant perspectives of classroom discourse are presented in this final report. Elementary school students gave their perceptions of (1) the formal rules or expectations governing discourse at school, in play groups, and at home; (2) appropriate forms to get attention or influence others; and (3) discontinuities between discourse at home and at school. Although pupils recognized discontinuities between formal rules of discourse at home and at school, no ethnic or achievement level differences

emerged in pupil responses. Identification of appropriate forms of address reflected pupils' awareness of their different status across settings. Sharp discontinuities between home and school discourse rules seemed better understood than more moderate discontinuities, and rules governing classroom questioning seemed difficult for the pupils to comprehend. Children's general lack of comprehension suggested the need for further research examining relationships between pupil perceptions of classroom questions, behavioral manifestations of understanding rules of discourse, and academic achievement. (It was found that participation in class discussion significantly reduced variance in final reading achievement; sex, entering reading skills, and student-teacher relationship contributed significantly to reducing variance in classroom participation.) Further studies were recommended to investigate indirect relationships between home-school discontinuities in rules of discourse and pupil success in school. (Author/DB)

Part of a year-long sociolinguistic study of teacher and pupil perceptions of classroom discourse, this study focused on the following methodological question: how might the approach selected for analysis of language as a linguistic system affect what is learned about language in a given social situation? Subjects were 165 children and their teachers in six second, third and fourth grade classrooms in a lower socioeconomic, multiethnic elementary school. Six teacher-planned language arts lessons were videotaped in each classroom over the course of the year. Transcripts of the lessons were also made. The videotapes and/or transcripts were analyzed using three different approaches to analysis of classroom language: a language dimensions approach, a speech act analysis, and an analysis of the structural sequencing of question cycles. After comparing the data derived from the above three approaches, the conclusion was reached that the initial findings of the original study, (which was based on the language dimensions approach), were not only supported by the two alternative approaches, but more importantly, were considerably clarified, extended, and strengthened. Descriptors—Age Differences, Classroom Communication, Classroom Research, Communication Research, Comparative Analysis, Discourse Analysis, Elementary Education, Elementary School Students, Ethnic Groups, Longitudinal Studies, Low Income Groups, Peer Relationship, Play, Sex Differences, Sociolinguistics  
Part of a year-long sociolinguistic study of teacher and pupil perceptions of classroom discourse, this study presents data on pupil perceptions of dis-

course in play settings. Subjects were 165 pupils from six second, third, and fourth grade classrooms in a lower socioeconomic, multiethnic elementary school. In each of the six classrooms six children were randomly selected (stratified by sex and peer status) to form six play groups. Each group of children was then videotaped while playing with construction toys. Videotapes were played back in short segments to all of the pupils in the classroom to which the play group belonged. Following each videotaped segment, pupils were individually asked to report on "what they heard anyone saying" in that segment of the videotape. Data obtained was compared to data previously obtained during discourse in classroom settings. Findings indicated that certain language events or functions, such as attention-getting and information-giving, occurred frequently in both play and classroom settings. However, in both settings these events were not necessarily those most salient (i.e., most frequently "heard") to pupils. The data further show that peer status and sex are related to patterns of processing information in both lesson and play settings. Higher peer status subjects in both settings reported more total information (related to both language and the social context in which that language occurred). Girls appeared to be more alert than boys to the source of language in both settings, with girls reporting the comments of other girls significantly more often than those of boys, while boys showed no significant difference in reporting of girls' versus boys' comments. Descriptors—\*Classroom Communication, Classroom Research, Communication Research, \*Discourse Analysis, Elementary Education, \*Elementary School Students, \*Elementary School Teachers, Ethnic Groups, Longitudinal Studies, Low Income Groups, Peer Relationship, Reading Achievement, Sex Differences, \*Sociolinguistics, Student Participation, Student Teacher Relationship, Videotape Recordings. This report presents a summary of findings from a year-long sociolinguistic study of pupil and teacher perceptions of classroom discourse. Subjects were 164 pupils, and their teachers, in six second, third, and fourth grade classrooms in a lower socioeconomic, multiethnic elementary school. Six teacher-planned language arts lessons were videotaped in each classroom over the course of the year. In addition, videotapes were made of conversations in the families of three third-grade pupils and of six randomly selected (stratified by sex and peer status) pupils in each classroom in an unstructured play setting. Videotapes were played back to pupils and a variety of tasks were used to collect data on pupil perceptions of the "rules" of discourse, the "units" and "salient features" of discourse, and the functions of "question cycles" in each of the three settings. Comparisons were made of pupil responses over time, across settings, and in relation to pupil characteristics, including ethnicity, sex, entering reading achievement, peer status, and status with teacher. Pupil perceptions were compared to teacher perceptions, and both were compared to those of outside observers, chiefly sociolinguistic specialists. Important discontinuities were identified between children's perceptions of discourse in home and play settings and their perceptions of classroom discourse. Children's perceptions of and participation in classroom discourse, for example, appeared to be associated with differences in classroom language patterns, as identified by sociolinguists. Pupils' sex, entering reading achievement, peer status, and status with teacher were all significantly related to perceptions of classroom discourse and participation in classroom discourse, but ethnicity was not. Frequency of participation in class discussions contributed significantly to explained variance in final reading achievement. (Author/MP)

Descriptors—\*Attitude Measures, \*Elementary School Teachers, \*Food Service, \*Knowledge Level, Lunch Programs, \*Nutrition, Nutrition Instruction, Private Schools, Public Schools, State Surveys

Identifiers—\*Teacher Knowledge, \*Wisconsin

Conducted by the Wisconsin Nutrition Education and Training (NET) program, this study was designed to (1) assess public and private elementary school teachers' and public school food managers' nutrition knowledge, and (2) to ascertain their opinions on various topics related to nutrition education. The first section of the report provides background information on the development of the Wisconsin NET program and its goals. Information on how the statewide survey was conducted is also included. This section is followed by two major sections. The first describes the development of the Nutrition Knowledge Test and the survey results for this test. The second section presents the survey findings regarding subjects' opinions on the following: the effects of nutrition instruction on students' eating habits; teaching approaches to nutrition education; respondents' perceptions of their levels of nutrition knowledge; and use of the lunchroom as a laboratory for learning about nutrition. More than half of the report consists of six appendices, including general behavioral and performance objectives related to the Informed Food Choice Model; a copy of the Wisconsin NET Nutrition Knowledge Test; the items used to elicit food service managers' and teachers' opinions on nutrition related topics; copies of letters and directions sent to study participants; a copy of the Nutrition Knowledge Test answer sheet; and item statistics for the Nutrition Knowledge Test. Descriptors—Adolescent Development, \*Children, \*Child Welfare, Cost Effectiveness, Day Care, \*Financial Support, History, \*Public Policy, Research Committees, \*Research Needs, \*Social Services

Focusing on the range of child welfare, health, juvenile justice, child development, recreation, and family support services currently provided to children in the United States, this report of the Committee on Child Development Research and Public Policy assesses and provides recommendations concerning research on children's services and service provision. The first section of the report provides a historical review of the development of and research on children's services. The second section presents three examples of how enlarging the frame of reference for studying children's services brings into question and shifts the terms of policy debate. Examples discussed are child care, services for youth (adolescent) development, and the costs and benefits of financing children's services. In the committee's view, the dozens of specialized perspectives now employed by researchers and service providers constitute an insufficient basis for the formation of a social policy. It is recommended that research on children's services, as well as the services themselves, adopt a holistic conceptualization of the child and investigate how children actually live and manage their lives. It is further recommended that present research and service provision be continued, but be redesigned, redirected, and reformed to provide

vide greater affordable benefits to children. Innovations in the existing array of children's services are suggested. (Author/RH)

Descriptors—\*Budgets, \*Child Rearing, Comparative Analysis, \*Cost Estimates, Cost Indexes, Expenditures, Family Income, Resource Materials, \*Rural Areas, Rural Farm Residents, Rural Nonfarm Residents, Rural Urban Differences, Tables (Data), \*Urban Areas

This guide describes estimates of the cost of raising a child made by the Family Economics Research Group of the United States Department of Agriculture (USDA). The guide starts with a description of what estimates are available, giving short profiles of the cost of raising urban, rural nonfarm, and rural farm children. The next section defines and addresses the most frequently asked questions on the use and interpretation of the estimates. Also described are adjustments to make the estimates more applicable to specific situations and limitations associated with the use of these adjustments. The third section describes resource materials on issues such as indirect costs of raising a child, costs of having a baby, and child care and higher education costs. Finally, the annual cost estimates of raising urban and rural farm and nonfarm children, updated to June 1980 levels, are presented in tabular form. References are organized to correspond to topics covered in the guide. (Author/MP)

Descriptors—Classroom Techniques, Compensatory Education, \*Curriculum Design, Curriculum Guides, \*Learning Activities, \*Learning Experience, \*Parent Participation, Primary Education, \*Skill Development, Student Teacher Relation-

ship, Teaching Guides

Identifiers—Oklahoma, \*Project Follow Through

Follow Through, which builds on the foundation provided by Head Start and similar preschool programs, is a program designed for children in the early primary grades. The Follow Through curriculum presented in this document is based on certain assumptions about children and the learning process, among them the understanding of the importance of individual uniqueness, human development, and self-esteem. Also stressed is the role of learning potential, learning as a process of interaction with the environment, and learning as a selective activity. A section devoted to teaching design focuses on coordination of curriculum goals, classroom management, the physical environment, and teacher behavior. Many learning activities are presented for developing reading, writing, mathematical, and test-taking skills. Creative thinking is also encouraged in this curriculum; learning experiences are outlined for arts and crafts, cooking, dramatics, writing, games, field trips, and the use of "intellectual kits" (a collection of objects used to help develop such skills as problem solving, language facility, and differentiating reality from fantasy). Parent involvement is briefly discussed. (Author/DB)

Pub Date—80

Note—130p.

Available from—The Home and School Institute, Inc., Training Programs and Publications, c/o Trinity College, Washington, DC 20017 (\$14.00). Pub Type—Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Academic Achievement, Adult Education, Children, Educational Philosophy, Elementary Education, \*Family Involvement, \*Family School Relationship, Guidelines, \*Learning Activities, Mathematics Achievement, \*Non-formal Education, \*Parent Child Relationship, Reading Skills, \*Skill Development

Identifiers—Parent Through Child Learning

The curriculum presented in this document involves a set of learning activities whereby parents can help children increase school achievement. The program emphasizes the idea that when families learn together a bridge of shared knowledge and caring is established between generations. Numerous activities, called "recipes for learning," make use of daily occurrences in such surroundings as the home, the supermarket, and the neighborhood. These learning activities provide a "dual-focus curriculum"; that is, adults learn while they are teaching children. Skill areas for children, geared for specific age groups, are reading and mathematics. Adult skill areas include health and safety, consumer economics, community resources, occupational knowledge, and citizenship. Tips for good results are provided. (Author/DB)

Descriptors—Birth Rate, Comparative Analysis, Death, Demography, Developed Nations, Developing Nations, \*Diseases, \*Environmental Influences, \*Incidence, \*Infant Mortality, \*Nutrition, Prevention, Risk, \*Social Influences

Demographic data are used in this report to present information about infant mortality in more- and less-developed countries. One chapter is devoted to rising infant mortality rates in developed countries, which defy the typical post-World War II pattern. Severe economic conditions are linked to this increase. Direct causes of infant deaths are

identified as birth defects, malnutrition, and disease. Infectious and parasitic diseases cause deaths frequently preventable by vaccination or proper sanitation. Not considered an outright killer of infants, malnutrition is seen as an accessory to the crime. Indirect causes of infant mortality are traced to social and physical environments. Poor medical care, ignorance, and low income are three factors in infant mortality that are aspects of the social environment; poor sanitation and polluted water are the major factors included in the physical environment. The total number of children a woman has borne, although not clearly linked to infant mortality, is also considered important. A three-stage endeavor to reduce infant mortality is discussed in terms of quality of life, medical interventions, and care of sick infants. (Author/DB)

The Elementary School Mental Health Project: A School Program Aimed at the Promotion of Mental Health in Young Children.

Pub Date—[80]

Note—13p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Consultation Programs, \*Coping, Elementary Education, \*Elementary School Students, \*Emotional Development, Foreign Countries, Group Counseling, Individual Counseling, \*Mental Health Programs, \*Prevention, Program Development, \*Social Development

Identifiers—Ontario (Ottawa)

A program aimed at promoting mental health in elementary school-age children is described in this report. The project's short-term goal is to help children successfully cope with social and emotional problems. One long-term goal is to prevent mental health problems which require long and costly remediation; another is to enhance the lives of children and families. The conceptual framework for the program is the primary, secondary, and tertiary prevention approach formulated by public health services. Program components include counseling, consultation, education, program development, and research. Counseling refers to individual interventions with a single child or to group work with children who have specific interests or problems. School staff and parents accept counseling services before they accept consultation. The objectives of consultation are to share knowledge and perceptions about individuals, to develop helping strategies, and to monitor progress. Mental health education in the program, seen as the first step in the direction toward primary prevention, involves small-group discussions, in-service education, and information dissemination. Program development involves special projects to promote mental health, such as a toy library which was created at one school. Preliminary evaluation results are presented. (Author/DB)

Factors Which Influence the Development of Intelligence and Performance Among Nigerian Children.

Pub Date—[80]

Note—20p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Children, Cognitive Ability, Communication Skills, Environmental Influences, \*Family Influence, Foreign Countries, \*Intellectual Development, Intelligence Tests, Learning Processes, \*Nutrition, Parent Child Relationship, \*Personality Traits, \*Socioeconomic Influences

Identifiers—Nigeria

Several themes relevant to the personality development and intellectual functioning of children are presented in this position paper. Inferences for the education of Nigerian children are also drawn. Among general factors considered influential in children's intellectual development, three are emphasized: the way in which intelligence is defined, the use of intelligence tests, and the basic communication process involved in learning. An estimate that children in developed countries use 15 to 20 percent of their mental ability is used to draw attention to the proposition that children in developing countries probably use their mental ability to a lesser extent; and that Nigerian educational planners should consider such prospects a cause for concern. Environmental factors, language, and the home are considered the major influences on personality

development of children with implications for Nigerian children seen fundamentally as the need for parent education programs. Cultural factors, which predominate in Nigeria with its diverse tribes, are also discussed as significant influences on personality development. The paper's final section identifies five factors pertinent to the growth and development of intelligence among Nigerian children: the home environment, economic handicaps, nutrition, harsh local medical practices, and competitive nature of child rearing in Nigeria. (Author/DB)

Parents' Views of Discipline in the Preschool and the Home.

Pub Date—Nov 81

Note—13p.; Paper presented at the Annual Meeting of the National Association for the Education of Young Children (Detroit, MI, November 5-8, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Classroom Techniques, \*Discipline, Discipline Policy, Early Childhood Education, Educational Background, \*Parent Attitudes, Parent Child Relationship, Parent School Relationship, \*Preschool Children, Sex Differences, \*Teacher Role

One hundred and forty-three parents of preschool age children were surveyed (1) to determine their beliefs about discipline at home and at the preschool, and (2) to ascertain relationships between these beliefs and demographic characteristics. Parents indicated the extent to which they expected teachers to solve classroom problems according to each of three discipline approaches: the interventionist approach, which follows social learning principles and endorses authoritative discipline; the non-interventionist approach, which follows psychodynamic principles and endorses non-directive discipline; and the interactionist approach, which follows reality therapy principles and endorses negotiated discipline. It was acknowledged that parents might endorse more than one discipline approach, but one approach was expected to predominate in an individual's beliefs. Most parents endorsed the interventionist approach in the home, a third endorsed the interactionist approach at home, and less than a tenth endorsed the non-interventionist approach. Parents expected teachers to use these approaches in approximately the same proportions. However, nearly 25 percent of the parents demonstrated a double-standard, expecting schools to be more authoritative than the home. Educational background of the parent, and gender of child, (but not of parent) were associated with type of discipline endorsed. Appendices include the data-gathering instrument and the scoring key. Becker, Judith A.

Preschoolers' Judgments of Speaker Status Based on Requests.

Pub Date—Apr 81

Note—6p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Boston, MA, April 2-5, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Age Differences, \*Childhood Attitudes, \*Cues, \*Individual Characteristics, Language Research, Language Skills, Language Usage, \*Semantics, Status, \*Syntax, \*Young Children

Identifiers—Dominant Behavior, \*Speech Discrimination, Subordination

Children's ability to infer dominant or subordinate status of speakers from their requests was investigated. It was hypothesized that, for young children, syntactic indirectness, semantic softness, and a positive tone, in the absence of other cues, would serve as cues to indicate that a speaker is subordinate to a listener. Syntactic directness, semantic aggravators, and negative tone were hypothesized as cues of a speaker's dominance. Syntactic directness/indirectness, semantic markers, and tone of voice were identified as cues which signify status to a listener. Syntactic directness/indirectness measures how explicitly sentence structure indicates a request is being made, semantic markers involve words such as "please" or a threat,

and tone of voice was used to differentiate between pleasant and aggressive requests. Sixteen 4 1/2- to 5-year-old boys and girls and sixteen 5 1/2- to 6-year-old boys and girls listened to eight pairs of stimulus sentences, each pair differing solely with respect to one of the hypothesized cues. One request in the pair was "directed" to each child by a doll while the other request in the pair was "addressed" to the child by an identical doll. After each pair of sentences, the child had to decide which doll was making requests "in a bossier way." In general, hypotheses were confirmed. (Author/DB/PW)

Identifiers—\*Israel

Israel's Home Instruction Program for Preschool Youngsters, a nationally administered home-based program of early childhood education, is discussed in this book. In addition to presenting information regarding the social conditions that necessitated development of the program, this book describes the theory and planning behind the program, its operation, and evaluation results. Failure of Israeli kindergartens to cope effectively with the educational deficiencies of Jewish immigrant children from Islamic countries led to the development of this home-based program in which mothers are taught how to teach their children. Highly structured materials were chosen as the instructional resources most likely to ensure academic success of the children. A hierarchical conception of early psychological development was also incorporated into the program. Teaching materials focused on language skills, discrimination skills, and problem solving. Three categories of concepts were emphasized: attributes, spatial relationships, and quantity. Specific chapters in the book present research about effects of the program on children, participants' views of the program, assessment of the program's implementation, and the current status and future outlook of the program. Appendices provide examples of workbook activities for 4-, 5-, and 6-year-old children. Several tables provide data on such topics as academic achievement, teacher evaluations, and reading and math skills. (Author/DB)

Descriptors—Academic Achievement, \*Attendance, \*Classroom Environment, Classroom Observation Techniques, Classroom Research, \*Classroom Techniques, Elementary School Students, \*Grade 3, Primary Education, \*Reading Achievement, \*Student Teacher Ratio, Teaching Methods

A finding in the 1975-76 evaluation of several California programs designed to improve the academic achievement of young children indicated that in schools whose students scored at or below the twentieth percentile on the Entry Level Test in 1973-74, third grade reading test scores had declined relative to their predicted scores over the three-year period from 1973-74 to 1975-76. Although the aggregate finding for that group of schools indicated a decline in scores relative to prediction, individual schools could be identified that had patterns of scores that increased over the period

in question, as well as schools in which scores declined. This study was designed to investigate the circumstances associated with this decline or improvement in third-grade reading achievement. Seven "increaser" schools and seven "decreaser" schools were identified, and a total of 45 third-grade classrooms were observed. Reading test scores from the California State Assessment of 1976 and 1977 and attendance data were obtained for the year. Major findings included the following: (1) higher classroom gains were associated with lower teacher-student ratios; (2) highly controlled classroom environments using systematic instruction and much positive reinforcement contributed to greater reading achievement scores; (3) small group instruction was more efficient and effective in increasing reading achievement than was individualized instruction; and (4) great classroom diversity was observed in terms of instructional processes and achievement gains. Appendices include the classroom observation instrument, and operational definitions for the observation instrument. (Author/DB)

Identifiers—ESEA Title I Migrant Programs, \*Oregon

Developed for non-English speaking kindergarten children, this skills check list was designed to evaluate rapidly and to monitor a student's mastery of suggested objectives at the kindergarten level. Objectives to be mastered with 100% accuracy include: (1) oral identification of 6 basic colors; (2) oral identification of numbers 0-5; (3) identification of numbers 6-10; (4) oral identification of 6 basic shapes; (5) oral recitation of English alphabet; (6) identification of letters (of the English alphabet), in and out of order and learning of keywords and phonetic sounds orally; (7) identification of 8 basic body parts; (8) oral identification of 9 advanced colors; (9) learning to tell basic time ("o'clock"); and (10) learning to print name. Included in the booklet are a K-level goal sheet, a skills check list on which to record student progress, and tutoring request/report forms that list individual objectives and provide space to record date and length of tutoring sessions. Additionally, a filmstrip is available to help the teacher or teacher-aide present the objectives and to help the child learn the skills as required in the K-level. (AW)

Descriptors—Addition, Alphabetizing Skills, \*Basic Skills, Behavioral Objectives, \*Check Lists, Elementary School Mathematics, \*Grade 1, Learning Readiness, Mastery Learning, \*Migrant Education, Non English Speaking, Primary Education, Reading Skills, Skill Development, \*Student Evaluation, Student Records, Word Lists

Identifiers—ESEA Title I Migrant Programs, \*Oregon

Developed for non-English speaking grade 1 students, this skills check list was designed to evaluate rapidly and to monitor a student's mastery of suggested learning. Following the Migrant Student Record Transfer System skill's list, the check list is a suggested list of learning needs to be mastered,

along with some helpful ideas for supplementing a child's knowledge of important things around him/her. Objectives to be mastered with 100% accuracy include: (1) reading aloud the Dolch pre-primer, primer, and Level 1 word lists; (2) reading aloud the Sullivan (or equivalent) word list; (3) identifying orally the numbers 0-100 in and out of order; (4) spelling numbers 0-10; (5) spelling 8 basic colors; (6) printing first and last name; (7) learning basic addition facts; (8) printing entire English alphabet in order (capital and lower case); and (9) learning to tell time (half hours). The booklet includes the goals for kindergarten through grade 6, a skills check list on which to record student progress, and tutoring request/report forms that list individual objectives and provide space to record date and length of tutoring sessions. Additionally, Dolch basic word lists (pre-primer, primer, and level 1) and basic addition problems are included. (AW)

The prefabricated Oregon Individual Short-Term Plan/Records on oral language (grades 1-3), covering skills such as sound discrimination, listening comprehension, critical listening, basic language patterns, oral expression, and vocabulary development, were designed for migrant children who attend a school for only 2 to 6 weeks. Migrant education teachers who had made extensive use of the plan/records were assembled by the Northwest Regional Educational Laboratory during 1979-1980 and funded by the National Institute of Education to develop prefabricated plan/records that could be applied to situations frequently encountered with Oregon migrant children, of whom 5,489 of 9,797 eligible for regular and summer terms were active migrants. Each short-term plan covers a single content area and focuses on a limited objective. The objective, a set of activities expected to lead to that objective, and a criterion statement are listed on each page, along with a place to record if and when the criterion was met, who attested to this fact, and any relevant comments. Because of efforts to implement the Migrant Skills List on a nationwide basis, these plan/records were pre-coded with the Migrant Skills List number if available. Directions for resource teachers are included along with optional reading resources. (AW)

Identifiers—\*Individual Short Term Plan Records, \*Oregon

Step-by-step directions for primary and elementary level resource teachers, classroom teachers and aides instruct them about how to meet the individual reading instruction needs of Oregon migrant children (9,797 eligible in 1980-81) through prefabricated Individual Short-Term Plan/Records. In this approach the teacher assumes the child will only be available for instruction for a short period of time, generally two to six weeks. After quick assessment, using whatever information is available, the teacher selects one or more short-term plans. Each plan addresses a single content area and focuses on a single limited objective. The objective, a set of activities expected to lead to that objective, and a criterion statement are laid out on a single page form, comprising the plan portion of the plan/record. The record portion of the page contains a place to record if and when the criterion were met, who attests to this fact, and any relevant comments. Plan/records are pre-coded with the Migrant Skills List number, if applicable. Prefabricated plan/records for reading readiness skills focus on visual discrimination, visual memory, auditory discrimination sensorimotor, alphabet, and context. Reading skills plan/records emphasize decoding consonants and vowels, structural analysis, literal and inferential comprehension, vocabulary, and study skills. (NEC)

Damon, Shayla R.

A Bidialectal Approach: Strategies for Assimilating the Mainstream Dialect into the Non-mainstream Southern Mountain Dialect.

Berea Coll., Ky.

Pub Date—18 Jul 77

Note—29p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Auditory Discrimination, \*Dialects, Individualized Instruction, \*Instructional Materials, \*Nonstandard Dialects, Oral Reading, \*Pattern Drills (Language), Secondary Education, Sentence Structure, \*Standard Spoken Usage, Teaching Methods, \*Verbs, Visual Learning  
Identifiers—Appalachia, \*Biddialectalism, Decoding (Speech), Encoding

Designed for the individualized instruction of non-mainstream (non-standard) dialect bearing students from middle school through secondary, this instructional packet attempts to develop flexibility in language whereby the dialect bearer will be able to assimilate the mainstream (standard) forms and phonology into his own idiolect without destroying his non-mainstream dialect. The packet stresses the value of oral work and repetition in producing this outcome. It is suggested that the teacher take an initial reading miscue inventory of a sample of each student's reading. The packet presents strategies and simple exercises for producing student awareness of dialectal miscues, for bridging the gap between mainstream and non-mainstream dialects, for encouraging standard usage of verb forms, and for using picture exercises to build up generalized conceptions about speech patterns. The desired end result is the reduction of any perceptual dysfunction created in the mismatch of the two dialects as they are perceived by the student, verbally and silently in materials. Included in the packet are picture exercises and pattern drills for individualized instruction. (CM)

Descriptors—Consolidated Schools, \*Educational Finance, Elementary Secondary Education, Enrollment, Expenditure Per Student, Operating Expenses, \*Public Schools, \*Rural Schools, School Districts, School Organization, \*School Size, \*Small Schools

Identifiers—\*Funding Formulas, \*New Mexico

Using 1975-76 school-year data, the study describes New Mexico size adjustment factors for public school funding, compares them with the manner in which other states recognize smallness or sparsity, and delineates the impact of size adjustment factors on New Mexico school districts in terms of resources, net operational and proportionate operational expenditures, pupil-professional and pupil-adult ratios, and breadth of program. The study also investigates size adjustment factors as incentives for school reorganization and for school and district consolidation and the desirability of recognizing alternative schools within the distribution formula. Results support the concept of three-tier size adjustment recognition (school, district, and rural/isolation) and the current recognition formulas for small elementary-junior high schools, small districts, and rural/isolation, but reveal a large disparity in the breadth of programs offered in small and large secondary schools and difficulties for very small schools to offer a breadth of program comparable to larger secondary schools, regardless of resources provided. Recommendations include: retaining without change the elementary-junior high, district, and rural/isolation factors; changing the high school adjustment factor to recognize schools with enrollments of 500 or fewer and reducing the multiplier to 1.5; and adopting incentives for small secondary school and small school district consolidation. Identifiers—\*Appalachia, \*Appalachian Literature, Appalachian Studies

Designed to give Appalachian high school students an awareness of their own mountain culture, this guide begins with a section on values clarification and cultural awareness. Chapters II through V lay the groundwork and give reason and explanation to the works the students will examine in Chapter VI. These chapters deal with the geography, history, and folk culture of Appalachia and with Appalachian language. Chapter VI, "Appalachian Literature," covers the following: (1) Tall Tale and Tall Talk; (2) Local Color: Realism and Romance; (3) New Dimensions of Realism: Renaissance in the Hills; (4) Using the Past to Search for Identity; (5) Poetry; and (6) Essays in Criticism and Culture. Each of these sections contains suggested teaching methods and student activities. The project section of the guide, to be used the last week of the course, is designed to enable students to investigate a part of the course that especially interested them, by working on individual projects. Identifiers—\*Experimental Schools Program

The organizational characteristics of school systems that affect the process and outcomes of planned change activities are examined in this monograph, which analyzes the Rural Experimental Schools Program (RESP), a set of long-term education field experiments sponsored by the National Institute of Education in 10 geographically dispersed school districts comprising 52 individual schools, to develop and implement comprehensive changes in all aspects of district and school functioning. The crucial relationship between the organizational properties of schools and their districts is explored. Particular attention is given to the organizational characteristics of the parts of the educational system (such as individual schools, school districts, and federal education structures) and to the essential relationships among the system's parts. The federal role in education, elements of a rational approach to change, strategies for measurement and analysis, and assumptions underlying RESP are considered. A descriptive analysis of the scope of the program's implementation is offered, as are discussions of how structuring authority affected implementation. Implications of the results of RESP for the design and management of other education change programs are discussed. (NEC)

Identifiers—\*Experimental Schools Program

The study documents what happened in 10 rural communities when a federal educational funding program (Experimental Schools) in 1972 provided 5-year grants for demonstration projects designed both to improve the school system and, through the schools, to address a variety of community needs. The study employs two strategies to document the ways in which a community's characteristics both influence and are influenced by rural development programs. First, it examines how various community characteristics enhanced or constrained the planning, development, and implementation of these programs and the ultimate effects of the programs upon both schools and communities. Second, it explores three concepts concerning the nature of rural communities: the existence of unique prototypes of rural communities; the nature of an underlying social system operating in many rural communities; and the role of various sectors of the community as these contribute to the development process (including local government, housing, the economic base, employment, social services, health, and family life). A sophisticated model developed to guide the research synthesizes theories and methods from social science theory, rural development policy, program evaluation, and operations research. Findings offer implications for educational investment programs, rural development policy, and social research and theory. (NEC)

\*Census Figures, Nonreservation American

Indians, \*Reservation American Indians, \*Tribes

Identifiers—Bureau of Indian Affairs, Iroquois

Confederacy, \*New York, Poospatuck (Tribe),

Shinnecock (Tribe)

According to the 1970 census, New York State has the tenth largest Indian population in the United States; 1978 tribal enrollment was 12,500—up about 25% over 1970. The nine Indian reservations are owned and occupied by Iroquois, Poospatuck, and Shinnecock Indians, all of whom are indigenous to New York State. Enrollment in the Iroquois Confederacy, which includes five nations—the Mohawks, Oneidas, Onondagas, Cayugas, and Senecas—is determined by lineage. The Cayuga Indians do not have their own reservation, having sold their lands to the State. The total American Indian population, as defined by the Bureau of Indian Affairs, consists of individuals enrolled in a tribe and other persons of at least one-fourth Indian blood. New York State's Indian population includes persons descended from tribes located outside the State. Because tribal lands are tax exempt, Indian nations and tribes enter into contracts with neighboring school districts for the education of their children. Although most Indian children (about 80%) are educated in public schools, three reservation schools, on the Onondaga, St. Regis and Tuscarora Reservations, are operated by local school districts under

contract with the State Education Department. The Bureau of Indian Affairs coordinates all State services and provides information and referral services to Indians. Following the narrative section, charts highlight pertinent information. (CM)

Mobility, Individual Characteristics, Local Government, Longitudinal Studies, \*Migration, Quality

of Life, Relocation, \*Rural Areas, \*Rural Development, Rural Environment, Rural Resettle-

ment

Identifiers—\*Energy Development, Impact Studies, \*Utah

A 1975-79 study assessing community satisfaction and migration intentions in 8 nonmetropolitan Utah communities ranging in population from 1,350 to 6,300 had 3 unique characteristics: (1) the use of distance from the community to the closest Standard Metropolitan Statistical Area (SMSA), per capita sales tax, and energy development status as contextual variables; (2) identification of interpersonal relations, community facilities and services, community physical appearance, local government, and environmental quality as 5 major factor analysis measures; and (3) separate analyses of communities with high and low energy impact. Analyses of 880 usable 1975 questionnaires (of a 1,126 total sample) and a 1979 follow-up survey revealed that satisfaction toward community physical appearance was affected negatively by age, education, and energy development status and positively by distance from SMSA and per capita retail sales tax. Satisfaction toward local government was significantly affected by age, distance, and energy development. For migration intention, home ownership exerted a retarding direct effect. Residents with non-Utah exposure, regardless of religion and other characteristics, were more apt to intend to move, as were residents in communities of high energy impact. Age, kinship ties, and housing type were not significant to migration intention, but were to actual migration. (NEC)

Identifiers—Wisconsin

Three discrete but related studies contribute to the larger research question of how adult educators can help community problem-solving group members gain new skills and competencies as they work together on community problems. The first study addresses defining individual growth in the context of rural community problem-solving groups and identifying indicators of individual growth. The second study examines how an educator might introduce educational activities into the community problem-solving situation and how these activities influence group growth. The third study examines the relationship between certain educator personality characteristics or styles and participant growth. Data suggest individual growth and growth of the

group as a whole can be realized to a greater extent when the educator deliberately works toward educational goals and is alert to attitudes and behaviors both conducive and detrimental to learning. Findings have implications for improving adult education in rural problem-solving groups and for teaching adult educators themselves. Synopses of Wisconsin case studies (six illustrating individual growth in rural community problem-solving contexts and nine illustrating the influence of adult educators on group growth) and data summarizing the relationship between adult educator's self-actualization and growth in community problem-solving groups are appended. Document Not Available from EDRS.

Descriptors—\*American Indian Education, American Indians, \*Community Resources, Counseling, Guidance Programs, Health Services, \*Higher Education, \*Hispanic Americans, Mexican American Education, Program Descriptions, \*Relevance (Education), Religious Organizations, Student Employment, Student Financial Aid, Student Interests, \*Student Personnel Services, Tutorial Programs

The information in this directory is presented to help students learn about specific Hispanic and American Indian higher education programs and services available from a large number of universities and colleges throughout the United States. For ease in use, the colleges and universities are organized in the directory by state. An alphabetical index of institutions as well as an academic program index are provided to help the reader locate programs of interest. General institutional information and a description of programs and services of special relevance to Hispanics and American Indians are included in each college entry. The address information is presented first, followed by a summary of the type of institution, student enrollments, campus housing available, and tuition and fees of the colleges. Support services available to students are described. Information is provided concerning clubs and organizations sponsored by the institution for Hispanics and American Indians: Hispanic and Mexican American staff and faculty members; courses of study offered; institutionally operated service centers; research centers; special library collections; and community support services. A summary description of the special projects and programs offered that may be of particular interest to Hispanics and American Indians is also provided. (Author/CM)

Identifiers—\*Navajo (Nation)

Qualitative or observational analysis was used in an all-Navajo Bureau of Indian Affairs day school of approximately 210 students, grades kindergarten through eighth, to generate a description of the attitudes and perceptions surrounding tests and the

process of learning about testing among Navajo children. Primary data gathering occurred at the second, third, and fourth grade levels; these data included teachers' explanations of tests and the need and purpose of testing, students' perceptions and feelings concerning testing, extensive classroom observations, and individual interviews conducted with a sample of students and teachers. Data indicated that teachers and students at the lower grade levels functioned in a complimentary way although they had different models for the testing event. By presenting the proper physical behavior during testing, the students seemed to satisfy many of the requirements of the teachers' model, although the understanding of the reasons behind testing were clearly different in both groups. When teachers had to change their model in the later grades, shifting the emphasis from form to content, and when, at that time, the reality of failing presented itself more strongly in the students' school life, the students' model became dysfunctional. Descriptors—Adoption (Ideas), \*American Indian Culture, \*American Indians, \*Comparative Analysis, Cultural Background, \*Cultural Differences, \*Cultural Exchange, Folk Culture, Foreign Countries, Health Education, \*Health Services, Medical Evaluation, Medical Services, Tribal Sovereignty

Identifiers—Folk Medicine, Medical Anthropology, \*Traditional Healing

Based on selected reading of the literature on medical anthropology and the sociology of modern and traditional system integration in other societies (developing and developed), this paper argues that state heteronomy is patently contraindicated, yet inevitable, should the funding and power structure behind Western health care systems be formally integrated with the traditional American Indian healing system. Structured around a comparison of the similarities and differences between the two systems in order to initiate some thoughts about etiology, role expectations, and situational factors that are traceable to the treatment characteristics of the two systems in question, the paper attempts to reflect strengths in the traditional healing system. Tables compare and contrast two divergent orders of information between the Western and traditional health systems. A "curing" versus "healing" model is presented in four tables that attempt to compare the two systems across causation, diagnosis, roles, and treatment processes. Excerpts from the literature which are concerned with traditional and modern interrelationships from a world-system perspective are presented to convey some of the multiple dimensions of medical pluralism. The paper also discusses non-medical interventions and the destructive aspects of large-scale educational efforts to incorporate the traditional into the modern system. (Author/CM)

Descriptors—Adults, \*American Indians, \*Assertiveness, Behavior Patterns, Biculturalism, Change Strategies, Communication (Thought Transfer), \*Coping, \*Counseling Techniques, Cultural Differences, Group Dynamics, \*Interpersonal Competence, Mental Health, Problem Solving, Program Descriptions, Role Models, Role Playing, Self Determination, \*Skill Development, Social Behavior

A skills training approach provides a conceptual framework from which human services can be provided for the personal and emotional needs of Indian people without the subtle, culturally erosive effect of traditional psychotherapy. Some 30 tribal groups and agencies participated in a cultural adaptation of an assertive coping-skills training intervention program for a year. The general themes of coping, self-determination, and communication were reflected in the ultimate program goal, which was competence in a biculturally appropriate lifestyle. Program goals emerged from discussions among community members. Formal and informal modeling provided a variety of Indian coping models enacting appropriate assertive behavior in several Indian and non-Indian social, family, and business settings. Indian and non-Indian persons rated 24 pre-training and 24 post-training role play scenes by 6 participants to determine whether relevant and noticeable change had taken place. Results indicated that the cultural adaptation of social skills training appeared to be more effective for American Indians than traditional psychological approaches. (CM)

Identifiers—Congress 97th, \*Cultural Preservation, \*Institute of American Indian Arts NM, New Mexico

The Select Committee on Indian Affairs met July 29, 1981 to hear testimony concerning S. 792, a bill to provide for the establishment of a national institute to preserve, revitalize, and disseminate Indian art and culture. Bill S. 792 was endorsed by senators from Oregon and Hawaii and, with certain reservations, by representatives of eight Indian Tribes, Pueblos, and Associations. Indian representatives wanted Indian control on the Institute's Board of Trustees to insure sensitivity to Indian religious and cultural concerns for policy direction, the exhibition of Indian arts and crafts, and compliance with the American Indian Religious Freedom Act. There was support for the concept of developing regional institutions rather than a national institute. The Department of the Interior's Bureau of Indian Affairs opposed the enactment of S. 792 because the bill proposed to remove the Indian Arts and Crafts Board and the Institute of American Indian Arts from the Department. Statements from nine Pueblo leaders in New Mexico who opposed S. 2166 (a bill to establish a National Institute of Native American Culture and Arts Development) and various correspondence were entered into the record. Descriptors—\*Educational Improvement, Educational Legislation, Educational Objectives, Elementary Secondary Education, Information Dissemination, \*Inservice Teacher Education, \*Learning Modalities, Linking Agents, \*Migrant Education, \*Program Design, Program Evaluation, Program Implementation, Questionnaires, Sequential Approach, Staff Development, \*State Programs

In 1980, a consortium composed of Virginia,

Georgia, North Carolina, Maryland, New Jersey, Pennsylvania, Florida, and the District of Columbia recommended a Staff Development Program for Modality Education to provide continuous and sequential educational experiences for all migrant children in participating states' schools. (Modality is defined as sensory channels through which individuals receive and retain information.) Project design and implementation will be predicated, for the most part, on improving the knowledge and skills of migrant instructional personnel through in-service training. The program, managed by Virginia, under the auspices of the Supervisor, Title I, ESEA and Migrant Education, will aim to build intra-state and interstate linkages and coordination linkages and coordinative mechanisms to ensure uniformity and continuity of instruction. The project also will collect and distribute relevant modality information. Although program development will consist primarily of developing specific activities and instructional modules, it will also include the selection of training and operational methods/techniques and an evaluation plan. The program will be evaluated for effectiveness as it relates to participants' reaction; learning mastery of principles, knowledge, and skills; and changes in teaching techniques and style resulting from the program. Appendices include an overview report of migrant education, Title I Elementary and Secondary Education Act. (CM)

Descriptors—Adult Education, \*Adventure Education, Affective Measures, Attitude Change, Attitude Measures, \*Group Unity, Outdoor Education, Pretests Posttests, \*Program Effectiveness, \*Resident Assistants, \*Self Esteem, Sex Differences, \*Staff Development, Staff Orientation, Supervisory Training

Identifiers—Pennsylvania State University

A 3-day outdoor adventure training program for an experimental group of Resident Assistants (RAs) at Pennsylvania State University was implemented to determine the effects of such a program on group cohesiveness and self-confidence. There were 60 subjects in the control group and 55 in the experimental group; 59% of the control group were male and 70% of the experimental group were female. While the control group participated in regular "in house" training, the experimental group participated in a 1-day orientation program followed by a 3-day adventure program which consisted of hiking, caving, swimming, and group problem-solving tasks. All facets of the usual RA training program were retained for both groups. The Moos and Humphrey Group Environment Scale and the Vegea Supervisory Self-Confidence Scale were administered prior to training, on the day following the program, and 11 weeks later. Results indicated that the program was effective in developing and sustaining group cohesiveness, that this group cohesiveness was sustained over time, that it was not effective in developing greater self-confidence than the regular program, and that the effectiveness of the program was differentiated in certain respects by the sex of the participant. Identifiers—\*Environmental Attitudes, \*Environmental Education Research, Environmental Problems

The results of a study which surveyed environmental attitudes and perceptions of residents of the San Antonio, Texas SMSA are presented and discussed. Respondents (N=1088) were selected on the basis of: (1) area stratification (urban, suburban, rural), (2) ethnicity (primarily Anglo and Mexican-American), and (3) economic and educational status (SES) income. The purposes of the study were: (1) to identify and evaluate variations in environmental attitude between and among individuals within the subgroups, relationships between environmental problems and non-environmental problems as perceived by the subgroup populations, extent to which individuals within and among the subgroups were willing to "pay" for improvement in environmental quality, and media influences which have the most significant impact in shaping the environmental attitudes of respondents; and (2) to correlate these findings with existing empirical data. Findings indicate, among others, that respondents do not believe environmental problems are among the most important faced by the nation, that respondents believe television is the most accurate source of information, concern for environmental problems decreases as one moves away from the center city, and that Mexican-Americans rank environmental concerns higher than Anglos. As a result of the increasing human impacts upon

global marine and aquatic resources, there is an increasing need to produce fishery science experts who can contribute to management, planning, and research. The Food and Agricultural Organization of the United Nations and Unesco cosponsored a workshop to examine the present status and problems in fisheries science teaching in various countries and to develop curricula in fishery science at a university level. Based upon the consensus that curriculum should be adapted to the specific needs of a country and its students, participants examined various case studies of curricula in the present global context. This analysis resulted in the criteria and recommended curricula for undergraduate and advanced degrees outlined in Part I of this workshop report. Part II contains a discussion of the need for fishery science graduates based on an analysis of the global situation and the six national case studies which guided the formulation of the recommended curricula in Part I. Descriptors—\*College Science, Demography, \*Doctoral Degrees, Educational Background, Employment Patterns, Higher Education, \*Marine Biology, Occupational Mobility, \*Occupational Surveys, \*Oceanography, Science Careers, Science Education, \*Scientists

The purpose of this report was to classify and count doctoral scientists in the United States trained in oceanography and/or working in oceanography. Existing data from three sources (National Research Council's "Survey of Earned Doctorates," and "Survey of Doctorate Recipients," and the Ocean Sciences Board's "U.S. Directory of Marine Scientists"), were used to determine the numbers and training of scientists in various ocean science fields, the number of Ph.D.s per year receiving degrees in various fields of ocean science, current employment of oceanographers, and patterns of mobility by trained persons into and out of the ocean sciences. Data analysis is presented under three major headings called: population of doctoral scientists, their education, and demography. Conclusions are drawn and recommendations made relative to the direct training of doctorates in contemporary ocean science, the role of doctorates not obtained specifically in oceanography, the problem of supply and demand, and institutional arrangements and records. Described is a mathematics-science intervention program for precollege minority students, specifically Chicanos and American Indians. The program is based on the experiences of intervention programs designed to increase the participation of non-minority underrepresented groups in mathematics related careers. It is proposed that in order to maximize the effectiveness of the intervention program activities aimed at impacting teachers, counselors, parents, students, and the school, curriculum should be undertaken on a sustained basis for a long period of time. The involvement of the local community

and industry is a necessary ingredient for increasing the effectiveness of these efforts. Also recommended is the inclusion of a sound evaluation program in order to systematically identify the successful activities which can or cannot be duplicated in other geographical localities. (Author/PB)

Identifiers—Cognitive Structures, \*Mathematics Education Research

This document highlights points made in papers presented in the two scheduled sessions devoted to issues in mathematics education affecting minority students at the 1980 National Council of Teachers of Mathematics (NCTM) conference. The first meeting was part of the official NCTM conference program. The second meeting was sponsored by the National Institute of Education (NIE). Points from a total of three papers presented over the two meetings are discussed. A paper concerned with verbal problem solving in mathematics among Chicano students is the first to be summarized, as it was only discussed at the NCTM session. The other two were further discussed at the NIE-sponsored meeting. Broad areas of ideas from both these papers are combined in a summary that reviews the following topic areas: bilingual education, curriculum, teaching and teacher training, ethnography, testing, and basic research. It is noted that there is a general lack of replications of research studies with minority students on findings and practices that are from mathematics education research that focus on the majority. It is felt the absence of such replications adds to the dubiousness of purportedly generalized outcomes, and needs to be remedied. (MP)

Identifiers—\*Mathematics Education Research

Nineteen projects related to mathematics education issues among minorities, funded by the Learning and Development Unit at the National Institute of Education (NIE), are summarized. It is felt that minorities and mathematics education issues have been largely neglected in recent investigations. This neglect is seen to have the potential to render tenuous the generalizability of empirical findings which have been observed among the non-minority student population. The studies abstracted here cover seven ethnic groups, with both sexes included. Collectively, they include populations in all levels of schooling. More specifically, two investigations include pre-elementary school populations, six involve grades K-6, six focus on grades 7-9, four on grades 10-12, seven include college populations, and five involve adult professionals. Further, three studies do not specify what ethnic groups are included. Of the remaining, eight involve whites, seven pertain to blacks, and four include Puerto Ricans. Each of the groups American Indians, Chinese, and Chicanos is included in two studies, and one report includes Alaskan Natives. One study covers females only, the remaining include both sexes. (MP)

Invitations to Science Inquiry.

Report No.—ISBN-0-536-03689-6

Pub Date—81

Note—363p.; Not available in paper copy due to copyright restrictions.

Available from—Ginn Custom Publishing, 191 Spring St., Lexington, MA 02173 (no price quoted).

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage. PC Not Available from EDRS.

Descriptors—\*Demonstrations (Educational), Discovery Learning, \*Elementary School Science, Elementary Secondary Education, Experiential Learning, \*Inquiry, Science Activities, Science Education, Science Instruction, \*Scientific Concepts, \*Secondary School Science, Teaching Methods

Identifiers—\*Discrepant Events (Science)

Presented is a collection of thoroughly-tested discrepant events designed for use in science classes. These events have been organized into 17 chapters grouped into four sections: Environment (5 chapters), Energy (7 chapters), Forces and Motion on Earth and in Space (3 chapters), and Living Things (2 chapters). The following information is provided for each discrepant event: chapter science concept, science sub-concept or science properties, title of event, materials needed, sketch of materials set-up, step-by-step explanation of procedure to be followed, key questions to be asked, and explanation providing background information for the teacher. (PB)

EDRS Price - MF01/PC01 Plus Postage. PC Not Available from EDRS.

Descriptors—Curriculum Development, Educational Objectives, Elementary Secondary Education, \*Environmental Education, \*Foreign Countries, Higher Education, Instructional Materials, \*International Educational Exchange, Legislation, \*Program Descriptions, Program Evaluation, Teacher Education

Identifiers—Environmental Problems, Informal Education

Environmental education issues and programs in Asian and Pacific countries are examined in four sections. Section One presents a general overview of environmental education in the region. Topics discussed include environmental problems, goals and

objectives for environmental education, legislation, the nature of environmental education, curriculum and instructional materials, teaching strategies, teacher education, and evaluation. Papers in Section Two were first presented to a Regional Workshop on Environmental Education convened by Unesco in Bangkok, Thailand. They describe the status of environmental education in 17 different countries and vary greatly in scope, often focusing on one or more of the above topics. Section Three addresses common problems and various dimensions of environmental education. Articles on population, the role of science, mass media, industrialization, and specific programs indicate that although environmental education is of relatively recent origin in countries around the world, much is being done in most countries in the region. The final section contains an extensive bibliography. (Author/DC)

Use of the Computer in Solving Mathematics Problems.

Pub Date—81

Note—10p.; Paper presented at the Annual Meeting of the American Mathematical Association of Two Year Colleges (1981).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Computers, Computer Science Education, Educational Technology, \*Logic, Mathematical Applications, \*Mathematics Education, \*Mathematics Instruction, \*Problem Solving, \*Programming

Identifiers—Computer Logic, Heuristic Methods, \*Heuristics, Structured Programming

Computer programming and problem-solving steps in mathematics are viewed to have related concepts. Some heuristics are compared with some suggestions for structured programming. The one fundamental difference between problem solving in general and when using the computer is seen as the computer solution must be finite. The computer is viewed as a useful tool in solving those problems where the method of solution is a finite step-by-step procedure. Many examples of areas of study where the computer would be a useful tool in investigation are identified. It is suggested that teachers who include computer programming in their problem-solving classes may find pupils learn programming and problem solving more quickly and easily than they would learn either separately. Cognitive Style in Students Evidencing Dyscalculia.

Pub Date—Nov 81

Note—27p.; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (10th, Lexington, KY, November 11-13, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Cognitive Style, \*Computation, Educational Research, Elementary Secondary Education, \*Grade 7, Junior High Schools, \*Learning Disabilities, \*Mathematics Education, Sex Differences, Spatial Ability

Identifiers—\*Dyscalculia, Field Dependence, Field Independence, \*Mathematics Education Research

The purpose of this study was to compare factors of cognitive style in two groups of seventh-grade children: (1) children of average or above average intelligence who show learning disability in mathematics but who perform well in reading; and (2) children of average or above average intelligence who perform well in both mathematics and reading. Thirty students were chosen as subjects for each of the two groups. Results indicated that students evidencing dyscalculia were significantly different from their mathematically achieving counterparts on two factors of cognitive style: field dependence and independence, and spatial visualization. Significant sex differences were found in scores used to measure field dependency, and differences in high-level spatial visualization were also found. The investigation is thought to offer some explanation as to why some intellectually capable students were unable to achieve in mathematics. (MP)

Research Report on College Level Physical Science for Non-Majors.

Pub Date—80

Note—9p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, \*College Science, Higher Education, \*Nonmajors, \*Physical Sciences, Research Methodology, Science Education, Science Instruction, \*Scientific Attitudes, Scientific Enterprise, Student Attitudes

Identifiers—\*Science Education Research  
This research report focuses on an experimental study comparing two laboratory approaches to a college level physical science course for non-majors. An approach using contemporary topics was compared to an approach using standard topics. The three dependent variables were achievement of subject content, scientific attitude, and understanding the nature of science. The data analysis showed no significant difference between treatments. The study used design features intended to control possible teacher effect. Of these, a treatment monitoring instrument used to measure congruence between intended and actual treatment proved very useful. It showed on a second trial of the experiment that one of the laboratory instructors did not follow the intended treatment. This was valuable in the analysis of data for that trial. It is strongly recommended that such monitoring techniques be included in this type of experimental design. (Author/DS)

Descriptors—College Programs, College Science, \*Employment Opportunities, \*Employment Qualifications, Engineering, \*Environment, Environmental Education, Higher Education, Land Use, Natural Resources, Program Descriptions, Recreation, \*Science Careers, Science Education Identifiers—Environmental Health

A wide variety of environmental careers, their educational requirements, places of employment, growth and future potential are examined. A discussion of the new environmental era characterized by a joining of environmental education, science, and management in an interdisciplinary, integrated, and involved approach to environmental concerns forms a background for the investigation into different careers. Representative environmental studies programs at a range of colleges and universities are described. Careers in science, environmental health, resources and recreation, and land use and human settlements are discussed. Comments indicate that scientists and engineers are most in demand but non-science specialists and generalists are in growing demand. Appendices provide resource information about citizen organizations, publications, and federal agencies. (DC)

The Integrated Science-Mathematics Education Project (ISMEP) is an NSF-funded, interdisciplinary science/mathematics education program for preservice elementary school teachers which fosters an increase in scientific and mathematical literacy, improved attitudes toward science and mathematics, and enhancement of intellectual development on the part of classroom teachers and public school pupils. ISMEP courses blend scientific, mathematical, and educational components while providing classroom, laboratory, and practicum experiences relevant to elementary school programs. Although an overview of the project, organizational flow chart, checklists, brochures, and an evaluation report are included, the major portion of the document is devoted to the modules used in the program. Individual's modules contain objectives, instructional references and materials, procedures, and assessment criteria. Sources used in the modules include activities from the "Science Course Improvement Study" and "Science A Process Approach," and other elementary science and mathematics curriculum projects. Descriptors—Adult Education, \*Algebra, \*Cognitive Processes, Educational Research, \*Learning Theories, \*Mathematics Education, \*Mathematics Instruction, Postsecondary Education, \*Problem Solving, Teaching Methods

Identifiers—Equations (Mathematics), \*Mathematics Education Research

Problem solving approaches often find a path from the givens to the unknown or from the unknown to the givens. This study explores those approaches using written protocols of Navy subjects while solving for the numerical value of an unknown from several knowns and a system of equations. For a subset of the items, solutions require subjects to retain expressions with both literals and numerals. Successful and unsuccessful students were similar in their preference to work backward and to use literals rather than numerals and in the efficacy of their solutions. Students acquired successful solution methods during instruction and used them consistently. (Author)

Descriptors—Elementary Secondary Education, \*Geometric Concepts, \*Geometry, Instructional Materials, Learning Activities, Mathematical Enrichment, Mathematics Curriculum, \*Mathematics Education, \*Mathematics Instruction, \*Middle Schools, Problem Solving, \*Teaching Guides, Teaching Methods

This document is written for middle school teachers of grades five through nine who do not have specialized backgrounds in geometry. It is arranged in three parts. The first part provides a brief overview of the geometry curriculum of the middle school that includes the present state of affairs, a rationale for inclusion of geometry in the curriculum, the geometry that is suggested for instruction, and suggestions for teaching methods. Part two covers the following selected topics: axiomatic systems and models, distance, congruence, constructions, and transformational geometry. The material in this part is not designed for immediate use, but requires adaptation to particular classroom settings. Most sections include suggested exercises, learning activities, and selected references. The third part is an extensive bibliography of references for both readings and additional activities in geometry. (MP)

Descriptors—Community Support, \*Conservation Education, Curriculum Development, Energy, \*Energy Conservation, Environmental Education, Federal Aid, Higher Education, \*Private Financial Support, \*Program Descriptions, Science Education, Secondary Education, State Aid, \*Teacher Education

Identifiers—\*Energy Education

The formulation of the Energy Curriculum Institute by the University of Houston at Clear Lake City was based upon the idea that a new approach was needed to develop effective energy education programs. Institute staff assumed that education could no longer depend upon federal and state educational energy agencies for curricular or financial leadership for projects. A brief description of the institutes, including their funding, speakers and materials, instruction, grading system, and balanced perspective, serves as an example of a model for shared local resources which staff propose as the necessary new approach to energy programs. The model assumes that energy education programs: (1) depend upon teacher education programs; (2) require increased cooperation between universities, school districts, energy companies, government agencies, environmental groups, and others; and (3) will be funded increasingly by private local sources. The groups which provided significant support for the institutes through speakers, materials, and field trips are described. (DC)

Water: A Vital Resource. Environmental Education Supplementary Instructional Guide. Sixth Grade Level.

Hawaii State Dept. of Education, Honolulu. Office of Instructional Services.

Report No.—RS-81-1095

Pub Date—Jun 81

Note—232p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC10 Plus Postage.

Descriptors—\*Conservation Education, \*Elementary School Science, Environmental Education, Grade 6, Instructional Materials, \*Interdisciplinary Approach, Intermediate Grades, Learning Activities, \*Science Activities, Science Education, Teaching Guides, \*Water Resources

Water related activities for sixth-grade students are presented as one possible way to incorporate environmental education into the existing curriculum of Hawaii schools. Designed as an interdisciplinary approach, the activities integrate numerous thematic and subject areas to teach that fresh water is a limited but vital natural resource. Topics include water in nature, use and control, distribution, purification, issues, and alternatives and consequences. Lessons are self-explanatory, allowing for independent student work. They involve a wide range of activities including experimentation, creative writing, interviewing, oral reports, field trips, art work, map work, research, and simulations. Each of the seven sections contains a list of instructional goals, objectives with an indication of subject area taught, performance expectations, essential competencies, and section objectives as well as the activities and teacher digest of the activity. A summary chart for the sections indicate the subject areas, teaching approach, resources, and time requirements for each lesson. (DC)

Presented is a professional reference book on change, an aid to mathematics educators in implementing the recommendations found in the National Council of Teachers of Mathematics' (NCTM's) publication, "An Agenda for Action: Recommendations for School Mathematics of the 1980's." The text is divided into three major parts that discuss different facets of change: the process, strategies for implementation, and how to apply this knowledge to bring about change. The introduction reviews the "Agenda for Action" as a potential agent for change in the mathematics curriculum. The chapters are grouped into the following parts: (1) Changing Schools; (2) Changing Mathematics Programs; and (3) Changing, and Being Changed By, Others. The document concludes with an Appendix that contains the entire contents of "An Agenda for Action" (ED 186 265). (MP)

## 122 Document Resumes

Highlights of the findings of a 1980 National Science Foundation supported survey of full-time faculty in the 156 doctorate-granting institutions with the largest Federal research and development funding in the fiscal year 1977 are reported. The role of recent doctorates, faculty with tenure, research activities, and faculty turnover are discussed and summarized in one chart and three tables. (DS)

Descriptors—Basic Skills, Cognitive Objectives, \*Educational Objectives, Educational Resources, Elementary Secondary Education, \*Human Resources, Mathematical Concepts, \*Mathematics Curriculum, \*Mathematics Education, Mathematics Instruction, Objectives, \*State Curriculum Guides

This guide was developed to give Kansas mathematics teachers from grades K-12 minimal sequential experiences in implementing the skills, values, and concepts of the mathematics program, and to provide a basic outline for developing a local program. All teachers are encouraged to make a real effort to see that their activities fit into the overall educational picture of the students. The guidelines are developed to provide meaning and understanding of mathematics first for all students, and then practice. Problem solving is viewed to be the necessary focus of instruction in mathematics. Objectives for mathematics are detailed by grade from K-8, and in the senior high for General Mathematics, Pre-algebra, Algebra I, Geometry, Algebra II, and Trigonometry. An appendix includes a directory of resource persons with details pertinent to their potential usefulness in various situations. (MP)

This report presents information describing labor market conditions for scientists and engineers, focusing only on those scientists and engineers who hold scientific or engineering (S/E) jobs. The scope of this report consists of an analysis of trends in the seventies, an attempt to identify in a qualitative way some of the factors that underlie these trends, and methodological details summarized in the technical notes. Employment data are summarized for major S/E fields, major employment sectors of the economy, and for scientists and engineers primarily engaged in research and development and teaching. (DS)

Descriptors—Curriculum Design, Curriculum Development, Curriculum Guides, \*Educational Change, Educational Objectives, Elementary Education, \*Elementary School Mathematics, Guidelines, \*Mathematics Curriculum, Math-

ematics Education, Mathematics Instruction, \*Problem Solving

This document notes that the traditional elementary school mathematics curriculum focused on computation. Data from the National Assessment of Educational Progress and other tests in states where minimum competencies have been established are thought to indicate computation-oriented curriculum has not produced the desired results. Further, the availability of microcomputers and calculators is viewed to nullify this curriculum approach. The program described here was scheduled for implementation at the P.K. Yonge Laboratory School during 1981-82 school year. It presents a plan for a mathematics curriculum which de-emphasizes computational skills and focuses on several topics (especially problem solving) not currently emphasized. The general format of each grade level guide is a descriptive statement about each relevant curriculum strand at the given grade followed by goal statements, list of materials and activities, and a space for evaluating teaching techniques and pupil performance. Identifiers—\*International Assn Evaluation Educ Achievement, \*International Surveys

The results of the first International Association for the Evaluation of Education Achievement (IEA) survey of science subjects are summarized in this document. The purpose of this survey was to gather data from nationally represented samples of schools, teachers, and pupils from 19 countries and determine the factors accounting for variations between pupils, schools, and the various national school systems. The survey showed that the most variation between schools and pupils in terms of measured achievement and skill was attributed to factors outside the school. The rationale, aims, and Sweden's participation in a second survey are also reviewed, including the objectives and sample populations of the Swedish survey. (Author/DS)

Descriptors—Calculus, \*College Mathematics, \*Computers, Course Descriptions, Educational Change, Educational Technology, Higher Education, Mathematics Education, \*Mathematics Instruction, \*Problem Solving

Identifiers—\*Computer Uses in Education

This report discusses how a computer was used to enhance the curriculum of a college calculus course. Problems with a calculus adjunct course in computer science are detailed, along with the nature of changes in the new program. The changes moved from student use of the computer as an automatic typewriter to use as a tool with instructional programs. Examples of ten assignments directed toward computer use are presented. The view expressed is that the results of the course changes exceeded expectations, with assignments so heavily intertwined with calculus topics that the students were gaining insights into mathematics through the activities. Descriptors—\*Curriculum Development, \*Science Education, Scientific Enterprise, Scientific Literacy, Secondary Education, \*Secondary School Science, Social Problems, \*Technological Advancement, Values

In June, 1980, 38 secondary school science teachers and 10 specialists met at Phillips Exeter Academy to discuss the state of science education. Conference participants agreed that a crisis in science education exists. Events appear to indicate that the public is telling science teachers that what they are offering in the name of science education is not relevant to American society today. There have been no major changes in the teaching of secondary school science since the curricular reforms of the 1960's although circumstances have changed dramatically since those times. Conferees suggested that new materials, not new courses, need to be created so that material of societal and ethical character could be infused into present science courses, replacing 10% of present course content. They also suggested that a national network of permanent Science Resource Centers (patterned on the County Extension model) should be established to create and distribute teaching materials addressed to societal issues as well as for other tasks. Identifiers—\*Graphing (Mathematics), \*Mathematics Education Research

This study was designed to extend the schema-theoretic perspective of understanding general dis-

course to include graph comprehension. The sample included 204 fourth-grade and 185 seventh-grade pupils. Data were collected on achievement in reading and mathematics, sex, prior knowledge of topic, mathematical content, graphical form, and graph comprehension. Results indicated all independent variables, except sex, are unique predictors of graph comprehension for fourth graders. For seventh graders, unique predictors included mathematics achievement, reading achievement, and prior knowledge of content. There were no significant sex-related differences with fourth-grade pupils, but seventh-grade girls significantly out-performed boys in mathematics achievement. The results are viewed to imply that fourth graders focus their attention on a graph's surface structure, notably the topic and graphical form used. Seventh graders can scan graphs more effectively and become concerned with a graph's mathematical content. Implications for teachers are noted. (MP)

Presented is a 1981 revision of a pamphlet first published by the National Council of Teachers of Mathematics (NCTM) in 1959. The primary purpose of this pamphlet is to provide a comprehensive listing of mathematics tests available that may assist educators in meeting their evaluation needs. Tests covering mathematics from primary school through the first two years of college are included. Material is subdivided in the following categories: Arithmetic; Junior High School; Batteries and General Listings, K-4; High School, General; Algebra; Geometry; Trigonometry; and College-related. Information for each test listed is given in the following order: Title; Authorship; Grade Levels and Forms; Availability of Norms; Publisher/Distributor; Reference to Additional Information; Original Date of Publication; and Date of Latest Revision. The document concludes with a Directory of Publishers/Distributors and a list of references. (MP)

Identifiers—\*Programmable Calculators

This teacher's guide is designed to aid in the incorporation of programmable calculators in the school mathematics program for pupils in grade 11. Warnings include the need for care in modifying the curriculum so that students are not punished in the process. The concept of "black boxing," of letting the computer or calculator take charge of education, is stated as a concern that pupils may lose conceptual understanding of computation and take for granted that these devices can carry out difficult computations easily and efficiently. However, the benefits are seen to present powerful arguments for calculator use in the instructional program. In addition to discussing the pros and cons of programmable calculators, the brief introduction gives ideas on student access to calculators, rules and guidelines for calculator selection, approaches to classroom presentation, and hints on calculator-caused changes in classroom dynamics. The bulk of this document consists of answers to problems from the student textbook. (MP)

Descriptors—Algebra, Course Content, Course Descriptions, \*Educational Research, \*Instructional Materials, Learning Theories, Mastery Learning, \*Mathematical Applications, \*Mathematics Curriculum, Mathematics Instruction, Pilot Projects, \*Program Descriptions, Secondary Education, \*Secondary School Mathematics

Identifiers—\*Mathematics Education Research

The aim of this project was to develop a curriculum for first-year algebra students to provide a wide range of applications of mathematics. This type of application would permit students to understand how algebraic symbolism develops out of natural needs. A pilot draft of the materials was field-tested during the 1974-75 school year, revised, and field-tested in three schools the following year. A basic element of the curriculum which evolved from the testing and revision was the development of a skill workbook which employed principles of mastery learning. Nationwide field testing was accomplished during the 1976-77 school year. The final product is a course similar to a standard algebra course in much of the content, but with more emphasis on probability, statistics, and applications of word problems. Results of field-testing in 20 schools indicated little differences in measures of achievement between project and non-project classes. Teacher attitudes were divided, almost evenly, into two groups—those who felt the course to be appropriate for first-year students, and those who felt it was too difficult or non-traditional. (Author)

Identifiers—\*Science Education Research

The major purpose of this study was to determine whether certain types of instructional strategies (factor-label method, use of analogies, use of diagrams, and proportionality) were superior to others in teaching problem solving in four topics (mole concept, gas laws, stoichiometry, and molarity). Also of major interest was whether particular strategies would be more effective for students having different verbal-visual preferences, different levels of mathematics anxiety, and varying proportional reasoning ability. The design was a posttest only control group design. Subjects were 421 high school students drawn from 10 schools which ranged from rural/small town to metropolitan settings. Among other things, it was found that students of high mathematics anxiety scored significantly lower than did students of low mathematics anxiety, and that students of high proportional reasoning ability scored higher than did students of low ability. Findings related to the aptitude by treatment interaction indicate that students with high mathematics anxiety and an absence of another aptitude (visual preference or proportional reasoning ability) profited by instructional methods that contained supportive material that was not mathematical in nature. In a series of followup interviews, it was determined, among other findings, that students who did not understand the chemistry concepts were unsuccessful in problem solving and that students who were more successful used more organizing skills and used mnemonic notation. Identifiers—\*Mathematics Education Research

It is noted that current methods of textbook selection are characterized by subjective judgments and faddish trends. It is felt that rarely in the process of selection are research findings that are available or principles of educational psychology seriously considered. A systematic selection process of entire series of textbooks, based on the collection and analysis of data for decision-making which has been implemented successfully, is described. The process is based on a model for applying research findings to field-based curriculum improvement. The model is seen to be a tool to intervene in the cycle of weak curriculum, weak textbooks, and weak instruction. It is felt criteria for textbook selection can be easily developed into curriculum objectives, and evaluation systems for textbooks can be used as resources for system-wide mathematics competency evaluation. The situation in which the process was developed was viewed as successful, as the model was adopted by the school district that used it to select language arts textbooks the next year. (MP)

Four fact sheets discuss topics of interest to environmental educators. Number one addresses the relative lack of effective evaluation of environmental education programs. It emphasizes the need to base evaluation on identified goals and objectives and cites an accepted goal statement. Two examples of evaluation methods are given as well as suggestions for further reading. Number two discusses different kinds of simulation games, their purpose, basic components and value to environmental education. An extensive reference list is included. Fact sheet number three explains the purpose and advantages of learning activities for environmental education and describes materials prepared by Stapp and Cox, Area Cooperative Educational Services, Upper Mississippi River ECO-Center; the ERIC Clearinghouse for Science, Mathematics and Environmental Education; and others (materials listed and cited in these three fact sheets are available through ERIC). Number four presents generalizations about the characteristics, duties, and responsibilities of the officially designated contact persons for environmental education in state education agencies. Names and addresses for all fifty individuals are listed. A coordinating association for these individuals is also described. (DC)

Presented is an executive summary of a study to collect information needed by policymakers and educators about the status of science education in two-year colleges. Data were collected from college administrators, faculty, and students by means of questionnaires. A sample of colleges was selected from a directory of all public and nonproprietary private two-year colleges. One hundred and eighty-three institutions agreed to participate. Faculty and student samples were selected randomly from lists of course sections in each field. Findings and recommendations are summarized in the final chapter which presents an overview of the characteristics of two-year colleges and information obtained from various types of institutions. Other findings related to institutions, faculty, and students are listed by the appropriate category. (Author)

Descriptors—Credit Courses, \*Educational Needs, \*Graduate Study, Instructional Materials, \*Professional Continuing Education, Program Development, \*Program Effectiveness, Relevance (Education), Transportation

Identifiers—\*Transportation Education

This report describes and analyzes the failure of an attempt to launch a series of off-campus graduate credit courses in transportation to update the skills of mid-career professionals. Based on an evaluative review of other programs and teaching methods, the following format was developed: (1) on-campus orientation and examination; (2) self-paced study modules with scheduled completion dates; and (3) scheduled telephone conferences with instructors. A questionnaire was developed to determine the continuing education needs of employees of several state transportation departments. Analysis of replies revealed several reasons for failure of the program: (1) preference for short intensive courses; (2)

availability of on-campus evening courses; (3) preference by employees in remote areas for specifically job oriented materials; and (4) more interest in undergraduate than graduate offerings. Current layoffs in the transportation work force was considered the main deterrent. (Author)

Meeks, Philip  
Interdisciplinary Analysis and Global Policy Studies.

Pub Date—Mar 81

Note—23p.; Paper presented at the Annual Meeting of the International Studies Association Convention (Philadelphia, PA, March, 1981).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—\*Global Approach, \*Interdisciplinary Approach, Policy, Research Methodology, \*Research Needs, Social Problems, Social Science Research, \*World Problems

This paper examines ways in which interdisciplinary and multidisciplinary analysis of global policy studies can increase understanding of complex global problems. Until recently, social science has been the discipline most often turned to for techniques and methodology to analyze social problems and behaviors. However, because social science research has of late become so specialized and so concerned with breaking down social problems into ever smaller components, it has become largely irrelevant for pragmatic solving of important social problems. Among the reasons why global policy studies are likely to give better insights than social science research into global problems are that global studies usually focus on broad and complex social problems (as opposed to the narrower problems-focus of social science research); are generally designed to integrate an understanding of social problems with concrete suggestions on how to ameliorate the problems; and are often motivated by a sense of urgency as compared to the social scientists' frequently stated objective of mental puzzle solving. An interdisciplinary or multidisciplinary analysis of global policy studies can give a better understanding of complex problems than can analysis based on a single discipline because it avoids disciplinary parochialism and jargon. At its best, interdisciplinary analysis can take a complex problem and reveal its many facets without becoming obsessed with any one of them and without overemphasizing the culture-specificity of values and problems. In sum, interdisciplinary analysis of global policy studies is a good way to combine expertise from many different disciplines in the search for integrating global values and practical problem solutions (DB)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—Blacks, \*Communication Problems, \*Cultural Differences, \*Cultural Influences, \*Educational Discrimination, Ethnic Bias, \*Ethnic Discrimination, Ethnic Relations, Grade 5, Intermediate Grades, \*Social Discrimination, Social Science Research

It is hypothesized that a "cultural communication" theory is more useful and veridical for explaining ethnically related educational and social inequity than are either "ascriptive" or "deficit" theories. The study site was a successfully desegregated, urban elementary school. A fifth-grade classroom was selected for the intensive observations of the project. Methods utilized include observation of the classroom and the school principal and extended interviews with the principal and classroom teacher. Interactions of students were videotaped and analyzed. A sociometric assessment was also made of the students. Results do show that an important source of educational inequity is found in the confusion resulting from cultural code differences in interethnic encounters. The results of the

sociometric analyses suggest the operation of ethnic identity in primary and secondary friendship affiliations among pupils. Extensive videotape analyses of interethnic communication events among students, however, failed to expose the expected differential ethnic patterns. The study concludes with a listing of references. Identifiers—\*Japan, \*Korea

This is the first English language, book-length bibliography on Korean and Japanese women. The primary aim of the guide is to facilitate a wide variety of research, either descriptive or comparative, on Asian American women. The guide was designed with on-line interactive data retrieval in mind. Work toward this goal is now underway at the National Museum of Ethnology in Japan and Korean Scientific and Technological Information Center in Korea. Five hundred and eighty references issued between 1789 and 1979 are cited. Included are books, journal articles, chapters of books, conference papers, and dissertations. The guide consists of two books. There are separate sections on Korea and Japan throughout each book. Book I contains a wide variety of indexes including subject, title, and author; an author profile index, a research design and method index, a role profile index, and a major historical time period index. Book II provides a complete profile of each document indexed in Book I including an annotation. Following the document profiles, Book II also cites English translations of Japanese fiction by women and additional references. (Author/RM)

Descriptors—Civil Liberties, Conflict Resolution, Cooperation, Cultural Awareness, Curriculum Development, Developed Nations, Developing Nations, \*Educational Innovation, \*Educational Needs, \*Educational Objectives, Elementary Secondary Education, Futures (of Society), \*Global Approach, Higher Education, \*International Education, Peace, Postsecondary Education

Objectives and realities of education for international understanding, cooperation, and peace are examined. Information is presented in six major sections. In Section I, various meanings of international education are explored. In addition, central concerns of international education are identified, including respect for human rights and fundamental freedoms, tolerance for differences of opinion, and ability to be objective and free from prejudice. Section II suggests how to cross national boundaries through an international curriculum emphasizing UNESCO's concepts of world peace and knowledge and appreciation of other cultures. Section III describes an ideal core curriculum for a university-level world studies course. The course would incorporate information from seven areas—the nature of man, the ecology of human and natural species, culture, social and economic consequences of development, values, resolution of differing points of view, and peaceful relations. Section IV describes innovative programs which currently exist at different grade levels in various countries to teach students about international understanding. Also described are peace proposals made by individual researchers and research groups. Section V offers concluding remarks about the need for world peace

and about the ways in which educators can work towards peaceful objectives. Recommendations include that educators consistently stress the importance of non-violent solutions to world problems and work to help students recognize the essential equality of all peoples. The final section offers a bibliography of peace-related references. (DB)

Descriptors—Curriculum Development, Elementary Secondary Education, \*Global Approach, \*Inservice Teacher Education, \*World Affairs, World Problems

Identifiers—\*World Order Studies

This handbook accompanies two inservice programs designed for elementary and secondary teachers who want to incorporate a world education thrust in their curricula. The first inservice program, "Making a Commitment," attempts to help participants come to an agreement as to what they mean when they speak of their world education program. It identifies a focus and sets parameters. The second program, "Charting a Course," helps educators examine four different methods for implementing world education in their school. Participants are encouraged to agree on one approach or a combination of approaches. These inservice programs have two major components. A television presentation provides input for the workshop. This handbook, the second component, gives guidance for active participation in the workshop and for planning programs. The handbook contains directions for conducting the sessions and background information for the participants. Included are suggestions for classroom activities, inservice evaluation sheets, and descriptions of curricular approaches. The appendices, which comprise half of the handbook, include a reprint of a journal article on world education, a review of selected school based global education programs, an evaluation instrument, the script of the TV program and an annotated listing of selected resources. Identifiers—\*Latin American Studies

This publication is a collection of the presentations made at the 1977 National Seminar of the Latin American Studies Association. Each article or presentation can stand alone; together they provide a sweeping view of the complexities of Latin America and suggestions for more effective secondary and college teaching about the area. There are three sections to the publication. The first section deals with Latin American studies. Articles in this section deal with a variety of topics including Latin American economic life, the city, Cuban literature from 1608 to 1959, symbols in two Afro-Brazilian literary works (Jubiaba and Sortilegio), the historical roots of Latin America's underdevelopment, and world resources and their significance to Latin America. The second section deals with pedagogy. Articles deal with topics such as reasons for study-

ing about Latin America, teaching, the visual history technique of teaching, using the radio to bridge the information gap about Latin America, and making films about Latin America. The third section contains bibliographies. There is an annotated listing of English language books on Latin American societies and cultures. Another listing cites books in English on the history of Mexican art. Also included is a film bibliography and an annotated list of sources for the selection of current materials on Latin America. Descriptors—Disarmament, International Relations, Nuclear Warfare, Peace, World Problems Identifiers—United Nations

This is a report of a conference held in Bermuda in 1981 to discuss a multilateral approach to disarmament. The conference was an informal, off-the-record exchange of ideas and opinions among 24 diplomats and scholars from 18 countries and two international agencies. Participants considered current disarmament concepts, assessed UN disarmament mechanisms and procedures, and explored new approaches to this issue. Significant highlights of the report include the following recommendations: A summit meeting between the heads of state of the United States and the Soviet Union should be organized as soon as possible, before the end of 1981. Discussions should include a wide range of political issues but principal focus should be on reaching general agreement on the framework of strategic arms limitation and reduction. An international group of experts should be created to determine whether parity in force levels between the Soviet Union and the United States exists. Nations should make stronger commitment to regional arms limitation and disarmament efforts. Existing multilateral disarmament machinery, both deliberative and negotiating mechanisms, needs to be streamlined and better coordinated. Greatly increased educational and public information efforts should be undertaken to build a more effective constituency for arms limitation and disarmament. Independent initiatives and temporary confidence building measures should be undertaken by nations to stimulate disarmament progress. (Author/RM)

This handbook provides background information and classroom activities that teachers can use to help students in grades 6-8 understand the New Mexico court system. Although intended for use in New Mexico, a great deal of the information provided can be used by teachers in other states. The information and activities can be incorporated into curricular areas such as civics, U.S. history, govern-

ment, and social studies. A variety of resources are included. The handbook opens with narrative explanations of New Mexico's judicial history, the court system, and civil and criminal procedure. Tips for using lawyers and law related resource people in the classroom are then presented. So that students can learn the fundamentals of trial procedure before being introduced to all the elements of attorney questioning techniques, a scripted mock trial is included. Students can read it like a play. Four cases of relevance to young children are presented in pro-se court simulations. Simplified rules of evidence are discussed. A criminal law mock trial and a family law mock trial are provided. To help students learn about plea bargaining and practice representing their own point of view, a plea bargaining simulation is presented. An appellate court role play and a simulation dealing with juvenile hall are included. The handbook concludes with a glossary of legal terms. (Author/RM)

Descriptors—Civics, Consumer Economics, Consumer Education, Criminal Law, Grade 9, Laws, Learning Activities, Legal Education, Money Management, Secondary Education, Student Rights, Teaching Guides, United States Government (Course)

The learning activities in this resource manual supplement three commonly taught units in the secondary civics curriculum: law, government, and consumer economics. The activities were chosen to meet objectives of the New Mexico Basic Skills Plan. Although geared toward ninth-grade-level students, the activities can generally be adapted for students at different skill levels. The activities are organized into three major sections: 1) law including criminal law, juvenile law, individual rights law, students' rights and responsibilities, and court system; 2) government, its structure, and political process; and 3) consumer economics including consumer awareness, consumer redress, and money. Each self-contained activity has a cover page which describes the activity, suggestions for where to use it in the curriculum, and explanations of the procedures for using it. A variety of teaching strategies are utilized—brainstorming, opinion polls/surveys, role-play situations, simulations, case studies, mock trials, and field trips. (Author/RM)

Major trends and factors are discussed which are likely to influence the development of education in socialist countries over the next 20 years. There are three major sections to the paper: basic features of educational development; trends in educational development; and some aspects of educational forecasting and prospective planning. The educational system in socialist countries is designed to shape socialist personalities who employ their talents and capabilities for the benefit of the socialist society and who are distinguished by their willingness to work and by their collective spirit. Special charac-

teristics of education in socialist countries include mass education, more training for the world of work, and more links between higher education and research. Trends in these countries include setting up evening and correspondence courses, the development of people's universities, curriculum revision, utilization of an interdisciplinary approach, and making available alternative or elective subjects. Educational forecasting and planning are very important in socialist countries because of the prime role they play in the optimal perspective plan for economic development. The widespread use and practical testing of various new methods in mathematics, systems analysis, and computer software have made it possible to formulate the general aims and concrete tasks confronting present day educational planning. This annotated bibliography, Part II in a series, cites current literature concerning the future of education or the many factors affecting educational development in member states of UNESCO. Part I of the series was issued in June of 1979 and focuses on the core literature concerned specifically with the future of education, as well as literature in the closely related field of educational development. The present complementary volume constitutes Part II of the bibliography and covers three further broad categories of literature dealing with: 1) education and the individual; 2) education and society; and 3) international cooperation in education. Books, reports, journal articles, legislation, and government publications published since 1972 are cited. While every effort was made to include titles published in all parts of the world, the majority of the titles listed were published in North America. Topics dealt with include: the learning process; learning needs; individual demand; education for development; education for social change; implications of social change for education; effects of demographic changes on education; the democratization of education; education in relation to culture, employment and science and technology; focus of international cooperation, and evaluation of past and current performance in international cooperation. Identifiers—Europe (East), USSR (Russia)  
 This paper examines educational development in

East-European socialist countries in the 1970's. The main emphasis is on Russia. The paper is organized topically. Topics discussed include: educational policies and plans; general principles of educational development; indicators of the levels of educational attainment; population dynamics; preschool education; primary and secondary education; vocational training; and new trends in financing. On the whole, the analyses of the development of education in these socialist countries demonstrate a wide diversity of patterns of educational policies, structures, contents, and methods. Often it appeared impossible to identify trends which would be characteristic for all the countries. In some cases the developments were going in opposite directions. Therefore, the paper includes analytical information for the entire group of countries and, where possible, by separate countries. In general, long term educational plans in socialist countries have several main objectives. The first is to help youth acquire solid scientific and technological knowledge and instill in them a deep ideological conviction. The second objective refers to the further development and improvement of the existing and the building of the new structure of the educational system. The third objective is the socioeconomic efficiency of education. (Author/RM)

This paper consists of the working document and the final report of an international panel which met in Paris in 1980 to discuss the future development of education in UNESCO countries. There are four major sections to the working document which comprises the bulk of the paper. The topic of the first section is significant trends in the recent evolution of education. Many topics are discussed including pupil enrollments in developed and developing countries; educational personnel; illiteracy; educational administration, structure, and content; financing; and educational policy. The second section deals with current issues in education. Discussed are democratization; access to education; educational achievement and opportunity; relevance; education in relation to science and technology; education and culture; the interaction of education and the mass media; education and social development; and efficiency. Examined in the third section are factors affecting the development of education such as demography; the economy; science and technology; environmental factors; social and cultural factors; political factors; and international relations. Orientations for reflecting on the future of education are presented in the fourth section of the working paper. The final report which concludes the paper summarizes the topics discussed in the meeting. (Author/RM)

This report is the product of a study of educational development policy in Barbados from independence in 1966 to 1979. Data for the study came from a number of sources such as documentary materials, interviews with selected individuals in key positions in education in Barbados, literature on educational planning, policy and development, and files drawn from the Ministry of Education and Hansard. The approach used in the paper is essentially descriptive and inductive—describing what is being done and drawing conclusions from visible efforts. The report begins with a socioeconomic profile of Barbados. Demography, the labor force and employment, and the economy are discussed. The next section of the report presents an educational profile. Discussed are the educational structure of Barbados, enrollment, teachers, educational expenditures, and legislation. The third section examines educational policies—aims and objectives; the promotion of nationalism in a democratic country; cooperation and consolidation of the family group; wider and more effective participation; flexibility of the system; relevancy of education; training citizens to be efficient; and the efficiency of the system. The report concludes by examining emerging issues and the future of education in Barbados. Emerging issues or problems include legislation, secondary allocation, system coordination, policy articulation and implementation, and education statistics and research. (Author/RM)

Identifiers—United States, USSR

This interim report, intended to help textbook authors and publishers, describes the results of a project in which American schools critiqued Soviet textbooks and Soviet scholars critiqued American textbooks. Secondary level history and geography texts were the focus of the study. There are five chapters to the report: Background to the Study; American Criticisms of Soviet Textbooks; Soviet Criticisms of American Textbooks; Recommendations for the Revision of American and Soviet Textbooks; and Conclusions and Recommendations. The report's conclusions state that there are a few ways in which books in the two nations can be judged similarly deficient. Both American and Soviet textbooks tend to: glorify the accomplishments of their own nation and to denigrate the contributions of others; feature the least attractive aspects of life in the other nation; emphasize political affairs and devote scant attention to social and cultural life in the other country; and to be written from a Cold War perspective. Recommendations made include the following. When treating a topic involving a dispute between the United States and the USSR, authors should include information about how the issue is interpreted in the other country. Authors should strive to use the most accurate up-to-date information. When discussing disputes that have arisen over violations of treaties and other agreements, textbook authors should provide the texts of the relevant portions of agreements in the texts so that students can judge for themselves the extent of violations that have occurred. Emotional and pejorative language should be avoided. Respect

for the national traditions and customs of the other country should be encouraged. (Author/RM)

In accordance with a mandate from Unesco's 1978 General Conference, an evaluation methodology and instruments were devised to assess the Unesco Associated School's success in encouraging international peace and human rights. The background of this assessment project and a report of evaluation activities are presented in this document. The Associated Schools Project originated in initiatives taken by Unesco in 1953 to help selected schools in Unesco member nations carry out special projects of education for living in a world community. By 1980, the project encompassed more than 1,400 participating institutions in 74 member states. Information is presented in three major sections. Section I describes the evaluation design. During the period June-July 1979, project consultants designed two questionnaires—one to be completed by coordinators of the project at national levels and the other to be filled out by faculty and administration at selected Associated Schools. Questions focused on relevancy and worth of project objectives in light of evolving needs, student learning and attitudes, teacher skills and development, community relationships around the schools, impact on official policy and curriculum, and developing better information flows between Unesco and the country concerned. Section II describes the administration of questionnaires in seven Unesco member nations: Mauritania, Argentina, Colombia, Philippines, Japan, Poland, and the Federal Republic of Germany. Section III offers conclusions and recommendations, including that the Associated Schools Project should be continued, subject to periodic re-evaluation; greater emphasis should be placed upon regional exchanges and cooperation; teaching content should be renewed periodically in accordance with global developments; and that the schools should increase their emphasis on promotion of understanding between groups within countries and between countries. Copies of the questionnaires are included. (DB)

Descriptors—\*Crime, Equal Opportunities (Jobs), \*Females, \*Feminism, Income, Labor Force, Males, Research, \*Sex Differences, Urbanization

This study measures the impact of sexual equality on the differences between male and female involvement in crime. The units of analysis were all 100 counties in North Carolina. Data for the dependent variable, male-female involvement in crime, were obtained from the North Carolina Police Information Network. The 1970 U.S. Census was the source of data on the control variables which consisted of population density, degree of urbanization, percent unemployed, percent non-white, percent of the population female, and female age structure. Analysis of the data indicates that sexual equality does not significantly reduce the male-female gap in criminal behavior. Female labor force participation, urbanization, and income level

are more important factors. The counties with the lowest male-female crime differentiation are characterized by high female force participation, low urbanization, and a high income level. (Author/RM)

Descriptors—Charts, Child Neglect, \*Children, Developed Nations, Developing Nations, \*Family (Sociological Unit), Family Characteristics, \*Family Planning, \*Females, Futures (of Society), \*Health, Infant Mortality, Infants, Pregnancy, Quality of Life, Tables (Data)

This document explores risks to the health and lives of women and children that can be avoided or reduced by family planning. Emphasis throughout is on case studies and statistics from developing nations. Data are presented in expository and chart form. Information is presented in four chapters. Chapter I, Child Health and Family Planning, identifies factors which influence a child's chances of being born healthy, including number of children in a family, spacing between birthdates of children, and age of mother when each child is born. Chapter II, Women's Health and Family Planning, focuses on complications of pregnancy and childbirth among women in developing countries. Problems include the predilection of women to resort to dangerous illegal abortions when effective means of contraception are unavailable; death due to pregnancy (40-180 women in most developing nations died for every 100,000 children born in the mid-1970s); and ill health due to too many pregnancies. Chapter III, Family Planning in Developing Countries, discusses various methods of contraception and pinpoints areas of unmet need for family planning services. Specific problems include widespread use of inefficient methods of contraception, difficult access to contraceptive supplies, lack of information, and expense of traveling to a family planning site. The final chapter offers conclusions. A major conclusion is that family planning makes a substantial contribution to maternal health by making it possible for women to avoid high-risk pregnancies. The suggestion is offered that international organizations and governments of developed nations cooperate with health ministries in developing nations to develop family planning programs to meet each nation's needs. EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Children, Economic Opportunities, Economics, Elementary Secondary Education, Energy, Energy Conservation, \*Futures (of Society), \*Opportunities, \*Population Growth, Urban Planning, Urban Problems

Identifiers—\*United States (South)

This report contains a statement of regional objectives with respect to growth problems and opportunities in the South. The report was prepared by the 1980 Commission on the Future of the South which was appointed by the Southern Growth Policies Board, a public, interstate agency governed and supported by the state and local governments of the Southern United States and Puerto Rico. For each topic discussed there is a background paper fol-

lowed by a listing of recommendations. Topics focus on the children, cities, and energy of the South. Recommendations include the following. Public and private investments which develop jobs in high poverty areas and target minority groups, single parents, and other chronically under employed groups should be supported as a first order priority rather than depending solely on trickle down economic policies. To assist the Southern region in attracting and retaining financial capital, state banking laws should be amended to permit, under adequate supervision, state wide branching of all financial institutions. City officials need to develop closer working relationships with state officials, especially the Governor, in order to improve their ability to provide urban services and to acquire the tools needed for this task from their state legislatures. The constraints on the use of natural gas should be removed. The non-excessive number of regulatory constraints on the mining and burning of coal should be decreased. (Author/RM)

**Measuring Economic Attitudes in High School.**

Pub Date—Nov 81

Note—22p; Paper presented at the Annual Meeting of the (CUFA) session of the National Council for the Social Studies (Detroit, MI, November, 1981).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Affective Measures, \*Attitude Measures, \*Economics, \*Economics Education, Educational Assessment, High Schools, High School Students, Knowledge Level, School Surveys, Social Studies, \*Student Attitudes

Identifiers—\*Survey on Economic Attitudes

This paper discusses a survey undertaken to assess the attitudes of over 2,000 high school students towards economic issues and economics courses. The premise of the survey was that more studies evaluating economics instruction at the high school level overemphasize achievement and knowledge outcomes and fail to measure attitude outcomes. The instrument devised to measure economics-related student attitudes was the Survey on Economic Attitudes (SEA). The paper is divided into three major sections. In Section I, information is presented on development of the SEA measurement instrument. Topics discussed include problems of devising measurement instruments for high school students, steps taken to insure that the measurement instrument would possess content validity, and selection of the 14 final items for the attitude measure with regard to nine broad topics—government regulation, taxation, welfare, inflation, unemployment, incentives, power-concentration, foreign trade, and economic growth. Section II focuses on several validity and reliability studies which were based on the SEA and conducted during 1979. The final section discusses advantages of the SEA instrument. Advantages include that it can be administered conveniently in whole or in part within a 10 to 15 minute time frame, can be easily read and understood by high school students, and is valid for economic attitude sophistication as well as attitudes towards economics as a subject. The document concludes with an appendix containing an outline of the instrument development process and a copy of the measurement instrument. (DB)

**'Pro-Family vs. Pro-Woman': Elite-Mass Linkages on Family Issues.**

Pub Date—Sep 81

Note—52p; Paper presented at the Annual Meeting of the American Political Science Association (New York, NY, September 3-6, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—\*Abortions, Activism, Attitude Measures, Family (Sociological Unit), \*Family Role, \*Females, \*Feminism, \*Politics, Public Opinion, Social Science Research, Tables (Data), \*Voting

Identifiers—Equal Rights Amendment

This paper explores single-issue politics by examining voting patterns on abortion and Equal Rights Amendment (E.R.A.) issues. The concept of single-issue politics refers to any issue which generates a significant amount of single-minded voting and/or political behavior. Major objectives of the study

were to consider factors which were likely to influence behavior towards single-issues and to test some ideas about single-issue politics on two controversial issues—abortion and the E.R.A. The authors employed two major methods. First, they reviewed literature on voting and single-issue politics. Second, they carried out a survey of attitudes toward single-issue politics based on mass data (a telephone survey of 1,228 randomly selected Minnesota residents) and political activist data (a questionnaire administered to participants at the White House Conference on Families, 1980). From the general overview of political literature, the authors present a number of findings, including that existing treatments of single-issue politics tend to ignore the general dynamics underlying such issues in favor of more narrow focus on a particular issue and that, in order for a policy question to be labeled a single issue, a number of people must respond to it in a single-minded fashion. From their surveys of Minnesota residents and participants at the White House Conference on Families, the authors present additional findings. Among these findings are that there is a higher rate of single-issue voting at the activist level than at the mass level and that people with extremely favorable or extremely negative opinions on abortion and the E.R.A. tend to single-issue vote more than do moderates. It is concluded that some activists are keeping the battle over abortion and the E.R.A. intense by cuing the masses into a pattern of single-issue voting. Tables of data are presented in the appendix. (DB)

**Doing Sociology with Video Tape.**

Pub Date—Aug 79

Note—25p; Paper presented at the Annual Meeting of the American Sociological Association (Boston, MA, August, 1979).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Environment, Environmental Research, Higher Education, \*Production Techniques, Social Behavior, Social Science Research, \*Sociology, \*Videotape Recordings

Identifiers—Habermas (Jürgen), Hermeneutics

This paper describes the production of a videotape which shows how visual sociology can be used to explicate the varying images which are associated with different status groups and which create conflict about the environment. The videotape, *Alternative Images of the Mississippi*, Images I, shows in a systematic sociological fashion, the range of images of the physical environment which are held by environmentalists active in the Hiawatha Valley portion of the Upper Mississippi River Basin below the Minneapolis-St. Paul Metropolitan Area. It was the intention of the project to show those images in such a way that they would be recognized as important scientific statements in the debates, contests, and litigation over the environmental quality in the Hiawatha Valley. The paper describes the interviewing, editing, and production processes used. Previous research on environmental issues was utilized to prepare for the interviewing. Also presented in the paper is a rationale for the use of visual sociology in the form of videotaping. The rationale draws upon Habermas' categories of scientific interest. Of the three described, the "empirical-analytic," the "hermeneutical," and the "critical," it is the second of these, the "hermeneutical" which lends itself to visual sociology in general and videotaping in particular. Hermeneutical science studies the values, assumptions, and images of groups and provides a systematic analysis of where various groups are coming from. (Author/RM)

Descriptors—\*Abstract Reasoning, Intermediate Grades, Junior High Schools, Learning Activities, Models, \*Science Education, \*Skill Develop-

## ment, \*Social Studies

Science and social studies teachers can use these sample learning activities to teach reasoning skills in grades 5-9. The publication was developed by a group which provides information and assistance to Vermont educators of science and social studies in the fifth through the ninth grades with a focus on the teaching and learning of reasoning skills. Sample reasoning lessons were drawn from the most popular 5th through 9th grade science and social studies texts, along with some innovative lessons from non-text sources. The first part of the publication contains 40 science learning activities; the second part contains 32 social studies activities. The kind of information provided for each activity includes the following: grade level, reasoning competency, type of activity, source (e.g. textbook and publisher), materials needed, teacher directions, mastery criteria, and, in some cases, comments. The types of activities are many and varied. In the science activities students classify animals according to a key, develop a classification system based on external features, separate petroleum products into groups according to physical properties, and build a storage cell. Social studies activities involve students in constructing graphs, reading selections to find specific information, grouping historical people, classifying words, reading a selection and then putting statements in proper order, and brainstorming and analyzing. ## Identifiers—\*Vermont

This unit is intended to help Vermont high school students in social studies classes understand ways in which northern New England individuals and groups relate to global social and economic change. Although activities are based on common New England scenes and experiences, they can be easily adapted by classroom teachers to reflect life in other regions. Activities are organized around 10 topics—economic links of Vermont to the rest of the world, origin of material objects found commonly in Vermont households, Vermont's role in world trade, internationally-owned companies in Vermont, foreign companies and the U.S. market, the extent of world-wide events on students in Vermont, freedom of trade, and basic economic concepts. Among the many activities suggested for each topic are discussing topics in class and in small groups, keeping international consumer diaries, listing material goods made in Vermont and/or elsewhere, reading assigned passages, writing research reports, collecting objects from home and explaining how they link Vermonters to places outside their community and nation, interviewing community business people regarding exports and imports, and participating in various map and globe projects which relate Vermont to the rest of the world. For each activity, information is presented on objectives, materials needed, and procedures. Also included where necessary are background information, tabular data, reading selections, and student handouts. (DB)

## Studies, Units of Study

## Identifiers—Canada

Ideas are offered for helping eighth-grade students incorporate an at-home field trip to Canada into a social studies unit. The teachers who developed the unit state that students can complete the 21-day imaginary trip in five hours of classroom time when appropriate materials are available and the classroom environment is conducive to working on the trip. All pertinent notes and figures are to be written out on worksheets included in the document. The overall objective of the unit is to challenge students' imagination in planning an excursion into another culture. More specific objectives include improving students' map and globe skills, encouraging students to generalize about travel and international trade as a result of planning their trips to Canada, exposing students to small group work, and teaching students how to select appropriate activities and lodging in Canada from government and travel agency brochures. A wide variety of activities is suggested on the daily lesson plan outline. Among the 13 activities are studying road maps, selecting sights to visit, plotting routes and mileage, estimating costs, budgeting funds available for the trip, and discussing ways of coping with unexpected emergencies such as flat tires. For each activity, information is presented on objectives, instructional events, materials and activities, and the role of teacher and learner. Feedback from students who have participated in the imaginary field trip unit indicates that the majority of students thoroughly enjoyed the activities and learned a great deal about planning a real trip. ## Nielsen, Lynn Ethan

Readability of Rewritten and Original Primary Source Materials in the Elementary Classroom.

Pub Date—Oct 81

Note—9p.; Paper presented at the Annual Meeting of the Plains Regional Conference of the International Reading Association (9th, Des Moines, IA, October 22-24, 1981).

Pub Type—Reports - Research (143) — Speeches / Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational Research, Grade 5, Grade 6, History Instruction, Intermediate Grades, Pretests Posttests, \*Primary Sources, \*Readability, \*Social Studies

Reading problems related to use of primary source materials in the upper elementary grades are investigated. A major focus was the appropriateness of original versus rewritten versions of primary source materials with respect to readability. The sample consisted of 209 fifth and sixth grade students and seven elementary school classroom teachers in Iowa public schools. The study was designed to include a pretest to measure the students' ability to comprehend original and rewritten (i.e. edited and/or clarified) primary source reading selections on Iowa history, a series of Iowa history lessons involving primary source materials, and a posttest to again measure the students' ability to comprehend primary source reading selections. All students were exposed to some original and some rewritten primary source material on either the pre- or posttests and all students were exposed only to original primary source material during the history lessons. Findings from analysis of pretest scores indicated that students who were exposed only to original versions of primary source materials scored significantly lower than students using rewritten versions of the same primary sources. Findings from analysis of posttest scores indicated that there were no significant differences on students' abilities to read original and rewritten primary source materials. The conclusion is that students became more able to comprehend original primary sources when they were given opportunities to work with these materials. One implication is that classroom teachers should generally use the original versions of primary source materials because, in so doing, they will provide students with the flavor of another time period which may not be accurately communicated by the rewritten version. Teacher's Resource Manual on Worldmindedness: An Annotated Bibliography of Curriculum Materials, Kindergarten through Grade Twelve. Occasional Paper No. 8.

California Univ., Los Angeles. Graduate School of Education

Pub Date—81

Note—136p.

Available from—Curriculum Inquiry Center, Graduate School of Education, 334 Moore Hall, University of California, Los Angeles, CA 90024 (\$5.00).

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Annotated Bibliographies, Conflict Resolution, Cultural Awareness, Elementary Secondary Education, Futures (of Society), \*Global Approach, \*Instructional Materials, International Relations, Natural Resources, Peace, \*Resource Materials, Social Studies, Values

This bibliography lists resource and instructional materials for use by classroom teachers as they design and implement educational programs on world-mindedness. Worldmindedness is characterized as differing from international and/or multicultural education in that it includes a value orientation in addition to knowledge about and interest in international relations. Worldminded individuals are defined as those who are positively disposed to people with other cultural beliefs, perceive commonality in basic needs of all peoples, and develop their individual potential for the benefit of others as well as self. Bibliographic entries are presented in five categories: (1) Farther Reaches of Human Nature, including spiritual dimension, and holistic education; (2) Global Education and Futuristics, including world order, and the United Nations; (3) Interdependence and Global Problems, including development, energy, environment, and food; (4) Peace, including aggression, disarmament, nonviolence, and social justice; and (5) General and Miscellaneous, including cultural awareness for young children, institutional violence, ethnocentrism, and contributions of women throughout history. Entries include books, audiovisual materials, edited volumes, maps, teacher's guides, pamphlets, monographs, games, and religious tracts. For each entry, information is presented on appropriate grade level, title, author, publisher or developer, pagination or size, availability, price, and annotation. Most of the entries were published/produced in the United States between 1975 and 1980. The document concludes with an appendix containing a guide to periodical literature, a listing of resource centers, and opportunities for active student participation. (DB)

Descriptors—\*Cognitive Ability, \*Educational Assessment, Elementary Secondary Education, \*Music, Music Education, National Surveys, \*Student Attitudes

Identifiers—\*National Assessment of Educational Progress, Second Music Assessment (1979)

The report presents data from two national assessments—1971-72 and 1978-79—of the attitudes, knowledge, and understandings of American students about music. In each assessment, 9-, 13-, and 17-year-olds were administered exercises designed to measure some of their cognitive abilities and attitudes about music and some of their experiences with music. Some exercises from the first assessment were readministered in the second assessment so that changes in music achievement could be detected. Also, data were gathered on the music train-

## 130 Document Resumes

ing background of students. Achievement results are presented for national populations of 9-, 13-, and 17-year-olds as well as for subpopulations defined by region of the country, sex, race/ethnicity, parental education, type of community, and grade level. Some major findings from the report include the following. About three-fourths of the students at each age appear to have positive feelings about music and appear able to make simple judgments about it. Many students have some knowledge of the elements and expressive controls of music—52% of the 9-year-olds, 61% of the 13-year-olds, and 57% of the 17-year-olds. Knowledge about music history and style is less widespread—58% for 9-year-olds, 36% for 13-year-olds, and 39% for 17-year-olds. Fewer 9- and 17-year-olds were successful in answering their respective exercises in the two assessments. The decline between assessments for the 9-year-olds was 3.3%; for the 17-year-olds it was 2.5%. The percentage of 13-year-olds able to respond correctly to the music exercises was about 41% in both assessments. Primary type of information provided by report: Results (Selective) (Change).

This publication contains the proceedings of the 1980 annual meeting of the Ohio Valley Philosophy of Education Society (OVPEs) held at the University of Kentucky. There are four parts to the proceedings. The first part presents the presidential address "Strategic Thinking, Reason, and Education: A Critique of Re-Industrialization" and a response to it. The papers delivered at the general sessions are included in Part II. They are: "Aspects of the Reproduction Thesis" and "Theoretical Approaches to Education and Social Inequality." Part III, which comprises the bulk of the proceedings, contains the 16 papers delivered at the concurrent sessions. Topics discussed include: Dewey's aesthetics; the aesthetic-moral connection; evaluating intrinsic values; education and the imagination; marriage and divorce; a philosophical critique of special education; the role of coercion in teaching; Cremin's concept of education; the hidden curriculum; and the teaching of ethics. Part IV contains the minutes and treasurer's report for 1980, a membership list; and OVPEs style guidelines. (Author/RM)

The purpose of the teacher workshop described in this report was to disseminate information to junior and senior high school social studies classroom teachers and administrators regarding innovative educational materials and teaching methods available in social science disciplines. Forty-seven social studies teachers and administrators from New York City area schools, participated in the program. The program consisted of one-day long presentations in 1979 on anthropology, sociology, political science, economics, and psychology and additional full-day conferences devoted to each of these disciplines scattered throughout the following year. Presentations were offered by teams consisting of a social scientist, an experienced teacher consultant, and the project director (a social science educator). Workshop participants were involved in a wide variety of activities, including viewing and analyzing social science topics, evaluating various teaching techniques and materials (including major texts, projects, and National Science Foundation sponsored programs in the social sciences). Pre- and posttest workshop surveys were undertaken to determine teachers' and administrators' familiarity with social science materials, willingness to try new materials and methods in the classroom, projected success in implementing new ideas (pre-workshop survey), and impact of the workshop on participants (follow-up surveys). Findings indicated that teachers and administrators possessed little familiarity with innovative social studies materials at the beginning of the workshop and that most teachers demonstrated an increase in awareness, familiarity, and intent to use new materials and teaching methods as a result of participation in the workshop. Descriptors—Decision Making, Formative Evaluation, Intermediate Grades, Junior High Schools, \*Program Effectiveness, Program Evaluation, Self Concept, \*Sex Fairness, Sex Role, \*Social Studies, Summative Evaluation

This paper presents the results of an evaluation study of a sex equity program designed to affect the achievement and attitudes of early adolescent students in the middle school. The Self-Concept and Decision-Making Middle School Curriculum Program at Florida State University developed sex equity curricular materials titled "Decisions About Roles" that can be infused directly into the middle school curriculum of math, science, language arts, physical education, and social studies. To determine the effectiveness of the program, both formative and summative evaluation procedures were used over two years. During the formative evaluation of the first year, all materials were field tested and student pre- and posttests were administered. The materials were revised as a result of the feedback. The summative evaluation of the second year employed a pre- and posttest design to contrast the gain scores of the students participating in the program (experimental group) and those not exposed to the materials (comparison group) for five dependent measures. Six hundred and thirty students in grades six, seven, and eight at two experimental site schools and 234 students in the comparison school participated. Evaluation instruments administered are described in the paper. Results indicated that the program which includes a substantial social studies component had a significant effect on pupils' achievement, sex-role perceptions, and decision making. Participants made achievement gains in content areas; gained more egalitarian perceptions of occupational, school, and family roles for females and males; expressed more androgynous self-concepts (girls only); and gained confidence in decision making. Descriptors—Anthologies, \*Asian Studies, High Schools, Primary Sources

Identifiers—\*Vietnam, \*Vietnam War

Intended for high school students, this book contains a collection of personal accounts of Vietnam and the Vietnam War by American and Vietnamese soldiers. An introductory paragraph suggests that one excellent way for students to learn the lessons of the Indochina war is through the words of the soldiers who fought it. Narratives, excerpts from diaries, interviews, and poems are included. Discussion questions are suggested throughout the book. In each of the accounts the soldiers are confronted with a situation which demands a choice involving their basic beliefs and sometimes their lives. War presents these dilemmas in their most dramatic form, but the questions which are raised are ones which students will very likely face in their own lives. A bibliography of print and media for students wanting to further study the Vietnam War is provided. A glossary of unfamiliar words is included. (Author/RM)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Curriculum Development, \*Educational History, Educational Needs, Elementary Secondary Education, Energy, Guidelines Identifiers—\*Energy Education

This paper discusses the rise and fall of energy education, justifies the commitment to achieve the goals of energy education, and suggests some strategies for accomplishing this objective. The rise of energy education is first discussed. Energy is not a newcomer to the K-12 school instructional program. Energy sources, forms, states, and uses have traditionally been part of the science curriculum at all grade levels. Social studies classes have always discussed energy in many contexts. The events of the 1960s and mid 1970s caused a shift in the way we wished to deal with energy in the schools. It evolved from a multi faceted area of interest to a complex area of concern. In the late 1970s many programs were begun by federal, state, and local educators demonstrating their commitment to create an energy literate society. The paper then goes on to discuss the four major reasons for the falling off of interest in energy education: pervasive sense of complacency; change in political ideology; fiscal constriction; and shift in educational priorities. The next section of the paper discusses why energy education is still important. Suggestions for promoting energy education in the classroom include becoming energy literate, maintaining a long-range perspective, not falling victim to a crisis mentality, and participating in the political process. The paper concludes with five guidelines for implementing energy education. (Author/RM)

Descriptors—\*Curriculum Development, Geographic Concepts, \*Geography Instruction, \*Learning Activities, Program Descriptions, Program Evaluation, Secondary Education, \*Social Studies, Space, Summer Programs, Teacher Developed Materials, Urban Studies

This report describes a project designed to develop geography based activities that could be used to supplement an ongoing social studies program. The purpose was to help secondary social studies teachers in the Memphis, Tennessee area develop geography based activities dealing with concepts of urban spatiality. The project staff organized and publicized through brochures and news releases to newspapers the four-week summer program to be held at Memphis State University. Fifty-six public school teachers were selected and organized into ten planning and writing task forces. Each task force was assigned to one of the following ten social studies courses: Tennessee history; American history I; civics; economics I; introduction to social studies; American history II; American political behavior; economics II; sociology; and social interaction. Teachers designed each instructional module so that it would coincide with specific chapters in each textbook. The modules developed utilized a problem-solving approach, involve community resource people, and contain a wide variety of teaching methods—for example, games, films, role playing, and labs. A teacher's manual to accompany the activities was also developed. The activity modules are not included in this report. Project evaluation shows many positive effects including improved public school-university relations and curriculum improvement. Included in the appendices are a list and definitions of geography concepts and the summer

workshop agenda. (Author/RM)

This publication contains analyses of elementary and secondary social studies textbooks, supplementary classroom materials, and teacher resource materials. The purpose of the publication is to provide analyses of curriculum materials which will allow K-12 school teachers, administrators, curriculum coordinators, and college methods teachers to select materials which are appropriate to their students, schools, and community. The kind of information provided in each analysis includes purpose, intended users and uses, content, and teaching methods. Some evaluative information is also included. The analyses of curriculum materials are divided into sections by grade level. The first major section of the book describes elementary textbooks and multimedia or supplementary materials. The second major section of the book is devoted to the secondary (7-12) curriculum. Textbooks are analyzed along with filmstrips and other supplementary materials. The third section includes short analyses of teacher resource materials, most of which provide practical suggestions and ideas for classroom teachers. The fourth section contains abstracts of ERIC documents. There are several indexes to the publication—author/editor/developer, grade level, publisher, and subject area. The publication concludes with a list of publishers' addresses. (Author/RM)

Descriptors—\*Community Education, Community Involvement, Community Resources, Community Schools, Community Services, Leadership, Models, Needs Assessment, Program Descriptions, Resource Materials, School Community Programs, Study Guides

This booklet is designed to be used as a workbook to present the concept of community education in a format which addresses important questions any community needs to consider as it explores community education. The booklet can be used in conjunction with the videotape "Community Education: A Profile of Two Communities." However, the contents of the booklet are self-explanatory and can be used independently. The booklet begins with a profile and a discussion of the philosophy of two model community education programs. The next section of the booklet, which comprises its bulk, is a study guide which can be used individually or with groups for exploring community education. Five components of a community education program are examined: extended use of public school facilities, citizen involvement, interagency cooperation, needs assessment of communities, and leader-

ship. The format for each component is broken into three sections: a brief overview of how the two model communities have developed each part of their community education program; a series of facts and issues to broaden the reader's perspective of the implications this component has for community education development; and several key questions which communities and schools need to consider in beginning to implement community education. The last section of the booklet lists a variety of community education resources available to communities and schools. (Author/RM)

Descriptors—\*Art Education, Career Education, Communications, \*Concept Teaching, \*Course Objectives, \*Curriculum Development, Elementary Education, Glossaries, \*Integrated Curriculum, Mathematics Education, Music Education, Physical Education, Preschool Education, Safety Education, Science Education, Second Languages, Social Studies, Teaching Guides

This publication, first in a series of two intended for Utah's elementary teachers, outlines objectives for teaching visual thinking through art concepts. The second part in the series entitled "Art is Elementary" (ED 158 872) provides teaching strategies and lesson plans for each objective. The subject areas in which the program is intended to be taught include math, science, social studies, communications, music/art, health/physical education, safety education, foreign languages, and career education. The first two sections of this publication contain a discussion of the program's philosophy and present administrative guidelines for implementing the program. The listing of instructional objectives, which comprises the bulk of the publication, is then presented. The objectives are organized by grade level from preschool through grade seven. Maturity level goals are indicated for each objective. The maturity goals are intellectual, ethical-moral-spiritual, emotional, social, physical, environmental, aesthetic, and productive. Other information provided in code form for each objective includes subject area in which the objective is to be taught, grade level, and relationship of each objective to the general curriculum goals. A glossary and pronunciation guide for artists' names and art terms follows the listing of objectives. The publication concludes with three appendices containing a chart illustrating reading skills taught in the program, a chart of holiday and seasonal art activities, and a student progress record form. This book contains ten articles which discuss education for a world view. In a democratic society there is a need for wide public understanding of the country's national and international policies. One article "The End of Innocence" discusses the rapidly changing, and complex world in which we live and points out certain fallacies which must be avoided. These fallacies include thinking that we live in a bipolar world, fear of negotiation, and the belief that there exists an incompatibility between our foreign policy objectives and our fundamental values. Another article, "Education and the World

View" examines difficulties standing in the way of international education—for example, the declining role of foreign language teaching. One article is a bibliographic essay citing "Readings for a Global Curriculum." "What College Seniors Know About Their World" is examined in one article. The Educating Testing Service sampled 3000 undergraduates across the country. Preliminary results show that seniors achieved a mean score of 50.5 questions correct out of 101 on the test, indicating considerable lack of knowledge on topics felt important by the assessment committee. History majors scored highest while education majors scored lowest. Other articles include "A World in Transition," "Forward to Basics: Education as Wide as the World," "Expanding International Dimensions," "The New Curricular Equation," "Who is Tending the Store?" and "Toward a Collectivity of Functions." This handbook describes international programs for undergraduates, provides a short section on selected consortia, and suggests ideas for widening international education. The programs selected for this volume met certain criteria. In addition to being effective, the programs do not place a large strain on institutional budgets and can be easily adapted by others. The volume is arranged into four chapters. Chapter I, the largest section, describes over 60 two-year and four-year college and university programs. Chapter II describes six consortia programs. Each description includes a brief introduction to the institution and an overview of the international aspects of the curriculum as well as information about how the international aspects are organized, the educational impact, and the resource persons who can be contacted for further information. Chapter III presents worthwhile, imaginative ideas that are used at other institutions. Chapter IV consists of a thematic index that lists each program or approach under general program theme or pedagogical approach categories, such as foreign languages, study abroad, and integrated curriculum. Identifiers—China, Chinese People, Maoism  
This book, which can be used in secondary and college courses, is the first of two volumes which present a Chinese view of China and the world. The reality of everyday life as experienced by the Chinese people is recreated in the series. Almost all of the materials in both volumes has been written by Chinese and has been taken from a variety of

sources: autobiographies, fiction, poetry, newspaper and magazine articles, and historical documents. Each primary source selection is preceded by an editor's introduction which provides background information and a few questions for class discussion. Volume one begins with the story of the Communist rise to power in 1949, which led to perhaps the most spectacular social revolution the world has ever seen. This first volume focuses on the changes brought about in the lives of the peasants, the masses who make their living from the land. It is comprised of four major parts. In Part I the Chinese talk about the "Revolution and Land Reform." Part II, "A New World View," presents materials on Maoist ethics, the traditional family ethic, and religion. Part III deals with "The Liberation of Women." The status of women, the home life of a saleswoman and romance in China are discussed. Part IV deals with "Politics." The Confucian heritage, education, and dissent are included among the topics discussed. (Author/RM)

Identifiers—China, Chinese People

A Chinese view of China and the world is presented in this book, which is second in a series of two volumes which can be used in secondary and college courses. The reality of everyday life as experienced by the Chinese people is recreated in the series. Almost all of the material in both volumes has been written by Chinese and has been taken from a variety of sources: autobiographies, fiction, poetry, newspaper and magazine articles, and historical documents. Each primary source selection is preceded by an editor's introduction which provides background information and a few questions for class discussion. Volume two continues the theme of change by exploring the struggles and debates within China over economic development, the proper path for socialism, and the role of literature and art in society. This second volume is comprised of four sections. In the first section, "The Cultural Revolution," a student talks about the Red Guards, a young man tells how he became a writer, and a once idealistic young woman talks about the disillusionment of youth. The second section deals with "The Economic Revolution." Included is a fictionalized account of how a farming cooperative got started in one area, a criticism of some of the agricultural decisions made during the Cultural Revolution, and a description of a model worker in the Taching oil fields. The primary sources presented in the third section examine "Population, Pollution, and Health Care." "China and the World" is the topic of the fourth and last section of the book. Included is a letter which illustrates the arrogance of the traditional Chinese attitude toward foreigners, and excerpts from speeches showing the arrogance of Westerners once they had become dominant in China. Identifiers—Hinduism, India

This book, which can be used in secondary and college courses, is the first of two volumes which present an Indian view of India and the world. The reality of everyday life as experienced by the Indian people is recreated in the series. Almost all of the material in both volumes has been written by Indians and has been taken from a variety of sources: autobiographies, fiction, poetry, newspaper and magazine articles, and historical documents. Volume one focuses on the most personal aspects of Indian life: family relations, marriage, caste membership, and religious beliefs. Each primary source selection is preceded by an editor's introduction which provides background information and a few questions for class discussion. Examples of selections include the following. Indian family life is compared with American family life. Ravi Shankar (the world famous sitar player) describes the ideal relationship between the student and his guru. One selection tells how an upper class, well-educated family arranges the marriage of their eldest daughter. Dowries are the topic of one reading. In another, an Indian journalist analyzes the concept of woman power in India showing that the expectations for men and women are quite different. An Indian girl describes to her brother how their mother used stories to educate her. An imaginary conversation between an American teacher and an Indian businessman will help students understand the caste system. Several readings attempt to clarify some of the religious concepts of the Hindu way of life. (Author/RM)

Identifiers—Japan, Japanese People, World War II

A Japanese view of Japan and the world is presented in this book, which is the first of two volumes which can be used in secondary and college courses. The reality of everyday life as experienced by the Japanese people is recreated in the series. Almost all of the material in both volumes has been written by Japanese and has been taken from a variety of sources: autobiographies, fiction, poetry, newspaper and magazine articles, and historical documents. Each primary source selection is preceded by an editor's introduction which provides background information and a few questions for class discussion. Volume one begins with a brief look at Japan as it is known to the world today: a nation of economic prosperity and technological excellence. It then goes back to the 17th century, to a time when Japan was isolated from the rest of the world, and traces some of the political and social developments that transformed this hermit kingdom into a modern imperial power. Japan's contact with the outside world led eventually to its involvement in World War II. The last third of the book examines some of the causes of that war, its impact on the Japanese people, and some of the permanent changes it brought about in Japan. (Author/RM)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Educational Objectives, Elementary Secondary Education, Learning Activities, Local History, Primary Sources, Research Methodology, Research Tools, Social Studies

This manual is intended to help elementary and secondary teachers locate and use historical records in social studies and local history courses. There are four major sections to the manual. The first section discusses educational objectives which can be met by using historical records. How to locate and use historical records is the topic of the second section. For example, a good way to begin the search for records is by contacting the local historian. Several bibliographic aids which identify repositories and their holdings are listed. Tips for using the repositories and for preparing records for classroom use are presented. The third section, which comprises the major portion of the manual, provides sample uses of the following historical records: personal papers, business records, local government records, maps, photographs, broadsides, and census records. A brief background reading on each of the records is provided for the teacher. Following this reading is a self-contained activity with questions to ask and points to consider for use with students. Additional learning activities are also suggested. Section four provides suggestions for further reading. (Author/RM)

Descriptors—Art Education, Educational Needs, Elementary Secondary Education, English Curriculum, Ethical Instruction, History Instruction, Integrated Activities, Mathematics Education, Moral Development, School Community Programs, School Role, Science Education, Social Studies, Teaching Methods, Values Education

Moral contradictions and cross purposes in society make formal moral training in the schools difficult, if not impossible. Values clarification and school-wide programs of moral education are of questionable merit. Nevertheless, effective moral education is implicit in teaching the subjects that comprise good basic education. A mathematics teacher, for example, might encourage students to think of the ways data are gathered and organized. She might have a student discuss the moral implications of gathering information through computers. Science teachers might make students aware of the values that determine the way science is done—its openness to new formulations of reality, or the rigorous testing of theories before they are accepted. English teachers have a wealth of material that provides models of human conduct, writing about conduct good and bad, and reflections on how people change as they gain insight, or suffer, or discover how their behavior affects the lives of others. History and social studies teachers might fill some of the gaps and omissions in the customary accounts of our past. They need to remind their students that what is chosen to be studied reflects a point of view that screens out more than it admits. The arts are one of the best vehicles for the transmission of values. For example, Golden Age sculpture and architecture provide a chance to teach the ancient Greek's moral vision of balance and proportion. It is morally imperative to bring young people and adults back together in cooperative association outside the classroom. (Author/RM)

*Creating Conditions for Professional Practice in Schools and Departments of Education.*

Pub Date—81

Note—26p.

Pub Type—Reports - Descriptive (141) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Standards, Admission Criteria, Educational Responsibility, Governance, Higher Education, Institutional Autonomy, Preservice Teacher Education, Program Improvement, School Funds, Schools of Education, Teacher Education Programs, Teacher Educators, Teacher Effectiveness

There are four conditions that will enhance professional practice in schools and departments of education. The first condition is the necessity for commitment on the part of the education department and its faculty. As professionals, faculty must be committed to providing essential services to individuals and society, make decisions in the interests of students in accordance with the best knowledge available, accept responsibility for the decisions, and be accountable to the profession. Second, schools of education must have and exercise the governance of factors directly related to their educational mission. They must have the primary voice in determining admission and retention standards for programs, the content of those programs, the assignment of faculty, and the reward system for faculty. The third condition is that programs must be developed which not only include a broad spectrum in the liberal arts but also transmit the professional culture, the insights derived from the experience of effective teachers, and the expanding knowledge base regarding effective teaching. The schools of education are responsible for the quality of the students they offer for certification, and for monitoring and evaluating standards and procedures. In discussing the last condition, resource availability, it is pointed out that schools of education are not receiving a level of financial support necessary for training teachers who are truly professional. Specific recommendations for changing and improving these conditions include using professional educator associations, maintaining strict accordance with certification standards, and changing the funding patterns of schools of education. *Are Children's Competitive Team Sports Socializing Agents for Corporate America?*

Pub Date—Nov 81

Note—28p.; Paper presented at the Annual Conference of the North American Society for the Sociology of Sport (2nd, Fort Worth, TX, November 12-15, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Business Skills, Children, Elementary Secondary Education, Employment Qualifications, Fathers, Goal Orientation, Organizational Theories, Parent Attitudes, Physical Recreation Programs, Pyramid Organization, Reference Groups, Soccer, Socialization, Social Values, Team Training

Identifiers—Ice Hockey

In a study of the similarities between children's competitive team sports and the typical corporate or business environment, two research questions were posed: (1) Does the structural organization of children's soccer and ice hockey organizations resemble that of American corporations?; and (2) Are the values of children's competitive sports similar to corporate values? Questionnaires were distributed to 222 Connecticut and New York fathers with 11 or 12 year old sons in soccer and ice hockey teams. Through observations and interviews, it was found that the structural organization of the children's ice hockey and soccer programs clearly resembled that of corporations. An organizational chart illustrated the hierarchies and divisions in a youth soccer program, and it was also found that the values stressed in competitive sports are similar to corporate values. The fathers selected teamwork as the most important sports attribute that would contribute to success in business. The importance of learning to be part of a team was a constant theme in the fathers' responses. Although some fathers expressed misgiv-

ings about the amount of politics in the team selection process and the inconveniences of complying with practice and travel schedules, most fathers had positive attitudes toward competitive youth sports. Those who have participated in competitive sports have an advantage over others who are not socialized in these values, skills, and attitudes. (FG)

Identifiers—Louisiana

Control of entry into teacher education programs should be a function of the teaching profession, with philosophy and parameters set by the professional associations while policy and procedures are set by the teacher training institutions. This problem is approached by examination of conditions that prevail in Louisiana. A strong foundation in state law is found for control of entry by the teacher training institutions, but there is a recent tendency to propose highly specific criteria which represent direct control of entry. State agencies and boards have recently recommended stricter entry standards. State accreditation standards have refrained from specification of criteria, leaving control of entry with the schools of education. No demands, directions, or levels of performance are described by the guidelines for program approval at the state level. In Louisiana, there is no evidence of professional associations' influence on the control of entry into teacher education programs, even though the need has been expressed by various associations. Enrollment-based formula funding, with its premium on numbers, may be a powerful influence on the current attitude of university training programs toward control of entry. Control of entry should be a professional responsibility in which the power is drawn from the practicing profession. A standing commission should be established to recommend parameters for selective admissions. This committee, composed of members appointed by the executive board of the state education association and by the Council of Deans of Colleges of Education, would report to those groups on the status of selective admissions in the state. Independent of any other agencies, the commission would address all attempts to regulate control of entry. (JD)

Descriptors—Elementary Secondary Education, Goal Orientation, Needs Assessment, \*Pacing, Problem Solving, \*Resource Allocation, \*Scheduling, \*Self Evaluation (Individuals), Teaching (Occupation), \*Time Perspective

Identifiers—Time Management

Time management principles can help teachers become more aware of ways in which time can be used to the greatest advantage. An exploration of personal time perspectives is a step toward establishing effective patterns of behavior. Productivity may be high in the morning and low in the late afternoon, for example, and organizing some activities to fit these energy curves relieves stress and permits a balance of personal and professional needs. In setting realistic and attainable goals, time may be used to develop actions and plans for achieving them. Since much of the school environment is time-governed or time-bound, it is important to know which aspects of school life and school time cannot be controlled. Working within these constraints and eliminating interruptions during controlled school time produces a more effective use of

time. It is important to plan and to understand personal priorities, and to follow through on these priorities before accepting new responsibilities. Knowing and using the support system available is essential in accomplishing work that must be done. Other supportive teachers, secretaries, principals, students, or parents are essential for good time management. Other suggestions for wise use of time are: concentration on the task at hand, learning not to procrastinate, and following through and finishing projects. A time management check-list is included. Three time management activities, designed to pinpoint areas of time waste, procrastination, and priority organization, are appended. (JD)

Teachers' Attitudes Toward In-Service Programs.

Pub Date—81

Note—11p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classroom Techniques, Elementary Secondary Education, \*Inservice Teacher Education, Needs Assessment, \*Participant Satisfaction, \*Program Attitudes, Program Design, \*Teacher Attitudes, Teacher Behavior, Teacher Education Programs, Teacher Effectiveness, Teacher Improvement, \*Teacher Motivation, Teacher Participation

A review is presented of recent literature concerning teachers' attitudes toward inservice programs. One of the studies concluded that items that teachers like at inservice meetings are: (1) active involvement; (2) teaching; (3) practical information; (4) meetings that are short and to the point; (5) in-depth treatment of one concept; (6) well organized meetings; (7) variety; (8) an incentive to come; (9) occasional inspirational speakers; and (10) to visit other schools to observe other teachers. Other studies maintained that teachers disliked all inservice programs or had conflicting attitudes. There appeared to be general agreement that inservice programs should be planned cooperatively between teachers and administrators and evaluated on mutually agreed upon and understood criteria. Teachers indicated approval of programs that are problem based and task centered, as well as activity oriented, systematic, continuous, and individualized. An important factor was that programs be flexible and site specific. Extension college courses seemed to be more popular than campus courses. The factors of distance from home, individual needs, and the reputation of the course and instructor were important. Salary increase was a universal motivation for teachers seeking inservice programs. Researchers have concluded that, for the most part, teachers recognize their own weaknesses and volunteer for inservice training which addresses their needs. (JD)

Descriptors—Evaluation Criteria, \*Evaluation Methods, \*Inservice Teacher Education, Needs Assessment, Outcomes of Education, Program Effectiveness, \*Program Evaluation, Summative Evaluation, \*Teacher Education Programs

Increased activity in the field of inservice teacher education has not created an immediate improvement in the quality of inservice. Programs are not planned or implemented well, and teachers are generally not involved with or committed to the programs. To perform the necessary evaluations of the programs, the planning of inservice teacher education programs must involve needs assessment, the setting of measurable objectives, and delivery services linked specifically to the objectives. Once this model has been adopted, a number of evaluation concerns can be addressed. One evaluation approach requires the involvement of planners, presenters, and participants. The approach focuses on responses to five basic concerns of the inservice evaluator: (1) Was the content of the inservice activity informative and useful to the participant?; (2) Was the presenter of the inservice activity effective?; (3) Was there an immediate change in the participants' behavior as defined by the stated ob-

jectives?; (4) Were there long term changes in classroom behaviors?; and (5) Did the students of the participants change as a result of altered teacher behavior? Each concern can be integrated into an evaluation instrument that is usable and is time and cost effective. Samples of evaluation forms used by schools are included in this paper along with a bibliography of 21 references to inservice education and evaluation. (FG)

Descriptors—Administrator Education, \*Comprehensive Programs, Educational Change, Foreign Countries, \*Inservice Teacher Education, Program Design, \*Secondary Education, Secondary School Teachers, Teacher Participation, \*Vocational High Schools

Identifiers—\*MAVO Project, \*Netherlands

This description of a project in the Netherlands concentrates on the progress made by participating schools since 1974, inhibiting and success factors, and the outlook for the future. The MAVO project provides secondary students with training for administrative functions. One of the characteristics of the program is that it provides a three-year and a four-year course of study. This option, prepared so that both "high stream" and "low stream" ability students can be taught, has made teaching the two groups of students difficult. The MAVO project was set up by teacher unions, the Ministry of Education, school authorities, and national pedagogical centers to assist the teachers and staff in MAVO schools. The MAVO project has focused on developing and disseminating strategies for mixed ability teaching, so that teachers could effectively deal with students in both the "low stream" and the "high stream" courses. The difficulties encountered in implementing the project have been communication gaps between participating agencies and institutions, lack of available staff, and confusion in priorities. Some events have had both positive and negative repercussions, such as the MAVO-trained staff being increasingly attracted to other positions. By 1985, when the MAVO project is scheduled to end, 800 schools will not have received training. Options exist for partial implementation, but the differences in aims and characteristics of the schools make planning difficult. (FG)

Holtzman, Wayne, Jr.

Effects of Locally Conducted Research on Policy and Practice Regarding Bilingual Inservice Teacher Education. Final Technical Report.

Southwest Educational Development Lab., Austin, Tex.

Spons Agency—National Inst. of Education (ED),

Washington, D.C.

Pub Date—29 Sep 81

Grant—400-80-0035

Note—161p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Bilingual Education, Bilingual Teachers, Elementary Education, \*English (Second Language), \*Inservice Teacher Education, Mexican American Education, \*Program Attitudes, Special Education, \*Teacher Attitudes, \*Teacher Education Programs, Teaching Conditions

Collaborative planning between the Southwest Educational Development Laboratory (SEDL) and a school district in central Texas provided concrete data to implement changes in inservice training programs for bilingual teachers. Five instruments were developed to obtain the attitudes of 108 teachers of kindergarten through fifth grade who taught Mexican American children who had limited English proficiency. The teachers were regular classroom teachers, bilingual teachers, or special education teachers. Among the findings from the study were that the areas of greatest need for inservice were in the teaching of reading and attending to behavior problems. Courses in the philosophy and theory of bilingual education were not desired. Teachers of English as a second language felt that the existing

inservice program could be improved by developing more and better materials. All of the teachers wanted more authority in choosing their inservice training activities. The teachers also agreed that they did not receive enough feedback and assistance in implementing new knowledge and skills. The director of bilingual education for the school district announced changes in both the bilingual inservice components and the English as a second language program as a result of the study. Sections of this report on the project present information on: (1) introduction to the study; (2) background of the school district; (3) collaborative relationship between the SEDL and the school district; (4) research strategy; (5) data analysis; (6) discussion of findings; and (7) changes made in the inservice programs. Appended are the survey instruments and the findings in chart form. (FG)

A framework of concepts in nutrition, environmental factors, genetics, and human growth and development is presented as a background for developing elementary and secondary curricula on responsible childbearing. Aspects of the four subject areas are outlined for instruction at five education levels: preschool through kindergarten, primary, upper elementary, middle/junior high, and senior high. Each of the subject areas is discussed in relation to goals and key concepts. The key concepts covered in the chapter on nutrition include the importance of nutrition for everyone and especially for pregnant women, food preparation methods, and eating habits. Those concepts discussed in relation to environment are the dangers of drugs and chemicals, infectious diseases, pollution, radiation, and the baby's delivery process. The concepts in the chapter on genetics include heredity and environment, and the causes and consequences of genetic disorders and birth defects. The chapter on human growth and development discusses developmental stages and the physical, emotional, and intellectual needs that affect human behavior and health. In the discussions of each topic, information is suggested as a basis for class discussion and instructional development. Each chapter is followed by a list of references. Charts indicate the recommended education level for teaching the key concepts. A final essay endorses the idea of action on the local level to make courses on responsible childbearing a part of the school curriculum. (FG)

Descriptors—\*Adapted Physical Education, Athletic Equipment, \*Disabilities, Elementary Secondary Education, \*Individualized Education Programs, \*Instructional Materials, Mainstreaming, \*Physical Activities, \*Physical Education, Physical Fitness, Psychomotor Skills, Student Evaluation

Guidelines are presented for organizing programs and modifying activities in physical education programs for children with a wide range of physical and emotional disabilities. The guidelines should result in a program that allows students to work to their maximum potential within the framework of regular physical education classes. In planning the program, it is essential that a planning committee, composed of the teacher, school administrator, school nurse, a doctor, school counselor, and parents, work together to form an individualized program for each child. Chapters are included on programs for children with hearing impairments, emotional disturbances, orthopedic impairments, visual impairments, spinal deviations, specific learning disabilities, weight problems, and below average physical fitness and psychomotor skills. Each chapter contains a discussion of the disability's characteristics, suggested teaching methodology for physical education, and suggested activity areas, as well as techniques for assessment and evaluation of the child. References for further study on the problem are included at the end of each chapter. The appendix contains a bibliography of available audiovisual materials, instructional materials, and children's books. Also provided are the addresses and descriptions of three validated programs for individualizing physical educational programs for handicapped children and a sample physician's referral form. (JD)

Descriptors—\*Birth, \*Child Rearing, Economically Disadvantaged, Health Education, \*Medical Services, Moral Values, \*Obstetrics, Parent Attitudes, Parenthood Education, \*Pregnancy, Preventive Medicine, Retrenchment

The scripts of four programs of National Public Radio's Options in Education series are presented. The first program has sequences involving the use of high technology in childbirth. Interviews with doctors and expectant mothers explore the use and availability of electronic monitoring equipment in prenatal care. In the second program, the high technology itself is described through discussions with specialists. Much of the discussion centers on the ethical nature of using technology to save high-risk newborns. The third program concentrates on the health problems of poor children and presents the viewpoints of: (1) a mother of a sick child in a community health center; (2) a pediatrician discussing children's health needs; and (3) a clinic director facing budget cuts. The focus of the fourth program is the care provided in a pediatric emergency room in a public hospital. Clients' use of health services and the economic and social impact of impending financial cutbacks are explored. (FG)

Descriptors—Attitude Change, \*Developmental Stages, Elementary School Teachers, Individual Development, Job Satisfaction, Maturity (Individuals), Peer Influence, Personality Development, Self Concept, \*Teacher Attitudes, \*Teacher Characteristics, \*Teaching (Occupation), Teaching Experience, \*Vocational Adjustment, \*Vocational Maturity

This study examined the perceptions of 15 elementary school teachers on their personal and professional development. In focused interviews, they were asked their perceptions of the characteristics of their personal and professional development and of the major influences on that development. The teachers' experience ranged from 4 to 28 years. The most striking finding was the evidence for stages of teacher career development. The teachers

described different characteristics during identifiable periods in their careers. Developmental changes seemed to occur in an ordered, hierarchical sequence with each year characterized by different types of changes. The changes occurred gradually and were cumulative. Distinct characteristics were displayed in the first year; the second, third, and fourth years; and the fifth year and beyond. At each phase or stage, there seemed to be an increase of knowledge, leading to a change in attitude, which increased ability, and subsequently changed job performance. The major influences on professional development were other teachers and prior contact with children. Recommendations arising from this study are provided in the areas of: research, undergraduate teacher education, graduate teacher education, inservice teacher education, and supervision and administration. (JD)

A case study was made of an interorganizational arrangement involving collaboration between a college of education, intermediary service agencies, and a collection of schools or school districts. The relationships among partners in the arrangement are examined with a focus on linking mechanisms and boundary-spanning roles. The case study is made of the Statewide Teacher Center Network, and two of its constituent members, the Arcadia Teacher Center and the Three Rivers Teacher Center. All are located in a large, sparsely populated midwestern state. Each of the two centers acted as an intermediary, linking a college of education with surrounding school districts and counties. A description is given

of the origins of the Statewide Teacher Center Network and of the Arcadia and Three Rivers Centers. In describing the first two years of collaborations between these institutions, consideration is given to events and activities, available resources, objectives, key persons, barriers and facilitators, and the dynamics of interaction between the institutions. The present collaborative effort is examined, focusing on the main events and institutional context, structure and procedures, changes in objectives, and resource changes. A discussion is presented of the outcomes of the collaborative effort and possibilities for the future. Profiles are given of specific projects at the Arcadia and Three Rivers Centers. Diagrams are presented of the factors that appeared to account for the outcomes obtained in each of the centers studied. (JD)

This case study focuses on formal agreements between a college of education and individual school districts. The Office of Field Experiences (OFE), founded at Eastern State University's College of Education in the 1960s, formally collaborated with five school districts to establish either teacher centers or professional development centers. Each of these formal collaborations, involving exchanges of resources to establish and maintain the centers, constituted a district-level interorganizational arrangement (IOA). Coordinators of the centers attended monthly OFE meetings. Additionally, OFE held its own retreat, special events, and workshops. The OFE represented a holistic IOA which formally and regularly brought together the coordinators of the separate district level IOAs. Part One of this case study presents a history of the IOA, its historical and institutional context, and the founding of the first centers. Part Two outlines the present configuration of the IOA, changes in objectives, key persons, resource changes, activities, barriers, facilitators, and dynamics between participants. Descriptions are also given of operations of the Cardon County Center and the Hanburg County Center. In Part Three, outcomes are described for the IOA as a whole and for the Cardon and Hanburg Centers. Another section presents a discussion of future possibilities for all units of the IOA. A presentation is given of three episodes which illustrate the interorganizational dynamics of the Eastern State University case. (JD)

Linking Agents, Networks, Organizational Communication, \*Private Colleges, Program Development, Regional Cooperation, Resource Centers, \*School Districts, Socioeconomic Status, Staff Development

This case study of an interorganizational arrangement (IOA) involves a set of school districts and a college of education located in one of the most affluent areas in the United States. The school districts had a reputation for being among the strongest in public education, and it was from these schools that the university drew teachers to become professors at the college of education. The history of the Eastern Private IOA, its roots in 1920, its founding, its decline, and its renewal in the 1940s are related. The institutional structure and procedures are described. Profiles of key personnel (graduate students, directors, school district superintendents, and a college president) are presented with descriptions of their individual activities and philosophies. In discussing the IOA, analyses are made of key events, management activities, the Fellows Program, research and written production, successful differences, barriers to collaboration, and intergroup collaborative activities. The dynamics of the IOA are examined, in particular the areas of conflict and consensus, bargaining and exchange, linkages, and knowledge transfer between participating school districts and the college. The future of the network is examined, focusing on the future socioeconomic context, institutional patterns, staffing, changing objectives, and potential resources. Descriptions are given of the Fellows Program and a writing consortium developed by the IOA. An overview is provided of the entire IOA network and how it is organized. (JD)

Planning, Organizing & Implementing Developmental Movement Skill Themes for Elementary School Children.

Pub Date—Oct 81

Note—14p; Paper presented at the Annual Conference of the Indiana Association for Health, Physical Education, Recreation and Dance (IN, October 30, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Curriculum Design, Developmental Stages, Elementary Education, \*Individualized Instruction, \*Lesson Plans, Movement Education, \*Physical Education, \*Sequential Learning, \*Skill Development, Student Evaluation, Teaching Methods

A four-step approach to planning and implementing a physical education program for children centers on a theme, through which movement skills are developed and refined. In preplanning, a scope and sequence chart are a means of providing a general overview of the school year and the progression involved from year to year. The second step involves observational assessment of pupils so they may be classified as being generally in the initial, elementary, or mature stage of development for the specific patterns being observed. This enables the teacher to implement specific strategies to advance the learner to the next level or stage of development. Once the entry level of the student has been determined, specific means are devised and implemented to foster improvement. It is important that specific skill objectives for each lesson be determined, and that the teacher know when to move on to the next skill theme. The lesson generally consists of four parts: introduction, review of learned skills, the body of the lesson itself, and a summary of the lesson. The final phase consists of continual observation and refocusing of the lesson to achieve a balance between success, challenge, and failure. To accomplish this, constant evaluations and reassessments of pupil progress, interest, and needs enable the teacher to be flexible and to create the most effective learning environment. (JD)

Teacher Supply and Demand in the ACT Schools

Authority: Implications of Enrollment Projections 1981-1986. Research Report.

Australian Capital Territory Schools Authority, Canberra.

Report No.—ISBN-0-642-89514-7

Pub Date—May 81

Note—71p.

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

Descriptors—Elementary Secondary Education,

\*Enrollment Trends, Foreign Countries, Long Range Planning, Part Time Faculty, \*Policy Formation, \*Teacher Distribution, Teacher Employment, Teacher Placement, Teacher Promotion, Teacher Retirement, \*Teacher Supply and Demand, \*Teacher Transfer, Tenure, Trend Analysis

Identifiers—\*Australia (Australian Capital Territory)

An analysis of policy options concerning teacher supply and demand in the A.C.T. [Australian Capital Territory] Schools Authority from 1981 to 1986 is presented. Projections have indicated declining demand for primary school teachers, fewer promotions in primary schools, and the necessity of relocating teachers to areas of expansion. However, comparatively higher annual replacement demand (20 percent) for teachers in the A.C.T. Schools Authority may relieve the initially dismal prognosis for teacher demand suggested by enrollment projections. Opportunities for promotion during this period are considered, and it is concluded that a "stationary state" in the aggregate demand for teachers need not imply stagnation in promotional opportunities for teachers. Primary teachers and principals are warned to be alert to, and prepared for, the necessity for large teacher redeployment among geographical regions within the A.C.T. The necessity for the geographic relocation of some primary and secondary school teachers generates pressure for immediate planning of alternative teacher resource utilization strategies. Policy options considered in this report include: permanent part-time employment for teachers; teacher exchanges; voluntary early retirement schemes; incentives for professional renewal programs; and the issue of voluntary versus compulsory teacher transfers. grams, Vocational Education  
Identifiers—\*Texas

This guide lists approved teacher education programs in Texas institutions and is divided into three parts: (1) college approved programs; (2) approved programs for areas of specialization; and (3) approved competency-based programs. Part One of this guide alphabetically lists the Texas institutions with approved teacher education programs. Certification officers were from colleges and universities in Texas. Under each institution are listed the approved programs as of September 1, 1981. Included in this information is the funding source of the institution, the highest academic degree offered, and the accrediting agencies, as well as the name of the dean and the accrediting officer. Part Two lists institutions with approved specialized programs. This listing is organized alphabetically by the type of specialty and includes the areas of elementary education, secondary education, special education, special services, and vocational education. Part Three provides a list of colleges and universities that have competency based programs approved by the State Board of Education from June 1972 through September 1, 1981. Included in this list are the approval date and the competency based programs offered. (JD)

Identifiers—\*Netherlands

In the Netherlands, the immediate support and coaching of primary schools and kindergartens is institutionalized in a nationwide network of local and regional school support agencies. This research study sought information about the role and characteristics of external consultants and their relationship to the school. Explorative case studies were conducted in eight schools, using interviews, questionnaires, observation, and free data gathering. The theoretical framework for school innovation support by consultants is described, and the activities of consultants and school personnel are discussed. Descriptions are given of the characteristics of the schools, the innovation activities undertaken, and the characteristics of the consultant and his relationship to the school. An analysis is presented of the findings on the following research questions: (1) How do consultants plan their actions along all the relevant action dimensions?; (2) What activities are done by consultants to support the school and the innovation process? Can clusters of activities be distinguished?; (3) What activities are done by consultants to support their relationship with a school? Can clusters of activities be distinguished?; (4) Is it possible to identify mutually different groups of consultants?; and (5) What variables within the school innovation support situation can be identified as probable factors causing differences in support activities? Descriptors—Basic Skills, Classroom Environment, Elementary Education, Elementary School Teachers, \*Inservice Teacher Education, \*Magnet Schools, \*Multicultural Education, School Desegregation, Teacher Administrator Relationship, \*Teacher Characteristics, \*Teacher Effectiveness, Teaching Methods

Classroom practices of selected teachers in two school districts were studied to provide a research base for the development of inservice training in newly desegregated or multiethnic schools. This report discusses the second study, which tested the validity of implications drawn from the first study. Schools in the second study had initiated magnet programs with two formats: an extended learning program for gifted children; and a back to basics program. Seven teachers from two elementary schools participated in the study. Ethnographic observers, film, and self-report by the teachers were used to collect data. Following a description of the characteristics of the teachers and classrooms, observations on findings in six areas are presented: (1) instructional practices; (2) classroom management; (3) encouraging social interaction; (4) inculcation of values; (5) involvement with the community; and (6) followup discussions with the teachers. A comparison of the findings in the two studies showed the low priority of inservice training in school districts, the noninvolvement of the principals, and difficulties faced by teachers in achieving their needs in multicultural education methods. It is concluded that, since the proportion of minority students is increasing, schools must examine the components of successful multiethnic school environments and must address questions that have, in many cases, been avoided. Descriptors—\*Classroom Techniques, \*Inservice Teacher Education, Program Effectiveness, \*Reading Instruction, \*Remedial Reading, Secondary Education, \*Secondary School Teachers, Student Teacher Relationship, \*Teacher Workshops, Teaching Styles

This paper discusses the Study of Teaching Basic Reading Skills in Secondary Schools, a project that devised an inservice training model for secondary school teachers who needed skills in reading instruction. In Phase I of the study, 46 secondary reading classrooms were observed to examine the relationship between teaching practice and student gains in reading. The results of this phase provided specific guidelines for effective instructional strategies to use with secondary remedial reading students. Needs were found in the areas of interactive instruction, supportive behavior, off-task activities, and organization and grouping. In Phase II, the findings were translated into a series of workshops for 47 teachers in the districts where Phase I was conducted. One neighboring district was also included. Half of the teachers, the treatment group, were trained; the other half, the control group, received no training until the end of the experiment. Twenty-two of the 24 treatment teachers changed behavior in recommended ways, and their students made more reading gains than did students of teachers in the control group. Appended to the paper are tabular data supporting the findings and a description of the seven workshops in Phase II. (Author/FG)

Identifiers—\*Kentucky

The materials in this document describe the professional education component of the preparation of secondary school teachers in Kentucky as envisioned by high school teachers, teacher educators, school administrators, and representatives of professional organizations and learned societies. The primary impetus for the revision of regulations came from public school teachers in response to a perceived schism between public expectations of the teachers' role and their own preparation for that role. The eight teaching competency areas described here present a sequential curricular framework that incorporates basic principles of both theoretical and experiential learning. The competency areas are: (1) orientation to secondary education; (2) foundations of learning and human development; (3) generic teaching skills; (4) individualized educational planning; (5) teaching strategies and methods; (6) human interaction in the school; (7) the professional teacher in the school; and (8) student teaching. Within each area, minimum competencies are suggested, and field or laboratory experiences are listed. Thirty needs and concerns that had been identified by classroom teachers are related to the applicable competencies. (FG)

Considerations of Sex, Sex Role, and Competition Anxiety.

Note—13p.; Paper presented at the Annual Conference of the Indiana Association of Health, Physical Education, Recreation, and Dance (West Lafayette, IN, October, 1981).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Androgyny, Athletes, Athletic Coaches, \*Fear of Success, \*Females, \*Goal Orientation, Physical Education, Self Evaluation (Individuals), Sex Differences, \*Sex Role, \*Social Attitudes, \*Women's Athletics

Recent growth of sport psychology research has led to studies of the attitudes of women in sports. Using the Bem Sex Role Inventory and the Sport Competition Anxiety Test with 736 male and female subjects, one study found that: (1) Males with a masculine self description had the lowest levels of sports anxiety; (2) The "feminine" males had a very high level of sports anxiety; and (3) All females, regardless of sex role endorsement, scored at about the same level. Another study of female high school volleyball teams found that, regardless of the subjects' age, sports experience, and team status, masculine characteristics were attributed to both male and female team coaches. Schema theory (a branch of cognitive psychology that accounts for mental structures that represent internalized knowledge and interpretation) can be used to interpret these findings. Since all athletes have learned the ubiquitous schema that sports are masculine, it follows that males with feminine self descriptions would have higher levels of sports anxiety, and that females, conditioned to think of sports as masculine, are all equally anxious to satisfy their sex role schema. This rationale provides some answers for questions about psychological responses to physical education and about students' role expectations for coaches, but more investigation in these areas is needed. Identifiers—\*Georgia

This guide provides an outline of the policies, procedures, responsibilities, and functions of Georgia agencies and individuals participating in laboratory experiences for teacher education students. In Unit I, the policies of the Georgia Board of Education relating to laboratory experiences are presented. Criteria are listed for: professional laboratory experiences; selection of professional laboratory centers; selection of supervising teachers; and the preparation of supervising teachers. Policies regarding the roles and responsibilities of professional laboratory participants and other services are also presented in this unit. The second unit defines the roles and responsibilities of the Georgia Board of Education, college faculty, and public school personnel in professional laboratory experiences. Procedural steps in initiating laboratory experiences are outlined in Unit III: selection of sites; placement of students; and cooperative evaluation. Appendices contain a glossary, a sample agreement between state agencies (a county board of education and a state college), and a list of Georgia teacher education institutions. (FG)

Judged Similarity of Aptitude and Achievement Tests in Mathematics.

Pub Date—81

Note—10p.; Paper presented at the New England Educational Research Organization (Lenox, MA, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Achievement Tests, \*Aptitude Tests, Comparative Analysis, \*Item Banks, \*Quantitative Tests, Secondary School Mathematics, \*Specifications, \*Test Format, Test Items

Identifiers—\*Scholastic Aptitude Test

This study attempts to establish the ability of a panel of five judges with varied mathematics background to distinguish between two types of mathematical tests by separating their component items when they are presented in a mixed pool of aptitude and achievement tests. Typically, the two tests show high correlation. The judges showed about 70% success in their judgments, which points to a clear distinction between the tests. In examining the items which were consistently misclassified, the general conclusions were that certain achievement items exhibit aptitude-item characteristics, and vice-versa. The use of more formal specifications might be useful in controlling the correlation between the tests. However, as mathematics curricula introduce formerly advanced topics at earlier times, such specifications will probably become increasingly difficult to establish. (Author/AL)

Descriptors—\*Academic Achievement, \*Classification, \*Classroom Research, Data Collection, Intermediate Grades, Learning Processes, \*Measurement Techniques, Process Education, Science Education, \*Student Behavior, \*Student Characteristics, Teacher Behavior, Teaching Methods, \*Time on Task

Identifiers—Generalizability Theory

This paper advocates categorization of engagement on the basis of a logical relationship with the outcomes of a study and the use of student attributes that are logically related to engagement and/or achievement as covariables. Results from a study involving nine engagement categories, measures of formal reasoning ability, locus of control and science achievement are used to highlight issues

related to student engagement measures. The possibility of increasing the reliability of selected engagement categories through manipulation of student behavior is discussed. Generalizability theory is used to plan reliable data collection procedures and to assess the reliability of engagement measures. (Author)

Descriptors—\*Academic Achievement, Course Evaluation, Difficulty Level, Higher Education, \*Learning Processes, Literature Reviews, \*Retention (Psychology), \*Student Attitudes, \*Study, Test Format, \*Testing, \*Test Use, Undergraduate Students

A review of the literature on the influence of testing on learning and retention reveals the need for more comprehensive research findings in this regard. This study was designed to investigate further the direct effects of tests in contrast with no tests on learning and retention in ongoing college-level classes with both the instructor and the students going about the daily business of teaching and learning. It probed further to determine if it was taking the test or studying for it or both which effected learning and retention if indeed such effects were replicable. Test type (multiple-choice and short answer) and item complexity (knowledge and concept) were also variables studied. Moving from the cognitive domain to the affective domain, this study focused on the students' feelings when they did/did not have to study for and take a test. Analyses of the resulting data showed that students who studied for and took a test not only achieved more but also retained their learning longer than students who "studied in order to learn than for a test." However, student ratings of construction were lower when students were tested. (Author/AL)

Descriptors—\*Cluster Analysis, Factor Analysis, \*Research Methodology, \*Statistics

Identifiers—Empirical Analysis, \*Hierarchical Cluster Analysis, \*Matrix Operations, Order Analysis

Outlining a cluster procedure which maximizes specific criteria while building scales from binary measures using a sequential, agglomerative, overlapping, non-hierarchic method results in indices giving truer results than exploratory factor analyses or multidimensional scaling. In a series of eleven figures, patterns within cluster histories reveal the structure of the data. If true clusters exist in the data, one way they reveal themselves is by a sharp drop in the index values as an item outside the true cluster is added. In spatial terms, this represents a "moat" surrounding the cluster; a low region of density between regions of higher density which are the clusters themselves. A series of analyses were conducted using artificial data which had a known cluster structure. The Birnbaum test model was used to produce unidimensional scales of three sizes, which were combined with six outliers to make the raw data for analysis. Means, variances, and distribution shapes were varied for the Birnbaum parameters of difficulty, ability and discrimination. (Author/CE)

Identifiers—Elementary Secondary Education Act Title VII, \*Hartford Public Schools CT

An evaluation report of second year accomplishments at the Ann Street Bilingual School is presented. Objectives are established for students, instructional personnel, and parents at the school, the testing programs, standards set, and results for each are explained. Kindergarten students were expected to meet established standards in Spanish and English language skills and demonstrate high self concepts. Students in grades one through seven were expected to improve English and Spanish language skills and proficiency. They should have improved their levels of math, science, English reading, and social studies skills. These improvements are compared to the level of students in other Hartford bilingual programs. The instructional personnel were to strive for improved classroom teaching, student learning, and to improve professionally. They were expected to contribute their services for the success of the school program. The parents of students were to visit the school, participate in school activities and parent education programs. The most important result is the general superiority of Ann Street students' skills in Spanish reading, oral English, and oral Spanish over their counterparts in other Hartford bilingual schools. The expectations for improvement in English reading were not met. Establishment of a reading resource room is recommended. (DWH)

Descriptors—\*Business Education, High Schools, \*Program Evaluation, \*Rural Schools, Secondary Education

Identifiers—\*Colorado, \*Model Business and Office Block Program

Program supervisors for Business and Office Education (BOE), State Board for Community Colleges and Occupational Education completed a second year evaluation of Model Business and Office Block Program for rural schools. Data analysis and report writing were completed by a private consultant. On site visits were conducted and performance tests were administered. The case studies identified the improvements in the program. These included: increased capability for delivery cap-stone experiences such as cooperative education or stimulation, and an improved instructional management system. The testing indicated no significant differences among students in this year's key school program as compared to the control school utilized in last year's evaluation. Weaknesses or areas of improvement identified in this year's Model BOE Block Program as contrasted with those identified last year include: lower student performance on typing speed tests and fewer students enrolling in the business and office program having a career objective compatible with training they received. The evaluation ascertained no significant difference in student performance on the Civil Service and typing tests. The program faculty's utilization of the advisory committees was the same as last year and needs improvement. Administrative support for the program was positive. (Author/DWH)

Identifiers—\*Research and Development Utilization Program

An examination of the effect of intervention strategies utilized in the Research and Development Utilization (RDU) Program on school improvement outcomes was the subject of this document. The basic Federal/State approaches to support local school improvement efforts are a coercive/manipulative approach, direct support, or indirect support. Indirect support may take the form of technological or process/people support. RDU strategy, however, emphasizes voluntary involvement and small amounts of federal seed money funding. The major emphasis is on providing technological and process/people support in a local school improvement effort. RDU intervention combines strategies which produce important predictor variables. These variables are product quality, product characteristics, and breadth of participation. The degree to which the outcome is achieved is largely a function of the internal processes and the less manipulable site characteristics. (DWH)

Descriptors—\*Evaluation Methods, \*Evaluative Thinking, \*Program Evaluation

Identifiers—\*Evaluation Utilization, \*Using Evaluation Data Form

The Using Evaluation Data Form (UEDF) represents a psychological lever for getting a program's decision maker to consider major evaluation findings. The form may be used at any point of the evaluation process when sufficient data exist to support a finding deserving of action or reaction by the project staff. By local policy, it is required for inclusion in all end-of-year evaluation reports. Findings are results of evaluation activities conducted throughout the year. The process of the form's use is initiated when the evaluator lists, in draft form, findings the evaluator desires to be considered for possible action by the project manager. Findings are reported descriptively rather than judgmentally. In most instances, the evaluator will discuss these findings with the project manager. Each finding is addressed by the manager, indicating the action taken, or to be taken. Justification for no action or action contrary to the findings, must be explained. The "Action" column represents the project manager's reply to the evaluation findings. An example form is attached for review. The form is effective to the extent that the system requires the program people be committed to a course of action in response to evaluation data. (Author)

Identifiers—Oregon, \*Oregon (Eugene)

The 1990 Plan is a comprehensive planning guide for the local governments of the City of Eugene, City of Springfield and Lane County, Oregon. The Metro Area General Plan is of significance and concern to the school districts of Eugene, Bethel and Springfield. A conflict of authority is created by mandating that control of major public investments be both planned and coordinated on a metropolitan wide basis. The actual control over major public investments does not reside in one authority, therefore the statutory right of the school board to locate schools is abrogated. Reported findings in the public utilities, services and facilities section are unsubstantiated in fact, and do not make a clear distinction between elementary schools and community. Without clear district policy on the provision of neighborhood schools, the question of whether the plan can mandate a policy to the school district based on citizen perceptions of past practice arises. The school district should find it possible to resolve these concerns without resorting to legal solutions. (DWH)

This is a manual designed to accompany staff development sessions in which research and evaluation personnel will discuss key areas with administrators, evaluators in schools, and area office personnel. Forms and methods for assessment and reporting of pupils' progress in a local school's instructional program are illustrated. The state requirements in regard to on-going evaluation are enumerated. The methods of establishing an evaluation committee and the functioning of it to review program implementation, quality, outcomes for students and staff, and the match between budget and expenditures are outlined. Specific forms are reproduced and directions for their use are included. Program evaluation requires a sound communication network among staff to be effective. This manual provides detailed instructions for establishing an effective evaluation committee. (DWH)

Identifiers—\*Basic Skills Improvement Policy (Massachusetts)

The Bureau of Research and Assessment developed a two-staged approach for assessing speaking skills. All students were to be initially rated by two of their current classroom teachers (teacher observations). A limited number of students would be assessed by a rater in a focused measure of student performance (one-on-one ratings). The purpose of the 1981 study was improvement of materials used to train teachers and individual raters. Training materials were substantially revised. Reliability of teacher ratings and individual raters were studied. The one-on-one rating was found to be a more valid measure of speaking skills. It is the preferred method because it is standardized and a reliable measure when administered by trained, approved raters. Results can be reviewed because the measure is obtained in a controlled setting. If necessary, ratings can be conducted by an outside agency and can

be audited and verified. The one-on-one rating measure is not ready for dissemination at this time. Training materials need more revision and the method for determining whether raters will be reliable needs to be expanded and tested. (DWH)

Descriptors—\*Abstract Reasoning, \*Black Students, \*Cognitive Ability, \*Intelligence Differences, \*Racial Differences, Secondary Education, Standardized Tests, \*White Students

Identifiers—\*Jensen (Arthur R)

Arthur Jensen has argued that genetic differences in abstract reasoning ability, not cultural bias in the test item, are the causes of differences in standardized test performance between American Blacks and Whites. He used a study by Frank McGurk to support his argument. McGurk's study used test items judged most cultural or least cultural. These were administered to a sample of pairs of black and white high school seniors matched on age, educational status, and other demographic characteristics. The authors analyzed the McGurk study. They found an analysis of the data demonstrates that black-white differences are constant across the major types of tasks used in tests of mental ability. Abilities tested are association note memory, abstract reasoning and problem solving ability. (DWH)

**On the Distinction Between Quantitative and Qualitative Research.**

Pub Date—[79]

Note—15p.

Pub Type—Opinion Papers (120)

## EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Measurement Techniques, \*Research Methodology, Scientific Methodology

Identifiers—\*Metaphysics, Pragmatism, \*Qualitative Research, \*Quantitative Research

Quantitative and qualitative research are differing modes of measurement, one using numbers and the other not. The assignment of numerals to represent properties enables a researcher to distinguish minutely between different properties. The major issue dividing these approaches to empirical research represents a philosophical dispute which has traditionally been resolved in one of four ways. In classical metaphysics, qualities have been conceived as objective, non-natural properties. They are seen as objective facts which reside outside of nature and cannot be known through experience, or studied scientifically. In phenomenalism, qualities have been conceived as subjective and could not be studied rationally or scientifically. Subjective, rather than objective, reality is important to this method. In positivism, qualities have been conceived as objective natural properties ultimately reducible to quantities. This view considers qualities as such to be a function of perception. Abstract ideas are meaningful to the positivist only if they can be defined in terms of concrete, particular things. The pragmatic view maintains qualities can be studied scientifically, as well as rationally. This view thinks of the empirical world as encompassing features that are inherently abstract. The author believes pragmatism provides the strongest case for qualitative research. (DWH)

This handbook provides guidance to district-wide steering committees about how to compile a database. A district database should contain two types of information including general contextual data that are broadly germane and relevant to all programs. The second type of information is about specific programs. The database should begin as a minimal document to which information is added during the period of evaluation. Several questionnaires, opinionnaires, and surveys are illustrated to be administered as shown or adapted to individual district needs. These instruments are designed for administration to the community, students, and staff. The district database may be used as a planning or information document. (DWH)

**Identifiers—**Diagnostic Mathematics Inventory, \*Kentucky State Department of Education, Prescriptive Reading Inventory

The Kentucky Department of Education has a responsibility to provide technical assistance and consultative services to local school districts. Descriptions of the state selected diagnostic reading test, the Prescriptive Reading Inventory (PRI) and the diagnostic math test, the Diagnostic Math Inventory (DMI), are explained. Each school district in the state has the option of utilizing the state diagnostic test services or choosing an appropriate alternate form of diagnostic assessment. These tests are to be administered to students identified by screening instrument or teacher judgement as being most in need of assistance. Materials are available for grades four, six, eight, and eleven. Detailed instructions for training examiners and proctors are included in the manual. A description of the PRI and DMI, along with report and scoring forms are included. A scoring service is provided by the state. Recommended activities of the Educational Improvement Program coordinator are listed. (DWH)

**Identifiers—**\*Elementary Secondary Education Act Title I, External Evaluation, Qualitative Analysis, Quantitative Analysis

Prepared as part of a United States Education Department project on evaluation in early childhood Title I (ECT-I) programs, this is one of a series of resource books developed in response to concerns expressed by state and local personnel about early childhood Title I programs. By considering: (1) who will use the evaluation results; (2) what kinds of information are users likely to find most helpful; (3) in what ways might this information aid in program improvement; and (4) are the potential benefits substantial enough to justify the cost and effort of evaluation. The purpose is not to be a comprehensive technical manual, but rather to help local school personnel identify issues that might merit further examination and to guide the choice of suitable evaluation strategies to address those issues. From the initial program review methods, citing the human resource requirement and procedures for

conducting self-study and outside review, the document outlines quantitative methods (such as structured process evaluation, product evaluation and process-product evaluation) and qualitative methods (investigative evaluation, ethnographic evaluation, and documentation) and lists reasons to choose a method and outlines how to implement the plan. The underlying theme would have the reader use this as a springboard for beginning evaluation. (CE)

**Identifiers—**\*Informed Consent, Medical Record, \*Patients Rights

The goal of this study was to produce an improved medical consent form. This form was designed to record the informed consent discussion between doctor and patient which should include an explanation of what procedure will be performed, by whom, why, the risks, and the alternatives. Patients, doctors, and hospitals may all benefit from the use of consent forms. Three considerations in devising a consent to surgery form included the best way to improve readability for patients, specificity of information, and improvement of design to make it more frequently utilized. The revised form was evaluated by lawyers, nurses, doctors, and subjects from the general public. The author believes ideal documents cannot be produced until all patients are willing to be fully informed and all doctors are willing to inform them. (DWH)

**Descriptors—**\*Early Childhood Education, \*Evaluation Methods, \*Federal Programs, \*Mathematical Models, Program Evaluation

**Identifiers—**\*Elementary Secondary Education Act Title I, Evaluation Problems, \*Value Added  
This resource book examines the value-added model approach when used in assessing early childhood Title I (ECT-I) programs. The evaluation design must be able to separate program effects from natural maturation. The basic idea behind the value-added model builds on the notion of natural maturation. The major strengths are that it does not require a comparison group or the use of a norm referenced test. The major weaknesses are its usefulness only for the assessment of skills or attributes which show a natural development with age over the duration of the program. Selection procedures may disguise the relationship between age and skill development among a particular group of program participants. Finally, it can require complex statistical calculations. This method attempts to derive a great deal of information from a situation with little data and little external control. The validity of results from the value-added model may be questioned in situations where one wishes to assess the short-term impact of an ECT-I program and the available sample size is relatively small. A possible solution is pooling data across multiple years of the program or across several sites that are implementing similar activities. (DWH)

**Descriptors—**\*Change Agents, Evaluation, \*Evaluators, \*Measurement Techniques, \*Reliability, Semantic Differential  
**Identifiers—**\*Evaluation Reports, \*Evaluation Utilization, Maine Health Education Resource Center

A study was conducted on the measurement of the characteristics of innovation. The results or specific recommendations of evaluation studies may be assessed for their likelihood of adoption and implementation based on these characteristics. As the recommendations are perceived more positively, the level of utilization should increase. The semantic differential technique developed by Osgood, Succi, and Tannenbaum was used to measure the characteristics in this study. The Statistical Package for the Social Sciences Reliability sub-program was used to assess the internal consistency of the scales to identify which recommendations are positively perceived. With this knowledge, an evaluator/change agent may be better able to judge where efforts should be directed. (DWH)

**Identifiers—**\*Project Head Start

The overall purpose of the national Head Start evaluation is to assess the impact, on the children and parents being served, of: (1) the educational services component of Head Start, and (2) a new demonstration program within Head Start, Basic Educational Skills. The evaluation deals with a total of 65 Head Start programs and their families. This longitudinal study will focus on the preschool and elementary experiences of three groups: those in typical Head Start programs, those who are eligible but not enrolled in Head Start, and those who participate in the Basic Educational Skills program. The dominant issue is the relationship between program delivery and program effects on a national scale. Site visits to selected Head Start programs were conducted in spring, 1979. The results of these site visits are reported in terms of determinants of implementation, characteristics of the program and its context, implementation/process variables, curriculum resources, parent involvement, continuity, and opportunity to benefit. Future phases of the evaluation are described. (BW)

The National Assessment of Educational Progress (NAEP) methods and procedures used in the 1979-80 assessment of reading and literature are described. The objectives of the assessment are categorized into four main areas. These include values reading and literature, comprehension of written work, response to written work, and application of study skills in reading. The redevelopment of objectives, development of exercises which measure performance against those objectives, the preparation of assessment materials, sampling, data collection, scoring, data analysis, and reporting are outlined. The primary type of information provided in this report is a description of procedures used in the assessment program. Appendices include results for population subgroups, sample forms used to obtain background information, computation of achievement measures, and a glossary of national assessment terms. Arguments against competency testing surface continually, and classic counter-arguments reoccur. Nevertheless, minimum competency testing and other accountability efforts have much public support. Those claiming that the tests are not relevant or do not have predictive validity, also say they are

coachable and biased. Answers are given to these arguments; along with three situations of testing "wronged students": (1) by limiting a student's opportunities; (2) by risking psychological health; (3) by invading privacy and violating confidentiality. Besides educational programs and teachers being harmed, there is claim that the tests, being conceived by the upper middle class are promoting elitist values. These attacks are presented, the objections outlined, legitimate failings corrected and forceful, logical arguments presented in favor of testing. The document grants that access to the sources of relevant skill and information is unequal. However, in the long run, society will benefit not by giving special treatment to all members of special groups without regard to the opportunities that specific individuals in the group have had, not by offering preferential treatment on the basis of some general inherited characteristic, but by equalizing the opportunities for all people. Descriptors—\*Academic Standards, Basic Skills, Competency Based Education, Elementary Secondary Education, \*Graduation Requirements, \*Minimum Competency Testing, \*Remedial Instruction, \*Remedial Programs, Testing Programs

By 1985, nearly half of the nation's public school students will be required to pass a minimum competency test (MCT) for high school graduation. Supporters of objectives underlying the MCTs suggest that the tests will force school systems to take their responsibilities to all children more seriously. Critics argue that students who fail will become scapegoats for school system failure, with few, if any, new efforts made to meet their needs. The purpose of this study was to examine the validity of the critics' argument. For students who fail MCTs, are remedial services provided to help them pass the tests on later attempts and, if so, who is paying for these services? Analysis of data collected from thirteen states chosen for having an MCT program statewide, underway at survey time, and MCT results determining high school graduation eligibility, revealed that most students failing the MCT the first time and remain in school eventually meet the competency requirements. Nevertheless, not all students pass, and failure rates are higher among minority students than among nonminority students. Potential problems were identified relating to the "required by law," "proportionate share," and "comparability" provisions of Title I in a section on funding remedial activities. (Author/CE)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Administrators, \*Classification, \*Colleges, \*Evaluation Methods, Higher Education, \*Program Evaluation, \*Student College Relationship, \*Student Personnel Services, Two Year Colleges, Universities

The focus of this report is on student service programs of colleges and universities with a student population between twenty and thirty-five thousand. Using 39 senior colleges and 16 junior colleges, administrators of academic affairs and student services areas were asked to categorize evaluation approaches they had participated in. Respondents were asked to indicate the purpose of evaluation, the "advance organizers" or types of variables used to determine information requirements, the source of questions addressed in evaluations, the actual questions answered by evaluation, and the instruments

used. Results have it that to effectively study student services at this target level, internal committees and external consultants may evaluate different aspects of the program. Just as in a traditional academic evaluation, policies, procedures and lines of authority must be established as well as a rigid chronological step-by-step procedure must be outlined. (CE)

Identifiers—\*Adaptive Testing, Tailored Testing, Test Length

Conventional mastery tests designed to make optimal mastery classifications were compared with fixed-length and variable-length adaptive mastery tests. Comparisons between the testing procedures were made across five content areas in an introductory biology course from tests administered to volunteers. The criterion was the student's standing in the course, based on examinations and laboratory grades. Results showed adaptive tests resulted in mastery classifications more consistent with final class standing than those obtained from conventional tests. This result was observed within individual content areas and for discriminant analysis classifications made across content areas. This result was also observed for two scoring procedures used with the conventional tests. Results indicated that there was no decrement in the performance of the adaptive test when a variable termination rule was implemented. Further analyses shows that the adaptive tests administered differed from the conventional test for each content area as a function of achievement level. This evidence was used to explain why the adaptive tests resulted in more valid decisions than the conventional procedure. Variable-length adaptive mastery tests can provide more valid mastery classifications than "optimal" conventional mastery tests while reducing test length an average of 80% from the length of conventional tests. Self-concept: The Construct Validity of the Self Description Questionnaire.

Pub Date—30 Sep 81  
 Note—46p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—\*Academic Achievement, Factor Structure, Foreign Countries, Intermediate Grades, \*Locus of Control, Private Schools, Public Schools, \*Self Concept, \*Self Concept Measures, \*Sex Differences, \*Test Validity

Identifiers—Australia (Sydney), Likert Scales, \*Self Description Questionnaire

The Self Description Questionnaire (SDQ) is a multidimensional instrument designed to measure seven facets of self-concept hypothesized in Shavelson's hierarchical model. The SDQ, along with measures of attributions and academic achievement, was administered to primary school students from two quite diverse populations. Separate factor analyses of responses from the two groups were quite similar and clearly demonstrated the seven factors that the SDQ is designed to measure. The small correlations among the different dimensions were similar for the two groups and consistent with the hierarchical structure in Shavelson's model. Consistent and predictable correlations were also observed between the different self-concept dimensions and: (1) attributions of responsibility for academic outcomes; (2) academic achievement; and (3) the sex of the student. Somewhat smaller sex differ-

ences were observed for students who attended single-sex classes suggesting that they might be using a different reference group in forming their self-concepts. Overall, these findings provide compelling support for Shavelson's model of self-concept and the construct validity of the SDQ. (Author)

Person fit in the Rasch one parameter model is investigated. The first set of data deals with grade 3 students responding to the mathematics computation and reading vocabulary subscales of the Comprehensive Test of Basic Skills Forms (CTBS/S). The second set of data deals with grade 3 students responding to the Basic Skills Assessment Program pilot testing on reading and mathematics statewide objectives. The only three variables available for study with these samples were ability, sex, and race. Four tables are given to relate the CTBS/S scores with the South Carolina Basic Skills Assessment Program scores. Such things as the proportion of male/female misfitting subjects and proportion of male/female total sample and these proportions divided among blacks and whites are given. Reasons for misfits analysis and cautions about interpreting such tables are also outlined. (CE)

Reliability and Validity Issues Associated with the McLeod-Hawley Index of Professional Orientation.

Pub Date—81

Note—52p.

Pub Type—Reports - Research (143)

**EDRS Price - MF01/PC03 Plus Postage.**

Descriptors—\*Measures (Individuals), \*Professional Personnel, Statistical Analysis, \*Test Reliability, \*Test Validity

Identifiers—\*Difference Scores, McLeod Hawley Index of Professional Orientation, \*Professionalism

The professional orientation difference approach was operationalized as a stress on the importance of intellectual activity, autonomy, service and influence, with de-emphasis on the monetary, prestige, security and human relations aspects of a job. As a difference score, the index was subject to special reliability problems. This analysis identified six factors associated with the index. These included importance of expressiveness, learning, human relations, advancement, job security, and influence/prestige. Criterion variables were used to test the validity of these factors as professional orientation components. The influence/prestige factor was positively related to experience, organizational involvement, and management job activity variables. The advancement, job security, and learning factors were negatively related to education, experience, and organizational involvement. Expressiveness was unrelated to the criterion variables, while human relations was negatively related to income. The author concluded a traditional difference score approach to a professional orientation measure was unreliable. Results argue for a temporal notion of the professionalization process assuming that an orientation toward human relations, advancement, security, and prestige job aspects may be a necessary prelude to a stress on autonomy, expertise, service, and commitment. The validity of a particular professional orientation measure should not be automatically assumed. (Author/DWH)

A Bayesian Method for Assigning Course Grades.

Pub Date—81

Note—20p.; Paper presented at the Annual Meeting of the New England Educational Research Organization (Lenox, MA, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Evaluative (142)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Academic Achievement, \*Bayesian Statistics, \*Grading, Mathematical Formulas, Probability, \*Student Evaluation

The use of Bayesian methodology to assign grades in classroom situations is presented. Assigning a grade is viewed from a criterion, as opposed to norm, referenced perspective. Criteria include mastery of some proportion, determined by the teacher, of the subject matter covered in a course. Different levels of mastery are deemed possible and, therefore, the assignment of different grades to different students may be appropriate. A prior probability distribution is assigned to the level of mastery, in terms of proportions, of each student at the outset of the course. After the first test is administered in the course, a likelihood distribution is obtained for each student. This distribution reflects the probability that the observed score would have been obtained, given each previously specified level of mastery. A posterior probability distribution on level of mastery is obtained for each student by combining the prior and likelihood distributions through the application of Bayes formula. For all subsequent tests, the posterior from the previous test is taken as the prior for the current test. A complete example illustrating the necessary calculations is included as well as a brief description of the Bayesian method. (Author/DWH)

Toward a Definition of "Good" Incident Dimension Congruence for BARS.

Pub Date—Mar 80

Note—21p.; Paper presented at the Annual Meeting of the Southeastern Psychological Association (Washington, DC, March, 1980).

Pub Type—Speeches/Meeting Papers (150) — Numerical/Quantitative Data (110) — Reports - Research (143)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Correlation, \*Factor Structure, Higher Education, Questionnaires, \*Rating Scales, Teacher Evaluation

Identifiers—\*Behaviorally Anchored Rating Scales, \*Dimensional Analysis

This study investigated the relationship between the dimensionality of behaviorally anchored scales during construction and during their use. It was hypothesized that as the agreement among raters in assigning behaviors to dimensions increased, there would be an increase in the stability of the structure of the dimensions and in their independence during use. Undergraduate students enrolled in two introductory history classes and five introductory psychology classes were administered a teacher evaluation instrument containing 60 behaviorally based items. These items represented five performance dimensions and four ranges of rater agreement. For the analyses, class means were subtracted for each item, items were factor analyzed, and interdimension correlations were computed. The results demonstrated partial support for the hypothesis. At the higher levels of agreement among raters, more of the original five dimensions were interpretable, and they were more independent. However, in none of the factor analyses were all of the original dimensions reproduced. It was concluded that the degree of agreement among judges during dimension construction did influence the ability of factor analytic solutions to represent the original dimensionality. However, high agreement does not guarantee the maintenance of dimension independence. (Author)

Validating Measures of Brinkmanship Behaviors.

Pub Date—81

Note—14p.; Paper presented at the Annual Meeting of the Mid South Educational Research Association (Lexington, KY, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

TM 810 960

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—\*Data Analysis, Measures (Individuals), Principals, \*Teacher Behavior, Teacher Discipline, Teachers, \*Test Validity

Identifiers—Authority, \*Teacher Brinkmanship

This study investigated the validity of measures of teacher brinkmanship behaviors. These are behaviors which challenge the authority system of the school while avoiding its negative sanctions. These acts are generally satirical in nature. The subjects were teachers and principals representing schools located in a metropolitan school system in the southern United States. The data were analyzed using an O-technique factor analysis. The theory differentiating three types of brinkmanship behavior may require further elaboration. The three types of behavior are differentiated by the degrees of compliance which they reflect. The types are "subversive obedience," "righttipping," and "boundary testing." The results suggest that the measures may require further refinement, although they were developed in a thoughtful, multi-staged process and they have been employed by several researchers in substantive studies. Validity of the SRBCSS for Hispanic and Anglo Gifted Students.

Pub Date—Aug 81

Note—21p.; Paper presented at the Annual Meeting of the American Psychological Association (Los Angeles, CA, August, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Academic Achievement, Anglo Americans, \*Behavior Rating Scales, Elementary Education, \*Ethnic Groups, \*Gifted, Hispanic Americans, \*Predictive Validity, \*Socioeconomic Status, \*Talent Identification

Identifiers—\*Scales for Rating Behavior Character Superior Student, Stanford Achievement Tests

The validity of a behavioral rating scale for identifying gifted and creative students was investigated for three ethnic groups by socioeconomic status. These groups were mid to high socio-economic status (SES) Anglo, low SES Anglo, and low SES Hispanic. The Scales for Rating the Behavioral Characteristics of Superior Students (SRBCSS) was studied to provide data about its utility in assessing giftedness. Data were examined to determine whether the SRBCSS differentially predicted scholastic achievement for different cultural or socioeconomic groups. Elementary school gifted Anglo and Hispanic students comprised the sample. All students were administered the Stanford Achievement Test (SAT). Regression analyses were computed between the SRBCSS and the SAT. Results indicated that the SRBCSS seemed to have minimal predictive validity for intelligence or achievement test performance by Anglo students. However, there may be value in its use in identification of gifted Hispanic students. The scale may also be useful in determining the differences in behavioral characteristics of giftedness among students of various sociocultural groups. (DWH)

Using Children's Self-Reports to Measure Attitudes: Factors Influencing a Recency Response Set.

Pub Date—Apr 81

Note—18p.; Paper presented at the Annual Meeting of the American Educational Research Association (65th, Los Angeles, CA, April 13-17, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

**EDRS Price - MF01/PC01 Plus Postage.**

Descriptors—Age Differences, \*Attitude Measures, \*Childhood Attitudes, Developmental Stages, Early Childhood Education, \*Response Style (Tests), \*Self Evaluation (Individuals), \*Testing Problems, \*Young Children

Identifiers—\*Recency Effect

Children's tendency to answer attitude questions in a biased manner, favoring latter response alternatives when two alternatives are presented in a forced-choice format, was investigated. Using a forced-choice interview format, children were asked questions concerning their attitudes toward mathematics. Each question contained two evaluative alternatives from which children selected in responding to the questions. The results supported

the hypothesis that three- to five-year-old children are more likely to choose latter response alternatives than are six- to eight-year-old children. Topic word abstractness was not found to influence children's use of the recency response set. In six- to eight-year-old children, understanding of the topic word concept was related to the frequency with which latter response alternatives were chosen. Caution is suggested in using orally-administered self-report methods to assess the attitudes of young children. Further research on the recency response set is recommended. (Author/AL)

Descriptors—\*Aptitude Tests, Armed Forces, Bayesian Statistics, \*Item Analysis, Latent Trait Theory, Maximum Likelihood Statistics, Research Design, Simulation, Test Items, \*Test Theory

Identifiers—Adaptive Testing, \*Item Calibration, Item Linking, \*Parameter Identification  
A simulation study to determine appropriate linking methods for adaptive testing items was designed. Three basic data sets for responses were created. These were randomly sampled, systematically sampled, and selected data sets. The evaluative criteria used were fidelity of parameter estimation, asymptotic ability estimates, root-mean-square error of estimates, and the correlation between true and estimated ability. Test length appeared more important to calibration effectiveness than sample size. Efficiency analyses suggested that increases in test length were several times as effective in improving calibration efficiency as proportionate increases in calibration sample sizes. The asymptotic ability analyses suggested that the linking procedures based on Bayesian ability estimation were more effective. The equivalent-tests method was no better than not linking. Bayesian scoring procedures were slightly superior to the others tested. Efficiency loss due to linking error was less than that due to item calibration error. Test length and sample size had a definite effect on calibration efficiency but no strong effects appear with respect to linking efficiency. For the systematically sampled data set, the anchor-test method produced the most efficient item pools in terms of linking efficiency. Bayesian scoring was preferred over the maximum likelihood scoring procedure. (Author/DWH)

Identifiers—Elementary Secondary Education Act Title I, Title I Evaluation and Reporting System  
Evaluations which describe and measure the impact of programs assisted under Title I are mandated by law. This evaluation is to be used in the decision-making process. A review of the literature on evaluation and instrumentation shows a paucity of descriptive information on early childhood programs funded under Title I. On-going evaluations of these programs are necessary. Services provided to pre-kindergarten, kindergarten, and first grade level students differ. Whole program efforts are offered at pre-kindergarten levels, while supplementary services are provided above and beyond children's regular school programs at the first grade level. Both whole program and supplementary program interventions are apparent at the kindergarten level. The

differences in the structure of interventions funded at these levels, combined with the differences in program goals, illustrate the ineffectiveness of a single evaluation scheme for all three levels. High quality instruments for use in testing young children are scarce. Evaluation models and guidelines by which early childhood programs may be assessed are needed particularly in areas where no adequate instruments are available. (DWH)

Identifiers—Error Analysis (Statistics), PLATO, \*Signed Numbers Operations

Error analysis performed on data sets revealed that seventh grade students used a variety of rules of operation for solving the signed-number arithmetic problems. The data sets were obtained from an experimental study in which students were randomly assigned to study either of two lessons written on a computer based education system. The two lessons used different conceptual frameworks. The verbal Postman Stories and the Number Line method. This paper deals with the early stages of learning in which the students applied different rules of operation. These systematic sources of variation in the data resulted in increased dimensionality. Moreover, the variety of algorithms (rules of operation) used by the students in both treatment groups supported the assertion that the two instructional methods were at least partially responsible for individual differences in information processing. Descriptors—Adult Counseling, \*Adult Literacy, Adults, Basic Skills, \*Functional Literacy, Minimum Competencies, \*Personnel Evaluation, Reading Tests, \*Test Selection, Writing Evaluation

This is a guide designed for professionals who need to assess the literacy ability of adults. The three general categories of literacy skills which are distinguished include generic literacy skills, everyday skills, and job-related skills. Functional literacy has been defined in various ways, therefore, the assessment of it is very difficult. The purpose of literacy assessment must be established before selecting the appropriate instrument. The criteria to be considered are usability, validity, and reliability. The decisions to be made before a specific test or assessment approach are identified relate to the categories of literacy, the purpose for testing, the uses and users of test results, examinee characteristics and logistics. General guidelines for reviewing existing published or unpublished tests are examined. These include preliminary screening and technical quality review. Assessment of everyday literacy activities may be determined through the use of one of several published tests designed for this purpose. Assessment of on-the-job literacy is usually limited to tests of clerical ability. Appendices to the guide include suggested readings on definitions of functional literacy, published tests of basic writing and reading skills, and procedures for scoring writing samples.

The District of Columbia Public Schools (DCPS) Dissemination Project examined its dissemination procedures and devised a more effective system of sharing information germane to the improvement of practice with school system personnel. A questionnaire entitled "Information Needs and Uses" was prepared and distributed to school system personnel. The survey was designed to assess the need, flow and use of information intended to improve the dissemination practices of educators in the DCPS. The groups responding to the survey included classroom teachers, librarians, counselors, resource teachers, principals, and central and regional administrators. The questionnaire is reproduced in this document along with statistical analyses of the responses. The four areas covered by the survey were information needs and obtainment, professional sources for securing new ideas, use and value of information sources and assistance in job-related information seeking. Demographic information was also requested of all respondents. (Author/DWH)

Descriptors—\*Academic Ability, \*Academic Achievement, Elementary School Mathematics, Grade 5, Group Dynamics, Instructional Design, \*Interaction, Intermediate Grades, Retention (Psychology), \*Small Group Instruction, \*Student Attitudes, Student Behavior

This study examined student aptitudes and student behaviors during small group interactions as mediators of the effectiveness of small group learning. The hypotheses to be investigated were that the effects of small group learning on student achievement are produced by students' participation in group interaction, and in the providing and receiving of higher-order explanations. High and low ability students are more often involved in this process than other students. A treatment and control group of fifth grade students completed ability and attitude pretests. The treatment group was trained in small group interaction. All students received regular mathematics classroom instruction. They worked on assignments in mixed ability groups of four students. Achievement, retention and attitude toward mathematics were assessed. A Mann-Whitney comparison showed that trained students participated in more task related interaction than control students. The effects of small group interaction depend on the ability level of the students. Interaction during small group work was most beneficial for low ability students. The study showed they can help themselves by teaching others. A high quality of interaction must prevail if the small group method is to be of maximal effectiveness. (Author/DWH)

Securing Local Cooperation in a National Evaluation: The Teacher Corps Evaluation Model.

SRI International, Menlo Park, Calif.

Pub Date—Apr 81

Note—16p.; Paper presented at the Annual Meeting of the American Educational Research Association (65th, Los Angeles, CA, April 13-17, 1981).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Data Collection, \*Educational Cooperation, \*Evaluation Methods, Models, National Programs, \*Program Evaluation

Identifiers—\*Teacher Corps

The methods used in the Teacher Corps Program Evaluation are based principally on the importance of securing the cooperation of local participants during data collection. Several principles concerning local cooperation were established and explained. These included encouraging active participation, encouraging local review of instruments, maintaining communication, establishing clear lines of communication and responding to concerns, providing and receiving feedback, and providing lead time before a data collection activity. Standards for maintaining rapport with various projects were established. Communication lines, properly established, facilitate continued cooperation. These techniques seem to have been successful because all projects have remained in the evaluation samples. Response rates for self-report questionnaires are high, indicating that participants value the evaluation as a means of expressing their views of the project and the program as a whole. The response rates to the questionnaires by teachers and administrators have been very high. (DWH)

Descriptors—\*Computer Assisted Testing, \*Criterion Referenced Tests, Grade 8, Junior High Schools, \*Response Style (Tests), \*Secondary School Mathematics, Test Validity

Identifiers—\*Individualized Consistency Index, PLATO, \*Response Patterns

Criterion-referenced testing is an important area in the theory and practice of educational measurement. This study demonstrated that even these tests must be closely examined for construct validity. The dimensionality of a dataset will be affected by the examinee's cognitive processes as well as by the nature of the content domain. The methods of extracting a unidimensional subset from an achievement dataset were studied. A second purpose was to apply a general technique for detecting aberrant response patterns derived from wrong rules of operation. The Individual Consistency Index (ICI) was found effective in detecting the anomalous response patterns resulting from some misconceptions. However, it requires repeated measures. Applicability to tests that do not have several parallel items to measure the performance of a single task will be limited. Although computerized error diagnostic programs can identify misconceptions possessed by a student in the very specific domain of arithmetic, ICI can be applicable to more general domains. It can detect candidates to route to the expensive error-diagnostic programs. (Author/DWH)

Identifiers—School Effectiveness

This paper examines the implications of research on effective schools for professional development at the State and local levels. The first part of the paper gives an overview of the research and a description of the characteristics of instructionally effective urban elementary schools. The paper then explores how these characteristics can be applied to inservice programs within schools. Issues discussed in this section include: (1) school and teacher expectations; (2) supervision and evaluation of instruction and teacher performance; and (3) community relations and communication. This paper concludes with recommendations for professional development that can be initiated by a State education agency. (Author/APM)

Identifiers—\*Working Class

An exploratory research study was undertaken to determine the extent of drug abuse in three ethnic neighborhoods. The nature and scope of drug use among Italian and Polish Americans in three working class neighborhoods were examined in the light of the role class and cultural identity plays in the development and treatment of drug abuse. Results were based on existing data on drug arrests and on interviews. The organizational and clinical implications of the study suggest the importance of ethnic considerations as well as family and community involvement in prevention, intervention and treatment methods. Descriptors—\*Adolescents, \*Drug Abuse, Drug Use, Ethnic Groups, Females, Males, \*Mental Health, Socioeconomic Status, \*Whites

Drug abuse among white ethnic adolescents is described in this report. Focusing on the framework of economic and social factors that affect the inner-city white adolescent, the report attempts to integrate this information with available mental health studies related to drug taking behaviors. The results

from the National Polydrug Study which differentiated drug use by race are presented. In addition, the report reviews data gathered by the National Center for Urban Ethnic Affairs on white ethnic drug abuse. These two studies provide data on types of drugs used, frequency of use, sex and age of users, and use by each ethnic group. The report concludes that rates of drug use among white ethnic adolescents are as high as among non-whites. (Author/APM)

Descriptors—\*Academic Achievement, \*Admission Criteria, Cohort Analysis, \*College Students, Evaluation Criteria, Grade Point Average, Longitudinal Studies, \*Minority Groups, \*Predictive Validity, Student Development, \*Student Improvement

A longitudinal analysis of the records of performance of cohorts of minority and nonminority students in two different undergraduate settings was used to determine the predictive validity of admissions tests and school rank in determining long range and short range outcomes for college students. It was also hypothesized that the performance of minority students would improve as the college record accumulates. The results showed that substantial across-cohort increases in average grades relative to average ability levels were greater for minority students in the college setting. Consequently, in later cohorts, minority and nonminority students were less sharply differentiated by their average grades than were their counterparts in earlier cohorts, and grade point average trends suggested the possibility of "late blooming." The report states that the results did not explain the increases in average grades across cohorts and suggest that increases in the average level of grades awarded across cohorts did not necessarily reflect increases or invariances in the average quality or quantity of academic achievement. The report also states that admissions variables were valid success predictors for both minority and nonminority students. The ambiguity of these findings are said to further point to the need for special consideration of problems involved in setting and maintaining standards for evaluation of student achievement in future, comparative across-cohort studies. The staff of the Ways to Improve Education in Desegregated Schools (WIEDS) project set out to collect information regarding successful desegregation practices in order to conceptualize, develop, test, and refine an inservice model and training guidelines for use in desegregated schools. The information was gathered by: (1) analyzing the United States Commission on Civil Rights Case Studies and the National Institute of Education's School Desegregation Ethnographies; (2) reviewing the desegregation literature; (3) surveying 149 central office administrators and Desegregation Assistance Center personnel; (4) interviewing 193 administrators, teachers, students, and parent/community representatives; and (5) analyzing the inservice education programs of fifteen selected desegregated school districts. The WIEDS investigation focused on the impact of desegregation on racial relations, student discipline policy (especially suspensions and expulsions), and student, teacher, administrator and parent attitudes. Identifiers—\*Philadelphia School District PA

This paper briefly reviews the current racial balance in Philadelphia, Pennsylvania public schools and discusses the development of an evaluation system to assess progress toward desegregation. Priority products and services of the Desegregation Evaluation Unit, formed in 1979, are listed. A number of problems that must be addressed in order for the school district to participate successfully in a voluntary desegregation plan are discussed. Individual objectives, relating to racial balance, community involvement, staff development, and academic achievement, are outlined and ways of evaluating each objective are reviewed. Finally, serious barriers to voluntary desegregation are discussed, particularly the tendency toward "one way" desegregation; that is, minority students attend predominantly white schools, but few white students voluntarily attend schools in minority neighborhoods. Report No.—CSOS-R-308

Pub Date—Mar 81

Grant—NIE-G-78-0210; NIE-G-80-0113

Note—45p.; Some tables may be marginally legible due to small size type.

Pub Type—Information Analyses (070)—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Black Students, Educational Attainment, \*Racial Differences, \*Regression (Statistics), \*Research Methodology, Secondary Education, \*Statistical Analysis, \*Validity, White Students

This paper focuses on the methodology of cross group comparisons of regression coefficients commonly used to identify group differences in status attainment. Using the study of race differences in educational attainment as an example, the paper reviews a number of relevant published studies and demonstrates that evidence for such differences is inconsistent across studies, that differences in the regression coefficients are subject to artifactual sources of fluctuation, and that statistical inferences based on such differences are weak. The paper concludes that the study of statistical interactions requires the design of creative studies and data collection strategies that anticipate and compensate for such problems as inadequate data, differential measurement properties, and differences in the sampling frame. Identifiers—\*Mutual Assistance Associations

The results of an informal survey of the characteristics, composition, capacity building needs and future

directions of sixty Cambodian, Laotian and Vietnamese Mutual Assistance Associations (MAAs) are documented in this report. Included among the survey findings are the purposes, current achievements, and future goals of the associations, capacity building needs, organizational characteristics, the resources of the associations and their networking and cooperative relationship with other organizations and among members. Results of the survey compared the associations according to funding status, regional (geographic) differences, and ethnic differences. Survey conclusions asserted that there is a need for more support services, alternative funding sources, and immediate assistance in grants management, staff development and training, program administration, and capacity building assistance among all MAAs. It was also found that there are significant differences in composition, size, and interests among the various ethnic groups, and important regional differences among MAAs and the organizations evidence an interest in coalition building. Identifiers—\*Mutual Assistance Associations

The role of Indochinese self-help groups in the Refugee Resettlement Program is examined in this paper. Drawing on the literature dealing with Indochinese self-help groups, the paper reviews the factors which contribute to the formation of these groups, more commonly called Mutual Assistance Associations or MAAs. In addition, the value of MAAs as perceived by both the Indochinese and American communities is discussed. The effect of Federal Refugee program policies on MAAs is also analyzed. The paper closes with a recommendation that more emphasis should be placed on financial support for MAAs and particularly that each State should be encouraged to contract with MAAs for the delivery of social services. Identifiers—\*Chicago Public Schools IL, Elementary Secondary Education Act Title VII, \*Limited English Speaking

This is an evaluation of the Chicago, Illinois public schools' bilingual program during fiscal year 1979. The report states that bilingual instruction was offered in sixteen languages in more than two hundred programs ranging from pre-kindergarten to high school. Descriptions of both the elementary and high school language programs provide information on program structure, staff and student characteristics, and student development within the program as indicated by increased English instruction. Performance on standardized tests measuring mathematics and reading ability show student progress in the elementary grades. Grade point averages are used to demonstrate program effects on high school student achievement. Results from classroom observation and teacher surveys are also presented. Significant findings offered by the evaluation include documented student achievement gains in English reading and mathematics and evidence that students are being moved into a regular English curriculum within three years. Appended to the report are a sample bilingual student form, a student census form, a classroom observation form, and a teacher

questionnaire form. Also included are sample Spanish criterion-referenced tests in mathematics and an explanation of short tests of linguistic skills and their calibration. (APM)

This report focuses on the Bilingual Reinforce-  
ment and Enrichment Learning Program Compo-  
nent and the Parent Involvement Component of the  
Chicago, Illinois public schools' bilingual education  
program of 1979. A description of the project pro-  
vides information on student and staff characteris-  
tics, program structure, and the instructional needs  
of participating pupils. Statistics from several in-  
dicators of student achievement are shown to de-  
monstrate the program's educational impact. These  
indicators include: (1) oral language proficiency rat-  
ings; (2) instructional needs category ratings; (3)  
Chicago Continuous Progress/Mastery Learning  
Levels; and (4) grade scores of the Iowa Tests of  
Basic Skills in reading and mathematics. In addi-  
tion, data from a bilingual staff survey are presented.  
An overall evaluation of the program comparing  
program goals with program results concludes the  
report. Appended to the report are three docu-  
ments: (1) the evaluation of Chicago's Bilingual  
Education Program; (2) a Title VII evaluation of the  
Bilingual Reinforcement and Enrichment Learning  
Program's inservice teacher education efforts; and  
(3) the preliminary report of the Title VII Rein-  
forcement and Enrichment Program summary of the  
April, 1979 evaluation survey. (APM)

mentary Secondary Education, \*Minority Group  
Children, Racial Composition, School Segrega-  
tion, \*Scores, \*Test Norms

Identifiers—Comprehensive Tests of Basic Skills,  
\*San Diego Unified School District CA

This report summarizes the results of achieve-  
ment tests administered in the Spring of 1981 to  
students in court-identified minority-isolated  
schools in San Diego, California. An introduction  
outlines the court order and describes the tests and  
the participating schools. In 28 of the 36 subject-  
grade level instances analyzed, student achievement  
on the Comprehensive Tests of Basic Skills met or  
exceeded interim goals, goals which reflect the rate  
of progress needed to attain the court specified ob-  
jectives. Test results also revealed an increased per-  
centage of students performing at or above the  
national norm for reading, mathematics, and lan-  
guage. In conclusion, these test results show a high  
level of success for the instructional programs im-  
plemented in response to the court decision. (APM)

This is part one of the report of the San Diego  
(California) Plan for Racial Integration, 1980-81.  
Information is presented in four areas in order to  
chart the progress made by the San Diego School  
District. These include: (1) a census of students'  
ethnic backgrounds; (2) the number of minority,  
minority-isolated, and majority students in each in-  
tegration program; (3) a comparison of the students  
enrolled in the various programs with the goals for  
the programs; and (4) integration indexes which re-  
flect the exposure of minority to majority students  
and assess the ethnic balance of the district's teach-  
ing staff. In addition, various specialized integration  
projects such as race relations and oral communica-  
tion programs for staff are reviewed. Findings and  
conclusions are provided at the report's end. (APM)

This report updates information on the implemen-  
tation of a desegregation plan in the St. Louis, Mis-  
souri, public schools. Student enrollment patterns,  
the revision of student and teacher assignments and  
transfer policies, and changes related to enrollments  
in special programs and magnet schools are exam-  
ined. The report presents guidelines for alleviating  
overcrowding as well as suggestions for school  
facilities utilization, transportation improvement,  
and security measures. Also discussed are a plan to  
eliminate overcrowding by reassigning students to  
their home clusters, the problems and needs of cur-  
ricular development in the middle schools, and im-  
plementation of Title I programs. Appendices  
include data which describe building renovations in  
individual schools, black and white student waiting  
lists in magnet schools, and letters of evaluation  
from Price Waterhouse and Company. (JCD)

This eighth report by the Desegregation Monitor-  
ing and Advisory Committee updates information  
on the implementation of a court ordered desegre-

gation plan in the St. Louis, Missouri public schools.  
The introduction states that the successes in carry-  
ing out the plan far outweigh the failures. Site visits  
and management-by-objective reports were cited as  
major information sources used in monitoring the  
implementation process. The report cited delays in  
building renovations and lack of consistent com-  
munication about curriculum development as the  
major problems of the implementation plan at the  
middle school level. Identifiable problems related to  
demographics were higher percentages of white at-  
trition than anticipated, overcrowding in some  
schools, and the loss of some student records. The  
report attributed delays in the implementation of  
enrichment and special education programs to lack  
of consistent curriculum guidelines, inadequate re-  
sources and staff as well as limited mainstreaming of  
students in the case of special education programs.  
Also emphasized were problems associated with  
teacher assignments to achieve racial balance, and  
minimal parent participation due to the burden of  
too many meetings held by too many competing  
organizations. Statistics are given on the number of  
students transported, and the number of vehicles  
used. (JCD)

This fourth report of the Desegregation Monitor-  
ing and Advisory Committee examines the prob-  
lems in the implementation of a desegregation plan  
for the St. Louis, Missouri public schools. The or-  
ganizational role of administrative and volunteer  
personnel and the process of obtaining information  
through school visitation is discussed. Problems of  
meeting and exceeding target enrollments, delays in  
implementing specialized, enrichment and develop-  
mental programs in some schools, and the lack of  
effective enrollment reporting procedures are exam-  
ined. Also discussed are problems and reforms in  
the school transportation system, (such as measures  
to relieve overcrowding), and the lack of adequate  
teaching space for special education students. Ap-  
pendices include a list of reports requested by the  
committee; student enrollment data for special edu-  
cation classes according to school, area of excep-  
tionality, and race; and information on the number  
of available teaching positions arranged by region,  
school and subject area. (JCD)

dents

Identifiers—\*Saint Louis City School District MO  
This voluntary plan for the interdistrict exchange  
of students responds to a desegregation court order  
issued to the St. Louis, Missouri Board of Educa-  
tion. Among the criteria cited as necessary to the  
operation of permissive interdistrict transfers were:  
(1) eligibility of a student to transfer to a district and  
school where the student's race is in the minority;  
(2) determination of space availability by the host  
district; (3) agreement by the host district to provide

the same educational services to the transfer student as are provided its own students; (4) agreement by participating districts to provide information on space availability by school and by grade; (5) the right of eligible students to apply for a specific school in which space has been identified; and (6) agreement by participating districts to actively promote interdistrict transfer. Criteria for student selection, evaluation of building capacity and site selection for magnet schools and other special programs, staff exchanges, parent/community involvement, transportation policies, and administrative coordination are also examined. A discussion of finances includes an itemized budget summary for the plan. The budget also describes activities for the implementation of the plan over a three year period, and includes the estimated number of students involved during each phase. (JCD)

Identifiers—\*Saint Louis City School District MO

This progress report on the Public Information Section of the St. Louis, Missouri public schools covers the period from April to September 1980 and includes a log of events and descriptions of activities related to the implementation of the school desegregation plan. According to this report, the Public Information Section incorporated the following activities: (1) establishment of a telephone hotline for the dissemination of desegregation related information; (2) development of a media campaign directed toward all segments of the St. Louis community and school personnel; (3) identification of community resources and organizations to act as liaisons between the public schools and the community; (4) coordination of contacts with media persons, arrangement of media conferences, and provision of speakers as requests were made; (5) provision of training in media communication skills for school administrators; and (6) recruitment and training of volunteers for the Straight Story Line. The Straight Story Line is described as an information and referral service which handled telephone inquiries about school assignments, enrollments, transfer policies and procedures, school safety and security measures, and transportation services. Also included in this report is information on the daily number and content of the telephone inquiries. Appended are two summary reports on the Straight Story Line. (JCD)

Identifiers—\*Saint Louis City School District MO

This interim evaluation report of the St. Louis, Missouri Urban Consumer Education Project assesses program effectiveness in terms of teacher training and teacher knowledge of consumer basics, community resource participation, and student and teacher knowledge. The project was designed to teach fifth grade students their rights and responsibilities as consumers, while helping teachers and other community members to gain expertise in teaching and using consumer basics. A major feature of the teacher training workshops was the participation of representatives from local businesses, educational institutions, and public service agencies. These resource persons also taught consumer

basics to the students. In a post-program test which evaluated consumer knowledge of wise buying habits, warranties, consumer agencies, and consumer rights and responsibilities, both student and teacher performance was weakest in the understanding of warranties. Students showed limited knowledge of local consumer groups to be contacted about consumer problems. Appended to this report are samples of the tests used in the evaluation. (JCD)

Identifiers—\*Saint Louis City School District MO

This educational plan for voluntary, cooperative school desegregation was designed to provide the St. Louis, Missouri Public School System with strategies for coping with desegregation effects, such as declining enrollments, teacher layoffs, and school closings. The primary components of the plan include: (1) permissive, interdistrict transfers on to existing programs that already have available space when the transfer would decrease racial segregation; (2) specialized magnet schools or programs that could be either full-time or part-time; and (3) educational programs designed to promote constructive experiences for students of different races in nonschool educational settings. Other factors considered in the development of the plan were criteria for student, teacher and administrator involvement, transportation, administrative coordination, and financing. The plan is described as six years in length; implementation is to be accomplished in two phases. (JCD)

This second report of the Desegregation Monitoring and Advisory Committee examines the problems and procedures of a court-approved desegregation plan for the St. Louis, Missouri public schools. Regular and nonregular student assignments and enrollments are discussed with respect to the racial composition of the student population and the type of school or program. The report describes objectives of the desegregation plan, student assignment procedures, guidelines for safety, essential elements in a school contingency plan to handle emergencies, and procedures for identifying discipline problems. Appendices include current and projected enrollment data for black, white and total student populations in integrated and non-integrated schools in 1980 and 1981, as well as enrollment information for magnet schools and enrichment programs according to grade level. Information on the number of black and white certified and non-certified teachers for each participating school district and the number of open teaching positions according to grade category and subject area are also given in tabular form. Additional charts analyze the national origin of minority group children, the number of naturally integrated schools, changes in cluster configuration, and the three tier schedule of school hours. This interim report about the court's order for voluntary, interdistrict desegregation in the St. Louis, Missouri public schools was filed by the Desegregation Monitoring and Advisory Committee. The report discusses the problems of defining the relationship between "voluntary" and "mandatory," and developing alternative solutions to desegregation. The issue of whether a voluntary plan can protect participating districts against further litigation is examined with respect to the following questions: (1) Is there a legal barrier to a resolution of potential school desegregation claims against a county school district by means short of full litigation of a district's liability? (2) To what extent can such a resolution eliminate a county school district's exposure to future school desegregation litigation? and (3) What criteria must such a resolution meet? The characteristics of a possible voluntary, cooperative interdistrict plan are discussed in response to these questions. (Author/JCD)

**Identifiers—Saint Louis City School District MO**

This report examines the status of school desegregation in the St. Louis, Missouri, public schools as of February 1981, and weighs the problems associated with court ordered versus voluntary desegregation. It is proposed that the city of St. Louis might still avoid a lengthy court battle over desegregation if the following steps are followed to permit voluntary desegregation to take place: (1) a two-month extension of the cooperative planning process authorized by the court; (2) a modification of the December 19, 1980 court order to include both the City Board and the Department of Justice in the planning; (3) the issuance of a court order guaranteeing protection of the process ordered under Paragraph 12 of the court's May 21, 1980 order; (4) the issuance of a court order delaying any further activity or reporting of action concerning mandatory planning under Paragraph 12 of the May 21, 1980 order; (5) a two month delay of action on the motions filed by the Board and the NAACP to expand the case throughout the area; and (6) the reservation of a time at the end of two months for a hearing on the plan to be submitted. **Identifiers—Toledo Public Schools OH**

Presented here is volume one of a catalog developed by the Toledo, Ohio Public Schools and the Evaluation Center at Western Michigan University and designed as a tool for the evaluation of student growth and learning. The introduction and preface provide information concerning the development and use of these materials which are said to be suggestive rather than prescriptive in nature. Part one consists of a description of student behaviors in seven growth areas, which are divided into subsections within each area, and further divided into student traits. The seven growth areas are intellectual, emotional, physical and recreational, aesthetic and cultural, moral, vocational, and social. Part two consists of a wide variety of measuring devices for the seven growth areas and for a range of age/grade categories which can be used to assess student performance. Three remaining sections facilitate the use of this document. The outline of classes section provides an overview of subsections in each growth area. A cross reference index gives an alphabetical listing of classes, categories, and characteristics keyed to the page on which the narrative is found

and followed by the page number of all applicable measuring devices. Finally, the index of measures is organized to provide the page numbers of measuring devices by type and subject. (Author/JCD)

**Identifiers—Toledo Public Schools OH**

The evaluation of instructional programs is necessary in order to document accomplishments, determine cost effectiveness, establish management control, and provide bases for improving the education of students. The responsibilities and technical requirements of an evaluation system involve the function of the following component areas: demographic information, program evaluation, program auditing, testing, and technical assistance. The evaluation process includes: (1) a generalized needs assessment and identification of the problem area; (2) a focused assessment involving program development, implementation and formative evaluation; and (3) a summative evaluation and dissemination of results. The organization and development of an evaluation system also involves the selection and training of staff as well as the implementation of a systemwide standardized testing program. (JCD)

**Identifiers—Toledo Public Schools OH**

In response to declining student enrollment, the Toledo, Ohio public school system conducted a school utilization study involving the evaluation of eight categories of achievement. These categories were: (1) educational adequacy as determined by the ability of the facility to meet the requirements of a good instructional program; (2) an overview of operational costs which included overhead per student for support personnel and utilities; (3) current and projected enrollments; (4) environmental influences such as noise pollution, play area, lighting and security, flooding, and the condition of adjacent properties; (5) alternate or non-school use of facilities; (6) modernization potential based on age and general condition of the physical structure, renovation complexity and code compliance, and access for the physically handicapped; (7) capacity; and (8) traffic and safety controls. Each category was ranked across the school system, and the data results for each school are included in this report. (JCD)

**Identifiers—Desegregation Aid, Emergency School Aid Act 1972, National Diffusion Network**

This paper describes the dissemination effort that has resulted in the extensive use of the Student Team Learning Program, an instructional process designed for the purpose of improving race relations in desegregated schools. Various attributes of the program that have enhanced its adoption in over 1000 school districts are examined and the effectiveness of differing dissemination strategies is considered. The roles of the National Diffusion Network, the Race Desegregation Centers, State Departments of Education, Emergency School Aid Act programs, regional educational laboratories, and administrators and teachers in the dissemination process are reviewed. The report concludes with a discussion of the implications of this project for the dissemination of other educational innovations. It is suggested that the development of adequate educational technology will help solve many dissemination problems. (Author/APM)

**Identifiers—Impact Aid**

This report on the administration and operation of Title I of Public Law 874 is a descriptive and evaluative study of the Federal Impact Aid Program. Chapter one discusses the history and basic elements of the program, and the plan of study used in the evaluation. The methodology of the study, which includes the characteristics and validity of the Economic Impact Model in comparison with more conventional models, is examined in chapter two. Chapter three considers evidence for reducing or revising the Impact Aid Program with respect to the following issues: the definition of federal property, and strategies for mitigating adverse effects of federal activities on local educational agencies; intergovernmental tax immunities; the government's responsibility in the attainment of adequate levels of education in federal programs; the net fiscal burden placed upon local education agencies by federal activities; and the criteria for determining eligibility of local education agencies for compensatory payments. The last two chapters include the report's findings and legislative recommendations. Sixteen appendices provide supplementary and peripheral information related to the Federal Impact Aid Program and to this report. (JCD)

**Identified and Placed for Life: A Review of the Disproportionate Number of Black Children Assessed, Identified and Placed in Programs for the Educable Mentally Retarded.**

Pub Date—27 Aug 81

Note—21p; Some tables may be marginally legible due to reproduction quality of original document.

Pub Type—Numerical/Quantitative Data (110)

**EDRS Price - MF01/PC01 Plus Postage.**

**Descriptors—Black Students, Civil Liberties, Elementary Secondary Education, Equal Education, Intelligence Tests, Mild Mental Retardation, Racial Bias, Racial Discrimination, Student Evaluation, Test Bias**

This paper reviews and assesses the data that show black children are being placed in Educable Mentally Retarded (EMR) classes at rates which are two to four times greater than whites or any other ethnic group in the nation. Discussed are the results and implications of a study involving a comparative analysis of the national statistics of the

number of blacks and whites assessed, identified and placed in EMR programs, and the criteria used by public schools for identifying and placing children in EMR programs. Included among the results were that while blacks comprise only 16 percent of the total student enrollment in public elementary and secondary schools, they make up 38 percent of the enrollment for EMR programs. The study suggests that racially and culturally fair assessment tools (as defined by Mercer) as well as a variety of formal and informal indicators of social, emotional and intellectual development are necessary in the evaluation of students. A Study of the Longitudinal Effects of the Title I Reading Component From 1976 Through 1980. Atlanta Public Schools, Ga. Pub Date—19 May 81

Note—8p. Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Elementary School Students, \*Longitudinal Studies, Program Effectiveness, Reading Achievement, \*Reading Improvement, Underachievement

Identifiers—\*Atlanta Public Schools GA, \*Elementary Secondary Education Act Title I

The purpose of the study was to determine the longitudinal effects of a Title I reading component on students in grades two through five from 1976 through 1980. The following questions were considered in the analysis of performance among reading participants: (1) Do the same students remain in Title I year after year? (2) Do students who participate in Title I for one year achieve at a higher level and no longer need the compensatory instruction? (3) Do students participating in Title I the first year score too high on the standardized achievement test to be eligible the following year, and become eligible to participate again in the third year? Results indicated that although 29 percent of the students remained in the program for the full four year period, the achievement of 12 percent of the students improved significantly. The remaining 59 percent of the students fluctuated in and out of the program during the four year period. (JCD)

Identifiers—\*Atlanta Public Schools GA, Elementary Secondary Education Act Title VII, \*Limited English Speaking

This is the final project report for the Transitional Education Project, conducted in Atlanta, Georgia, public schools in 1979-80. A program description is followed by a section that charts changes in students' attitudes toward school and lists program objectives in the areas of English and Spanish language ability and advancement in core curricula materials. Staff development and teacher inservice training efforts are outlined. Parent advisory council and community liaison activities are also covered. Conclusions and recommendations for program improvement are presented at the report's end. Appended are a list of project personnel, a list of instructional materials for bilingual classes, and sample student attitude and evaluation questionnaires. (APM)

Identifiers—\*Atlanta Public Schools GA, Independent Learning Project, \*Project Follow Through

This is a final evaluation report for Atlanta, Georgia's Follow Through Program, a project conducted from 1977-80 to curb low achievement among Project Head Start students as they move through the primary grades. Various program components including psychological, health, and social services, administration, staff development, and parent involvement are described. Results of the program evaluation are discussed for several areas such as: (1) the degree of implementation of the Independent Learning Model (the program's model); (2) the reading progress of students; (3) the extent of parent involvement; (4) student gains on achievement tests; (5) program costs; (6) attendance; and (7) the performance of the health, psychological, and social services components. Extensive statistical data on results are included in the form of 22 tables, four charts and an appendix. Recommendations for program improvement are offered at the end of the report. (APM)

Identifiers—\*Parent as a Teacher, Parent Assisted Learning Program

This paper reports the results of an ongoing study of home school programs incorporating the fourth through twelfth grade levels of large urban school districts. It examines the nature and scope of programs designed to improve student learning through parent involvement in tutoring, managerial and socializing activities as they relate to educational practice. Programs are classified according to goals for students such as achievement, social development, attendance, and career plans, and according to modes of home school interaction, parent school and parent child activities. Also included is a review of selected home school programs and a set of general guidelines, objectives, and activities for prospective home school programs. (JCD)

Identifiers—\*Pacific Americans  
The issue of school desegregation does not affect most Asian/Pacific Americans today due to their small number, geographic dispersion, heterogeneity based on differences in ethnic identities, and varia-

UD 021 833

tions in their degree of cultural and social assimilation into American society. Before 1965 most of the Asian and Pacific American young people were acculturated second and third generation Americans; however, the number of foreign born, limited English speaking children of Asian or Pacific background in the schools began to increase steadily after that year. The relatively small number of Chinese American children, for example, probably promoted their supervision by adults in the community, thereby reducing opportunities to become delinquent as well as increasing social and emotional support for doing well in school. Favorable employment situations between the 1940s and 1960s also promoted the cultural assimilation of the descendants of the earlier immigrants. After 1965, however, the evidence of social and racial discrimination encountered by Asian and Pacific Americans in the areas of employment, housing, educational and social services becomes more visible. Descriptors—Cost Effectiveness, \*Delivery Systems, \*Disadvantaged Youth, Elementary Secondary Education, \*Program Effectiveness, Program Evaluation, \*School Community Relationship, Social Services, \*Student Development, \*Urban Programs

Identifiers—\*Cities in Schools

This is the final report of an evaluation of the Cities in Schools (CIS) program which was designed to ensure the delivery of educational and social services to inner city students; CIS uses the school as a base of operations. CIS contends that the current delivery systems are insufficient to meet the needs of youth due to lack of coordination, personalism, accountability and morale, according to this report. CIS's solution to this problem was reviewed in the light of the following assertions: (1) CIS will provide a superior structure and process for service delivery to disadvantaged youth; (2) the higher quality of service leads to significant, positive impact on youth; and (3) these positive benefits can be achieved without excessive increase to costs of the present delivery systems. Also discussed are problem reduction strategies versus solution building strategies in the evaluation of CIS, and CIS elements as part of the solution. A commentary by CIS on the issues that affected the program evaluation is appended. A discussion of the design of the study, which includes samples of caseworker and student interview forms, service delivery questionnaires, project histories, and other archival data from the evaluation are included in the appendices. The first national needs assessment of Hispanic elderly represents a response to the research findings which indicate lower participation rates in social programs and more limited access to social

services among older Hispanics than among aged Americans in general. This report provides a descriptive analysis of the problems and needs of four main subgroups of older Hispanics: Cuban Americans, Mexican Americans, Puerto Ricans, and other Hispanics in relation to the following areas: (1) health services; (2) housing needs; (3) social services; (4) transportation; (5) crime; (6) community involvement; (7) nutrition; and (8) discrimination barriers. The report discusses the influence of each of the subgroup classifications and cites the following as major findings of the study: (1) older Hispanics exhibit characteristics of both homogeneity and heterogeneity; (2) older Hispanics reported relatively low use of social services, with a high discrepancy reported between use and need; (3) only 55 percent of older Hispanics aged 65 years and over receive Social Security retirement; (4) whereas informal network supports are available for many older Hispanics, as measured in terms of visits with children, relatives and friends, only 4.2 percent of older Hispanics receive financial support from family members on a regular basis; and (5) arthritis is the most prevalent ailment among older Hispanics, followed by high blood pressure, heart trouble and circulation problems. This collection of conference presentations focuses on the relationships among educational environment, academic achievement, and discipline problems, particularly in desegregated schools. The first paper, by Barbara Sizemore, addresses the role of the school community in creating positive learning experiences. In the second paper, author William Thomas discusses discipline problems and strategies for dealing with these problems. The following presentation by Leonard Beckham focuses on enhancing student self concept and increasing student involvement in their high schools. Safety and security in a desegregated setting is the topic of the fourth paper by Peter Blauvelt. In the fifth paper, Gloria Grantham conducted a community advocacy project for minority group students in New Castle County, Delaware. This paper is followed by a discussion of ways to improve standardized test performance among minority group children. The final paper describes activities carried out with Emergency School Aid Act (ESAA) funds in Charlottesville, Virginia. Appended to this collection are the results of a conference evaluation and a list of conference participants. (GC)

Descriptors—\*Business Education, \*Females, \*Group Dynamics, \*Higher Education, Hispanic Americans, \*Minority Groups, Socialization, \*Teaching Methods, Womens Education

Identifiers—\*Guided Design

Under the assumption that women and minority business college students have had little opportunity to develop the interpersonal and community membership skills required in business management, this paper reviews some of the research on socialization, group process theory, and the development of college students, and relates it to the special needs of women and minorities. It singles out Guided Design as a useful pedagogical tool for teaching committee skills and finds merit in the approach's emphasis on small group cooperation in solving a structured series of problems within a case situation. The paper describes a study in which 26 business statistics students of Anglo, Hispanic, black, or foreign origin were exposed to a Guided Design exercise involving the completion of 23 tasks over a total of 10 class hours. Findings, based on the author's observations and students' reports and assessments, tentatively supported the hypotheses postulated: women and/or minority students experience fewer roles than white males and consequently have different role learning goals; women and/or minority students played more unfamiliar roles during the class exercise; and a high percentage of students reported that the exercise was effective in teaching both roles and statistics. Questionnaires and Guided Design exercises are included. (MJL)

Descriptors—\*Attitude Measures, Black Students, Middle Schools, \*Peer Influence, \*Peer Relationship, Racial Bias, \*Racial Relations, \*School Desegregation, \*Student Attitudes, White Students

Identifiers—Allport (Gordon W), \*Likert Scales

In order to develop a scale to measure student attitudes toward desegregation in their own schools, 61 Likert type statements were developed and administered to over 3000 black and white middle school students in five schools in a southwestern community. Gordon Allport's criteria, particularly his contact theory of desegregation, provided the theoretical base for the study. Factor analysis of the responses yielded five factors which served as the basis for grouping 50 items into a five subscale test. The five emergent factors concerned (1) the concept of interdependence of groups; (2) perceptions of supportive organizational norms; (3) intergroup as-

sociations and interactions; (4) the criterion of equal status; and (5) students' acceptance of others different from them as peers. The internal consistency reliability of the scale was .92. Of seven other measures taken to test the validity of the scale, five were correlated highly with the total score and the subscale scores. (MJL)

Descriptors—\*Eligibility, \*Federal Legislation, \*Illegal Immigrants, Immigration Inspectors, \*Law Enforcement, \*Policy Formation, Public Policy

Identifiers—Immigration and Nationality Act 1965, \*Immigration and Naturalization Service, \*Immigration Law, Legal Status

A legalization program for illegal aliens living in the United States is examined in this statement by Doris Meissner, Acting Commissioner of the Immigration and Naturalization Service (INS). Meissner states that the Administration's current proposed legislation is designed to regain control of the immigration process through the development of more effective enforcement measures. This legislation is said to be based on the rationale that: (1) qualified aliens would be able to contribute more to society if they were granted the right to open participation; (2) the enactment of employers sanctions legislation would curtail further uncontrolled hiring of illegal aliens; and (3) legalization would enable the INS to target its enforcement resources on new flows of illegal aliens and avoid devoting limited investigative resources equity claims by aliens. Meissner explains that the current bill would provide "temporary residence status" to illegal aliens who entered the United States prior to January 1, 1980 and have had a continuous residence since that time. Meissner says that the Administration supports a one time legalization program but does not believe that the process of legalization should begin until new enforcement measures, such as employers sanctions have been instituted. Descriptors—Busing, \*Civil Rights Legislation, \*Court Litigation, De Facto Segregation, De Jure Segregation, \*Desegregation Methods, Elementary Secondary Education, \*Equal Education, \*Government Role, Policy Formation, Public Schools, Racial Balance, \*School Desegregation. This testimony was delivered by William Bradford Reynolds, the Assistant Attorney General of the Civil Rights Division, before the Subcommittee on Separation of Powers, Committee on the Judiciary of the United States Senate. Reynolds states that compulsory busing of students is not an acceptable remedy to achieve racial balance. He emphasizes the responsibility of state and local school boards to formulate educational policies in accordance with Titles IV, VI and IX of the Civil Rights Act of 1964 as well as the Equal Education Opportunity Act of 1974. Reynolds argues for alternative solutions to achieve school desegregation. In developing specific remedial techniques, Reynolds cites the Department of Justice's intent to thoroughly investigate the background of every racially identifiable school in a district to determine whether the racial segregation is de jure or de facto. Reynolds also states that the Department further recognizes several desegregation approaches that seem most promising: voluntary student transfer programs, magnet schools, enhanced curriculum requirements, faculty incentives, inservice training programs for teachers and administrators, school closings in systems that are overcrowded, and adjustments to attendance zones. Descriptors—\*Administrator Role, \*Educational Innovation, Elementary Secondary Education, \*Information Dissemination, Models, Program Evaluation, \*Reading Achievement, \*Reading Programs, State Action

Identifiers—\*Elementary Secondary Education Act Title I, \*National Diffusion Network Programs

This report by the Comptroller General to the United States Congress discusses the review made of the Department of Education's National Diffusion Network, particularly its efforts to improve Title I reading programs through information dissemination on exemplary projects. Chapter one examines the Department of Education's dissemination activities, administration of Title I responsibilities and objectives, scope, and methodology of Title I projects. Chapter two discusses the need to improve the effectiveness of existing programs through the increased and more cost effective use of exemplary projects. Chapter three discusses the lack of adequate evaluations criteria for assessing project effectiveness, the need to improve the monitoring of State Title I activities, the differences in local project evaluations, and the need to improve network data on exemplary projects. Following a concluding chapter are appendices which discuss the selection of school districts used for site visits and analyze the reading achievement gains of Title I students in thirteen school districts. The last appendix is a letter from the Acting Assistant Secretary for Elementary and Secondary Education in the Department of Education which comments on a draft report of this

document. (JCD)

Descriptors—Busing, Civil Rights, Court Litigation, \*Court Role, Desegregation Methods, \*Equal Education, \*Government Role, Public Policy, \*Racial Balance, School Desegregation, \*Voluntary Desegregation

Identifiers—Brown V Board of Education, Chicago Public Schools IL, \*Department of Justice

Presented here are the remarks of William Bradford Reynolds, Assistant Attorney General, Civil Rights Division at the Education Commission of the States National Project on Desegregation Strategies' Workshop. Reynolds states that mandatory busing and other remedial techniques to achieve racial balance in schools (measures tentatively sanctioned by the United States Supreme Court after the Swann decision of 1971) have not fared well. The speaker says that the Department of Justice will now emphasize a remedy that will remove State enforced barriers to open up access to public schools; to ensure that all students are provided with educational opportunities of comparable quality; and to provide individual relief to students injured by unconstitutional state actions. Reynolds cites the overseeing of the development of a desegregation plan in Chicago, Illinois in which the Justice Department is emphasizing voluntary desegregation techniques. (APM)

The Title I Great Cities Training Programs were designed to provide school paraprofessional personnel in Detroit, Michigan, with the knowledge, skills and techniques that will lead to higher levels of achievement among the Title I target student population. This evaluation report provides a description of program structure, training curricula, and results for the 1979-80 school year. Participants' pre- and post-test scores are shown for different phases of the training schedule and in different subject areas. Scores for ninth grade students serviced by teacher aides who participated in the training program are also presented. Appended to the report are an observation report on program participants in the classroom, evaluations of the summer 1980 teacher/teacher aide training workshop, and a sample monitoring instrument and trainee questionnaire. This guide, designed for use in the Detroit, Michigan public schools, is intended to help parents become participants in bilingual/bicultural programs. Beginning with an overall perspective on bilingual education, the guide outlines the specific requirements of the State of Michigan's Bilingual Education Law. The next section provides an overview of the Detroit public school system. The last section focuses on the techniques to be used by parents in order to become effectively involved in school activities. This section reviews the role of parent-teacher conferences, parent advisory committees, and various community advisory committees. The guide concludes with a directory of Detroit public school administration staff and bilingual instruction staff. (APM)

 This teacher's guide on ethnic literacy was developed by the Ethnic Literacy Project for the Detroit, Michigan public schools. It consists of lessons, materials and activities intended to supplement reading activities under the DORT (Detroit Objective Referenced Tests) Reading System being implemented in those urban classrooms from kindergarten to eighth grade which are affected by a desegregation order. Included in the guide are instructional materials, lessons and activities on ethnicity, stereotypes, prejudice, immigration, the Holocaust, family life, folk tales, nutrition, and ethnic heritage, intended for inclusion at the teacher's discretion into Social Studies, English, Music Appreciation, and Art. An annotated bibliography of children's books using ethnic characters and a list of books, records, films and other resources related to the subject matter of the guide are appended. (MJL)

 This is a teacher's manual describing the activities of Detroit, Michigan's Ethnic Literacy Project and providing resource materials and classroom techniques for teaching ethnic heritage. The manual states that the Ethnic Literacy Project was intended to supplement the Detroit Objective Referenced Tests (DORT) Reading System. This system, the manual continues, was designed to develop comprehensive reading skills among students in all grades. Contained in the manual is a test for students to determine their knowledge about the history and culture of Detroit's many ethnic groups. The manual also contains lists of resource materials available from both general sources and from DORT. These materials include books, recordings and films. Various resource centers' addresses and sample suggested activities for extending ethnic literacy to basal readers are also included. A bibliography of books on ethnic subjects primarily for elementary school children, and a list of DORT Comprehension Objectives for grades 3 through 8 concludes the manual. (APM)

Identifiers—\*Detroit Public Schools MI, \*Limited English Speaking

This is an administrative guide for bilingual/bicultural education programs in the Detroit, Michigan, public schools. The first section of the guide provides background on the legal mandate for bilingual education. Section two discusses the identification and selection of limited English-speaking ability pupils for bilingual services. The third section reviews issues pertinent to the selection and maintenance of qualified bilingual education personnel. In section four, the selection of an appropriate educational design is considered through the analysis of six potential bilingual classroom models. Section five covers parent and community participation, and section six offers lists of resource materials, and consultant personnel. Extensive appendices include: (1) a discussion on the historical development of bilingual/bicultural education; (2) the text of Michigan Public Act 294 (1974); (3) a pupil profile form; (4) sample letters to parents in several languages; (5) job descriptions for central and regional program personnel; and (6) a glossary of terminology. Descriptors—\*Administrative Organization, Black Students, Busing, \*Desegregation Methods, Elementary Secondary Education, Institutional Autonomy, \*Magnet Schools, \*Organizational Change, Organizational Climate, \*Parent School Relationship, Political Influences, Racial Composition, \*School Community Relationship, White Students

A case study of the magnet school program in an anonymous midwestern United States city provides insights on the types of organizational and political changes that result from this form of school desegregation. Organizationally, the normal life of school systems depends upon a delicate balance of two sets of contradictory elements: individual school and teacher autonomy, on the one hand, and the larger administrative structure of the entire system, on the other. The use of magnet schools to achieve desegregation changes the balance of authority by: (1) formalizing the existence of variation in school practice; (2) tightening the linkage between the school system and individual schools; and (3) giving increased power in the organization to parents as clients. In addition to these organizational changes, by contradicting the principle of equivalent education and facilities among different schools, the magnet system exacerbates political conflict, particularly with regard to competition for resources between minority and privileged groups. Elitism becomes a significant problem when white or wealthier students are disproportionately drawn to magnet schools. Given the changes described above, it is understandable that the magnet system has provoked resistance from teacher unions, office and instructional staff, parents and, at different times, the black and white communities. Descriptors—Black Population Trends, \*Black Students, Conflict, \*Desegregation Effects, Elementary Education, Elementary School Students, Group Dynamics, \*Hostility, Intergroup Relations, Racial Attitudes, \*Racial Composition, \*Racial Relations, \*White Students

In a study of the relationships between school racial composition and intergroup hostility in 123 desegregated elementary schools, four measures of racial hostility were considered: (1) white attitudes toward desegregation; (2) whites' friendliness toward blacks as perceived by blacks; (3) white attitudes toward voluntary social interaction with blacks; and (4) teacher estimates of the level of intergroup conflict in the school. The results indicated significant nonlinear relationships between the black percentage of white hostility, but did not show black percentage as significant predictor of white attitudes toward contact with blacks. It was found also that maximum hostility occurs in schools between 40 percent to 60 percent black. In conclusion, it was suggested that the hostility of white students toward blacks might best be minimized by placing white students in predominantly white schools or in predominantly black schools. This collection of papers examines contemporary issues and problems in bilingual special education. The first paper, by Lizette A. Cantres, discusses Federal and State laws and regulations related to bilingual special education, with respect to litigation in the case of "Jose P." The problems of assessment of bilingual children under a monolingual testing system are examined in the second paper, by Rafaela E. Weffer; the author presents a study of twenty Hispanic children and explores issues raised by a review of the literature. A third paper, by Eva M. Gavilan-Torres, examines the processes for diagnosing and serving Hispanic children who are believed to be mentally retarded or to have learning disorders or speech and hearing impairments. In the fourth paper, author Rosa Maria Gil examines the relationship between cultural attitudes toward mental illness and the use of mental health services among groups of Puerto Rican mothers and their elementary school children. The final paper in the collection is by Carmen D. Ortiz and discusses the masters degree program in special education at Bank Street College of Education as a model for standards in teacher training; this paper identifies a variety of special education professionals and defines their functions and required competencies. This report describes the extent of black-white classroom segregation in desegregated elementary, middle, and high schools; compares the degree of segregation for blacks, whites, and Hispanics; compares the degree of resegregation in major regions of the nation, and investigates the relationship between the degree of school desegregation and patterns of classroom resegregation. Using National Longitudinal Survey data, the survey examines academic course areas and extracurricular memberships to determine the degree of white-minority interaction. Findings show that black and white students are almost equally likely to be enrolled in most courses in desegregated schools, but resegregation occurs through tracking or ability grouping procedures which significantly reduce the opportunities for cross-racial contact. For extracurricular activities in desegregated schools, it was determined that blacks participate more in athletics, music, and drama, but whites participate more in academic honorary clubs. Fairly equal participation was found in student government and academic subject clubs. (Author/JCD)

Identifiers—\*National Longitudinal Study High School Class 1972

This report examines the resegregation of black and white students which may occur in desegregated schools due to differential enrollment and participation in academic programs and extracurricular activities. The report analyzes data collected by the National Longitudinal Survey (NLS) of 1318 high school graduating classes of 1972 throughout the United States. The data include regional and educational level comparisons of classroom segregation; average participation rates in extracurricular activities by race, sex, and region in segregated and desegregated schools; participation in activities by students in the same desegregated high schools by race, sex, and region; percent participation in academic programs and courses by students in the same desegregated high schools by race, sex and region; and a comparison of estimated probabilities of cross-race student contact in desegregated high schools under different course assignment practices by sex and region. The results of the survey showed greater participation in extracurricular activities among black male students in desegregated schools, but found less participation among whites in the same setting. The results also showed that black students are less likely than whites to be enrolled in academic programs in segregated and desegregated schools; however, blacks and whites are equally likely to be enrolled in most courses in desegregated schools. Identifiers—\*Columbus Public Schools OH

This report is based on a case study which examined the efforts of community organizations in Columbus, Ohio to strengthen citizen participation (through the use of networking strategies) in the implementation phase of school desegregation. The report describes interorganizational networks as a function of exchange relations. Specialization, scarcity of resources and the limits of power in individual organizations are cited as the major reasons for the development of exchange relations. The data from the study are reported in terms of the relationships between the mean number of network links established among various organizations, and the funding status, type of activity, target group, scope of issue and age of the organizations involved in the network. The following results are cited: (1) privately funded community organizations have more

network ties than public funded organizations; (2) advocacy group organizations have the most network ties, followed by service and public information organizations; (3) single issue and older organizations have more network ties than multi-issue or younger organizations; and (4) community organizations which identify the school as its target have more network ties than groups which target either the black community or the public at large. Affirmative Action: A Concern in Higher Education Administration. The Organization and Administration of Higher Education.

Pub Date—[80]

Note—29p.; Some sections may not reproduce clearly because of light print.

Pub Type—Historical Materials (060) — Reports - General (140) — Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—\*Administrative Policy, \*Affirmative Action, \*Court Litigation, Equal Opportunities (Jobs), \*Faculty Integration, Females, \*Higher Education, Minority Groups, \*Promotion (Occupational), Quotas

This paper reviews the effects of affirmative action on administrative policy in higher education. The history of the Federal mandate against ethnic and sex discrimination is traced, and several court cases are reviewed. Examples of discriminatory admission and employment practices in higher education as reflected in pattern, class and individual complaints are presented, and the limits of affirmative action are discussed. Data are cited to demonstrate that although affirmative action has been emphasized in recruitment and hiring, promotion, and salary scales, the actual proportion of minorities and women faculty members is still low. The paper maintains that women and minorities who have assumed academic positions as a result of affirmative action feel compelled to defend their qualifications. In conclusion, it is suggested that affirmative action be viewed as a short term remedy and that equal education and affirmative action be used to build up a future supply of qualified minority and women academics. This is a collection of anthropological and sociological articles on the black woman. Essays cover the experiences of black women in Africa, the Caribbean, South America, and the United States in politics, business, the community, the arts, the family, and social change. Several themes are present throughout this anthology, including black women's common African heritage, economic exploitation and marginalization of black women, their negative images in literature, and the development of an ideology of self-reliance by these women in order to survive. Issues of race, sex and class are explored in relation to both Western and "African" conceptions of feminism. An extensive cross-cultural bibliography on black women is also provided. (APM)

This paper reports on two workshops held in 1980 and 1981, for the purpose of exploring the perceptions, feelings, and opinions of Asian and Pacific American (APA) educational administrators from the State of Washington. In the first workshop, which brought together 19 APA administrators, discussion focused on changes in roles, family life, interpersonal relations, and educational environment that have occurred for these individuals. At the second workshop, a smaller group of APA administrators reviewed some of the more pressing problems identified in the first meeting, including sex role stereotypes and the pressures that such stereotypes place on APA women administrators, and pressures to compromise one's ethnic identity. A number of alternatives were suggested to mitigate these problems and their consequences. Appended to this report are lists of the workshop participants and a summary of issues discussed. (GC)

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—\*Attitude Measures, \*Measurement Techniques, \*Preschool Children, Preschool Education, \*Racial Attitudes, Research Methodology, Test Reliability, Test Validity

Identifiers—Doll Choice Task, Preschool Racial Attitude Measure, Projective Prejudice Test (Katz), Sticker Family Game

The dearth and inadequacy of measurement instruments to assess racial attitudes in children of preschool age provided the impetus for an empirical study that examined four types of commonly used racial attitude measurement instruments and, at the same time, provided information on racial attitudes among preschoolers. Subjects of the study were 36 boys and girls aged 31 to 72 months from four preschools. Over a two week period, the Preschool Racial Attitude Measure II (PRAM II), the Doll Test, the Projective Prejudice Test, and the Sticker Test were administered to the subjects. A subsample of 10 children was retested after a month. Results indicated that each test had adequate reliability. The PRAM II and the Doll Test were found to be significantly correlated, but the correlations between the other measures were insignificant, indicating the multidimensionality of ethnic attitudes. Correlations between age of children and the PRAM II and the Doll Test were also significant. The findings further show that stereotypic ethnic attitudes are

measurable at young ages and that there is increasing awareness of racial attitudes as children get older. In addition to reporting on the author's research, this report includes a review of currently available racial attitude measurement instruments for school age and preschool age children. Descriptors—Compensatory Education, \*Educational Legislation, Elementary Secondary Education, Federal Programs, \*Federal Regulation, Federal State Relationship, \*Financial Policy, \*Program Administration, \*School Districts, \*State Departments of Education

Identifiers—\*Elementary Secondary Education Act Title I, Pennsylvania

This report of the guidelines, instructions, and procedures for Title I programs in Pennsylvania is divided into three major sections: Section one describes the organization, administration and procedures of the Pennsylvania State Educational Agency (SEA). Section two presents SEA guidelines for local school districts, dealing with (1) attendance area selection; (2) needs assessment; (3) planning, design, implementation and evaluation of Title I programs; and (4) Title I as a supplementary program. In section three information is provided on fiscal management, Title I application procedures, program numbers, the approval letter, application corrections and revisions, reallocated funds, annual performance report, carryover funds, comparability of schools, and concentration grants. Appendices include: a directory of Compensatory Education Division staff members; methods used in the selection of attendance areas; guidelines for explaining data sources used to determine low-income children; instructional activities and supportive services; maintenance and retention of records; Federal and State Title I policies and administration procedures in desegregated school districts; regulations concerning equipment, materials and supplies; and Title I forms for the 1981-82 school year. Ziegler, Suzanne

Diagnosis and Treatment of a Community Illness: Primary Prevention of Racism in Ethnically Heterogeneous Communities.

Pub Date—26 Aug 81

Note—17p.; Paper prepared for the Annual Meeting of the American Psychological Association (Los Angeles, CA, August 26, 1981).

Pub Type—Reports - General (140) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cultural Interrelationships, \*Educational Strategies, Ethnic Bias, Ethnic Groups, \*Friendship, Group Activities, \*Intervention, Junior High Schools, \*Racial Attitudes, Small Group Instruction, \*Social Integration, Sociometric Techniques, \*Teamwork

Identifiers—\*Ontario (Toronto)

This paper summarizes research in which the public health models of epidemiological assessment and primary prevention were used to (1) determine the prevalence of ethnic social segregation among school children in Toronto, Canada; and (2) alter ethnically segregated friendship patterns in Toronto schools. A preliminary study of children aged 12 to 14 years and belonging to Anglo majority or to Chinese or Italian minority groups, documented ethnic segregation as a fact of life for many Toronto school children. In a second study, an experimental group of sixth graders was divided into heterogeneous learning teams which worked cooperatively to complete assignments. Pre- and post-experiment measures were taken from a sociometric self report and an attitude to different others scale for the experimental group and a control group. Results indicated the positive effects of using small cooperative learning teams to increase cross ethnic friendship and to prevent racist behavior. (Author/MJL)

Harris, William G. And Others

**Black Family Planning: Attitudes of Leaders and a General Sample.**

Pub Date—26 Aug 81

Note—10p.; Paper presented at the Annual Meeting of the American Psychological Association (39th, Los Angeles, CA, August 26, 1981).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Alienation, \*Black Attitudes, \*Black Leadership, \*Contraception, \*Family Planning, Multivariate Analysis

Attitudes of black leaders and a general black population sample toward birth control and family planning issues were "Pro Birth Control" and "Genocide Fears." The leaders questioned held positions in twenty national black organizations, while the general population samples were taken from Philadelphia, Pennsylvania, and Charlotte, North Carolina. A significant difference was found on the "Pro Birth Control" scale, indicating that black leaders were more favorable toward birth control, a conventional vehicle for black improvement. Lack of difference on the "Genocide Fears" scale may indicate the pervasiveness of black alienation from the larger society. (Author/APM)

Indochinese Bibliography. Revised.

Department of Education, Kansas City, Mo. Regional Office 7.

Pub Date—1 Jun 81

Note—183p.

Available from—United States Department of Education, Region VII, Office of Educational Programs, Indochinese Materials Center, 324 East 11 Street, 9th Floor, Eleven Oak Building, Kansas City, MO 64106 (write for price).

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC08 Plus Postage.

Descriptors—Adult Education, \*Asian Americans, Cambodians, \*Educational Resources, Elementary Secondary Education, \*Indochinese, \*Instructional Materials, Laotians, Refugees, \*Second Language Instruction, \*Supplementary Reading Materials, Vietnamese People

This is a bibliography of the collection held at the Indochinese Materials Center in Kansas City, Missouri. Various types of materials are cited, including: (1) textbooks and workbooks for teaching English; (2) curricular and supplementary materials for teaching Vietnamese, Cambodians, and Laotians; (3) curricular and supplementary materials for teaching Chinese speaking Indochinese; (4) resettlement information; and (5) general information concerning Asians. Individual items are listed with their cost, source, and target audience. Some of the materials listed may be acquired free of charge from the Indochinese Materials Center. For each item, its cost, source and target audience are indicated. (APM)

## Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors*, are in alphabetical order.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Investigations in Mathematics Education, Volume 14, Number 4.

ED 210 174

**Learning Activities**

Cultural Awareness for Young Children. Revised Edition.

ED 210 091

ERIC Clearinghouse for Science, Mathematics, and Environmental Education Fact Sheets. Nos. 1, 2, 3, 4, 1981.

ED 210 194

Families Learning Together: At Home and in the Community. Building Adult Knowledge and Children's Skills.

ED 210 113//

Follow Through in Oklahoma: A Process Curriculum in Early Childhood Education, Grades K, 1, 2, 3.

ED 210 112

A Methodology for Reading Skill Improvement in Vocational Secondary Programs.

ED 209 499

Project to Incorporate Spatial Concepts of Urban Geography in Secondary Social Studies Curricula (Project Geography). Final Report.

ED 210 233

World Population: Toward the Next Century.

ED 210 182

**Learning Disabilities**

Career Attitudes of the Learning Disabled Adolescent: Research Suggestions and Practices.

ED 209 821

Characteristics of Learning Disabilities: A Selective Review.

ED 209 885

Cognitive Style in Students Evidencing Dyscalculia.

ED 210 159

Designing Spelling Instruction for Learning Disabled Youngsters: An Emphasis on Unit Size, Distributed Practice, and Training for Transfer.

ED 209 809

Effects of Cooperative Learning on the Social Acceptance of Mainstreamed Academically Handicapped Students.

ED 209 882

A Pilot Document of Standards and Procedures Developed to Assist the Multidisciplinary Evaluation Team in the Identification of Learning Disabilities.

ED 209 819

Responding to Questions to Continue Classroom Participation.

ED 209 822

Self and Ideal Self of Learning Disabled Children—A Preliminary Study.

ED 209 792

**Learning Experience**

Follow Through in Oklahoma: A Process Curriculum in Early Childhood Education, Grades K, 1, 2, 3.

ED 210 112

**Learning Modalities**

Modality Education Project Overview.

ED 210 141

**Learning Modules**

Auto Service. Vocational Preparation Curriculum.

ED 209 492

Carpentry. Vocational Preparation Curriculum.

ED 209 490

La Fete de la Ste-Catherine: Guide.

ED 209 915

Maintaining Small Engines. Vocational Preparation Curriculum.

ED 209 491

**Learning Problems**

Developing and Implementing a Model for the Remediation of Weaknesses of Learning Abilities in Gifted and High Achieving Fourth Grade Students.

ED 209 813

The Spina Bifida Child in the Classroom.

ED 209 839

Utilization and Evaluation of Parents as Tutors of Young Black Children with Special Needs.

ED 209 830

**Learning Processes**

Avoidance Ruled Out by Similarity.

ED 209 926

Current Mental Retardation Research in the Soviet Union.

ED 209 875

The Development of a Cognitive Process Based Learning Strategies Questionnaire.

ED 209 896

Networking: A Semantic-Based Learning Strategy for Improving Prose and Comprehension.

ED 209 898

Reading and Study Behavior: A Review of the Behavioral Literature with Conclusions and Implications for Developmental Educators.

ED 209 639

Testing: A Key to High Student Achievement but Low Student Ratings?

ED 210 275

**Learning Resources Centers**

Special Education Resource System.

ED 209 872

**Learning Strategies**

The Development of a Cognitive Process Based Learning Strategies Questionnaire.

ED 209 896

Networking: A Semantic-Based Learning Strategy for Improving Prose and Comprehension.

ED 209 898

**Learning Theories**

Solution Methods on Algebra Problems with Simultaneous Equations.

ED 210 165

Teaching the Language of Literature.

ED 209 672

Towards Self-Directed Learning Theory.

ED 209 475

**Lecture Method**

Recall of Different Segments of an Interpreted Lecture by Deaf Students.

ED 209 908

**Legal Education**

New Mexico Courts: Information and Ideas for Teaching.

ED 210 206

Teacher Resource Manual for Civics.

ED 210 207

Teaching Communication in the Legal Process.

ED 209 693

**Legal Problems**

Avoiding the Court of First Resort.

ED 209 766

**Legal Responsibility**

Confidentiality of Alcohol and Drug Abuse Patient Records. Participant Manual.

ED 209 605

Off to a Good Start: A Resource for Parents, Professionals and Volunteers.

ED 210 096

**Legislation**

The Parent's Guide to Bilingual/Bicultural Education. Home, Child, School.

ED 210 384

**Legislators**

Legislative Libraries and Research Services in Developing Countries.

ED 210 007

**Leisure Time**

Continuing Education for Men and Women in Leisure Services.

ED 209 487

**Lesson Plans**

Planning, Organizing & Implementing Developmental Movement Skill Themes for Elementary School Children.

ED 210 263

**Liberal Arts**

An Evaluation of the Liberal Arts Program of the Institute of Study for Older Adults.

ED 210 056

**Librarians**

Curriculum Planning—Is the School Librarian Relevant?

ED 210 014

Library Faculty Development: Needed Now More Than Ever.

ED 210 021

Status of Librarians in Universities with Special Reference to Developing Countries.

ED 210 004

Technology, Systems and School Librarians: An Approach to Continuing Education.

ED 210 015

**Libraries**

The Problems of the Documentation on the History of Art in Japan.

ED 210 009

Technology as a Factor in Library Development and Educational Change.

ED 210 027

**Library Acquisition**

Collection Development Strategies for Academic and Research Libraries.

ED 210 039

**Library Associations**

## Subject Index

### Mild Mental Retardation

Competency Goals and Performance Indicators K-12: Educable Mentally Handicapped Learners Supplement.

ED 209 783

Effects of Cooperative Learning on the Social Acceptance of Mainstreamed Academically Handicapped Students.

ED 209 882

Identified and Placed for Life: A Review of the Disproportionate Number of Black Children Assessed, Identified and Placed in Programs for the Educable Mentally Retarded.

ED 210 354

Low Elevated Lead Levels and Mental Retardation.

ED 209 838

State Norms for IQ, Adaptive Behavior, and Sociocultural Status: Implications for Nonbiased Assessment.

ED 209 811

### Military Academy (West Point) NY

Follower Attributional Biases and Assessments of Female and Male Leaders' Performance.

ED 209 609

### Military Schools

Follower Attributional Biases and Assessments of Female and Male Leaders' Performance.

ED 209 609

### Military Training

Preparation and Design for a Training Effectiveness Evaluation of Device 2F64C for Replacement Pilot Training.

ED 209 435

### Minicourses

A Model Program for Middle School Gifted and Talented Students.

ED 209 805

### Minimum Competencies

Background Materials for the Professional Preparation Component of the Undergraduate Program Leading to the Provisional High School Certificate.

ED 210 270

### Minimum Competency Testing

Remedial Services for Students Who Fail Minimum Competency Tests. Final Report.

ED 210 303

### Minnesota (Saint Paul)

Report of the Citizens Task Force for the Library to the Mayor and the City Council of the City of Saint Paul.

ED 210 016

### Minority Group Children

Recruiting Minority Students.

ED 209 750

A Synthesis of Selected Research at NIE in Mathematics Education Related to Minorities.

ED 210 154

Testing Results for Minority Isolated Schools. San Diego City Schools. Spring 1981. Report No. 295.

ED 210 335

### Minority Groups

Academic Computing at Bennett College. A Case Study.

ED 210 022

Academic Computing at Jackson State University. A Case Study.

ED 210 023

Bibliography on Multicultural Drug Abuse Prevention Issues.

ED 210 373

Career Guidance Strategies for Minority High School and College Students.

ED 209 574

Enhancing Parental Effectiveness.

ED 209 841

ERIC References on Urban and Minority Education. Equal Opportunity Review.

ED 210 403

First Glances at Language and Culture in Mathematics Education.

ED 210 153

A Guide to Multicultural Drug Abuse Prevention: Evaluation. Series Booklet.

ED 210 378

A Guide to Multicultural Drug Abuse Prevention: Funding. Series Booklet.

ED 210 377

A Guide to Multicultural Drug Abuse Prevention: Needs Assessment. Series Booklet.

ED 210 374

A Guide to Multicultural Drug Abuse Prevention: Resources. Series Booklet.

ED 210 376

A Guide to Multicultural Drug Abuse Prevention: Strategies. Series Booklet.

ED 210 375

Improving Committee Membership Skills of Women and Minority Business College Students.

ED 210 364

A Manual for Screening and Assessing Students of Limited English Proficiency.

ED 209 785

Nonbiased Assessment.

ED 209 810

Phoenix Union High School District #210 Adult Academy Evaluation Report, 1980-81. Research Services Report No. 33:08:80/81:010.

ED 209 527

Predicting the Long-Term Performance in College of Minority and Nonminority Students: A Comparative Analysis in Two Collegiate Settings. College Entrance Examination Board Research and Development Reports.

ED 210 325

Program Strategies for Cultural Diversity. Proceedings of the 1980 Minority Leadership Workshop: Handicapped Children's Early Education Program (June 22-25, 1980).

ED 209 796

Student Characteristics Profile: Fall 1980 and Recent Trends. Data Brief Series.

ED 210 001

A Synthesis of Selected Research at NIE in Mathematics Education Related to Minorities.

ED 210 154

### Minority Institutions Science

#### Improvement Program

Minority Institutions Science Improvement Program (MISIP): A Brief History 1972-1980.

ED 210 149

#### Miscue Analysis

Studying Text Difficulty through Miscue Analysis. Program in Language and Literacy. Occasional Paper Number 3.

ED 209 657

### Mission Statements

The Virginia Plan for Higher Education-1979.

ED 209 973

### Mississippi State University

Enhancing the Quality of Teaching, Research, and Service at Mississippi State University.

ED 209 982

### Missouri

Adult Basic Education Learning Center 310 Project. Evaluation Report, July 1980-June 1981.

ED 209 534

A Study of Gifted Programs in the State of Missouri and the Philosophies of Their Faculties.

ED 209 847

### Mnemonics

Pictures as Prose-Learning Devices.

ED 209 660

### Model Business and Office Block Program

Model Business and Office Block Program for Rural Schools. Second Year Evaluation.

ED 210 278

### Modeling (Psychology)

Tevised Models as Agents of Behavior Change: Inducing Pro-Social Interaction Among Severely Withdrawn Children.

ED 209 826

### Models

Career Development Theory: An Interactive Adjustment Model for Career Education.

ED 209 904

An Ethnographic Analysis of Testing and the Navajo Students. Final Report.

ED 210 137

Evaluation of Secondary Vocational Programs-The Wisconsin Model.

ED 209 483

## Multicultural Education

203

A Plan for Evaluation Services.

ED 210 350

Program Strategies for Cultural Diversity. Proceedings of the 1980 Minority Leadership Workshop: Handicapped Children's Early Education Program (June 22-25, 1980).

ED 209 796

Research Dissemination in Mathematics Education.

ED 210 193

Simulation of a Schema Theory-Based Knowledge Delivery System for Scientists.

ED 210 011

Systematic Interviewing Skills. Typescript Manual.

ED 209 525

The Toledo Catalog: Assessment of Students and School Administrators. Volume 1. Draft.

ED 210 349

Towards a Strategy for Planning Vocational Education.

ED 209 486

### Money Management

Agricultural Marketing.

ED 209 539

### Monitor Model

Applying the Monitor Model to the Editing of Compositions.

ED 209 925

### Moral Development

Morality and the Schools. Occasional Paper 32.

ED 210 246

### Moral Values

Educational Implications of Behavioral Disordered Children's Classifications of Moral, Conventional and Personal Issues.

ED 209 803

On the Nature of Emotion: Research and Educational Implications.

ED 209 580

### Mothers

Antecedents of Compliance in 2-Year-Olds From a High-Risk Sample.

ED 210 099

Prevention Service Programs for Infants of Mentally-Ill Mothers. Progress Report.

ED 210 094

### Motivation

Career Anchors: A New Concept in Career Development for the Professional Educator.

ED 209 545

### Motivation Techniques

The Effect of Ridiculing a Model on Children's Imitation of Televised Instruction.

ED 209 696

### Motor Development

The Spina Bifida Child in the Classroom.

ED 209 839

### Multicultural Education

Accommodating Diversity: An Assessment of Teacher Training Needs in Newly Desegregated Schools. Multi-Ethnic School Environments.

ED 210 268

Detroit Objective Referenced Tests (DORT): Ethnic Literacy Handbook. A Guide for Teacher Planning.

ED 210 386

DORT: Ethnic Literacy Project. ESAA Basic Project. Teacher's Manual.

ED 210 387

ERIC References on Urban and Minority Education. Equal Opportunity Review.

A Users Guide to the Evaluation of Inservice Education. ED 210 252

The Using Evaluation Data Form. ED 210 280

A "Working Assumptions" Approach to Early Program Evaluation. ED 210 078

The 1979-80 Evaluation of the Title VII Bilingual Program, Project Cumbre, at the Ann Street Bilingual School of Hartford, Connecticut. ED 210 277

### Program Implementation

An Administrator's Manual for Planning, Developing, and Implementing Mainstream, Self-Contained, or Co-op Programs for the Disadvantaged. ED 209 429

Analysis of the Competency-Based High School Diploma Program for CETA Clients. Report I: Structural and Programmatic Features of the Pilot Project as Model. ED 209 507

Career Education for the Handicapped: Current Perspectives for Teachers. ED 209 498

Health Occupations Cluster Guide. ED 209 522

Implementation and Intervention Strategies: The Case of PL 94-142. ED 209 761

Implementation Issues in K-12 Career Education. Monographs on Career Education. ED 209 452

The Kansas P.L.A.N. for Deaf-Blind: A Model System for Providing a Coordinated Life-Long Continuum of Services to Deaf-Blind Individuals and Their Families. ED 209 623

Library Instruction Workbook for the Sciences for Use in Mitchell Memorial Library, Mississippi State University. Pilot Study, Final Report. ED 210 028

Project Teen Concern: An Implementation Manual for An Educational Program to Prevent Premature Parenthood and Venereal Disease. ED 209 604

School - Community Involvement: A Human Interaction Approach. ED 209 565

Some Issues in the Implementation of P.L. 94-142 in the Pacific Basin Territories. ED 209 833

### Program Improvement

Creating Conditions for Professional Practice in Schools and Departments of Education. ED 210 247

Educational Needs Assessment for Wisconsin Adults with Less than High School Graduation or GED. ED 209 538

Revitalizing a Foreign Language Department. ED 209 960//

Vocational Education in Correctional Institutions. A Report Based on Four National Hearings. ED 209 474

### Program Monitoring

A Comprehensive Monitoring System. ED 209 837

### Program to Develop Efficiency Visual Functioning

Revision of the Utilization of Low Vision Kit. Final Report. ED 209 849

### Program Validation

Resources on Validation of Educational Programs, Practices, and Products: An Annotated Bibliography. ED 209 780

The Search for Quality Control in Dissemination of Educational Products and Practices: A Look at the Literature and Major Issues. Revised. ED 209 777

Survey of State Procedures for the Validation of Educational Programs. ED 209 778

Survey of State Procedures for the Validation of Educational Programs. Executive Summary. ED 209 779

### Programmable Calculators

Using Calculators in Mathematics 11. Student Text. ED 210 187

Using Calculators in Mathematics 11. Teacher Commentary. ED 210 188

Using Calculators in Mathematics 12. Student Text. ED 210 189

Using Calculators in Mathematics 12. Teacher Commentary. ED 210 190

### Programed Instruction

Auto-Tutorial Anatomy and Physiology for Associate Degree Nursing Programs. ED 209 482

Success Begins at Home. ED 210 119//

### Programing

Multiple-Instruction, Multiple-Data Path Computers: Parallel Processing Impact on Flight Simulation Software. Final Report. ED 210 037

Use of the Computer in Solving Mathematics Problems. ED 210 158

### Programing (Broadcast)

Boston (WGBH) Field Testing of a Qualitative Television Rating System for Public Broadcasting. ED 209 710

Do Pro-Nutritional Television Messages Improve Children's Eating Behaviors? Empirical Findings and Recommendations for Further Research. ED 209 707

### Project ALMS

Project ALMS: Adult Literacy Mission Support. An Adult Basic Reading Project. ED 209 424

### Project Follow Through

Atlanta Follow Through Program. Final Report 1977-78, 1978-79, 1979-80. Report No. 14-6. ED 210 357

Follow Through in Oklahoma: A Process Curriculum in Early Childhood Education, Grades K, 1, 2, 3. ED 210 112

### Project Head Start

## Psychological Characteristics

213

National Evaluation of Head Start Educational Services and Basic Educational Skills Demonstration Programs. Project Report 6: Description and Analysis of Program Data, Basic Educational Skills Initiative [and] Project Report 7: Description and Analysis of Program Data, Head Start Sample Programs. Appendices. Draft. ED 210 293

National Evaluation of Head Start Educational Services and Basic Educational Skills Demonstration Programs. Project Report 7: Description and Analysis of Program Data: Head Start Sample Programs. Draft. ED 210 292

National Evaluation of Head Start Educational Services and Basic Educational Skills Demonstration Programs. Project Report 9: Implementation of the Study Design. Appendices. ED 210 295

National Evaluation of Head Start Educational Services and Basic Educational Skills Initiative. Project Report 1: Design and Sampling and Project Report 2: Panel Recommendations. ED 210 098

National Evaluation of Head Start Educational Services and Basic Educational Skills Initiative. Project Report 10: Phase II, Fall 1979 Child Data Collection. Draft. ED 210 296

National Evaluation of Head Start Educational Services and Basic Educational Skills Initiative. Project Report 11: Description and Analysis of Fall 1979 Child Pretest Data. Appendix B, Part 2: Item Response Distribution Tables. Draft. ED 210 298

National Evaluation of Head Start Educational Services and Basic Educational Skills Initiative. Project Report 9: Procedures in the Implementation of the Study Design, 1978-79. Draft. ED 210 294

National Evaluation of Head Start Educational Services and Basic Educational Skills Initiative Programs. Project Report 11: The First Cohort of Children. Final Project Report. ED 210 297

### Project STEP

Project S.T.E.P. (Sequential Training Experiences in the Psychomotor Domain). Final Evaluation Report. ED 209 791

### Project TEACH

Project: TEACH. Handicapped Children's Early Education Program. Progress Final Report, July 1, 1979 to June 30, 1980. ED 209 877

### Promotion (Occupational)

Affirmative Action: A Concern in Higher Education Administration. The Organization and Administration of Higher Education. ED 210 408

### Property Taxes

Fiscal Restraints and the Burden of Local and State Taxes. ED 209 733

### Proposal Writing

Teaching Evaluation Research Via a Semester-Long Simulation. ED 209 596

### Prose Learning

Pictures as Prose-Learning Devices. ED 209 660

Studying Text Difficulty through Miscue Analysis. Program in Language and Literacy. Occasional Paper Number 3. ED 209 657

### Protocol Analysis

Editing for Comprehension: Improving the Process through Reading Protocols. ED 209 642

### Psychiatric Hospitals

Sound Minds in a Soundless World. ED 209 816

### Psychological Characteristics

Long-Term Changes in Intelligence in Children at Risk. ED 209 616

- A Study of the Relationship Between Alcoholism and Character Disorder. ED 209 621

Disseminating Student Team Learning in Desegregated Schools: A Case Study. ED 210 352  
Integration, Inservice Education, and the Impact of Desegregation. ED 210 327  
Operationalizing Contact Theory: Measuring Student Attitudes toward Desegregation. ED 210 365

## Subject Index

Report of the San Diego Plan for Racial Integration 1980-81, Part I.

ED 210 336

### Radio

Structural Change Criteria in the Selection of Strategies of Communication for Development. An Examination of Two Contrasting Media Systems—National Television and Local Public-Service Radio Stations—in the Light of Structural Change Criteria.

ED 210 033

### Rape

Alcohol Consumption and Responsibility Judgment for Rape.

ED 209 587

Violence Against Women: Causes and Prevention. A Literature Search and Annotated Bibliography. Second Edition. Domestic Violence Monograph Series, Number 3.

ED 209 584

### Rasch Model

Person-Fit to the Rasch Model Using Norm-Referenced and Criterion-Referenced Statewide Data.

ED 210 307

### Rating Scales

Early Psychological Studies of "Genius" and Academic Quality Rankings.

ED 209 999

Evaluating Ethnic Literature from a Cross-Cultural Perspective: Implications for the Bilingual Classroom.

ED 209 917

Toward a Definition of "Good" Incident Dimension Congruence for BARS.

ED 210 310

Training Skills: A Rating Scale. National Project on Career Education.

ED 209 470

### Read Along

The Effects of a Modified Neurological Impress Method on Developing Decoding Skills.

ED 209 638

### Readability

Experiments on the Readability of Natural Expository Paragraphs with Identical or Related Sentence Topics.

ED 209 631

Readability of Rewritten and Original Primary Source Materials in the Elementary Classroom.

ED 210 224

Readable English for Hearing-Impaired Students: Multi-Level Guidelines for Linguistically Controlled Reading Materials.

ED 209 876

### Reader Response

The Transactional Theory of the Literary Work: Implications for Research.

ED 209 667

### Reading Achievement

Early Childhood Education Classroom Evaluation.

ED 210 120

Greater Use of Exemplary Education Programs Could Improve Education for Disadvantaged Children. Report to the Congress by the Comptroller General of the United States.

ED 210 369

Procedural Handbook: 1979-80 Reading and Literature Assessment.

ED 210 300

### Reading Attitudes

The Beginner's Concepts about Reading, Attitudes, and Reading Achievement in Relationship to Language Environment.

ED 209 637

An Ethnographic Study of the Acquisition and Application of Reading Skills in One Elementary School Classroom.

ED 209 658

A Study of the Reading Interests and Attitudes of Fourth, Fifth, and Sixth Grade Gifted Children in the State of Missouri.

ED 209 842

### Reading Comprehension

Bibliographies and Summaries of Selected Articles in Reading Comprehension.

ED 209 643

Children's Ability to Comprehend Main Ideas after Reading Social Studies Textbooks.

ED 209 647

Children's Awareness of Story Order.

ED 209 659

Editing for Comprehension: Improving the Process through Reading Protocols.

ED 209 642

Factors Affecting Comprehension of Math Word Problems—A Review of the Research.

ED 209 655

Flexibility of Schema Shifting in Good and Poor Readers.

ED 209 646

Improving Reading Comprehension.

ED 209 644

Information Structures and Pedagogical Applications.

ED 209 919

Investigating the Psychological Reality of Generic Characteristics of Short Stories.

ED 209 661

Networking: A Semantic-Based Learning Strategy for Improving Prose and Comprehension.

ED 209 898

Pictures as Prose-Learning Devices.

ED 209 660

Studying Text Difficulty through Miscue Analysis. Program in Language and Literacy. Occasional Paper Number 3.

ED 209 657

Teaching the Language of Literature.

ED 209 672

What Research in Reading Reveals about the Reading Process.

ED 209 630

### Reading Diagnosis

Diagnostic Evaluation in the Initial Tuition of Reading and Spelling.

ED 209 652

### Reading Difficulties

The Spina Bifida Child in the Classroom.

ED 209 839

Studying Text Difficulty through Miscue Analysis. Program in Language and Literacy. Occasional Paper Number 3.

ED 209 657

### Reading Habits

Reading Habits, Patterns, and Interests of Older Active Readers.

ED 209 654

A Study of the Reading Interests and Attitudes of Fourth, Fifth, and Sixth Grade Gifted Children in the State of Missouri.

ED 209 842

### Reading Improvement

Atlanta Follow Through Program. Final Report 1977-78, 1978-79, 1979-80. Report No. 14-6.

ED 210 357

A Methodology for Reading Skill Improvement in Vocational Secondary Programs.

ED 209 499

Pictures as Prose-Learning Devices.

ED 209 660

A Study of the Longitudinal Effects of the Title I Reading Component From 1976 Through 1980.

ED 210 355

Teaching Home Economics Content Material in an Individualized Reading Skills Laboratory.

ED 209 632

### Reading Instruction

Basic Skills Resource Guide.

ED 210 259

The Beginner's Concepts about Reading, Attitudes, and Reading Achievement in Relationship to Language Environment.

ED 209 637

Beginning Reading in Italy.

ED 209 636

Diagnostic Evaluation in the Initial Tuition of Reading and Spelling.

ED 209 652

The Disabled Reader in a Changing World—and Full Participation.

ED 209 645

## Reading Research

215

The Effects of a Modified Neurological Impress Method on Developing Decoding Skills.

ED 209 638

An Ethnographic Study of the Acquisition and Application of Reading Skills in One Elementary School Classroom.

ED 209 658

Identification of Reading Instructional Practices Employed by Elementary Teachers.

ED 209 656

Improving Reading Comprehension.

ED 209 644

Oversight Hearing on Reading and Writing Achievement. Hearing Before the Subcommittee on Elementary, Secondary, and Vocational Education of the Committee on Education and Labor, House of Representatives, Ninety-Seventh Congress, First Session.

ED 209 635

Phoenix Union High School District #210 Adult Academy Evaluation Report, 1980-81. Research Services Report No. 33:08:80/81:010.

ED 209 527

Primary Grade Content Reading: Why and How.

ED 209 633

The Secondary School Teacher as an Adult Learner.

ED 210 269

What Research in Reading Reveals about the Reading Process.

ED 209 630

### Reading Interests

Reading Habits, Patterns, and Interests of Older Active Readers.

ED 209 654

A Study of the Reading Interests and Attitudes of Fourth, Fifth, and Sixth Grade Gifted Children in the State of Missouri.

ED 209 842

### Reading Material Selection

Influence of Background Experience and Interest on Instructional Level of Adult Beginning Readers.

ED 209 649

### Reading Materials

Readable English for Hearing-Impaired Students: Multi-Level Guidelines for Linguistically Controlled Reading Materials.

ED 209 876

### Reading Processes

The Transactional Theory of the Literary Work: Implications for Research.

ED 209 667

What Research in Reading Reveals about the Reading Process.

ED 209 630

### Reading Programs

Federal Support Has Resulted in Effective Programs for Poor Readers in Small Schools.

ED 209 650

Greater Use of Exemplary Education Programs Could Improve Education for Disadvantaged Children. Report to the Congress by the Comptroller General of the United States.

ED 210 369

Oregon Title I-M Early Childhood and Elementary Education Programs.

ED 210 123

### Reading Research

The Beginner's Concepts about Reading, Attitudes, and Reading Achievement in Relationship to Language Environment.

ED 209 637

Bibliographies and Summaries of Selected Articles in Reading Comprehension.

ED 209 643

Children's Ability to Comprehend Main Ideas after Reading Social Studies Textbooks.

ED 209 647

Children's Awareness of Story Order.

ED 209 659

Differential Memory of Picture and Word Stimuli in a Paired-Associate Learning Task.

ED 209 651

Editing for Comprehension: Improving the Process through Reading Protocols.

ED 209 642

The Effects of a Modified Neurological Impress Method on Developing Decoding Skills.

ED 209 638

The Effects of Spelling Change on the Adult Reader.

ED 209 634

An Ethnographic Study of the Acquisition and Application of Reading Skills in One Elementary School Classroom.

ED 209 658

Experiments on the Readability of Natural Expository Paragraphs with Identical or Related Sentence Topics.

ED 209 631

Flexibility of Schema Shifting in Good and Poor Readers.

ED 209 646

Identification of Reading Instructional Practices Employed by Elementary Teachers.

ED 209 656

Influence of Background Experience and Interest on Instructional Level of Adult Beginning Readers.

ED 209 649

Investigating the Psychological Reality of Generic Characteristics of Short Stories.

ED 209 661

Pictures as Prose-Learning Devices.

ED 209 660

Reading Habits, Patterns, and Interests of Older Active Readers.

ED 209 654

Studying Text Difficulty through Miscue Analysis. Program in Language and Literacy. Occasional Paper Number 3.

ED 209 657

What Research in Reading Reveals about the Reading Process.

ED 209 630

#### **Reading Skills**

Children's Ability to Comprehend Main Ideas after Reading Social Studies Textbooks.

ED 209 647

The Disabled Reader in a Changing World-and Full Participation.

ED 209 645

Learning Problems of Junior Level Children: A Nordic Joint Research Project (No. 2108).

ED 210 095

A Methodology for Reading Skill Improvement in Vocational Secondary Programs.

ED 209 499

Oversight Hearing on Reading and Writing Achievement. Hearing Before the Subcommittee on Elementary, Secondary, and Vocational Education of the Committee on Education and Labor, House of Representatives, Ninety-Seventh Congress, First Session.

ED 209 635

Primary Grade Content Reading: Why and How.

ED 209 633

Reading: Primary and Elementary Levels. Pre-drafted Individual Short-Term Plan/Records: Directions for Resource Teachers, Teachers and Aides.

ED 210 126

Teaching Home Economics Content Material in an Individualized Reading Skills Laboratory.

ED 209 632

#### **Reading Tests**

Diagnostic and Criterion-Referenced Reading Tests: Review and Evaluation.

ED 209 640

Diagnostic Evaluation in the Initial Tuition of Reading and Spelling.

ED 209 652

Educational Improvement Act: Diagnostic Testing.

ED 210 287

How Accurate Are Oral Reading Tests?

ED 209 653

#### **Reading Writing Relationship**

Beginning Reading in Italy.

ED 209 636

#### **Recall (Psychology)**

Bibliographies and Summaries of Selected Articles in Reading Comprehension.

ED 209 643

Differential Memory of Picture and Word Stimuli in a Paired-Associate Learning Task.

ED 209 651

The Effects of Reviewing Class Notes for Deaf and Hearing Students.

ED 209 895

Pictures as Prose-Learning Devices.

ED 209 660

Recall of Different Segments of an Interpreted Lecture by Deaf Students.

ED 209 908

Uses of the Past: An Adult-Centric Model of Personality Development.

ED 209 602

#### **Recency Effect**

Using Children's Self-Reports to Measure Attitudes: Factors Influencing a Recency Response Set.

ED 210 313

#### **Receptive Language**

The Development of Social-Cognition in Deaf Preschool Children: A Pilot Study.

ED 209 808

#### **Recognition (Psychology)**

Differential Memory of Picture and Word Stimuli in a Paired-Associate Learning Task.

ED 209 651

The Effects of Reviewing Class Notes for Deaf and Hearing Students.

ED 209 895

#### **Records (Forms)**

The Specialists Who Help Your Child [and] Your Child's Records.

ED 209 868

Vocational Technology for Cerebral Palsied Individuals Project. End-of-Project Report, 1978-1981. Volume II-Appendices.

ED 209 531

#### **Recreational Programs**

Recreational Programming Hierarchy with Severely and Profoundly Retarded Populations.

ED 209 887

#### **Recreational Reading**

A Study of the Reading Interests and Attitudes of Fourth, Fifth, and Sixth Grade Gifted Children in the State of Missouri.

ED 209 842

#### **Reduction in Force**

Reduction in Force-Layoff and Recall. Suggested Personnel Policy Guidelines for School Districts.

ED 209 725

#### **Reentry Students**

Counseling Implications of Re-Entry Women's Life Experiences.

ED 209 600

The Impact of Life Change Events on Women's Decisions To Return to College.

ED 209 496

#### **Reentry Workers**

Counseling Implications of Re-Entry Women's Life Experiences.

ED 209 600

#### **Reference Materials**

Can a Missouri State University Successfully Operate a Course-Integrated Bibliographic Instruction Program?

ED 210 024

Energy Awareness Guide. A Resource Book for Vocational Educators.

ED 209 533

#### **Referral**

The Utilization of Social Service and Community Agencies as External Support Services.

ED 209 988

#### **Refugees**

A Bibliography of the Hmong (Miao) of Southeast Asia and the Hmong Refugees in the United States. Southeast Asian Refugee Studies Occasional Papers No. 1.

ED 210 371

Evaluation of the English as a Second Language and Vocational Training Program for Indochinese Refugees.

ED 209 941

Hearing on the Consolidated Refugee Education Assistance Act. Hearing before the Subcommittee on Elementary, Secondary, and Vocational Education of the Committee on Education and Labor, House of Representatives, Ninety-Seventh Congress, 1st Session, on H.R. 3076, to Consolidate Educational Assistance Programs for Refugees.

ED 210 401

Indochinese Mutual Assistance Association: Time for a New Role.

ED 210 332

Refugees in Africa: A Country by Country Survey.

ED 210 326

Teaching English to Refugees: A Family Model.

ED 209 952//

#### **Regional Characteristics**

Drug Abuse in Rural America. Treatment Research Report.

ED 209 571

#### **Regional Cooperation**

Regional Cooperation for Development of Medical Information Service.

ED 210 010

School-University Collaboration Supporting School Improvement. Volume II: The Eastern State Case.

ED 210 261

School-University Collaboration Supporting School Improvement. Volume I: The Midwestern State Teacher Center Network Case.

ED 210 260

#### **Regional Intervention Preschoolers**

##### **Parents**

Model Preschool Programs in a Rural Setting: Toward a Service Continuum.

ED 209 827

##### **Regression (Statistics)**

Black-White Differences in the Educational Attainment Process: What Have We Learned?

ED 210 330

##### **Reinforcement**

Using Experimental Psychology in Technical Writing.

ED 209 671

##### **Relationship Psychotherapy**

Relationship Group Therapy: A Short Term Approach with Children.

ED 209 627

##### **Relevance (Education)**

A Directory of Hispanic and American Indian Higher Education Programs.

ED 210 136//

The God Factor of the Community College Ecological System: Future Studies.

ED 210 061

##### **Reliability**

Measurement of the Perceived Characteristics of Evaluation Recommendations.

ED 210 291

##### **Religious Education**

Nonpublic School Enrollment and Staff. New York State 1980-81.

ED 210 264

##### **Remedial Instruction**

Overcoming Fossilized English.

ED 209 924

Remedial Services for Students Who Fail Minimum Competency Tests. Final Report.

ED 210 303

Status Report on Remediation in Higher Education.

ED 210 079

##### **Remedial Mathematics**

A Developmental Mathematics Program for Community College Students.

ED 210 076

Pre-Algebra.

ED 210 081

##### **Remedial Programs**

Behavioral Prescribing by the Numbers: A Manual for Educators Who Work with Problem Students.

ED 209 564

## Subject Index

Developing and Implementing a Model for the Remediation of Weaknesses of Learning Abilities in Gifted and High Achieving Fourth Grade Students.

ED 209 813

Remedial Services for Students Who Fail Minimum Competency Tests. Final Report.

ED 210 303

### Remedial Reading

The Effects of a Modified Neurological Impression Method on Developing Decoding Skills.

ED 209 638

The Secondary School Teacher as an Adult Learner.

ED 210 269

Teaching Home Economics Content Material in an Individualized Reading Skills Laboratory.

ED 209 632

### Reprography

Graphic Arts (Graphic Communications). Industrial Arts, Senior High-Level II. North Dakota Senior High Industrial Arts Curriculum Guides.

ED 209 516

### Reputation

Early Psychological Studies of "Genius" and Academic Quality Rankings.

ED 209 999

Enhancing the Quality of Teaching, Research, and Service at Mississippi State University.

ED 209 982

### Research and Development Utilization

#### Program

Product, Process and People in the R&D Utilization Program. The Power of the Interventions.

ED 210 279

### Research Committees

Program Related Evaluation (Manual and Staff Development Package).

ED 210 282

### Research Design

National Evaluation of Head Start Educational Services and Basic Educational Skills Initiative Project Report 9: Procedures in the Implementation of the Study Design, 1978-79. Draft.

ED 210 294

Student Retention and Attrition in the Community College: A Review and Research Design.

ED 210 064

### Research Directors

Directory of Rural Development Researchers in the South.

ED 210 143

**310 Project**

Adult Basic Education Learning Center 310 Project. Evaluation Report, July 1980-June 1981.

ED 209 534

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be carefully documented to ensure the integrity of the financial data. This includes recording dates, amounts, and the nature of the transactions.

The second part of the document provides a detailed breakdown of the company's revenue for the quarter. It lists various sources of income, such as sales of goods and services, and provides a clear comparison between actual performance and budgeted figures. This analysis helps management identify areas of strength and opportunities for improvement.

The third part of the document focuses on the company's expenses. It categorizes costs into fixed and variable expenses, allowing for a more granular understanding of the financial picture. By tracking these costs closely, the company can better manage its resources and optimize its operational efficiency.

The final part of the document summarizes the overall financial health of the company. It highlights key metrics such as profit margins and return on investment, providing a clear snapshot of the company's performance. This summary is crucial for stakeholders, including investors and board members, in making informed decisions about the company's future.

## Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

**Author** ————— **Norberg, Kenneth D.**

**Title** ————— **Iconic Signs and Symbols in Audiovisual Communication, An Analytical Survey of Selected Writing and Research Findings, Final Report.**

**ED 013 371** ————— **Accession Number**

## Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

**Institution** ————— **Sacramento State College, Calif.**

**Title** ————— **Iconic Signs and Symbols in Audiovisual Communication, An Analytical Survey of Selected Writings and Research Findings, Final Report.**

## Publication Type Index

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

Category Code	Category Name	Accession Number
(040)	Dissertations/Theses	
Title	Iconic Signs and Symbols in Audiovisual Communication, An Analytical Survey of Selected Writings and Research Findings, Final Report.	ED 013 371

PUBLICATION TYPE CATEGORIES			
CODE	CATEGORY	CODE	CATEGORY

## Publication Type Index

Self and Ideal Self of Learning Disabled Children—A Preliminary Study.

ED 209 792

Self-Concept and Deafness: A Review of Research Literature.

ED 209 899

Some Issues in the Implementation of P.L. 94-142 in the Pacific Basin Territories.

ED 209 833

Sound Minds in a Soundless World.

ED 209 816

Source Book—Nursing Personnel.

ED 209 505

Specifying the Needs of a "Bilingual" Developmentally Disabled Population: Issues and Case Studies.

ED 209 873

Stability and Change: Innovation in an Educational Context. Environment, Development, and Public Policy: Public Policy and Social Services.

ED 210 131//

Status of Librarians in Universities with Special Reference to Developing Countries.

ED 210 004

Structural Change Criteria in the Selection of Strategies of Communication for Development. An Examination of Two Contrasting Media Systems—National Television and Local Public-Service Radio Stations—in the Light of Structural Change Criteria.

ED 210 033

Surprised by the Other: Choice Points in Relationships.

ED 209 607

A Synthesis of Selected Research at NIE in Mathematics Education Related to Minorities.

ED 210 154

Teachers' Attitudes Toward In-Service Programs.

ED 210 251

Testing: A Key to High Student Achievement but Low Student Ratings?

ED 210 275

Traditional Healing and Western Health Care: A Case Against Formal Integration.

ED 210 138

Training Systems in Eastern Europe. A Study of Change in the Organization of Training in the USSR, Poland and the German Democratic Republic.

ED 209 427//

The Transactional Theory of the Literary Work: Implications for Research.

ED 209 667

Trends in Adolescent Childbearing in Kentucky: 1970-1977. Kentucky Women: Challenges and Prospects.

ED 209 589

Two Special Cases: Women and Blacks.

ED 209 738//

The Use of Peers as College Academic Advisors: Reasons and Evidence.

ED 209 599

The Use of Volunteers in Drug Abuse Services: A Review of the Literature. Services Research Report.

ED 209 606

Using Fairy Tales to Change Perceptions of Self and Others.

ED 209 578

Visual Literacy. . . An Overview of Theory and Practice.

ED 210 036

Vocational Education in Correctional Institutions. A Report Based on Four National Hearings.

ED 209 474

What Research Has to Say to Administrators of Secondary Schools About Effective Teaching and Staff Development.

ED 209 748

What Research in Reading Reveals about the Reading Process.

ED 209 630

Women's Studies.

ED 209 678

## (071) Information Analyses - ERIC IAPS

Activity Sourcebook for Earth Science. Science Education Information Report.

ED 210 145

Advisory Committees to the Humanities: A Handbook. Topical Paper, Number 74.

ED 210 066

Board or Superintendent: Who Manages the Schools? Research Action Brief Number 19.

Family Training Program for Atypical Infants and Children. The Third Year Report.

ED 209 782

Greater Use of Exemplary Education Programs Could Improve Education for Disadvantaged Children. Report to the Congress by the Comptroller General of the United States.

ED 210 369

Guidelines and Manual of Tests for Educators Interested in the Assessment of Handicapped Children.

ED 209 788

Implementation of Sex Equity in the Social Studies: Evaluation of a Middle School Curriculum.

ED 210 230

Improving Committee Membership Skills of Women and Minority Business College Students.

ED 210 364

Individualized Instruction for Data Access (IIDA). Final Report.

ED 210 026

The Indochinese Mutual Assistance Associations: Characteristics, Composition, Capacity Building Needs and Future Directions.

ED 210 331

Information on Prime Sponsor CETA Expenditures Related to Membership Organizations. Report to the Honorable William L. Clay, House of Representatives, by the U.S. General Accounting Office.

ED 209 526

Information Prosthetics for the Handicapped. Artificial Intelligence Memo No. 496.

ED 209 790

Library Instruction Workbook for the Sciences for Use in Mitchell Memorial Library, Mississippi State University. Pilot Study, Final Report.

ED 210 028

Management Training for Further Education Staff in the United Kingdom and West Germany. Comparative Papers in Further Education. Number Seven.

ED 209 753

Model Business and Office Block Program for Rural Schools. Second Year Evaluation.

ED 210 278

Multiple-Instruction, Multiple-Data Path Computers: Parallel Processing Impact on Flight Simulation Software. Final Report.

ED 210 037

National Evaluation of Head Start Educational Services and Basic Educational Skills Demonstration Programs. Project Report 7: Description and Analysis of Program Data: Head Start Sample Programs. Draft.

ED 210 292

National Evaluation of Head Start Educational Services and Basic Educational Skills Initiative. Project Report 10: Phase II, Fall 1979 Child Data Collection. Draft.

ED 210 296

National Evaluation of Head Start Educational Services and Basic Educational Skills Initiative Project Report 9: Procedures in the Implementation of the Study Design, 1978-79. Draft.

ED 210 294

National Evaluation of Head Start Educational Services and Basic Education Skills Initiative Programs. Project Report 11: The First Cohort of Children. Final Project Report.

ED 210 297

The National Evaluation of the Cities in Schools Program. Report No. 4: Final Report.

ED 210 360

A National Study To Assess the Service Needs of the Hispanic Elderly. Final Report.

ED 210 361

Needs Assessments in Career Education: Alternatives to Published Tests.

ED 209 443

Non-Discriminatory Assessment: Formal and Informal Assessment of Limited English Proficient Children.

ED 209 834

Phoenix Union High School District #210 Adult Academy Evaluation Report, 1980-81. Research Services Report No. 33:08:80/81:010.

ED 209 527

A Plan for Evaluation Services.

ED 210 350

Project S.T.E.P. (Sequential Training Experiences in the Psychomotor Domain). Final Evaluation Report.

ED 209 791

## (143) Reports - Research

289

Race-Neutral Campuses in Urban Areas: A Follow-Up Report on Merger and Joint Planning.

ED 209 990

Relationship Group Therapy: A Short Term Approach with Children.

ED 209 627

Remedial Services for Students Who Fail Minimum Competency Tests. Final Report.

ED 210 303

Report of the Citizens Task Force for the Library to the Mayor and the City Council of the City of Saint Paul.

ED 210 016

A Report on the Administration and Operation of Title I of Public Law 874, Eighty-First Congress.

ED 210 353

Revision of the Utilization of Low Vision Kit. Final Report.

ED 209 849

Simulation of a Schema Theory-Based Knowledge Delivery System for Scientists.

ED 210 011

South Carolina Vocational Educators' Professional Development Needs Assessment.

ED 209 485

Speaking Assessment, 1981. Final Report.

ED 210 283

Special Education in New Hampshire: A Five Year Perspective.

ED 209 884

The Status of Evaluation of Student Services and Academic Programs at Medium Sized Junior and Senior Colleges.

ED 210 304

Toledo Public Schools School Utilization Study, 1980-81 School Year 2nd Year Study. Elementary School Buildings.

ED 210 351

Unanswered Questions on Educating Handicapped Children in Local Public Schools. Report to the Congress by the Comptroller General of the United States.

ED 209 794

The Urban Consumer Education Project. Interim Report, 1979-80.

ED 210 342

Validation of Interdisciplinary Cooperative Education Manual.

ED 209 540

A Voluntary Plan for the Interdistrict Exchange of Students and Related Programs.

ED 210 340

The 1979-80 Evaluation of the Title VII Bilingual Program, Project Cumbre, at the Ann Street Bilingual School of Hartford, Connecticut.

ED 210 277

### (143) Reports - Research

Academic Computing at Bennett College. A Case Study.

ED 210 022

Academic Computing at Jackson State University. A Case Study.

ED 210 023

The Acceptance of Television Commercials among Black Consumers.

## Publication Type Index

Effects of Locally Conducted Research on Policy and Practice Regarding Bilingual Inservice Teacher Education. Final Technical Report.

ED 210 254

The Effects of Reviewing Class Notes for Deaf and Hearing Students.

ED 209 895

The Effects of Spelling Change on the Adult Reader.

ED 209 634

Electronic Messaging in the University Organization.

ED 209 706

Elementary School Foreign Language Instruction in the United States: Innovative Approaches for the 1980's. Final Report.

ED 209 940

The Emergence of Markers of Current Relevance.

ED 209 928

The Emergence of Topic Type in Children Under 2; 6: A Chicken and Egg Problem.

ED 209 929

Empirical Identification of Hierarchies.

ED 210 276

Energy Management Needs: A Project to Develop Solutions for Higher Education's Energy Problems in the 1980's.

ED 209 981

ESSEA Title I Early Childhood Education: Review of Literature on Evaluation and Instrumentation. Interim Report, Revised.

ED 210 315

Establishment of a Data Base for Use in the Development of a Model for Awarding Academic Credit to CETA Participants. Final Report for Governor's Special Grant.

ED 209 446

An Ethnographic Analysis of Testing and the Navajo Students. Final Report.

ED 210 137

An Ethnographic Study of the Acquisition and Application of Reading Skills in One Elementary School Classroom.

ED 209 658

Evaluating Ethnic Literature from a Cross-Cultural Perspective: Implications for the Bilingual Classroom.

ED 209 917

The Evaluation and Prediction of Affective Response to Graduate Teaching Assistants' Classroom Communication.

ED 209 699

The Evaluation of Transition Programs: A Quantitative and Quasi-qualitative Look.

ED 209 890

Experiments on the Readability of Natural Expository Paragraphs with Identical or Related Sentence Topics.

ED 209 631

The Extent of Classroom Segregation within Desegregated Schools.

ED 210 405

Facilitating Problem Solving in High School Chemistry.

ED 210 192

Facilitation of Communication Responses through Naturalized Sensory Reinforcement in Blind Mute/Profoundly Retarded Adults.

ED 209 817

Factors Influencing Year 9 Students' Intentions to Leave School.

ED 209 484

Factors Relating to the Job Placement of Former Secondary Vocational Education Students.

ED 209 477

Family Adjustment, Parental Attitudes, and Social Desirability.

ED 209 590

A Family Career and Individual Life Cycle Perspective on Planning Residential and Vocational Options for Mentally Retarded Children.

ED 209 852

Federal Support Has Resulted in Effective Programs for Poor Readers in Small Schools.

ED 209 650

A Film Evaluation Checklist to Describe Instructionally Relevant Film Characteristics: A Rater Reliability Study.

ED 209 909

First Semester Retention of University of Iowa Students.

ED 209 995

The First-Year Algebra Via Applications Development Project. Summary of Activities and Results. Final Technical Report.

ED 210 191

Fiscal Restraints and the Burden of Local and State Taxes.

ED 209 733

Flexibility of Schema Shifting in Good and Poor Readers.

ED 209 646

Flight Simulator: Use of SpaceGraph Display in an Instructor/Operator Station. Final Report.

ED 210 012

Follower Attributional Biases and Assessments of Female and Male Leaders' Performance.

ED 209 609

Group Process as the Mediator between Aptitudes and Achievement: Stability over Time.

ED 209 601

Health Occupational Program Needs in the Los Angeles Community College District. A Report of Study Results.

ED 210 052

Heuristics for Planning University Study at a Distance.

ED 209 992

Home-School Programs of Urban School Districts.

ED 210 358

How Well Do We Support Parents After the Death of a Child?

ED 209 582

Icons and Morphemes: Models of the Acquisition of Verb Agreement in ASL.

ED 209 934

Identification of Reading Instructional Practices Employed by Elementary Teachers.

ED 209 656

The Impact of Life Change Events on Women's Decisions To Return to College.

ED 209 496

The Impact of Televised Aggression on Children: A Developmental Field Study.

ED 209 690

Impact of the University of Virginia on Charlottesville and Albemarle County.

ED 209 965

Improving Committee Membership Skills of Women and Minority Business College Students.

ED 210 364

Influence of Background Experience and Interest on Instructional Level of Adult Beginning Readers.

ED 209 649

Information Needs and Uses Survey Report. State Dissemination Capacity Building Project, June 19, 1980-June 20, 1981.

ED 210 318

Informed Consent: Reality or Illusion?

ED 210 289

Integration, Inservice Education, and the Impact of Desegregation.

ED 210 327

Integration of the Profoundly Deaf and Severely Hearing Impaired in Ordinary Classes.

ED 209 859

Intercultural Relations in a School: A Pre-theoretical Study. Final Report.

ED 210 200

Internship Problems and the Academic Advisor's Role.

ED 209 695

Interpreting Congruent and Incongruent Verbal and Nonverbal Classroom Communication Cues.

ED 209 703

Investigating the Psychological Reality of Generic Characteristics of Short Stories.

ED 209 661

"Is That Any Way to Talk to Your Friend?": Mothers' Input and the Development of Role-Appropriate Discourse among Peers.

ED 209 938

Judged Similarity of Aptitude and Achievement Tests in Mathematics.

ED 210 273

Knowledge and Use of Agricultural Indexes and Abstracts by a University Agriculture Faculty.

ED 210 017

Language Variation and the Death of Language Teaching.

ED 209 918

## (143) Reports - Research

291

Learning Problems of Junior Level Children: A Nordic Joint Research Project (No. 2108).

ED 210 095

Linguistic Insights in Applied Linguistics. Collection d'"Etudes linguistiques," No. 14. Papers from the Neuchatel Colloquium in Applied Linguistics in collaboration with AIMAV, AILA, CILA, and the University of Neuchatel (2nd, May 25-26, 1973).

ED 209 911

The Logic of Citizen Participation in Public School Labor Relations.

ED 209 760

A Longitudinal Study of Career Maturity Attitudes in a Deaf Population.

ED 209 893

Long-Term Changes in Intelligence in Children at Risk.

ED 209 616

Low Elevated Lead Levels and Mental Retardation.

ED 209 838

Masculine and Feminine Personality Attributes of Dental Students and Attitudes Toward Women's Roles in Society.

ED 209 976

Materials Availability in Small Libraries: A Survey Handbook. Occasional Paper Number 149.

## Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education* (RIE). Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to its ED number and hence to its location in RIE.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index:

- |   |  |
|---|--|
| AA —ERIC Processing and Reference Facility  | JC —Junior Colleges                                      |
| CE —Adult, Career, and Vocational Education | PS —Elementary and Early Childhood Education             |
| CG —Counseling and Personnel Services       | RC —Rural Education and Small Schools                    |
| CS —Reading and Communication Skills        | SE —Science, Mathematics, and<br>Environmental Education |
| EA —Educational Management                  | SO —Social Studies/Social Science Education              |
| EC —Handicapped and Gifted Children         | SP —Teacher Education                                    |
| FL —Languages and Linguistics               | TM —Tests, Measurement, and Evaluation                   |
| HE —Higher Education                        | UD —Urban Education                                      |
| IR —Information Resources                   |  |

## NEW THESAURUS TERMS

All new terms and other *Thesaurus* changes previously listed here are now included in the new 1982 ERIC Thesaurus (9th Edition). The 1982 Edition reflects all changes to the *Thesaurus* file through November 1981, a total of more than 800 modifications. New terms and other changes to the *Thesaurus* made subsequent to the 1982 Edition will continue to be listed in this "New Thesaurus Terms" Section in future issues of RIE in order to bring them to the attention of users. Until that time, this space will carry information on the availability of the new edition.

Significant features of the new edition are:

- Sturdy cloth, reinforced binding, designed to stand up to the *Thesaurus*'s continual heavy use.
- Group codes in the Alphabetical Display, giving two-way access between the Alphabetical and Descriptor Group Displays.
- USE References in the Rotated Display, giving access via the component words of every term in the *Thesaurus*.

### ORDERING INFORMATION FOR THE 1982 THESAURUS

Title: *Thesaurus of ERIC Descriptors*, 9th Edition

Order From: The Oryx Press  
2214 North Central at Encanto  
Phoenix, AZ 85004

Price: \$25.00 (if paid with order)  
\$25.00 plus postage costs (if billing necessary)

## GENERAL INFORMATION

### 1. PRICE LIST

The prices set forth herein may be changed without notice; however, any price change will be subject to the approval of the National Institute of Education Contracting Officer.

### 2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMIC.

### 3. REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

### 4. CONTINGENCIES

CMIC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure of delay (a) is due to events beyond the control of CMIC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performance of subcontractors beyond CMIC's control and without negligence on the part of CMIC; or (c) is due to erroneous or incomplete information furnished by Customer.

### 5. LIABILITY

CMIC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMIC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

### 6. WARRANTY

CMIC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

### 7. QUALITY

CMIC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMIC. Best available copy will be supplied.

### 8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMIC.

### 9. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with CMIC to pay any invoice when due or to accept any shipment as ordered, CMIC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of CMIC in exercising any right hereunder shall waive any rights of CMIC or modify this Agreement.

### 10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

### 11. DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$200.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

### 12. STANDING ORDER ACCOUNTS

Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of *Resources in Education* may do so by depositing \$2000.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

### 13. PAPER COPY (PC)

A paper copy (PC) is xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

### 14. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the international Postal Rates in effect at the time the order is shipped. To determine postage allow 75 microfiche or 75 (PC) pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

## OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

### STANDING ORDERS

Subscription orders of microfiche copies of all ERIC reports announced in each issue of *Resources in Education* average \$160.00 per month.

ANNOUNCES . . .

# Information Analysis Products Mini-Files

This announcement describes briefly the 1975-1977, 1978, 1979 and 1980 Information Analysis Products Mini-Files, the contents of which are produced by the 16 ERIC clearinghouses.

ERIC, an acronym for Educational Resources Information Center, is operated by the National Institute of Education as a service to educators throughout the world. The ERIC clearinghouses are located at universities or professional organizations, with each clearinghouse specializing in a specific field of education. Through the clearinghouses, information is acquired, selected, indexed, abstracted, and announced in ERIC's abstract journals.

In addition to collecting the literature of education, the ERIC clearinghouses meet the informational needs of ERIC users by analyzing and synthesizing information into research reviews, bibliographies, state-of-the-art reports, and interpretive studies of topics of high current interest.

Each Information Analysis Product is put into the ERIC database and is available from EDRS. Sponsored by the National Institute of Education, EDRS has collected all such products published

since 1975 and has compiled them into individual Mini-Files. The four Mini-Files contain the full text of approximately 1000 Information Analysis Products.

Cited below are typical titles on topics of current interest:

- Online Training and Practice for ERIC Data Base Searchers
- Recycling Activities for the Classroom
- Alternative Tuition Systems
- Assertiveness Training
- Children and Television
- Interpreting the Results of Research on Teaching
- Counseling Exceptional People
- Information on Social Gerontology

The prices, per file, include U.S. postage and handling.

# ERIC TAPES ERIC TOOLS

## HAVE A COMPUTER? LOOK AT ERIC TAPES!

The Educational Resources Information Center (ERIC) data base is available on magnetic tape in a variety of options from ORI, Inc. Under special authorization from the National Institute of Education, U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC data base provides coverage of the significant literature in the field of educational resources. Report literature (announced in *Resources in Education*) is covered from 1966 to date, and journal article literature (announced in *Current Index to Journals in Education*) is covered from 1969. Monthly, quarterly, and annual updates are available for both *RIE* and *CJIE*, so that the files may be kept current.

The basic files are available in the ERIC (IBM 360 OS) Format. These files include the complete resume, (document description, indexing, and abstract or annotation) of each document announced in the respective journal, in accession number order. A variety of peripheral files, including

Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and almost any segment of the master files is obtainable on Special Order.

The files may be purchased individually or as a collection, and substantial discounts are available on annual subscriptions for updates. The files are written on new, high-quality, 9-track tapes (600-1200, or 2400-ft., as appropriate) at either 1600 or 800 BPI and are guaranteed. Prices per tape reel start as low as \$50.

## NO COMPUTER? LOOK AT ERIC TOOLS!

For organizations without access to a computer,\* ERIC TOOLS provide manual multi-viewpoint access to the ERIC document collection. ERIC TOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The *Title Index* provides access by document title. The *Source Directory* provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

The documents are available individually and on annual subscription at a discounted price. Prices start from as low as \$10 for some individual documents.

\*Many of these documents are also valuable tools for computer searches.

For additional information, complete and mail the reply form or call: **ERIC TAPES/ERIC TOOLS (301) 656-9723**  
ORI, Inc., 4833 Rugby Avenue, Suite 303, Bethesda, Maryland 20814

**II. REPRODUCTION RELEASE**

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche and paper copy (or microfiche only) and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce the identified document, please CHECK ONE of the options and sign the release below.

**CHECK

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce this document as indicated above. Reproduction from the ERIC microfiche by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction of microfiche by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."

**III. DOCUMENT AVAILABILITY INFORMATION (Non-ERIC Source)**

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents which cannot be made available through EDRS.)

## ERIC Network Components

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in *Resources in Education (RIE)*. They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for *RIE*; these information analysis products are also announced in *Resources in Education*.

### ERIC Clearinghouses:

#### ADULT, CAREER, AND VOCATIONAL EDUCATION (CE)

Ohio State University  
1960 Kenny Rd.  
Columbus, Ohio 43210
